INTRODUCTION

The survey series

This report describes the design, administration and data format of the 1997 *British Social Attitudes* (BSA) survey. The BSA survey is the thirteenth in a series started by the *National Centre for Social Research* (then called SCPR) in 1983 and core-funded by the Gatsby Charitable Foundation, one of the Sainsbury Family Charitable Trusts. The series is designed to chart continuity and change across a wide range of social attitudes - for instance, towards politics, the economy, the workplace, education, health and the environment. For an overview of some of the trends between 1983 and 1994, see McKie and Brook (1996). The series is similar to, and indeed was inspired by, the *General Social Survey* carried out since 1972 by the National Opinion Research Center (NORC) in the United States. The data derive from annual cross-sectional surveys of representative samples of adults aged 18 or over living in private households in Britain. Following a successful experiment carried out in 1993 (Lynn and Purdon, 1994), the main questionnaires are now administered by interviewers using lap-top computers (and Blaise software), rather than by the traditional pen and paper method.

Surveys in the *British Social Attitudes* series have been carried out annually between 1983 and 1997, except in 1988 and 1992. In these two years, with the agreement of the Gatsby Charitable Foundation, the BSA core-funds were deployed towards conducting the 1987 and 1992 surveys in the long-standing *British Election Study* (BES) series, but in addition a smaller *British Social Attitudes* Survey, financed from other sources, was also conducted. These, like the 1983 post-election study, were the responsibility of the National Centre and Nuffield College, Oxford. (The results of the 1987 and 1992 post-election surveys were published in 1991 and 1994 respectively (Heath et al., 1991; and Heath et al., 1994)). The core-funding for 1997 was deployed in the same way, to support the BES 1997 post-election study, so the 1997 BSA survey was funded from other sources. The 1997 survey is therefore unusual in that it took place in an election year in addition to the *British Election Study* and this explains the relative shortness of the survey compared with other years.

*British Social Attitudes* has been designed to be fielded as a series of surveys, to allow the monitoring and understanding of trends in attitudes, and to examine the relative rates at which different sorts of attitude change. Not all questions or groups of questions (modules) are included in each fieldwork round. The modules repeated every year tend to be on subjects where fairly rapid change in attitude might be expected, and for which an annual trend line is therefore likely to be helpful. Variables such as demographic characteristics or party identification, which are needed for interpreting other answers, are also included each time. In any event, constraints of space (we confine ourselves to an average of an hour-long interview each year), the need for economy and our wish to introduce new modules into the questionnaire, all combine to limit the frequency with which each group of questions can be carried. All questions are, however, scheduled for repetition - some each year, some at regular intervals and others less frequently.
Inevitably perhaps, a few questions do not seem to work very well, despite contrary indications at the pilot stage. Many survey series face this difficulty, and its resolution is by no means straightforward. To change or remove unsatisfactory questions would sacrifice comparability over time; to retain them would run the risk of producing and reproducing misleading information. Neither practice is desirable but one or the other is unavoidable. And, of course, the vocabulary changes over the years and our questions have inevitably to change to reflect this.

Each year the latest available dataset is deposited at the Data Archive at the University of Essex. This enables anyone in the academic community to do analytic or interpretative work of their own, or to use the datasets for teaching purposes. The Archive will provide details about online access. The survey data may be of interest substantively (either as sets of cross-sectional samples or as a series recording change over time), or methodologically (for instance, comparing different ways of asking questions, or the development of scale items). Until 1991, the SPSS-X set-up files were deposited together with the ASCII file. Since 1993, SPSS-X export-files have been deposited instead. The export-files are backed up by the SPSS-X programming files. Further information about the accessibility of the full dataset can be provided by BSA researchers at the National Centre.

Developments and offshoots

Users may like to take note of other developments in the British Social Attitudes series, some of which might affect the analyses they intend to carry out.

1. Seven surveys in the Northern Ireland Social Attitudes (NISA) series were carried out between 1989 and 1996 (as with BSA there was no survey in 1992). Between 1989 and 1991 it was funded by the Nuffield Foundation and the Central Community Relations Unit in Belfast, and between 1993 and 1996 by all the government departments in Northern Ireland. Until 1993, around 900 adults have been interviewed there each spring by the Central Survey Unit of the (then) Policy Planning and Research Unit (PPRU)\(^2\). In 1994 and 1995, the sample size was increased to around 1,500, and two versions of the questionnaire were fielded, but in 1996 the target achieved sample was reduced to 900 adults. The questionnaires contained all of the ‘core’ questions asked each year on BSA, and several of the special modules fielded in Britain in that year\(^3\). In addition, modules covering issues of particular concern to the province were included (for example, community relations and attitudes towards the security forces); where appropriate, some of these questions were also asked in Britain. The annual datasets are, of course, independent and cannot simply be added together to provide UK data. But they do allow data-users to make comparisons on a range of issues between the attitudes of UK citizens on either side of the Irish Sea. These datasets are also made available via the Data Archive. Books presenting the findings of the latest survey and looking at trends over time have been published annually\(^4\). 1996 was, however, the last NISA survey as, appropriately perhaps, the two surveys have now parted company. Colleagues at Queen’s University and the University of

---

1 The main changes in question wording, filter and interviewer instructions and so on made between 1984 and 1989 are noted in the Cumulative Sourcebook (see below). This is currently being updated and will shortly be available in the format of an electronic database.

2 Now the Northern Ireland Statistics and Research Agency (NISRA).

3 The exception is a module on home carers, fielded on the NISA survey only in 1994.

4 Some of the findings have also been reported in The 7th, 8th, 9th and 13th British Social Attitudes Reports. See also Stringer and Robinson (1991, 1992 and 1993); Breen, Devine and Robinson (1995); Breen, Devine and Dowds (1996); Dowds, Devine and Breen (1997); Robinson et al. (1998).
Ulster have succeeded in raising new local funding and, against the background of the new political arrangements in Northern Ireland, we have all agreed that the new *Northern Ireland Life and Times Survey* would be better served by cutting its formal links with its British counterpart. The two teams will, of course, continue to co-operate closely and intend to carry many questions in common each year for purposes of comparison.

2. Since 1985, a module of questions included in each year's *British Social Attitudes* survey has allowed users of the British datasets to make cross-national comparisons. This initiative began in 1984 when the Nuffield Foundation funded the *National Centre* to convene a series of meetings with research organisations abroad which were also carrying out regular national surveys of social attitudes. From these meetings, a group called the *International Social Survey Programme (ISSP)* has evolved. Each member undertakes to field annually an agreed module of questions on a sample survey which conforms to ISSP working principles. Each module is designed for replication at intervals, to allow comparisons both between countries and over time. The following 32 nations currently (in 1998/99) take part:

- Australia, Austria, Bangladesh, Bulgaria, Canada, Chile, Cyprus, Czech Republic, Denmark, France, Germany, Great Britain, Hungary, Ireland, Israel, Italy, Japan, Latvia, Netherlands, New Zealand, Norway, Philippines, Poland, Portugal, Republic of Ireland, Russia, Slovak Republic, Slovenia, Spain, South Africa, Sweden, USA.

Each year from 1989 to 1996 (except 1992) the ISSP modules were also fielded on the *Northern Ireland Social Attitudes* survey.

The ZentralArchiv at the University of Köln acts as archivist to the ISSP and has produced (on CD-Rom) combined datasets for each of the first seven modules fielded between 1985 and 1995, and accompanying codebooks. Modules fielded or planned are:

</tbody>
</table>

In 1997, the Work Orientations module was carried on the self-completion questionnaire (Qs. 1 to 34).

Contact names and addresses for each of the current ISSP member countries are given in Appendix K.

3. In a further cross-national venture, the National Centre collaborated with social research institutes in four other EU countries (Germany, the Irish Republic, Italy and the Netherlands) to extend the 1993 ISSP questionnaire module on environmental issues (see Witherspoon and Mohler, 1995). This consortium (COMPASS) has been funded by the European Union. Further joint ventures are planned.

4. A further offshoot, conceived and designed in collaboration with Barnardos, is the 1994 *Young People's Social Attitudes* survey. Around 600 twelve to nineteen year olds who lived in the households of BSA respondents were interviewed (for technical details of the survey, see Lilley et al., 1997 and Park, 1996). About half of the questions asked of the teenagers were identical to those asked of adults, allowing comparisons not only across generations but also between parents and children in the same household. The substantive report on the findings was published by Barnardos (Roberts and Sachdev, 1996). The study has been repeated on the 1998 *British Social Attitudes* survey as a multi-funded project, independent of Barnados.

5. In 1989, the National Centre and Nuffield College, Oxford set up the Joint Unit for the Study of Social Trends (JUSSST) which was awarded the status of an ESRC Research Centre in 1992. In 1994, JUSSST received funding for a further five years, upon which it changed its name to CREST (Centre for Research into Elections and Social Trends). Under its new name, CREST launched a panel study to investigate how, when and why people's attitudes, perceptions, political allegiances and voting behaviour change between general elections. Respondents who were first interviewed as part of the 1992 BES post-election survey were followed up at regular intervals (sometimes by face-to-face interviews, sometimes by telephone), with the final round taking place just after the May 1997 general election. After that they were replaced by a new panel, first interviewed as part of the 1997 BES post-election survey. A further three years' funding from the ESRC has extended the life of CREST (and of the panel survey) until the year 2002. These surveys feed off BSA and *vice versa*, providing a rich source of data about changing social and political attitudes and behaviour in Britain during the last decade of this century. Indeed, the 1996 *British Social Attitudes* survey also served as the first round of a *British General Election Study* Campaign Panel. CREST also carries out methodological research via the BSA and BES series in order to develop new and better tools for attitude measurement (for a summary with full references, see Curtice, 1996).

6. In November 1995, CREST held the first in a series of annual conferences, the topic in 1995 being 'A decade of change in social attitudes'. Many of the talks drew extensively on BSA data. The conference gave rise to a book of papers about the measurement of attitude change (Taylor and Thomson, 1996). The 1998 Conference held in Cardiff on the topic of 'Scotland and Wales: Nations Again', drew on the findings of the Scottish and Welsh
referendum studies carried out by CREST in 1997, and has also acted as the basis of a book (Taylor and Thomson, 1999).

7. In November 1991, the British Social Attitudes Cumulative Sourcebook (part-funded by Shell UK Ltd.) was published (by Gower), both as a companion volume to the series of annual Reports and as a comprehensive codebook for users of the dataset. The Sourcebook brought together responses to all the questions asked in the series between 1983 and 1989 (with all variations noted), together with year-by-year distributions of answers (numbers and percentages), and each variable’s SPSS name. As noted above, it is currently being updated, in collaboration with the Centre for Comparative European Survey Data (at Guildhall University). It will be issued on CD-ROM, and will contain the complete texts of the BSA questionnaires and the distributions of responses across the years. The database will be searchable both by hierarchical topic and key words.

8. Thanks to funding from the ESRC (under Grant Number R 000 233 230) the Sourcebook has now been complemented by a ‘Combined Dataset’, also deposited at the Data Archive. This provides in one computer file the data for all eight BSA surveys carried out between 1983 and 1991. A parallel dataset for Northern Ireland, containing data from the 1989, 1990 and 1991 NISA surveys, is also available.

9. Between 1984 and 1986 the ESRC funded the introduction of a panel element into the series, enabling us to re-interview respondents to the 1983 survey in the three following years. In this way it was possible to examine individual attitude change, not simply aggregate change, and to assess the possible effects of attrition and conditioning in the panel (see Lievesley and Waterton, 1985). The data for all four panel surveys are lodged at the Data Archive, together with copies of the Technical Report (McGrath and Waterton, 1986).

Arrangement of the report

Part I of this report describes technical aspects of the 1997 British Social Attitudes survey. Appendices A-K contain full technical details of the surveys, copies of the survey documents (including an annotated paper version of the CAPI questionnaire) and further information for users of the datasets.
I   BRITISH SOCIAL ATTITUDES

1.   THE 1997 SURVEY

1.1   Structure and funding

In common with previous British Social Attitudes surveys, the 1997 survey had two components. The main one was a questionnaire administered by interviewers using lap-top computers to key in the responses, and lasting on average about an hour. The second was a self-completion supplement for respondents to fill in after the interview. The supplement was either collected by the interviewer or posted by the respondent to the National Centre’s Field Office. The questionnaires appear in Appendix D of this report (the main questionnaire in the form of an annotated documentation of the Blaise program used to compile it). Some open ended questions were included in the politics module; the booklet used by interviewers to record respondents’ answers and a documentation of the open ended datafile can be found in Appendix E.

In the first three years of the survey series, 1,700-1,800 people were interviewed annually. Between 1986 and 1993, the target achieved sample size was increased to around 3,000, with two different versions of both the main and the self-completion questionnaire fielded. Since 1994, the target achieved sample has been further increased to 3,600, certain modules and ‘core’ questions (including all the classificatory items) being asked of all respondents, and the remainder being asked of a (random) third or two-thirds of the sample. The 1997 survey differed significantly in that the target achieved sample size was 1500 and only one version of the main and the self-completion questionnaire was fielded. Full details of the 1997 sample are given in Section 2 below.

Each year the National Centre produces a book which reports on and interprets some of the main BSA survey findings. The chapter titles of the fourteen Reports published between 1984 and 1997 are reproduced in Appendix J. Potential users of the data may wish to consult this to see whether topic areas relating to their field of interest have been covered in any of the Reports.

The steadfast support of the core-funder, the Gatsby Charitable Foundation, has guaranteed the continuation of the survey into the next millennium. However the series needs, and has been fortunate enough to receive, substantial additional financial support from a variety of sources. Over the years we have received support from a number of Government departments. The Department of Employment (now the Department for Education and Employment) has supported the series since 1984, enabling us to include more questions on education, training and the labour market than would otherwise have been the case. The Department of the Environment (now the Department of Environment, Transport and the Regions) has been a regular supporter of the series since 1985, and provided funding for a set of questions on attitudes to housing, fielded in 1996. The Countryside Commission has in most years between 1985 and 1997 provided financial support for us to include questions designed to monitor ‘green’ issues. The Departments of Health, Social Security and Transport and the Home Office have more recently provided financial support to enable us both to continue fielding questions first asked in 1983, and to rejuvenate the series with new ones.
The Nuffield Foundation also provided welcome funding from the series’ earliest days, providing the ‘seed-funding’ which helped launch BSA in 1983, and helped the ISSP get off the ground in 1984-85. Between 1989 and 1991 the Foundation provided a valuable ‘independent’ element of seed-funding for the *Northern Ireland Social Attitudes* survey series.

The Economic and Social Research Council, also contributed seed-funding for *British Social Attitudes* and funded the panel study in 1983-6, and has continued to support the survey series. The ESRC also supports the series - and in particular the *National Centre’s* membership of ISSP - through its grant (Grant Number M 543 285 001) to the Centre for Research into Elections and Social Trends (CREST).

Funding for the 1997 survey was slightly unusual in that, as in previous election years, core funding was transferred to the British Election Study, indeed it had originally been planned not to conduct a BSA 1997, however we were able to field a smaller one version of the study with financial support from:

- Gatsby Charitable Foundation, via an extra grant to fund questions on the European Union
- Department of the Environment
- Department of Transport
- Charities Aid Foundation
- Countryside Commission
- ESRC, via its support for ISSP and its grant to CREST

### 1.2 Topic areas covered in the series 1983-1998

Each year the interview questionnaire contains a number of ‘core questions’. These cover major topic areas such as the economy, labour market participation and the welfare state. The majority of these questions are repeated in most years, if not every year. In addition, a wide range of demographic and other classificatory questions is always included. The remainder of the questionnaire is devoted to a series of questions (modules) on specific issues - such as on gender issues and sexual relations - which are intended for repetition at longer intervals. The chart overleaf provides a guide to the topic areas covered in the twelve surveys carried out up to and including 1996, and - as a foretaste of things to come - to the two carried out since then.6

The chapters in the annual *Report* (see Appendix J) to some extent mirror the contents of the previous year’s questionnaire. However the *Reports* can, of course, present and interpret only a small fraction of the findings. Nevertheless, they may be a useful starting point for potential users of the data.

---

6 The 1997 survey was core-funded by the ESRC and only one version of the questionnaire was fielded.

W - fielded as a 'stand-alone' postal questionnaire in 1992
2. THE SAMPLE

2.1 Sample design

The 1997 survey was designed to yield a representative sample of adults aged 18 or over living in Great Britain. Since 1993, the sampling frame used has been the Postcode Address File (PAF), a list of addresses (or postal delivery points) compiled by the Post Office. For practical reasons, the sample is confined to those living in private households. People living in institutions (though not in private households at such institutions) are excluded, as are households whose addresses were not on the Postcode Address File.

For practical reasons, the sample was confined to those living in private households. People living in institutions (though not in private households at such institutions) were excluded, as are households whose addresses were not on the PAF. Postcodes of areas north of the Caledonian Canal were excluded: their geographically scattered inhabitants are prohibitively costly to interview.

The sampling method involved a multi-stage design, consisting of two stages of selection.

First, postal sectors were stratified prior to selection: any postal sector with less than 500 delivery points (DPs) was grouped with an adjacent sector which together were then treated as one.

The list of postal sectors was sorted into 11 standard regions (treating London and the South East as two separate regions). Within each region, sectors were listed in ascending order of population density. Cut-off points were then drawn at one third and two thirds down the ordered list of DPs so that, within each region, three roughly equal-sized bands were created. Within each of the 33 bands, sectors were listed in order of percentage of owner-occupier households.

Selection of sectors

Eighty-three sectors were selected systematically with probability proportional to DP count in England, Scotland and Wales.

Selection of addresses

Thirty addresses were selected from each sector. The PAF sample was therefore \( 83 \times 30 = 2,490 \) addresses.

The addresses in each sector were selected by starting from a random point on the list of addresses, and choosing each address at a fixed interval.

---

Before 1993 the BSA sample had been drawn from the Electoral Register (ER). For a detailed discussion of the advantages and disadvantages of the ER and PAF as sampling frames, see Lynn and Taylor (1994) and Lynn and Lievesley (1991).
The Multiple-Output Indicator (MOI), available through the PAF, was used when selecting addresses. It shows the number of accommodation spaces (or ‘dwelling units’) sharing one address. Thus, if the MOI indicates more than one dwelling unit at a given address, the chances of a given address being selected from the list of addresses would increase so that it matched the total number of dwelling units. As would be expected, the vast majority (97 per cent) of MOIs had a value of one. The remainder, which ranged between two and twelve, were incorporated into the weighting procedures (described below).

Selection of individuals

Interviewers called at each address selected from the PAF, and listed all those eligible for inclusion in the sample - that is, all persons aged 18 or over and currently resident at the selected address.

The interviewer then selected one respondent at random, using a computer-generated ‘Kish grid’. Where there were two or more households or dwelling units at the selected address, interviewers first had to select one household or dwelling unit, again using a ‘Kish grid’; they then followed the same procedure to select a person for interview. These procedures are set out in the Address Record Form (ARF) which is attached in Appendix C.
3. WEIGHTING

The weights applied reflected the relative selection probabilities of the individual at the three main stages of selection: address, household and individual.

First, because addresses were selected using the Multiple Output Indicator (MOI), weights had to be applied to compensate for the greater probability of an address with an MOI of more than one being selected, compared to an address with an MOI of one. Secondly, data were weighted to compensate for the fact that dwelling units at an address which contained a large number of dwelling units were less likely to be selected for inclusion in the survey than ones which did not share an address. The reason we use this procedure is that in most cases these two stages will cancel each other out, resulting in more efficient weights. Thirdly, data were weighted to compensate for the lower selection probabilities of adults living in large households compared with those living in small households.

The weighted sample was scaled down to make the number of weighted productive cases exactly equal to the number of unweighted productive cases \( n = 1,355 \).

All the scaled weights fell within a range between 0.18 and 6.53. In only two cases was the weight greater than 4.0. The average weight applied was 1.00. The distribution of weights for respondents aged 18 or above is shown below:

</tbody>
</table>
Using the weights

The weight for each record has been computed and included in the SPSS system file. The relevant SPSS derived variable is \textit{WtFactor}. Users \textit{must} weight the data before analysis.
4. DATA COLLECTION AND RESPONSE

4.1 Piloting

One small-scale pilot to test new questions were carried out in December 1996. Respondents were selected by quota sampling methods to include men and women in manual and non-manual jobs across a range of ages. In all, 39 interviews were achieved, all by traditional (pen and paper) methods. All interviewers were personally debriefed by the members of the research team.

4.2 Main stage fieldwork

Interviewing began at the end of January 1997 and was carried out mainly during February and March, with a small number of interviews (predominantly at 'reissued' addresses) taking place in April and May.

Fieldwork was conducted by 83 interviewers drawn from the National Centre’s regular panel. Interviewers were briefed in two ways. If they had not worked on the BSA 1996 or 1995 surveys they were personally briefed at a one-day conference, conducted by the researcher, to familiarise them with the selection procedures and the questionnaire (27 interviewers were briefed in this way). The remaining 56 interviewers had worked on the previous two surveys and were therefore sent self-briefing documents. All interviewers had earlier attended two training days on computer-assisted personal interviewing (CAPI) to familiarise them with the Blaise software. The average interview length was 54 minutes.

The total final response achieved is shown below:

<table>
<thead>
<tr>
<th>Total</th>
<th>No</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Addresses issued</td>
<td>2,490</td>
<td></td>
</tr>
<tr>
<td>Vacant, derelict, other out of scope</td>
<td>318</td>
<td>100.0</td>
</tr>
<tr>
<td>In scope</td>
<td>2,172</td>
<td>62.3</td>
</tr>
<tr>
<td>Interview achieved</td>
<td>1,355</td>
<td></td>
</tr>
<tr>
<td>Interview not achieved</td>
<td>817</td>
<td>37.6</td>
</tr>
<tr>
<td>Refused(^8)</td>
<td>617</td>
<td>28.4</td>
</tr>
<tr>
<td>Not contacted(^9)</td>
<td>89</td>
<td>4.1</td>
</tr>
<tr>
<td>Other non-response</td>
<td>111</td>
<td>5.1</td>
</tr>
</tbody>
</table>

\(^8\) ‘Refusals’ comprise refusals before selection of an individual at the address, refusals to the office, refusal by the selected person, ‘proxy’ refusals (on the selected person’s behalf) and broken appointments after which the selected person could not be re-contacted.

\(^9\) ‘Non contacts’ comprise households where no-one was contacted, and those where the selected person could not be contacted (never found at home).
Detailed statements of response by Standard Statistical Region, are included in Appendix B.

4.3 Self-completion questionnaire

As in earlier rounds of the series, respondents were asked to fill in a self-completion questionnaire which was, whenever possible, collected by the interviewer. Otherwise the respondent was asked to post it to the National Centre. If necessary, one, two or three postal reminders were sent to obtain the self-completion supplement. The second reminder was accompanied by a further copy of the appropriate version of the questionnaire. In addition, interviewers who had notified the office that they themselves were to collect the self-completion questionnaire were (when necessary) sent letters reminding them to do so. Copies of the reminder letters are included in Appendix I.

A total of 275 respondents (20 percent of those interviewed) did not return their self-completion questionnaire. The self-completion questionnaire was returned by 80 percent of respondents to the face-to-face interview. As in previous rounds, we judged that it was not necessary to apply additional weights to correct for non-response.

There is a derived variable: SelfComp which identifies those not returning a self-completion questionnaire (code 51) and those returning one (code 61).

4.4 Advance letter

An advance letter was sent to ‘the resident’ at all selected households. It briefly described the purpose of the survey and the coverage of the questionnaire, and asked for cooperation when the interviewer called. Although earlier experiments have shown that the effect of the advance letter on overall response is apparently negligible (for more details, see Brook, Prior, and Taylor, 1992), most interviewers report that it helps when they first call at an address. The majority of respondents appreciate them too.
5. DATA PREPARATION AND ANALYSIS VARIABLES

5.1 Data preparation

As CAPI data containing the face-to-face interviews and the paper self-completion questionnaires were returned to the office, they were booked in (that is, checked against the issued sample) and then sent for their first edit. The editing and coding supervisor worked closely with the team members and the CAPI programmer.

The interview questionnaires were edited by computer, and the self-completion questionnaires manually. The coding team examined each questionnaire on screen, and at this stage they coded respondents’ occupations, and prepared listings to selected questions. From these listings, code frames were agreed by members of the research team, and were then incorporated into the edit and coding process (see Appendix F).

Following the first edit, the self-completion questionnaires were sent for keying which was 100 per cent verified. The self-completion questionnaires were then merged with the CAPI questionnaires so that the next editing stage could be done in CADI (Computer-Assisted Data Input) again using Blaise software.

The second edit included a full set of range and filter checks. Error reports were of two kinds: a summary of errors by type and a listing of individual errors. Some classes of error were resolved by the application of logical rules, the remainder by individual amendments made by reference to the questionnaires. After correction, the records were submitted to a further edit, and the edit process continued until all records ‘passed’.

In the final edit, all computer-generated and manual checks were verified.

In general, code 8 (or 98, 998 or 9998, depending on the range of the column field) is used for ‘don’t know’ (DK) responses. Code 9 (or 99, 999 or 9999) is used to indicate no answer. There are two kinds of non-response: either the respondent refuses to answer the question, or the question is not asked by mistake. Such mistakes are of course, rare in CAPI questionnaires because interviewers must enter a code at each question so they can continue. But they can still happen, for example in partially-completed interviews.

Final listings of ‘other’ answers to all other questions were compiled, and can be supplied by the National Centre. Code frames used for open-ended questions and for ‘other answers’, and coding instructions for selected pre-coded questions, are in Appendix F.

5.2 Main analysis variables

The BSA datasets contain a large number of background demographic and other classificatory variables. Most of the information was collected about the respondent only, but some (mainly occupational details) were also collected for the respondent’s spouse or partner, if he or she was married or living as married. In this section, most of the main analysis variables and their SPSS variable names are listed, together with guidance as to how they have been grouped. Party political identification is covered in Section 5.3,
occupation in Section 5.4, socio-economic group and social class in Section 5.5, industry in Section 5.6 and attitude scales in Section 5.7.

All the derived variables are listed in Appendix H.

**Gender and age**

Gender and exact age are recorded for the respondent and for all members of his or her household. The variables are $R\text{Sex, } R\text{Age}; P\text{2Sex, } P\text{2Age}$, etc. Two further variables have been derived for the respondent only:

\[
\text{Age (7 age-bands) within gender - } R\text{SexAge}
\]

\[
\text{Age (7 age-bands) - } R\text{AgeCat}
\]

**Marital status**

As is the case for many variables, a priority coding system operates for marital status ($\text{MarStat2}$). For example, ‘divorced’ has priority over ‘widowed’. The format of the marital status question was changed in 1996. In order to provide comparability with earlier years the following variable has been derived:

\[
\text{Marital status - } \text{Marstat}.
\]

A further variable has been derived, combining ‘married’ and ‘living as married’:

\[
\text{Marital status (summary) - } \text{Married}
\]

**Geographical/regional indicators**

Standard Statistical Regions have been used, with Greater London shown, as is customary, separate from the remainder of the South East. There is also a summary version:

\[
\text{Standard Region - } \text{StRegion}
\]

\[
\text{Standard Region (compressed into 6 categories) - } \text{Region}
\]
In addition, the following geographical variables supplied with the sample (not asked of respondents) are included in the 1997 dataset:

**Postcode sector - Sector**

**Population density - PopDen** is supplied with the PAF sample; a derived variable PopBand divides PopDen into quartiles

**District council - LAD** as supplied with the PAF sample

Great care must be taken with regional analyses: the sample in several regions is small and heavily clustered and so could be subject to large sampling errors. For most purposes, it is advisable to group regions to form broader categories for analysis, or to combine two or more years' data.10

**Education**

Respondents are asked for the age when they completed their continuous full-time education. This variable is TEA2 (terminal education age). The format of the question was changed in 1996. In order to provide comparability with earlier years, the following variable has been derived:

**Terminal Education Age (banded) - TEA.**

Respondents are also asked about examinations passed, and any academic or vocational qualifications obtained. Variable names are *SchQual, PSchQual, and EdQual1* - *EdQual2*. There is also a derived variable:

**Highest educational qualification obtained (7 categories) - HEdQual**

**Accommodation**

There are several variables relating to accommodation. We ask the respondent whether he or she has legal responsibility for the accommodation (LegalRes).

The interviewer also checks and codes the type of accommodation occupied by the respondent (HomeType); asks whether or not the respondent lives on a housing estate (HomeEst); and asks about tenure type (Tenure5). The format of this last question was changed in 1996. In order to provide compatibility with earlier years, the following variable has been derived:

**Accommodation tenure - Tenure1**

---

There is also a summary derived variable:

Accommodation tenure (summary) - Tenure2

with five categories (plus 'no information').

Religious affiliation, attendance and belief

Respondents are asked which religion, if any, they belong to (Religion); which religion, if any, they were brought up in (FamRelig); and how often they attend services or meetings connected with their religion (ChAttend). In addition, two summary variables are routinely derived:

Respondent's religion (summary) - ReligSum

Religion respondent brought up in (summary) - RifamSum

both of six categories.

Ethnic origin

Respondents are shown a card and asked to which of twelve ethnic groups they considered they belong:

Respondent's ethnic origin - RaceOri2

Income

Towards the end of the classification section, interviewers show respondents a card listing 16 income bands, and ask them to read out the letter corresponding to their gross household income (HhIncome); and (if they are currently in paid work) their gross earnings (REarn). The income card used in 1996 is reproduced in Appendix D (it is periodically adjusted to take account of inflation). Respondents were also asked for their (and their partner’s) main source of income (MainInc).

Economic position

Respondents are shown a card and asked which description applied to what they were doing in the previous seven days (REconAct). A priority coding system operates. The response to this question determines which parts of the rest of the labour market module (e.g. for employees, the self-employed, unemployed people) respondents are asked. The card is reproduced in Appendix D. The economic position of the respondent’s spouse or partner (SEconAct) is also coded.
There are also variables incorporating responses to questions on full- or part-time work (RPartFul for respondents and SPartFul for spouses/partners); and on whether the respondent/spouse is or was an employee or self-employed in their current or last job (REmp@yee for respondents and SEmp@yee for spouses/partners). Two further variables have been derived:

- **Current economic position (12 categories)** - REconPos for respondents
- **SEconPos for spouses/partners**

The conventions used here for classifying those in paid work differ from those in the Census. In the *British Social Attitudes* surveys, a lower limit to the number of hours worked per week is specified as 10. The census has no such limit.

**Other background variables**

These include:

- **Daily morning newspaper readership** - ReadPap, WhPaper.

- **Trade union or staff association membership**: current - UnionSA and whether there are recognised unions at the respondent’s workplace - WpUnions (asked only of employees).

- **Anyone in the respondent’s household with regular use of a car or van** - which was derived from TransCar. The number of cars owned - NumbCars; whether any vehicle is provided by an employer or run as a business expense - CompCar; modes of travel nowadays - Travel 1-4,6 & 9 were also asked.

- **Current receipt (by respondent and/or partner) of means-tested state benefits** - AnyBn2; BenefOAP - BenefOth. Note that these replace the questions asked up until 1991 which referred to benefits received within the previous five years.

### 5.3 Party political identification

Respondents were classified as identified with a particular political party on one of three counts: if they considered themselves supporters of the Party, or as closer to it than to others, or as more likely to support it in the event of a general election. These three groups are described respectively as partisans, sympathisers and residual identifiers. The derived variable is:

- **Party political identification** - PtyAlleg

The three groups combined are referred to as identifiers-(PartyId1). There is also a derived variable:

- **Party political identification (compressed)** PartyId2
Respondents who indicated no party preference were classified as *non-aligned*.

### 5.4 Occupation

Until 1990, the occupation coding scheme used for all *British Social Attitudes* surveys was based on the *Classification of Occupations 1980* (CO80) as used for the 1981 Census. Two elements, Occupation Code and Employment Status, were coded. This enabled Socio-economic Group (SEG) and Registrar General’s Social Class to be derived by reference to a look-up table, and added to the dataset. In addition, the Goldthorpe/Heath (revised Goldthorpe) class schema was also derived from a look-up table.

In 1991, OPCS (now the ONS) introduced a new occupation coding schema, the *Standard Occupational Classification* (SOC), and the new schema has been used on BSA since then. The rationale for the new schema is explained in OPCS (1991a, 1991b). Social Class and SEG were re-based on SOC according to the principle of ‘maximum continuity’; that is, the number of jobs (and hence persons) allocated to the same Social Class or SEG category as when they were based on CO80 was maximised. In practice, OPCS has established that overall, 2.3 per cent of jobs were assigned to a different Social Class due to re-basing on SOC, and 2.0 per cent of jobs to a different Socio-economic Group (see OPCS, 1991b). The net redistribution of cases due to re-basing on SOC is therefore small, but since most of the change is concentrated in particular categories, the impact of change on those categories can be substantial (see OPCS, 1991b, p.15).

“Occupations are viewed in SOC as coherent sets of work activities carried on by individuals. In defining occupational groups, the aim has been to distinguish as far as possible in terms of the type and level of skills required to carry out the main work activities” (SOC, vol.3, p.2). The classification system comprises 371 Occupational Unit Groups (OUGs), the most detailed categories into which job titles and activities are coded. This 3-digit code for occupation is keyed for both the respondent (RSOC), and for the respondent’s spouse or partner (SSOC) where there is a spouse or partner in the household.

Occupational Unit Groups have been aggregated as derived variables as follows:

- **SOC Minor Groups (77 categories)** - *RMinGrp* for respondents
  - *SMinGrp* for spouses/partners

- **SOC Sub-major Groups (22 categories)** - *RSmajGrp* for respondents
  - *SSmajGrp* for spouses/partners

- **SOC Major Groups (9 categories)** - *RMajGrp* for respondents
  - *SMajGrp* for spouses/partners

Occupation details are collected for all respondents (and, where appropriate, for their spouses or partners). If respondents (or spouses/partners) are not currently in paid employment, they are asked about their last occupation (or, if waiting to take up paid work
already offered, about their next occupation). Thus only those who had never had a job were excluded.11

Self-employed respondents and their partners can be identified as follows:

Currently economically active - REmploye (code 2) for respondents

Ever economically active - REmployee (code 2) for respondents
- SEmploye (code 2) for spouses/partners

There are variables that identify those with and without managerial or supervisory responsibilities in their present or last job; if their title is or was that of manager, foreman or supervisor; and (if applicable) the number of people they supervise(d). For respondents these are: RSuper2, RMany, RSuper and RSupMan; for spouses/partners these are: SSuper2, SMany, SSuper and SSupMan.

The number of employees at the respondent’s place of work, and (if applicable) that of his/her spouse/partner is identified by the variables REmpWork and SEmpWork.

5.5 Socio-economic group and social class

A range of variables has been derived from respondents’ occupational details and from those provided by respondents about their spouses/partners. Among the principal ones is the Registrar General’s Socio-economic Group (SEG). There are two versions of both the full and the compressed version:

Socio-economic Group (20 categories) - RSEG2 for respondents
- SSEG2 for spouses/partners

Socio-economic Group (banded - 8 categories) - RSEGGp2 for respondents
- SSEGGp2 for spouses/partners

The second version of each of these derived variables is included in the dataset to maintain comparability with practice in earlier years of the survey series:

Socio-economic Group (17 categories) - RSEG for respondents
- SSEG for spouses/partners

Socio-economic Group (banded - 9 categories) - RSEGGp for respondents
- SSEGGp for spouses/partners

Also derived from occupational data are respondents’ and spouses’/partners’ Employment Status; and Registrar General’s Social Class:

11 Note that this differs from the practice adopted in the 1983 British Social Attitudes survey, when respondents coded as ‘in full-time education’, ‘permanently sick or disabled’, ‘looking after the home’ or ‘doing something else’ were not asked for their occupational details.
Employment status (11 categories) - *REmpStat* for respondents
  - *SEmpStat* for spouses/partners

Social Class (6 categories) - *RRGClass* for respondents
  - *SSGClass* for spouses/partners

Social Class (6 categories plus armed forces) - *RSocClas2* for respondents
  - *SSocClas2* for spouses/partners

Social Class (5 categories, skilled non-manual and manual workers being combined) - *RSocClas* for respondents
  - *SSocClas* for spouses/partners

There is also a dichotomised variable classifying occupations into non-manual and manual in the following derived variable:

**Whether in a non-manual or manual job** - *RManual* for respondents;
  - *SManual* for spouses/partners

These variables used to emerge automatically from the programme that creates the Social Class variable. However, with the change to SOC, this no longer happens. Instead it is derived separately from a combination of SOC and Employment Status codes. Full details are given in Appendix H.

In addition, Goldthorpe’s (revised) class schema (here referred to as Goldthorpe-Heath) is also coded. This system classifies occupations by their ‘general comparability’, considering such factors as sources and levels of income, economic security, promotion prospects, and level of job autonomy and authority. As for SEG and Social Class, it is based on the current or last job held.

The full Goldthorpe-Heath schema has eleven categories, to which we have added a residual category of those who have never had a job or who have given insufficient information to allow classification:

**Goldthorpe-Heath class schema**
(12 categories, including not-classifiable) - *RGHClass* for respondents
  - *SGHClass* for spouses/partners

Instead of the full schema, a compressed schema of five classes (plus a residual category described above) is often employed:
1. *Salariat* (professional and managerial)
2. *Routine non-manual workers* (office and sales)
3. *Petty bourgeoisie* (the self-employed, incl. farmers, with and without employees)
4. *Manual foremen and supervisors*
5. *Working class* (skilled, semi-skilled and unskilled manual workers, personal service and agricultural workers)

The derived variable is:

Goldthorpe-Heath class schema (compressed into 5 categories)
- RGHGp for respondents
- SGHGp for spouses/partners

### 5.6 Industry

All respondents for whom an occupation was coded were allocated a Standard Industrial Classification (SIC 1992). Two-digit codes are also used. As with Social Class, SIC may be generated on the basis of the respondent’s current occupation only, or on his or her most recently classifiable occupation. For a full listing of SIC categories, see Appendix G. The variable names are:

Standard Industrial Classification (SIC) - RSIC92 for respondents
- SSIC92 for spouses/partners

SIC also appears, compressed into 11 categories (including not classifiable):

SIC (compressed) - RSIC92Gp for respondents
- SSIC92Gp for spouses/partners

### 5.7 Attitude scales

Following methodological work carried out by Heath *et al.* (1986), *British Social Attitudes* survey questionnaires regularly carry three attitudinal scales, designed respectively as measures of egalitarianism, libertarianism and welfarism (and their opposites). The scales are intended to be general, concentrating on underlying values and excluding items referring to specific policy issues.

---

12 For comparison with previous years, the 1995 *British Social Attitudes* data was coded both to SIC 1992 and to the older SIC 1980 classification.
Since the 1997 BSA contained a module that formed part of the *British General Election Study*, the ‘balanced’ BGES versions of the left-right and libertarian-authoritarian scales were used instead of the normal BSA versions (see Lilley *et al.* 1998 for examples of these). The ‘balanced’ left-right scale (*LriRighB*) is made up of the following items:

**Questions**  
**Scale items**  
Q64a Ordinary working people get their fair share of the nation's wealth (*Wealth1*)  
Q64b There is one law for the rich and one for the poor (*RichLaw*)  
Q64c There is no need for strong trade unions to protect employees’ working conditions and wages (*NoTrUns*)  
Q64d Private enterprise is the best way to solve Britain’s economic problems (*PrEntBSi*)  
Q64e Major public services and industries ought to be in state ownership (*PubOwnSt*)  
Q65a It is the government’s responsibility to provide a job for everyone who wants one (*GovJob*)

The ‘balanced’ libertarian - authoritarian scale (*LibAuthB*) is made up of the following items:

**Questions**  
**Scale items**  
Q64c Young people today don’t have enough respect for traditional British values (*TradVals*)  
Q64d Censorship of films and magazines is necessary to uphold moral standards (*Censor*)  
Q65b People should be allowed to organise public meetings to protest against the government (*ProtMeet*)  
Q65c Homosexual relations are always wrong (*GaySex*)  
Q65d People in Britain should be more tolerant of those who lead unconventional lives (*Tolerant*)  
Q65e Political parties which wish to overthrow democracy should be allowed to stand in general elections (*BanParty*)
6. SAMPLING ERRORS

No sample precisely reflects the characteristics of the population it represents because of both sampling and non-sampling errors. If a sample were designed as a simple random sample (i.e. if every adult had an equal and independent chance of inclusion in the sample) then we could calculate the sampling error of any percentage, \( p \), using the formula:

\[
\text{s.e.}(p) = \sqrt{\frac{p(100-p)}{n}}
\]

where \( n \) is the number of respondents on which the percentage is based. Once the sampling error had been calculated, it would be a straightforward exercise to calculate a confidence interval for the true population percentage. For example, a 95 per cent confidence interval would be given by the formula:

\[
p \pm 1.96 \times \text{s.e.}(p)
\]

Clearly, for a simple random sample (srs) the sampling error depends only on the values of \( p \) and \( n \). However, simple random sampling is almost never used in British surveys because of its inefficiency in terms of time and cost.

As noted above, the British Social Attitudes sample, like that drawn for most large-scale surveys, was clustered according to a stratified multi-stage design - in this case, into 83 postcode sectors. With a complex design like this, the sampling error of a percentage giving a particular response is not simply a function of the number of respondents in the sample and the size of the percentage; it also depends on how that percentage response is spread within and between sample points.

The complex design may be assessed relative to simple random sampling by calculating a range of design factors (DEFTs) associated with it, where

\[
\text{DEFT} = \sqrt{\frac{\text{Variance of estimator with complex design, sample size } n}{\text{Variance of estimator with srs design, sample size } n}}
\]

and represents the multiplying factor to be applied to the simple random sampling error to produce its complex equivalent. A design factor of one means that the complex sample has achieved the same precision as a simple random sample of the same size. A design factor greater than one means the complex sample is less precise than its simple random sample equivalent.

If the DEFT for a particular characteristic is known, a 95 per cent confidence interval for a percentage may be calculated using the formula:

\[
p \pm 1.96 \times \text{complex sampling error (p)} = p \pm 1.96 \times \text{DEFT} \times \sqrt{\frac{p(100-p)}{n}}
\]
Calculations of sampling errors and design effects were made using the statistical analysis programme STATA.

The following table gives examples of the confidence intervals and DEFTs calculated for a range of different questions, some asked on the interview questionnaire and some on the self-completion supplement. It shows that most of the questions asked of all sample members have a confidence interval of around plus or minus two to three per cent of the survey proportion. This means that we can be 95 per cent certain that the true population proportion is within two to three per cent (in either direction) of the proportion we report.

The design effects for certain variables (notably those most associated with the area a person lives in) are greater than those for other variables. This is particularly the case for party identification, housing tenure. For instance, Labour identifiers and local authority tenants tend to be concentrated in certain areas; consequently the design effects calculated for these variables in a clustered sample are greater than the design effects calculated for variables less strongly associated with area, such as attitudinal variables.

Complex standard 95 per cent error of confidence interval

Attitudinal variables (Interview)

Q.203 Benefits for the unemployed are ...
   ... too low  45.8  2.0  41.7 – 49.8  1.49
   ... too high  28.2  1.6  24.9 – 31.4  1.33

Q.114 Area respondent lives in has got better/worse in past 2 years
   Better  12.9  1.2  10.4 – 15.4  1.37
   Worse  28.8  1.7  25.3 – 32.3  1.41

Q.118 Very likely to mention state secondary schools when asked about really good things in local area  10.5  1.0  8.6 – 12.5  1.17

Attitudinal variables (Self-completion)

Q206 New technologies will greatly reduce the number of jobs in Britain over the next few years  34.0  1.7  30.5 – 37.5  1.21

Q262A Strongly support or support doubling the cost of petrol to pay for improved public transport  12.1  1.3  9.5 – 14.6  1.28

Q235b Should Council tenants be allowed to buy their houses or flats
   Not allowed  13.1  1.0  11.2 – 15.0  0.93
   In some areas  34.4  1.6  31.1 – 37.7  1.13
   Generally allowed  51.2  1.9  47.4 – 54.9  1.23

These calculations are based on the total sample from the 1997 survey of 1,355 respondents (aged 18 or above) to the main questionnaire and 1,080 returning self-completion questionnaires.
7. NOTES ABOUT THE 1997 SURVEY

7.1 Politics Module Open Ended Questions

The 1997 British Social Attitudes survey included a set of open ended questions about what respondents' liked and disliked about the Conservative and Labour parties. Interviewers recorded respondents' full verbatim answers in a separate booklet (a copy of the booklet and documentation of the questions can be found in Appendix E). In addition, a data file relating to these questions was deposited separately at the Data Archive as an electronic, comma delimited ASCII file.
8. STRUCTURE OF THE QUESTIONNAIRE

As already noted, only one questionnaire version was used in 1997. It contained a 'core' of standard attitudinal and classificatory questions. The structure of the personal interview and self-completion questionnaires, and the topics covered, is shown overleaf.

Appendix D contains an annotated copy of the questionnaire and show cards.
BRITISH SOCIAL ATTITUDES 1997
QUESTIONNAIRE PLAN
Main questionnaire

1. Household composition
2. Newspaper readership
3. Party identification
4. Housing
5. Politics
6. Public spending, welfare benefits and health care
7. Economic activity and the labour market
8. Europe
9. Countryside
10. Transport
11. Charities
12. Religion and classification

Self-completion

1. ISSP attitudes to work
2. Housing
3. Politics
4. Europe
5. Countryside
6. Transport

*ALWAYS RETURN ARF SEPARATELY FROM THE SELF-COMPLETION QUESTIONNAIRE FILLED IN BY A MEMBER OF THIS HOUSEHOLD*
1. IS THIS ADDRESS TRACEABLE, RESIDENTIAL AND OCCUPIED?
   IF 'OFFICE REFUSAL', RING B

   Yes A GO TO Q3
   No B ANSWER Q2

IF NO AT Q1

2. WHY NOT?
   Insufficient address (call office before returning)
   Not traced (call office before returning)
   Not yet built/not yet ready for occupation
   Derelict/demolished
   Empty
   Business/industrial only (no private dwellings)
   Institution only (no private dwellings)
   Weekend or holiday home
   Other (please give details) ________________________________
   Office refusal ('phone or letter')

IF YES AT Q1

3. ESTABLISH NUMBER OF OCCUPIED DWELLING UNITS COVERED BY ADDRESS:
   (IF NOT KNOWN, TREAT AS OCCUPIED)

   IF NECESSARY, ASK:
   i) Can I just check, is this (house/bungalow) occupied as a single dwelling, or is it split
      into flats or bedsitters?
   ii) How many of those (flats/bedsitters) are occupied at the present time?

<table>
<thead>

0.9 (Britain should leave the EU)
0.4 Other (WRITE IN)
0.0 (Don't Know)
0.1 (Refusal/NA)

ASK ALL

Q316 [ECView]
CARD Here are three statements about the future of the pound in the European Union. Which one comes closest to your view?

16.7 Replace the pound by a single currency
15.0 Use both the pound and a new European currency in Britain
60.0 Keep the pound as the only currency for Britain
5.6 (Don't Know)
0.2 (Refusal/NA)

Q317 [ECFut]
CARD Regardless of what you would like to happen, what do you think will happen within the next five years or so?

32.7 The pound will be replaced by a single currency
31.0 Both the pound and a new European currency will be used in Britain
25.5 The pound will be kept as the only currency for Britain
10.2 (Don't Know)
0.2 (Refusal/NA)

Q318 [EuroUnem] CARD
Just suppose there were to be a single currency, with all member nations replacing their own currency with the new 'Euro'. Please choose a phrase from this card to say how much you agree or disagree that, if the pound were replaced by the new 'Euro' ... unemployment in Britain would become higher?
Q319 [EuroMort] *  
CARD AGAIN  
(How much do you think it is true or false, if the pound were replaced with the new 'Euro', would mortgage rates in Britain become lower?)

Q320 [EuroTax] *  
CARD AGAIN  
(How much do you agree or disagree that, if the pound were replaced with the new 'Euro', Britain would lose its ability to decide its own tax and spending plans?)

Q321 [EuroTrde] *  
CARD AGAIN  
(How much do you agree or disagree that, if the pound were replaced with the new 'Euro', Britain would be able to trade in Europe more successfully?)

Q322 [EUQuiz1] *  
Now a quick quiz about Europe. For each thing I say, please say whether you think it is true or false. If you don't know, just say so and we will skip to the next one. Remember, true, false, or don't know.

The European Union now has 15 member countries

Q323 [EUQuiz2] *  
(True, false, or don't know?) Hungary has applied to join the European Union

Q324 [EUQuiz3] *  
(True, false, or don't know?) Britain's income tax rates are decided in Brussels

Q325 [EUQuiz4] *  
(True, false, or don't know?) Elections to the European Parliament are held every 5 years

Q326 [EUQuiz5] *  
(True, false, or don't know?) Norway is a member of the European Union

Q327 [EUQuiz6] *  
(True, false, or don't know?) Britain doesn't have any European Commissioners at the moment
Q31 [EULibPol]*  
And Liberal Democrat Party policy? As far as you know, is it in favour of

% And which do you think is the next greatest threat?

13.0 Litter and fly-tipping of rubbish  
11.9 New housing and urban sprawl  
8.6 Superstores and out-of-town shopping centres  
14.9 Building new roads and motorways  
12.6 Industrial development like factories, quarries and power stations  
21.0 Land and air pollution, or discharges into rivers and lakes  
6.7 Changes to traditional ways of farming and of using farmland  
5.3 Changes to the ordinary natural appearance of the countryside, including plants and wildlife  
1.0 The number of tourists and visitors in the countryside  
0.2 Other answer (WRITE IN)  
1.0 (None of these)  
0.4 (Don't Know)  
3.4 (Refusal/NA)
Q338 [Set: Asid1] 
CARD
Modern methods of farming mean it now takes less land to produce the same amount of food. Please say how much you are in favour of or against each of these ways of paying farmers to use their spare land. Remember that if this happened on a large scale, income tax or VAT might have to go up to meet the costs.
First, how much are you in favour of or against paying farmers to change to organic farming which takes up more land?

Q339 [Set: Asid2] 
CARD AGAIN
(And how much are you in favour of or against... paying farmers to 'set aside' spare land and not use it at all?)

Q340 [Set: Asid3] 
CARD AGAIN
(And how much are you in favour of or against... paying farmers to 'set aside' spare land for woodland, to encourage wildlife?)

Q341 [Set: Asid4] 
CARD AGAIN
(And how much are you in favour of or against... paying farmers to 'set aside' spare land for forestry and timber?)

Q342 [Set: Asid5] 
CARD AGAIN
(And how much are you in favour of or against each of these ways of using spare farmland? Remember that if it happened on a large scale, it would mean less open countryside. Firstly, relaxing planning laws so that spare farmland can be developed for housing?)

Q343 [Set: Asid6] 
CARD AGAIN
(And how much are you in favour of or against... relaxing planning laws so that spare farmland can be used for golf courses and leisure activities?)

Q344 [Set: Asid7] 
CARD AGAIN
(And how much are you in favour of or against... relaxing planning laws so that spare farmland can be used for industry?)

Q345 [ConDev]
Suppose you heard that a housing development was being planned in a part of the countryside you knew and liked. Would you be concerned by this, or not?

% Yes, concerned
81.4
15.8 No
2.6 (Don't Know)
0.2 (Refusal/NA)

ASK ALL 'married' OR 'living as married'

AT [MarStat2]

Q475 [SEconAct] (NOT ON SCREEN)
Which of these descriptions applied to what your partner was doing last week, that is the seven days ending last Sunday?

Priority coded
0.6 In full-time education (not paid for by employer, including on vacation)
1.7 On government training/employment programme (eg. Youth Training, Training for Work etc)
59.6 In paid work (or away temporarily) for at least 10 hours in week
0.1 Waiting to take up paid work already accepted
2.7 Unemployed and registered at a benefit office
0.6 Unemployed, not registered, but actively looking for a job (of at least 10 hours a week)
0.4 Unemployed, wanting a job (of at least 10 hours per week) but not actively looking for a job
4.9 Permanently sick or disabled
17.0 Wholly retired from work
13.2 Looking after the home
0.3 (Doing something else) (WRITE IN)
- (Don't Know)
0.6 (Refusal/NA)

ASK ALL WHOSE PARTNER IS 'In full-time education', 'On government training', 'Unemployed', 'Wholly retired', 'Sick or disabled', 'Looking after the home' OR 'Doing something else' AT [EconAct] (I.E. NOT WORKING)

Q476 [LastJob]
How long ago did your partner last have a paid job of at least 10 hours a week?

GOVERNMENT PROGRAMS/SCHMES DO NOT COUNT AS 'PAID JOBS'.

% 
5.2 Within past 12 months
9.0 Over 1, up to 5 years ago
7.7 Over 5, up to 10 years ago
9.4 Over 10, up to 20 years ago
5.9 Over 20 years ago
2.4 Never had a paid job of 10+ hours a week
0.1 (Don't Know)
0.6 (Refusal/NA)

ASK ALL WHOSE PARTNER HAS EVER WORKED [IF 'In paid work' OR 'Waiting to take up paid work' AT [EconAct] OR EVER HAD A PAID JOB AT [LastJob]]

Q477 [Title]
IF 'In paid work' AT [EconAct]: Now I want to ask you about your partner's present. What is (his/her) job?
PROBE if NECESSARY: What is the name or title of the job?
IF 'Waiting to take up paid work' AT [EconAct]: Now I want to ask you about your partner's future job. What is (his/her) job. PROBE if NECESSARY: What is the name or title of the job?
IF EVER HAD A JOB AT [LastJob]: Now I want to ask you about your partner's last job. What was (his/her) job? PROBE if NECESSARY: What is the name or title of the job?
Open Question (Maximum of 80 characters)

Q478 [Stypewk]
What kind of work does/will/did) (he/she) do most of the time?
IF RELEVANT: What materials/machinery does/will/did) (he/she) use?
Open Question (Maximum of 80 characters)

Q479 [Strain]
What training or qualifications (are/were) needed for that job?
Open Question (Maximum of 80 characters)

Q480 [SSuper2]
Does/Will/Did) (he/she) directly supervise or (does he/she/will he/she/ be was he/she) directly responsible for the work of any other people?
35.0 Yes
63.7 No
0.3 (Don't Know)
1.0 (Refusal/NA)

IF 'Yes' AT [Super2]

Q481 [SMany]
How many?
Range: 1 ... 9999
% Median = 6
2.3 NA

1 Not on the SPSS file
ASK ALL WHOSE PARTNER HAS EVER WORKED (IF 'In paid work' OR 'Waiting to take up paid work' AT [EconAct] OR EVER HAD A PAID JOB AT [LastJob])

Q486 [SSocSect]
Which of the types of organisation on this card (does he/she/will he/she did he/she) for?

67.1 PRIVATE SECTOR FIRM OR COMPANY Including, for example, limited companies and PLCs
3.4 NATIONALISED INDUSTRY OR PUBLIC CORPORATION Including, for example, the Post Office and the BBC
26.7 OTHER PUBLIC SECTOR EMPLOYER Including eg: - Central govt/ Civil Service/ Govt Agency - Local authority/ Local Education Authority (including 'opted out' schools) - Universities - Health Authority / NHS Hospitals / NHS Trusts/ GP surgeries - Police / Armed forces
1.4 CHARITY/ VOLUNTARY SECTOR Including, for example, charitable companies, churches, trade unions
- Other answer (WRITE IN)

Thank you very much for agreeing to take part in this important study - the thirteenth in this annual series. The study consists of this self-completion questionnaire, and the interview you have already completed. The results of the survey are published in a book each autumn; some of the questions are also being asked in twenty-four other countries, as part of an international survey.

**Completing the questionnaire:**

The questions inside cover a wide range of subjects, but most can be answered simply by placing a tick (✓) in one or more of the boxes. No special knowledge is required: we are confident that everyone will be able to take part, not just those with strong views or particular viewpoints. The questionnaire should not take very long to complete, and we hope you will find it interesting and enjoyable. *Only you should fill it in, and not anyone else at your address. The answers you give will be treated as confidential and anonymous.*

**Returning the questionnaire:**

Your interviewer will arrange with you the most convenient way of returning the questionnaire. If the interviewer has arranged to call back for it, please fill it in and keep it safely until then. If not, please complete it and post it back in the pre-paid, addressed envelope, AS SOON AS YOU POSSIBLY CAN.

---

**SOCIAL AND COMMUNITY PLANNING RESEARCH**

Social and Community Planning Research is an independent social research institute registered as a charitable trust. Its projects are funded by government departments, local authorities, universities and foundations to provide information on social issues in Britain. The British Social Attitudes survey series is funded mainly by one of the Sainsbury Family Charitable Trusts with contributions also from other grant-giving bodies and government departments. Please contact us if you would like further information.

### [WHY WORK]

17. Which of the following statements best describes where you work?

**PLEASE TICK ONE BOX ONLY**

- I usually work in one place away from home (e.g. office or factory) 72.4
- I usually work at home 3.4
- I usually work part of the week at home and part at one place away from home 2.1
- I usually work in a variety of places 20.6
- (NA) 1.5

### [SECURE]

18. Which of the following describes your present job situation?

**PLEASE TICK ONE BOX ONLY**

- It is a job with no written contract 20.5
- It is a fixed-term job lasting less than 12 months 2.5
- It is a fixed-term job lasting for one year or more 10.1
- It is a job with no set time limit 54.4
- Can't choose 5.8
- (NA) 1.9

### [SKILL USE]

19. How much of your past work experience and/or job skills can you make use of in your present job?

**PLEASE TICK ONE BOX ONLY**

- Almost none 11.5
- A little 22.4
- A lot 24.1
- Almost all 38.9
- Can't choose 3.4
- (NA) 1.8

### [SKILLS]

20. Now think about the skills that you actually use in your job.

How important would you say each of the following was in developing these skills?

**PLEASE TICK ONE BOX ONLY**

- Very Important
- Important
- Not Important
- Not Important at all
- Can't choose

### [HELPFIRM]

21. In general, how would you describe relations at your workplace?

**PLEASE TICK ONE BOX ON EACH LINE**

34. What is your main source of economic support?

**PLEASE TICK ONE BOX ONLY**

- Pension (private or state) 48.3%
- Unemployment benefits 10.7%
- Spouse/partner 20.0%
- Other family members 2.8%
- Social assistance/welfare 7.2%
- Occasional work 0.9%
- Other 5.3%
- (NA) 4.7%

35a. Central government provides financial support to housing in two main ways.

- First, by means of allowances to low income tenants.
- Second, by means of tax relief to people with mortgages.

On the whole, which of these three types of family would you say benefits most from central government support for housing?

**PLEASE TICK ONE BOX ONLY**

- Families with high incomes 18.2%
- Families with middle incomes 17.3%
- Families with low incomes 61.4%
- (NA) 3.2%

35b. Which of these three views comes closest to your own on the sale of council houses and flats to tenants?

**PLEASE TICK ONE BOX ONLY**

- Council tenants should not be allowed to buy their houses or flats 13.1%
- Council tenants should be allowed to buy but only in areas with no housing shortage 34.4%
- Council tenants should generally be allowed to buy their houses or flats 51.2%
- DK 0.2%
- (NA) 1.1%

36. Which of the following statements do you think are generally true and which false?

**PLEASE TICK ONE BOX ONLY**

- Council tenants pay low rents 44.6%
- Councils give a poor standard of repairs and maintenance 48.6%
- Council estates are generally pleasant places to live 28.2%
- DK 0.7%
- (NA) 3.0%

37. Suppose a newly-married young couple, both with steady jobs, asked your advice about whether to buy or rent a home. If they had the choice, what would you advise them to do?

**PLEASE TICK ONE BOX ONLY**

- To buy a home as soon as possible 61.5%
- To wait a bit, then try to buy a home 30.2%
- Not to plan to buy a home at all 1.8%
- Can't choose 6.2%
- (NA) 0.5%
39b. Everyone's taxes should go up to provide better old age pensions for all.

INTERVIEWER NOTE:

- Record the respondent's full verbatim answers in this booklet.
- Later, type in these full verbatim answers into the CAPI Admin. Block before you download the interview data.
- Also, send back this booklet at the same time as you send the ARF -
  - If you are sending back the self-completion questionnaire at the same time as the ARF, put this booklet in the same envelope as the self-completion.
  - If you are not sending back the self-completion questionnaire at the same time as the ARF, put this booklet in an envelope on its own and send it back at the same time as you send back the ARF.
Q.1 LIKES ABOUT CONSERVATIVE PARTY

Is there anything in particular that you like about the Conservative Party?
IF YES: What is that?
PROBE: Anything else?
RECORD VERBATIM - PROBE UNTIL NO FURTHER ANSWERS
Q.2 DISLIKES ABOUT CONSERVATIVE PARTY

Is there anything in particular that you don't like about the Conservative Party?
IF YES: What is that?
PROBE: Anything else?
RECORD VERBATIM - PROBE UNTIL NO FURTHER ANSWERS
Q.3 LIKES ABOUT LABOUR PARTY

Is there anything in particular that you like about the Labour Party?
IF YES: What is that?
PROBE: Anything else?
RECORD VERBATIM - PROBE UNTIL NO FURTHER ANSWERS
Q.4 DISLIKES ABOUT LABOUR PARTY

Is there anything in particular that you don't like about the Labour Party?
IF YES: What is that?
PROBE: Anything else?

APPENDIX F

BRITISH SOCIAL ATTITUDES

Coding and editing instructions
BRITISH SOCIAL ATTITUDES 1997:
BLAISE EDIT AND CODING INSTRUCTIONS

General notes:

* All NotePad notes, whether attached to an open-ended question or not must be read and any 'obvious' recoding done. Please TAB any that you are uncertain about.

* Where the instructions below refer to final listing, this should include answers on the NotePad.

* The NotePad files must be kept and handed over to the BSA team with the edited ASCII file.

* Where an 'Other (WRITE IN)' question contains 'Don't Know' or 'Refusal' the original question should be recoded 'Don't Know' or 'Refusal' instead of 'Other'.
NEWSPAPER READERSHIP

WhPaper

*Code 94 should be used for British or Irish regional *daily morning* papers (NOT ‘free sheets’). Check whether any can be recode as codes 1-12. This is a list of examples of such daily morning regional papers, which should be coded 94:

- Birmingham Post
- Daily News
- Daily Post
- Dundee Courier
- Eastern Daily Press
- East Anglia Times
- Glasgow Herald
- Irish Press
- Jang
- Liverpool Post
- Newcastle Journal
- Northern Echo
- Press & Journal
- The Scotsman
- Shropshire Star
- South Shields Gazette
- Western Daily Press
- Western Mail
- Western Morning Post
- Yorkshire Post

Any other papers mentioned should be checked for whether they are *daily morning* papers. Any new ones identified should be final listed with serial number (so that the above list can be kept up to date). Please confirm that you have an up to date source to check the names of papers (e.g. ‘British Rate and Data’)

*Code 95 should be used for other daily morning papers* (e.g. foreign daily morning papers) - do not include free papers. Please check whether any can be recoded as 94. Final list code 95s with serial numbers.

*Add a code 96 for ‘More than one paper read with equal frequency’* and use wherever there are two or more daily morning papers mentioned (exclude ‘free sheets’).

PARTY ID

PartyFW

*Code 7 and 8: Check whether any can be recode 1-6. Final list with serial numbers.*
HOUSING

HomeType
Code 7: Check whether any can be recoded 1 to 6. Final list with serial numbers.

Tenure1a
Code 14: Check whether any can be recoded 1 to 13. Final list with serial numbers.

PTenure
Code 7: Check whether any can be recoded 1 to 3. Final list with serial numbers.

POLITICS

VoteSyst
Check NotePad for 'other' answers and recode if possible.

MembShip
Code 9: Check whether any can be recoded 1 to 8. Final list with serial numbers.

SCOOpport
Code 7: Check whether any can be recoded 1 to 4. Final list with serial numbers.

PUBLIC SPENDING, WELFARE BENEFITS AND HEALTH CARE

Dole
Add code 4: 'Both: unemployment benefit causes hardship but can't be higher or there would be no incentive to work'
Include here if main mention is that benefit discourages people from working, that wages are so low that benefit is a "disincentive", that minimum wage is too close to benefit level, etc.

In short, any comparison of the benefit level to wages, that benefit level in relation to wages doesn't pay people to work, etc.

Add code 5: 'Both: unemployment benefit causes hardship to some, while others do well out of it'
Here the point is slightly different - that some categories of people gain (unjustly) from getting benefit (unjustly) whilst others suffer.

So here include distinctions made between "genuine" claimants and "scroungers", people with families versus young people, differences between North and South, etc.

Add code 6 'About right/in between'
All mentions that level of benefit is about right, is enough with careful management, etc.

Code 7: Check whether any can be recoded as 1-6. Final list with serial numbers.

NB Sometimes there is some difficulty in deciding between codes 4 and 5 - partly because both reasons are given. Need to decide "main reason" - either most elaborated and detailed reason or first mentioned if both mentions are short. The important thing to remember is that code 4 relates the answer to level of wages while code 5 is about
dividing claimants into two groups. If in any doubt, please TAB.

**ECONOMIC ACTIVITY**

**EconFW and EconAct**
*Code 11:* Check whether any can be recoded as 1-10.

**OcSect2**
*Code 7:* Check whether any can be recoded as 1-4. Final list with serial numbers.

**EmplyFW1, EmplyFW2**
Check NotePad for answers of *less than one month* and recode as 1 month.

**WageNow**
*Code 7:* Check whether any can be recoded as 1-4.

**PayGap**
*Add code 7: ‘Other answers’.*
Since there was no ‘other’ category on this question, these would have to be other answers on the Notepad that cannot be recoded up.

**WageXpct**
Check NotePad for answers of *expect wages to fall* and final list with serial numbers.

**NumEmp**
*Code 7:* Check whether any can be recoded as 1-3.

**WhyGoFW**
*Add code 11: ‘Return to education’*
*Code 97:* Check whether any can be recoded as 1-11.

**NwEmpLiv**
Check for possible ‘other answers’ on the NotePad and recode if possible.

**WkPrefJob**
*Code 7:* Check whether any can be recoded 1 or 2.

**EUROPE**

**EULinks**
*Code 7:* Check whether any can be recoded 1-3. Final list with serial numbers.

**EU Feder**
*Code 7:* Check whether any can be recoded 1-2. Final list with serial numbers.
COUNTRYSIDE AND TRANSPORT

CthtNew1, CthtNew2
   Code 96: Check whether any can be recoded 1 to 9 or 97. Final list with serial numbers.

DevDo
   Check 'notepad' for other answers and recode if possible. Final listing with serial numbers.

ResPres
   Code 7: Check whether any can be recoded 1-5. Final list with serial numbers.

CutQrt1, CutQrt2, CutHalf1, CutHalf2
   Check 'notepad' for other answers and recode if possible. Final listing with serial numbers.

CHARITIES

LottYNo
   Code 6: Check whether any can be recoded 1-5. Final list with serial numbers.

CLASSIFICATION

RelRFW, RelFFW
   Code 11: 'Other Protestant'
   Check whether any can be recoded 1 to 10.

'Other Protestant' should include members of any church that separated from the Catholic Church in the sixteenth century, or any church, chapel or group that separated from a church that itself separated from the Catholic Church in the 16th century. In practice, this means any Western Christian church that is not Catholic.

Also included would be people who say "Protestant", but do not name any specific church or denomination.
So included under other Protestant would be any of the following:

Apostolic Church
Church of Christ
Church of God
Church of Nazarene
Church of Sweden
Christadelphians
Christian Scientist
Congregational
Covenanter
Elim
English Church Mission
Evangelical; Evangelical Christian
German Evangelist
House Church Movement
Independent Chapel
'Interdenominational'
Jehovah's Witness
Lutheran
Moravian
Mormon (Latter Day Saints)
New Jerusalem Church
New Testament Church
'Non-conformist'
Pentecostal
Salvation Army
Seventh Day Adventist
Society of Friends/Quakers
Unitarian

Codes like "Independent Methodist" and "Wesleyan Reform" are to be coded under "Methodist" (code 06); varieties of Presbyterian to be coded under "Presbyterian" (codes 07, 08); Church in Wales which is part of the Anglican Communion under "Church of England" (code 04); etc.

NOTE THAT 'CHURCH OF IRELAND' CAN BE RECODED 04

Final list with serial numbers.

Code 12: 'Other Christian'
Check whether any can be recoded 1 to 11.

'Other Christian' should include any of the ORTHODOX churches - that is churches which developed separately from the Catholic Church, or split from it before the 16th century, and are either the Eastern or Greek branches of Christianity.

It would also include people who say "Christian, but no denomination".
So included under this category would be:

- 'Christian Orthodox'
- Greek Orthodox
- Russian Orthodox
- Serbian Orthodox

Final list with serial numbers.

**Code 18: 'Other non-Christian'**

Check whether any can be recoded 13 to 17 (or, indeed, 1 to 12).

'Other non-Christian' can include other clearly non-Christian religions. Examples might be:

- Baha'i
- Believer in God, but not Christian
- Church of God of Prophecy
- Hare Krishna
- Humanist
- Satanist
- Spirit worship
- Spiritualist
- Wicca, or white witchcraft

Final list with serial numbers.

ChAttend

Check the NotePad for other answers, particularly "Refused/unwilling to say" which should be recoded as Refused.

**RaceOrI2**

**Code 3:** Check whether any can be recoded 1-2. Final list with serial numbers.

**Code 8:** Check whether any can be recoded 4-7. Final list with serial numbers.

**Code 9:** Include "British", "Irish", "English", "Welsh", "Scottish" or any combination of these.

**Code 10:** Check whether any can be recoded 9. Note that "British", "Irish", "English", "Welsh" or "Scottish" should be recoded 9. Final list with serial numbers.

**Code 11:** Check whether any can be recoded 1 to 10. Recode "mixed Asian" (e.g. "Turkish/Kurdish") as 'Other Asian' (code 8). Recode "mixed European white" (e.g. British/Italian") as 'White of any European origin' (code 9).

Final list with serial numbers.

**Code 12:** Check whether any can be recoded 1-11.
TEA2

*Code 97:* Check whether any can be recoded.
Note that if they finished school and had a gap of **more than one year** before continuing in education, age when they first left should be coded. If on the other hand they had a gap of **less than one year**, the **final leaving age** should be coded.

SchQFW

Note the changes in coding from 1996.

PSchQFW

Note the changes in coding from 1996.

*Code 97:* Check whether any can be recoded 1 to 17 at SchQFW or 1 to 17 at PSchQFW.
Note that postgraduate qualifications (e.g. MA, MSc, PhD should be code 17).

EconFW and EconAct

*Code 11:* Check whether any can be recoded as 1-10.

BenfNFW

*Code 16:* Check whether any can be recoded as 1 to 15. **Final list with serial numbers.**

MainInc

*Codes 2 and 3:* Include spouse/partner's pension.

*Code 8:* Check whether any can be recoded 1 to 7 or 9 to 11.
Note that:
* 'Maintenance' should be coded 12.
* Child Benefit counts as 'other state benefit'.

*Code 12:* Check whether any can be recoded as 1 to 11.
Code 12 includes 'maintenance'.

[PopDen] and [PopBand] (quartiles)

[PopDen] is the population density as supplied with the sample file. [PopBand] is the population density banded into quartiles.
Multiple Output Indicator
Supplied with sample file.

Percentage owner-occupier
Supplied with sample file.

Derived from postcode.

Derived variable: [WtFactor]
Weight - format xx.xxxx

Weighting is applied to BSA data to reflect the relative selection probabilities at the three main stages of selection of individual respondents from a Postcode Address File sample: address, household, and individual.

First, because addresses were selected using the Multiple Output Indicator (MOI), weights have to be applied to compensate for the greater probability of an address with an MOI of more than one being selected, compared with an address with an MOI of one. Secondly, the data need to be weighted to compensate for the fact that dwelling units at an address which contained a large number of dwelling units are less likely to be selected for inclusion in the survey than ones which do not share an address. In most cases, these first two stages of weighting will cancel each other out - resulting in more efficient weights. Thirdly the data are weighted to compensate for the lower selection probabilities of adults living in large households compared with those living in small households. These three stages of weighting are calculated as follows:

\[
\frac{\text{Number of Dwelling Units} \times \text{Number of adults in selected household}}{\text{MOI}}
\]
Outlying low and high weights were then grouped and the weights scaled to achieve a weighted sample size the same as the unweighed sample size. The resulting weights were

<tr>
<td>Refusal/NA</td>
<td>1, DK, 2</td>
<td>and Ref/NA</td>
<td>Ref/NA</td>
</tr>
</tbody>
</table>

Answers of 500 or more at [SEmpNum] have been coded 500.
### Derived variable: SNumEmp
Whether currently self-employed had employees

Derived from [REconAct], [REmpany] and [SEmpNum] as follows:

<table>
<thead>
<tr>
<th>[REconAct]</th>
<th>[REmpany]</th>
<th>[SEmpNum]</th>
<th>[SNumEmp]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>03</td>
<td>2</td>
<td>1-500</td>
</tr>
<tr>
<td>No</td>
<td>03</td>
<td>2</td>
<td>0</td>

APPENDIX I

BRITISH SOCIAL ATTITUDES

OTHER SURVEY DOCUMENTS

- Advance letter
- Self-completion reminder letters
- Project instructions
You may have read about the *British Social Attitudes* study in the newspapers, or heard about it on the radio or television. It is a widely-reported annual study carried out by SCPR, a leading research institute. The results are also used by government as a way of discovering changes in public attitudes.

The questionnaire covers a wide range of topics and no special knowledge is needed to answer any of the questions. In many cases, you will only be asked to choose one of a number of possible answers. Each year we publish a book on the results. All replies are treated in confidence, and are never linked to names or addresses.

Your address has been selected from the Post Office's central list of addresses. Within the next few weeks one of our interviewers will call on you, show you an identification card, and ask you for your cooperation in choosing someone in your household to take part. If you happen to be busy when the interviewer calls, he or she will be happy to call again at a more convenient time.

We very much hope you will be able to take part, and are sure that you will find it interesting and enjoyable. Even if you are unsure about it, please allow the interview to start and see how you get along. You will be free to stop at any time.

Yours faithfully

Roger Jowell
Director

P.S. If this letter has crossed in the post with the completed questionnaire, please accept our thanks for sending it off and forgive us for writing to you.
Dear Sir or Madam,

Within the last month or so you very kindly agreed to be interviewed as part of our annual British Social Attitudes survey. At the same time we asked you to fill in a self-completion questionnaire and return it to us by post in a pre-paid envelope.

As we have not yet received the self-completion questionnaire from you, I wonder if I could ask you to spare a little more of your time? The self-completion questionnaire is an important part of the survey. It contains questions on topics not covered in the main interview, and we hope you will find it interesting and enjoyable. We need to get the views of everyone in our sample, not just those with strong opinions or particular viewpoints.

Thank you very much for your help, and for taking part in the survey. I look forward to hearing from you.

Yours sincerely,

Roger Jowell
Director

P.S. If this letter has crossed in the post with your completed questionnaire, please accept our thanks for sending it off and forgive us for writing to you again.

Roger Jowell
Director

P.S. If this letter has crossed in the post with your completed questionnaire, please accept our thanks for sending it off and forgive us for writing to you again.
Dear Sir or Madam,

Thank you very much for agreeing to be interviewed on the British Social Attitudes survey. We depend on the voluntary co-operation of the people we contact to make sure that our survey accurately represents the views of everyone living in Britain, not just those who like surveys. So, I hope you will forgive me for troubling you again.

About two weeks ago we sent you another copy of the self-completion questionnaire that our interviewer left with you. Our records show that we still have not received it. Without it, we are missing vital information about your views on the important issues of today. We are keen to have a complete picture so that public confidence in our surveys remains high.

If you should have time to fill it in and post it back to us, I would be very grateful. It should take no longer than about twenty minutes or so.

We are very grateful for the time that you have already given us, and hope you will help us to complete the picture.

Thank you again for all your help.

Yours sincerely,

Roger Jowell
Director

P.S. If this letter has crossed in the post with your completed questionnaire, please accept my thanks and my apologies for writing to you again.

---

1. Background

Since 1983, Social and Community Planning Research has fielded a large national survey in England, Scotland and Wales. This series, called British Social Attitudes, has become an important and much quoted source of information about contemporary Britain.

The study has three main outcomes:

   a. A book published each autumn by Dartmouth, reporting on some of the previous year's results and commenting on changes in attitudes over time. There is a list of the latest report (The 13th Report) with your survey materials. (We tell all respondents who are interested where they can get hold of a copy of the book on this year's survey.)

   The findings of this report are widely known and discussed on radio and TV programmes, in articles and features in newspapers and magazines. Channel 4 News and BBC Newsnight both devoted some ten minutes each to The 13th Report in November 1996. The report was also given front page coverage in the Independent and the Guardian and inside coverage in the Financial Times, the Times, the Observer and the Daily Mail.

   b. The data from the survey are deposited in the Data Archive at Essex University, and made available for analysis by the academic community, or by any other interested data users.

   c. Various government departments get summary reports, or tables based on the findings, and use them in their policy planning.

The British Social Attitudes (BSA) survey is designed to measure contemporary social attitudes and how they change over time. Such findings are of interest to government departments and to have more information about people's own assessments of, for example, the police, race relations in Britain or the National Health Service. But the data are also contributions to social history, to allow analysts in the future to discover what people thought and felt about the major social issues of today.

The BSA survey series is funded mainly by one of the Sainsbury Family Charitable Trusts, with contributions also from several government departments, quangos and other grant-giving bodies. However, in 1997, as in other years, the Sainsbury Trusts agreed that their core funding could be put towards the British Election Study which SCPR is conducting in collaboration with academic colleagues at Nuffield College Oxford and the University of Strathclyde.

However, the Economic and Social Research Council (ESRC) stepped in and provided a grant which enabled SCPR to carry out a British Social Attitudes survey in 1997. The ESRC grant, together with money from government departments (Environment and Transport), the Countryside Commission, and other grant-giving bodies (the Gatsby Foundation and the Charities Aid Foundation), is funding a 'scaled-down' BSA survey: in 1997, with one version of the questionnaire, rather than the three versions we have fielded in recent years.

Topics covered this year include some asked about in all previous years - for example employment and the economy; and others asked less often: for example, about Europe, and party politics. This year, only very few questions are new - mainly in the Europe and countryside modules.

Each annual survey consists of two elements - an interview questionnaire conducted by computer assisted personal interviewing (CAPI) and a self-completion supplement for each respondent to fill in after the interview. The supplement contains further questions on topics covered in the main questionnaire. It also has some questions on people's attitudes towards working that are asked in twenty-four other countries (including the Republic of Ireland, the United States, and Australia) as part of an international survey of social attitudes.

2. Notifying the police

You must notify the local police station in the area where you will be working. You should complete a copy of the Police Notification Form that has been included in your supplies. Attach to it a copy of the advance letter for respondents (which 'doubles up' as the explanatory letter) and hand it in to the police. (You might try to see if it is possible to record these details in the book kept at the station desk.) Make a note of the name of the officer to whom you speak and the date of your call so that, in the event of any query or complaint to the police, you are fully covered. It is reassuring for elderly or suspicious respondents to be told that the police know about you and the survey, and that they can check with the police station.

PLEASE DO NOT START WORK UNTIL YOU HAVE DONE THIS.

3. The sample

The sample covers England, Wales and all but the highlands and islands of Scotland. There are 83 sampling points and 30 addresses have been selected at each point. The sample of 2,490 addresses is drawn from the Postcode Address File (PAF).

Because the sample is taken from the PAF, strictly it is a sample of 'delivery points' (i.e. letter boxes). Not a sample of named individuals or households living at these addresses. It is important to remember that there may be no household or, conversely, two or more households at any selected address (in other words, there is not necessarily a one to one correspondence between delivery points and households). You will be able to deal with all such circumstances by following the instructions on the ARF.

It is vital that the person chosen for interview at each address is selected by strict random sampling principles. If we interviewed only those people who happened to be at home at the first call, or who were especially keen to be interviewed, our sample would almost certainly be unrepresentative of the adult population of Britain.

Only people aged 18 or over when you first make contact are eligible for interview on the main BSA survey. The assignments of 30 addresses are issued as labels attached to the Address Record Form (ARF), and on allocation disks containing the corresponding 30 serial numbers.

A full description of how to use the ARF and how to select respondents is given in Section 7 below.
4. Overview of procedures

In summary, the survey involves the following procedures:

i) tracing and calling at all issued addresses, making contact at all (apart from those that turn out to be deadwood) and completing a paper ARF for each address;

ii) where there is more than one dwelling unit at an address, selecting one at random;

iii) conducting an interview with one adult selected at random at that address;

iv) giving a self-completion questionnaire to the selected respondent (and whenever possible collecting it);

v) putting basic ARF information for every allocated address onto the computer (Admin block);

5. Contact procedures

For the past few years, advance letters have been sent from the office to all addresses drawn in BSA samples. Interviewers have said that they prefer this to a completely "cold call", and most respondents prefer some advance notice.

But there are two problems with the advance letter. First, since we do not know in advance who will be selected to interview, it does not always reach the person who will be selected for interview. About this we can do little, except ask the person who opens the letter to show it to other members of the household, and let you have copies to show and leave behind.

The second problem has been that there is often a long gap between delivery of the letter and the interviewer's first call at the address. This is a problem we can tackle, and so (in response to popular demand), we are this year - as we did last year - asking you to post the advance letter yourself, three days before you intend to make your first visit to the address.

The procedures are:

- check that you have been supplied with addressed envelopes containing the advance letter, for each address in your assignment (the address will show through the "window" of the envelope). The envelopes are pre-paid - you do not need to use stamps.

- fill in the slip to say who you are (but don't add your address or phone number, as potential respondents might contact you and refuse even before you have a chance to meet them).

- post it to arrive two days before you plan to make your first visit (you may find it helpful to note the day of posting on the ARF).

The advance letter is identical to the explanatory letter. You will have supplies in your pack so that, if the selected person does not remember receiving the letter or if he/she has lost it, you can leave a copy behind. It is important to do this in case the respondent wishes to contact one of the researchers, after you have left.

You must attempt to make contact at every address in your assignment except those notified to you as office refusals (not necessarily in the order given to you, but grouped and visited in "economic" batches). You must call on at least four occasions, at different times of day and spread across the fieldwork period, before you classify the address as unproductive. If necessary, at least one of these calls should be in the evening and one at the weekend.

As always, it is very important to achieve a high response rate in this survey. Please keep trying to contact all the issued addresses until the end of the fieldwork period, and call back as often as you can while you are still in the area. If you sense a respondent may be about to refuse, it often helps if you withdraw, offering to call again at a more convenient time, before a formal refusal is actually given. Only by interviewing as many as possible of those selected for the sample can we SCPR be confident that the answers you get are representative of the views of everyone. We have provided you with a Question and Answer booklet which gives you some ideas on how to combat potential refusals.

To help achieve a good response rate, we are asking you to:

- call the Field Office before you return any incomplete or untraceable addresses. We might be able to find out some information which will help you locate "hard to find" addresses;

- return all completed paper ARFs and computeradmin. work for other deadwood addresses (vacant premises, etc.) to the Field Office as soon as possible. We need to know what deadwood there is as early as possible in the fieldwork period;

- if you select a person for interview who proves hard to contact, breaks an appointment, etc., keep on trying to "convert" him/her until the end of the fieldwork period, even if you have already made 4 calls. Then whenever you are in the neighbourhood try again, unless you have learned that the selected respondent will not be available until after the end of the fieldwork (due to holiday, illness, etc.). Complete the ARF, and the computer admin. work for any non-contacts, and return them to the Field Office with your final work.

You must never substitute one address for another, nor substitute one selected individual for another. The sample has been randomly selected, and any substitutions would lead to bias in the results.

Remember to show your Identity Card when you introduce yourself. If you think it will help you to get an interview, you can give the person you initially contact a copy of the advance/explanatory letter, or the newspaper leaflet describing the study, or the SCPR leaflet, or all three, as part of your introduction. In any case, you must leave a copy of the SCPR leaflet with each respondent after the interview, in case he/she has any queries after you have left and wishes to contact the office.

You may find it useful to say that SCPR is a non-profit making research institute, registered as an educational charity and independent from government.

The main interview will last, on average, about one hour, though it will be quite a bit shorter for some groups (such as those not in paid work, or without access to a car).
Interviews with older respondents may take a little longer. So please allow enough time between appointments.

6 Materials for the survey

1. Address Record Forms (ARFs) - 30 per assignment - see Section 7
2. Copies of the advance letters & envelopes & extra copies of letter to show as necessary
3. Leaflets about SCPR - leave one with each respondent
4. "Newspaper" leaflets about the survey - use as necessary
5. The 1st Report leaflet
6. Book information forms
7. BSA 1997 Questionnaire Plan
8. Set of show cards
9. Self-completion questionnaires
10. Politics open-ended answer sheet booklets
11. Project Instructions (this document)
12. Question & Answer booklet
13. List of practice serial numbers with check letters
14. Pre-paid A5 envelopes. (These are for respondents who return the self-completion questionnaires themselves when you cannot collect them...)
15. 1 blank END disk

.... and of course, a lap-top computer with a rechargeable battery pack and shoulder bag.

We think you will find it helpful to check both show-cards (that they are a complete set and in the right order) AND the self-completion questionnaire in your pack. The printers have been known to make mistakes and it is better to discover them at home, before you begin your assignment, than later, in the field.

To check your show-cards, you need to note that they should run from 1 to 35.

7. Address Record Forms (ARFs)

These are the forms on which your assignment of addresses is issued. You will have one for each address in your sample.

• Besides giving the selected address, the ARF has a number of other purposes: it provides space for you to record details of all the calls you make, and the outcomes
• it allows you to select one adult at random for interview (and one dwelling unit in the rare cases when there is more than one dwelling unit at the address)

... in a case where you do not achieve an interview you record, there is space for you to tell us why. For refusals or broken appointments, you also record some details about the person who refused or broke the appointment

• it is used to tell us how the Field Office might expect the self-completion questionnaire to be returned

It works just like a normal questionnaire and you should follow the filter instructions in the normal way.

You will see that the address, its serial number and other vital information are given on two separate labels on the first page of the ARF.

• the address label at the top left of the page looks like this:

<table>
<thead>
<tr>
<th>SERIAL NO.</th>
<th>SN: 90649M *</th>
</tr>
</thead>
<tbody>
<tr>
<td>15 PRINCES CRESCENT</td>
<td></td>
</tr>
<tr>
<td>S K I P T O N</td>
<td></td>
</tr>
<tr>
<td>N YORKSHIRE</td>
<td></td>
</tr>
<tr>
<td>BD23 1HH</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>FIELD AREA</th>
</tr>
</thead>
</table>

The two asterisks on the address label indicate that we have a telephone number for that address on the sample file, in case we need to attempt a 'telephone conversion' (see below). But your contacts with residents at the address must always be by personal visit. It is just too easy for potential respondents to refuse over the phone.

• the selection label on the top right of page 1 looks like this:

| SN: 90649M |
| (HAROLD DENT) |
| PERSON/DU: 123456 |
| SELECT: 121355 |

This allows you to make random selections of dwelling units or individuals whenever you come across more than one of either at your selected address.

If there is a name on the selection label, it means that we have been able to match the address on the Postcode Address File with that address on the electoral register. If living at the address, you must use a random selection procedure to choose one for interview as follows:
name is provided solely to help you gain cooperation at that address and you may use it if you think it may help. The name provided is not, of course, necessarily that of the person to be interviewed. The selection procedures must be followed to ensure that we choose someone completely at random, from among all those in the selected household.

Also on page 1, you will see that there is space for you to keep a note of the times, dates and results of all your calls. Please remember to fill this in at each separate visit: it will help you to plan any further visits you may have to make and helps other interviewers in case of absences. Also on page 1, there is a box for you to write in the respondent's full name (see question 16).

Finally, on page 1 of the ARF, there is a box for you to write in the respondent's telephone number, if given. If it is not, write in 'Refused'. If he/she has no telephone, write in 'No phone'.

From here on, you fill in the ARF just like a questionnaire.

Qs. 1-9 deal with the address. If you find that the address contains two or more dwelling units (e.g. flats, bed-sitting rooms), Qs. 5 to 8 take you through the steps necessary to select one at random, by listing them all in a systematic way and using the selection label on page 1 to choose one at which to seek an interview. This will, in fact, happen only very rarely. But remember it is the exact address as given that counts. If the address on the label is 'Flat 4, 12 London Road', it is that part of accommodation that is the sampled address, not the whole of no. 12.

(If you happen to come across an address with 13 or more dwelling units, there is a look-up table at the end of these instructions that will tell you which one to select.)

It is essential that - if you need to select a dwelling unit - you follow the rules in making this selection. Only in this way can we be sure that we end up with a truly random sample of dwelling units and adults living there.

At Q.8, write in the number of the selected dwelling unit, (the 'DU' code), that is the number printed on the grid at Q.5 - not the flat or room number of the unit itself.

If the address on the label is spelt wrong, or is incomplete, make any necessary changes on the label and in the Admin Section on the laptop.

Qs. 10-16 help you to select the individual within the address for interview. A useful tactic is to explain at the outset that you have to ask a few questions beforehand to make sure you interview the 'right person' - to ensure that you get a true cross-section of views and give everyone an equal chance to be included. If you can make the person giving the information feel that he or she is helping - and know why it is necessary - you will find it easier to gain cooperation.

At Q.11 you must find out how many adults (aged 18 or over) there are living at the address (or dwelling unit). On each occasion where there is more than one adult living at the address, you must use a random selection procedure to choose one for interview, as follows:

At Q.13a, list all resident adults in alphabetical order of their first name or initial. For example, if there are 4 adults in this household:

<table>
<thead>
<tr>
<th>FIRST NAME OR INITIAL</th>
<th>PERSON NUMBER</th>
</tr>
</thead>
<tbody>
<tr>
<td>B.</td>
<td>01</td>
</tr>
<tr>
<td>J.</td>
<td>02</td>
</tr>
<tr>
<td>M.</td>
<td>03</td>
</tr>
<tr>
<td>P.</td>
<td>04</td>
</tr>
<tr>
<td></td>
<td>05</td>
</tr>
<tr>
<td></td>
<td>06</td>
</tr>
</tbody>
</table>

By referring to the selection label, you will see that person number 1 is to be interviewed, as this is the number printed under '4' on the label. At Q.15, write in the person number that is printed in the grid at Q.13a. So in the example, person number 1 (initial B) has been selected, and you will write '01' in the boxes at Q.15.

Once a random selection has been made, no substitute can be taken, even if there is another adult living there who is available and willing to be interviewed.

Please note two other points:

- if there are two people with the same first name, list them in alphabetical order of their full name. If the full names are the same, list them in order of their age, with the oldest first.
- make sure that you write in the initials: this is part of the way that backchecks can be carried out in your work, to reassure us that the correct person has been selected.

If there are 13 or more adults living at the selected address, use the look-up list at the end of these instructions to tell you which one to select for interview.

We need the following information for each person successfully interviewed:

- the name of the selected person, if you can obtain it. (You may find out the name only at the end of the interview.) Write this in the box on the front page of the ARF. If someone refuses to give their name, write in 'Refused'. This information must then be transferred into the Admin. Block when you have completed the interview.

- whether an interview was carried out - Q.17a, codes 51 and 52. Very occasionally, you may not be able to finish an interview, or you may have to leave gaps because a particular respondent is finding it hard to cope. But a 'partial' will count as a 'productive' interview when half or more of the questionnaire is completed - that is, that you get at least to the end of the economic activity and employment section. An 'unproductive' partial is one where less than this but at least some attitude questions are completed, and should be coded '10' at Q.18a.
- details about the self-completion questionnaire (Q.17b) - see Section 11.
A few last points about selecting respondents:

(i) Any responsible adult member (aged 18+) of the household may provide the information that you need in order to establish who is the person you are to interview.

(ii) Interview only persons living at listed addresses. Never follow anyone to a different address, although you could of course interview a person somewhere else (e.g. at work). No substitutes are permitted, so if the selected person is in hospital or away for the duration of the survey, or too old or too ill to be interviewed, then no interview can take place.

(iii) This survey is intended to cover only the population living in private households - not those living in institutions. But people can be living as private households within institutional premises. Even if the address you have been given appears to be that of an institution, check that no one is living in a private household on those premises before abandoning the possibility of an interview there.

At Q18b, you are asked to record for non-productives full reasons why there was no interview (or no full interview).

On BSA this year, as last year, we are carrying out telephone recontacting of selected unproductive sample members. For many of the sampled addresses we have managed to find out the names of electors living there (these are the names on the selection label on the ARF). Sometimes we have been able to get their phone numbers as well. Any refusals in your assignment (including office refusals) and proxy refusals will be referred to a special team at the Brentwood Telephone Unit, and they will attempt to 'convert' the selected person - at least so the extent of getting his or her agreement to a further visit from you.

The important point to remember is that these 'recontacted' addresses do not count as refusals, and so you keep the ARF until notified by your Area Manager:

- either that the door is open to you for a possible 'conversion'
- or that there is no prospect of a 'conversion' at that address

In designing the ARF, we have allowed for both these possibilities - that is why on the relevant questions, there are two answer columns: 'first round' and 'after telephone conversion'.

At Q18a, if you did not manage initially to obtain an interview, you ring an interim code, and at Q19a, after checking with your Area Manager, code whether or not the address/person is to be referred for attempted telephone conversion.

If it is to be referred for conversion, keep the ARF and, when you know the result, write it in at Q19b. If the attempted telephone conversion is unsuccessful, code 2 at Q19c, and the final outcome at Q20 - i.e. the outcome you have already coded earlier in the ARF, (not any different outcome that the telephone interviewer might obtained).

If the way is open for a possible conversion, from the first round outcome you have coded at Q20 will tell you how far back through the ARF you should go when you make your attempted recontact -

- No contact made with any adult at address
- Information about number of DUs refused
- Contact not made with responsible adult in selected DU
- Information about number of persons 18+ refused
- Any code 71-80 at Q18a

Go back to Q3
Go back to Q10
Go back to Q17

8. Field procedures

(i) Receiving your allocation and CAPI program

Your allocation containing your addresses and serial numbers will be transmitted to you by modem.

The CAPI program will be loaded at the briefing.

(ii) The Admin. Block

The Admin. block should be completed at home once you have reached a final outcome code on the ARF. The Admin. block mirrors the ARF and for the most part you will simply be transferring information from the ARF. Please transfer your answers exactly as they are on the ARF, following the instructions on the screen. If you recontacted the household after a telephone conversion, for some questions on the ARF you will have two codes - one for 'first round' and one for 'after telephone conversion'. In these cases, only enter the 'after telephone conversion' code - do not enter in the 'first round' code. For example, if at Q3 you did not manage to make contact with any adult at the 'first round', but after the telephone conversion you established 'the number of occupied units', on the Admin block you should enter the latter code only.

All the information from the ARF that we may require at a later date is now entered onto the Admin. Block, including the name, address and telephone number of the respondent.

IMPORTANT NOTE ABOUT CONFIDENTIALITY. Please note that as soon as you identifying pieces of information - such as names, addresses and phone numbers - have been entered, they will become concealed. From that time on, neither you nor anyone else who might have access to the laptop or to the questionnaire will be able to read them. They are held in a special 'sub-file' which goes to a different part of the Brentwood office where it is stored quite separately from the questionnaires. In addition, the data are 'scrubbed', built while they are held on the laptop and during transmission to the office.
You must complete an Admin block for every serial number, including unproductive, deadwood and office refusals. Failure to complete all Admin blocks will prevent you from doing your end of assignment clearout.

iii) Returning work

For those of you that have worked on FRS, please note that the procedure on BSA for sending back completed interviews is now the same. You will be transmitting your interviews back to Brentwood. Use the 'transmit/return work' option in the MAIN MENU to download your work. Please do this on a daily basis.

In addition, it is essential that each day's work is backed up onto the END disk so that there is always a spare copy (in case of disasters) of the work you have carried out (Admin as well as interviews). Always keep your END disk at home - separate from your computer and other disks. Use the Backup option in the MAIN MENU to do your backups.

You will then have the following items to send back by post. They should be sent at the same time as you download the interview data -

- the ARF
- the politics open-ended booklet (see section 11)
- the self-completion questionnaire (where you have collected it)
- the book information form (where the respondent has filled one in)

The ARF must always be sent back separately from all the other paperwork. The open-ended booklet, the self-completion questionnaire and the book information forms can all be sent back together in another envelope. However, if you are due to collect the self-completions questionnaire at a later date, send back the ARF, open-ended booklet and (if relevant) the book information form at the same time as downloading the interviews.

At the end of your assignment, do your end of work clearout as usual onto the END disk and send the disk back to Brentwood - it should contain backups of all your interviews as well.

9. The self-completion questionnaire

Respondents may fill in the self-completion questionnaire either:

- Immediately after the interview, before you leave. Ideally, we would prefer it to be filled in then. You could use the time to key in the admin. details and to 'tidy up' any other answers or notes.
- In the respondent's own time, after the interview. In this case you will need either to call back to pick up the questionnaire, or to arrange for the respondent to post it back to Brentwood (in which case you must leave behind one of the A4 prepaid addressed envelopes).

Under no circumstances should you give the self-completion questionnaire to the respondent to fill in before the interview.

Before handing over the self-completion questionnaire, there are some important things to remember:

1. You should write the Sampling Point number, the respondent's Serial Number and your Interviewer Number in the boxes provided, before you hand over the questionnaire. We strongly advise you to enter the Sampling Point number and your Interviewer Number on all questionnaires before your first day in the field.

Without these identifying numbers, the self-completion questionnaire cannot be used - and we will not be able to pay you for a completed questionnaire!

Please also remember to fill in Q17b on the ARF, to tell us what your plans for returning the questionnaire are:

Code
1 if you yourself are sending the self-completion questionnaire back to the office at the same time as sending the interview data down the modem;
2 if you yourself are collecting the self-completion questionnaire and sending it back separately at a later date;
3 if you leave the questionnaire with the respondent for him or her to return direct to the office.

Please remember to place the self-completion in a separate envelope from the ARF, even if you are returning them at the same time.

2. If you leave the self-completion questionnaire at an address after the interview, leave it only with the selected respondent - the person you interviewed. The self-completion questionnaire may be filled in only by the selected respondent. Please tell the respondent that we cannot use questionnaires filled in by anyone else. No substitute is acceptable.

3. If the respondent cannot fill in the questionnaire by the end of the visit at which you carry out the interview, please arrange to call back for it - provided you are still interviewing in that area. You could use one of your appointment cards to remind the respondent of when you are calling for the questionnaire. This will help remind the respondent how important the self-completion questionnaire is. If this is not possible, you should leave a prepaid A5 (not A4) envelope and ask the respondent to post the self-completion questionnaire back to the office. If you do this please remember to ring code '3' at Q17b on the ARF. (We will then know whether or not to send out reminders to respondents whose questionnaires have not arrived.)
4. Never leave the respondent in any doubt as to how he or she should return the questionnaire. If you have arranged to call back for it, make sure that your respondent realizes this and that you keep your appointment. If you cannot arrange to call back, make sure that the respondent knows it is to be posted back, and stress the need for (reasonable) speed.

5. If you do wait for the questionnaire or call to collect it later, please try to spend a minute checking through to see that it has all been filled in. Any gaps can then be tactfully pointed out to the respondent and he or she should be asked to fill them in, even if it means writing in ‘don’t know’ where appropriate.

6. On rare occasions, it might be clear that a willing respondent needs your help to complete the questionnaire, because of, say, poor eye-sight or illiteracy. In such cases, treat the questionnaire as if it were an extension of the interview, and tick the boxes accordingly, with the respondent at your side. You may make a claim for time spent with the respondent, but please give full details of the circumstances.

10. The interview questionnaire: general guidelines

First, a feature of such a wide-ranging questionnaire is that people are likely to be more interested in some questions than in others. The particular interviewing challenge posed is one of establishing the right speed at which to ask the questions. Rushing the respondent clearly has to be avoided, but an over-deliberate approach would be equally wrong. It may be that some respondents want to give a great deal of thought to some of the issues, but we are seeking to capture present attitudes, not to conduct a philosophical discussion or a political debate! If some respondents have no particular viewpoint on a topic, or if they cannot answer the question as posed, a ‘don’t know’ or ‘other answer’ code is acceptable; then you just move on to the next question. (‘Don’t Know’ can be entered at any question by using the left square bracket [ ).

Second, throughout the questionnaire we will be using a number of general phrases that may cause the respondent to ask for further explanation. Examples might be:

“Closer links with the European Union”
“Britain’s general industrial performance”

In these and many similar cases we do not wish to give the respondent any further explanation. The phrases used are, intended as general ones. Simply read the question or statement out, and tell respondents that they should answer in terms of whatever they understand by the phrase.

Third, at questions where an ‘other answer’ code has been provided, the other answer should be recorded verbatim. (Up to 60 characters can be keyed or written in. If the respondent gives a longer answer, press <Ctrl + F4> and use the ‘notepad’ to continue.) Unless specifically stated, ‘other answer’ should be coded only when one of the pre-coded answers will not fit after probing.

At questions where there is no specific provision for ‘other answer’, none is anticipated, although should they occur, they should be entered on the ‘notepad’ provided for comments. For questions in which no ‘other answer’ space is provided, first repeat the question with the appropriate emphasis before accepting an ‘other answer’. You can also use phrases like “Generally...”, “in general...”, etc. as probes, otherwise repeating the question word-by word.

Fourth, the interview questionnaire is divided into blocks of question topics (see below for details). Sometimes these are introduced by (e.g.) “And now some questions on...” but often they are not. Respondents do not need to be made aware of the various blocks or sections of the questionnaire during the course of the interview, the questionnaire is designed to be administered as a single unit with a reasonably smooth transition between groups of questions and between different topics.

If a respondent does break off the interview part way through (this happens very rarely), you may code it as a productive partial (outcome code 52) if you have got as far as the end of the “economic activity and the labour market” section. Otherwise, code as an unproductive partial (code 80).

11. The interview questionnaire: in detail
11. The interview questionnaire in detail

The question name which will appear on the lower half of your CAPI screen is listed in italics on the left of the page.

**HOUSEHOLD GRID**

*HouseHld*  This question asks for the total number of people in the household (including children). You should have, of course, just recorded the number of adults at Q11b on the ARF.

If you should discover at this stage that you have been given the wrong information at *HouseHld*:

- Do NOT change the ARF or redo the selection procedure
- DO record the correct information at *HouseHld*
- DO use <Ctrl & F4> to make a note of what happened.

When you come to fill in *Person/1a* in the Admin block, record the information as recorded at Q11b on the ARF. If this is at variance with the household grid, you will have to suppress a soft check <Shift & F3>.

RelResp  'Son/daughter' includes adopted children, step-children and foster children.

**NEWSPAPER READERSHIP/PARTY ID**

*WhPaper*  A single newspaper is the preferred answer here. If the respondent maintains, in spite of probing, that he or she reads more than one daily morning paper equally frequently, code 95 for 'Other' and list the relevant papers under *OthSpec*. If respondents say that the newspaper they read most frequently is a free daily paper, code in 95, ask for the name of the paper and list it under *OthSpec*.

**HOUSING**

*HomeType*  Code type of accommodation from observation and check with respondent

*Tenure/a*  Note that this question on tenure applies to the *whole accommodation* that the respondent's household occupies, not just to the part of the accommodation that the respondent may occupy. For instance, if the respondent was renting a room from a relative who owns the property outright, you would code 1, grid 9.

Own (leasehold/freehold) outright: those whose accommodation is wholly owned, i.e., they are not buying on a mortgage or with a loan. To own a leasehold property, the occupier must have a lease of 21 years or more.

Buying (leasehold/freehold) on mortgage: those buying with a mortgage or loan, from a bank, building society or other organisation. This category also includes those buying as part of a co-ownership scheme, or those buying leasehold property when the lease is 21 years or more.

Rented property: includes those where the lease is fewer than 21 years. Note that the rent need not be paid by a household member; it could be paid by another member of the family (e.g., son on behalf of mother) or by income support.

**POLITICS**

*VoteSyst*  Proportional representation is a voting system in which the number of votes parties get determines the number of seats they have in Parliament.

*ConLikes*  These four questions are 'open-ended'. It is vital to the success of the Politics module that we get as much information as possible at these questions. We will be conducting early work checks on these questions to ensure that we are getting the information we need. Instead of typing the answers into the CAPI program during the interview, we are asking you to write the answers in the open-ended booklet provided - you have one page for each question. When you are completing the Admin Block at home, you are asked to enter the verbatim answers into the CAPI program at ConLikes, ConDek, LabLikes, LabDek. It is imperative both at the interview and then in transferring to the Admin Block that you record the respondent's full verbatim answer. The Admin fee has been increased to reflect the work involved in this. Please note that you must send back the written answers in the open-ended booklet as well as copy them into the Admin Block.

**WELFARE BENEFITS AND HEALTH CARE**

*Date*  In most cases people will be able to choose between the two statements. In some cases, however, people may feel the two statements are related. In these cases, code 7 and key in 'other answer given' under *OthSpec*.

**ECONOMIC ACTIVITY**

*EconFW*  The respondent may well choose several types of economic activity undertaken 'last week' - that is the seven days ending last Sunday. If so, all of them should be coded. In this case, the highest on the list (the first that applies) is the one that determines which set of questions you ask next (there are sets of questions for, e.g., employees, self-employed people, unemployed people and so on). If a respondent is not sure or doesn't know, please probe to find out which of the items on the card comes closest to what they were doing in the last week. Please note that 'Don't know' is not
The following notes explain the categories at EconFW a little more fully:

**Code**

01 **In full-time education (not paid for by employer, including on vacation)**

All students, even those doing vacation jobs during the last week, are to be coded in this category. If the student is on vacation and will continue to be a student only if he or she passes an exam, assume that the exam will be passed and still treat the respondent as in full-time education. People on government training programmes (ET, etc.) are EXCLUDED from this category. They should be coded as 02.

02 **On government training/employment programme**

People on government-sponsored training or employment programmes should be coded here. They should not be coded as 'In paid work' or 'In full-time education' (even if they are doing the educational part of the programme).

03 **In paid work for at least 10 hours in the week**

This category includes all types of paid work, whether for an employer, or on the respondent's own account as self-employed. It includes casual, part-time and temporary work provided that it amounts to at least 10 hours in the week.

Voluntary work, or work carried out where only expenses are reimbursed or work paid for in kind (e.g., receiving board and lodgings only) where there is no financial transaction, are EXCLUDED from this category.

People temporarily away would include those who were absent from work last week because of sickness or injury, holiday, compassionate leave, or maternity leave, provided that they have a job to go back to with the same employer or as self-employed in the same field. It would also include people who were temporarily laid off, or on strike, or locked out, again provided that they have a job with the same employer to go back to, or to the same self-employed status, e.g., an actor "resting" between jobs.

People whose contract of employment incorporates regular but intermittent work (e.g., some staff in educational institutions, or professional sportmen, whose wages are paid only during term-time or in the season, and who therefore may not have worked last week) are included in this category.

04 **Waiting to take up paid work already accepted**

This category covers people not in work last week but who have a definite agreement to start work on a set date. It does not include people who have been given a vague promise of a job if and when a vacancy occurs.

05 **Unemployed and registered at a benefit office**

This category covers those who are both unemployed and registered as unemployed for benefit purposes. It does not cover those unemployed and registered only through the government employment service (e.g., Jobcentres, local government careers offices).

06 **Unemployed, not registered but actively looking for a job**

This category includes all unemployed, not registered for benefit, but who are actively looking for a job at that time, in at least 10 hours a week. This would include people seeking work through central or local government employment services (Jobcentres, local authority careers offices, etc.), people registered with private employment agencies, people answering advertisements for work, advertising for work or even people just actively looking around for opportunities.

07 **Unemployed, wanting a job but not actively looking for a job**

Include here any unemployed (again not registered for benefit), but who are not actively looking for a job at the moment. People who, for instance, have given up looking for work would be included here, or those who are ill and temporarily unable to look for work. Respondents should normally be left to decide for themselves whether an illness in this case is temporary or not. If in doubt, include it if it has lasted less than six months.

The remaining four categories cover those members of the population who are generally considered to be economically inactive.

08 **Permanently sick or disabled**

Covers people out of work and not seeking work because of permanent (or indefinite) sickness or disability. People who have never worked because of disability are included. Do not include retired people in poor health who would not be seeking work even if they were healthy. In cases of doubt over whether an illness or disability is permanent, treat it as permanent if it has lasted continuously for six months or more.

09 **Wholly retired from work**

Covers people who have retired from their occupation at approximately the normal retirement age or who have taken 'early retirement', and are not seeking further employment of any sort. Retired people who are permanently sick or have become disabled still count as retired.

Women who leave work on marriage to look after the home or to raise a family and who have not worked for many years, should be classified as 'looking after the home' rather than retired. But it is difficult to define retirement exactly. Apart from the proviso made about women, the respondent's description from the card should generally be accepted.

10 **Looking after the home**

Covers anyone more or less wholly involved in domestic duties when classifying economic position. There can be more than one person in a household in this category, here we are concerned only with the respondent's position.

11 **Doing something else is not on the show card**

Covers anyone who does not fit into any of the ten categories on the card. But remember that people who are in any kind of paid work (including casual self-employed jobs) of more than 10 hours in the week should not be included here.
any kind of paid work (including casual self-employed jobs) of more than 10 hours in the week should not be included here.

EmployA
Self-employed refers to work done on the person's own account, not being taxed through PAYE. Some self-employed persons will have their own businesses; some will simply be involved with casual or intermittent work. A person in a one-man business is not necessarily self-employed; if the business is a company, he or she may well be an employee of the company, drawing a salary and being taxed through PAYE.

Title
We wish to collect occupational details of almost all respondents, excluding only those who have never had a job. Ask everyone else about their current, future or last job - the computer will change this as necessary. Please probe fully for all relevant details; if any are missing, we may be unable to code occupation accurately.

EmpMake
If the respondent works from premises (e.g. a travelling salesperson) rather than REmpWkWk at a workplace, adapt the question wording accordingly.

OccSect2
Note that if you are asking someone about their last job (not present or future), and the status of the organisation has since changed (e.g. privatised), we are interested in the status of the organisation at the time that they were working there.

UnionSA
'Staff association' referred to at this question is an organisation of employees recognised, like a union, by management for the negotiation of (e.g.) pay and other conditions of employment. In certain professions (e.g. banking) staff associations exist alongside or instead of trade unions. If respondent is a member of both - code 'trade union'.

EmplyFW1
Answers to several questions in this section, including EmplyFW1, can be recorded either in months or years. Key in whatever answer is given and you will next be asked to record whether the answer was given in months or years. You should round up the answers to the nearest whole month. Two weeks or over is the next highest month; under two weeks is the next lowest. Probe far best estimated in all cases.

WkHrsTim
Here we want the respondent's own definition of whether they work full-time or part-time.

PayGap
At this question and elsewhere, the place of work is the establishment where or from which the respondent works. This will ordinarily have a single address. The employer of the respondent may of course have several establishments but it is only the respondents workplace that is being asked about. Several questions refer to the workplace so it must be clearly established at this question.

SPartner
These questions are asked about the respondent's main self-employed occupation. Bus/OK "Business" may not always be the best or most appropriate Spurers description. Bus/Fut and you may therefore need to explain that this question SpNumEmp refers to the paid job, whatever it is.

SNumEmp
Note that family members can be employees, BUT ONLY IF THEY RECEIVE A REGULAR WAGE OR SALARY. Please check if unsure.

EUROPE
ECPolicy
At this question, you show a card and read out the possible answer codes

EuFeder
Again, at this question you show a card and read out the possible answer codes

EUQuiz1-6
For your information, the answers to the EU quiz are -
1 True
2 True
3 False
4 True
5 False
6 False

COUNTRYSIDE/TRANSPORT
NCarInc
At this question and at NeedCar1, and NCarPTr you need only read out 'or a van' if the respondent has explicitly stated that he/she only uses a van.

GetAbout1-8
The answer options on the showcard are in a different order to the answer options on the screen. So it is vital to get the respondent to read out the answer, and not (for example) say 'the second answer on the card'

CatHalf1-2
The answer options on the showcard are in a different order to the answer options on the screen. So it is vital to get the respondent to read out the answer, and not (for example) say 'the second answer on the card'

CatQuar1-2
Note that for half of the interviews, we are reversing the order of this pair of questions. So, for odd serial numbers, you ask 'a quarter' first and 'a half' second, for even serial numbers, the order is 'a half' and 'a quarter'.

CHARITIES/NATIONAL LOTTERY
LostFuis
This marks the start of a series of questions asking respondents what they think money raised by the National Lottery gets spent on. A few of the areas asked about - as you may realise - are not ones which any money gets spent on!

LostFreg
Note that if someone says that they play the Lottery twice a week (soon to be introduced), you should code 1 ("Every week if I can").
RELIGION AND ETHNIC ORIGIN
RelRFW Please note that the first set of codes (2-12) all relate to different Christian denominations. Codes 13-18 relate to other (non-Christian) religions. If none of these pre-coded categories exactly corresponds with the respondent’s religion, the answer should be written in as ‘Other Protestant’, ‘Other Christian’ or ‘Other non-Christian’ as appropriate.
RaceOri2 ‘English’, ‘British’, ‘Welsh’, ‘Scottish’, or ‘Irish’ should be coded as ‘WHITE (Any European origin)’.

CLASSIFICATION
TEA2 Full-time continuous education refers to the period of full-time education which spans school and any other full-time education undertaken after school. Ignore any gaps in full-time education that lasted one academic year or less.
EaQFW1 The main types of exams and qualifications are included here. Code ALL that apply. You should key in under ‘other’ any that the respondent mentions that are not on the list, but we are interested only in educational or vocational exams and qualifications, not leisure activities, St. John’s Ambulance, etc.
EconFw We need to collect details of occupation for the respondent’s spouse or partner. The same principles apply as for respondent’s occupational activities. (see pp. 18-19 above).
BenFinFW If you are in any doubt about which benefit(s) the respondent or his/her spouse or partner is receiving, code ‘Other state benefit’ and write in.
HhIncome At HhIncome you should obtain the total income of the household from all sources, before tax. Income includes not only earnings but state benefits, occupational and other pensions, unearned income such as interest from savings, rent, etc. For respondents in paid work in the last 7 days you should also obtain their own earnings at REarn. In each case - for both income and earnings - we want figures before deductions of income tax, national insurance, contributory pension payments and so on. The questions refer to current level of income or earnings or, if that is convenient, to the nearest tax or other period for which the respondent is able to answer.

12. Reallocations and reissues
There are two special re-allocation and re-issue outcome codes:
Code 81: Re-allocated to another interviewer

Code 82: Re-issue, not covered at final cut-off-date
These will enable interviewers with addresses that fall into these categories to clear out their work at the end of an assignment.

If you have any queries or problems about selecting respondents or about how to complete the questionnaire, please do not hesitate to telephone a member of the British Social Attitudes team at the Head Office in London on 0171 259 1866. The researchers mainly working on this survey are Caroline Bryson and Lindsay Brook. For information about who to contact over other queries, see your Admin. Note.

When you have finished, please:
• Check the self-completion questionnaire (if you are collecting it)
• Double-check that you have entered the respondent’s Serial Number, the Sampling Point number and your Interviewer Number on the self-completion questionnaire.

We hope that all goes well and that you enjoy the assignment.

13. Look-up Chart
14. Look-up Chart

(For 13-100 Dwelling Units or 13-100 persons at one issued address)

1. Background

Since 1983, Social and Community Planning Research has fielded a large national survey in England, Scotland and Wales. This series, called British Social Attitudes, has become an important and much quoted source of information about contemporary Britain.

The study has three main outcomes:

a. A book published each autumn by Dartmouth, reporting on some of the previous year's results and commenting on changes in attitudes over time. There is a leaflet about the 13th Report with your survey materials. (We tell all respondents who are interested where they can get hold of a copy of the book on this year's survey.)

The findings of this report are widely known and discussed on radio and TV programmes, in articles and features in newspapers and magazines. Channel 4 News and BBC Newsnight devoted some ten minutes each to the 13th Report in November 1996. The Report has also been given front page coverage in the Independent and the Guardian and inside coverage in the Financial Times, The Times, The Observer and the Daily Mail.

b. The data from the survey are deposited in the Economic and Social Research Council (ESRC) Data Archive, and made available for analysis by the academic community, or any other interested data users.

c. Various government departments get summary reports, or tables based on the findings, and use them in their policy planning.

The British Social Attitudes (BSA) survey is designed to measure contemporary social attitudes and how they change over time. Such findings are of interest to government departments anxious to have more information about people's assessments of, for example, their work or the National Health Service. But the data are also contributions to social history, to allow analysts in the future to discover what people thought and felt about the major social issues of today.

The BSA survey series is funded mainly by one of the Sainsbury Family Charitable Trusts, with contributions also from several government departments, quangos and other grant-giving bodies. However, in 1997, as in other the last two general election years, Sainsbury has allowed their core funding to be put towards the British Election Study which SCPR is conducting as part of its work under GREST (the Centre for Research into Elections and Social Trends). The Economic and Social Research Council (ESRC) has provided a grant which enables a British Social Attitudes survey to take place in 1997. The ESRC grant, together with money from several government departments and other grant-giving bodies, is funding a 'scaled-down' British Social Attitudes survey in 1997, we are fielding one version of the questionnaire, rather than three versions we have fielded in recent years.

Topics covered this year include some asked about in all previous years - for example employment and the economy; and others asked less often: for example, about Europe, and the countryside. This year, only very few questions are new - mainly in the Europe and countryside modules.

Each annual survey consists of two elements - an interview questionnaire conducted by computer assisted personal interviewing (CAPI) and a self-completion supplement for each respondent to fill in after the interview. The supplement contains further questions on
topics covered in the main questionnaire. It also has some questions on people's attitudes towards working that are asked in twenty-four other countries (including the Republic of Ireland, the United States, and Australia) as part of an international survey of social attitudes.

2. Self-briefing

As you worked on the British Social Attitudes survey in 1995 or 1996, we are not asking you to attend a personal briefing. Rather, we are asking you to read these instructions carefully and to complete a self-briefing questionnaire and practice the interview session using the home practice instructions (both enclosed). For this, you will receive a three-hour self-briefing fee. Once you have completed the self-briefing questionnaire and gone through at least one mock interview using the home practice instructions, you should send them to Brentwood in order to claim your self-briefing fee. A disk is enclosed for you to send back your mock interview(s).

3. Notifying the police

You must notify the local police station in the area where you will be working. You should complete a copy of the Police Notification Form that has been included in your supplies. Attach a copy of the explanatory letter for respondents to the form and hand it in to the police. (You might try to see if it is possible to record these details in the book kept at the station desk.) Make a note of the name of the officer to whom you speak and the date of your call so that, in the event of any query or complaint to the police, you are fully covered. It is reassuring for elderly or suspicious respondents to be told that the police know about you and the survey, and that they can check with the police station.

PLEASE DO NOT START WORK UNTIL YOU HAVE DONE THIS.

4. The sample

The sample covers England, Wales and all but the highlands and islands of Scotland. There are 83 sampling points and 30 addresses have been selected at each point. The sample of 2,490 addresses is drawn from the Postcode Address File (PAF).

Because the sample is taken from the PAF, strictly it is a sample of ‘delivery points’ (i.e. letter boxes), and a sample of named individuals or households living at these addresses. It is important to remember that there may be no household or, conversely, two or more households at any selected address (in other words, there is not necessarily a one to one correspondence between delivery points and households). You will be able to deal with all such circumstances by following the instructions on the ARF.

It is vital that the person chosen for interview at each address is selected by strict random sampling principles. If we interviewed only those people who happened to be at home at the first call, or who were especially keen to be interviewed, our sample would almost certainly be unrepresentative of the adult population of Britain.

Only people aged 18 or over when you first make contact are eligible for interview on the main BSA survey. The assignments of 30 addresses are issued as labels attached to the Address Record Form (ARF), and on allocation disks containing the corresponding 30 serial numbers (but no addresses).

A full description of how to use the ARF and how to select respondents is given in Section 8 below.

5. Overview of procedures

In summary, the survey involves the following procedures:

i) tracing all issued addresses, making contact at all (apart from deadwood) and completing a paper ARF for each address;

ii) where there is more than one dwelling unit at an address, selecting one at random;

iii) conducting an interview with one adult selected at random at that address;

iv) giving a self-completion questionnaire to the selected respondent;

v) putting basic ARF information for every allocated address onto the computer (Admin block);

6. Contact procedures

For the past few years, advance letters have been sent from the office to all addresses drawn in BSA samples. Interviewers have said that they prefer this to a completely ‘cold call’, and most respondents prefer some advance notice.

But there are two problems with the advance letter. First, since we do not know in advance who will be selected to interview, it does not always reach the person who will be selected for interview. About this we can do little, except ask the person who opens the letter to show it to other members of the household, and let you have copies to show and leave behind.

The second problem has been that there is often a long gap between delivery of the letter and the interviewer’s first call at the address. This is a problem we can tackle, and so (in response to popular demand), we are this year asking you to post the advance letter yourself three days before you intend to make your first visit to the address.

The procedures are:

- check that you have been supplied with addressed envelopes containing the advance letter, for each address in your assignment (the address will show through the ‘window’ of the envelope).
- The envelopes are pre-paid - you do not need to use stamps.
- fill in the small slip to say who you are (but don’t add your address or phone number, as potential respondents might contact you and refuse even before you have a chance to meet them).
• post it to arrive two days before you plan to make your first visit (you may find it helpful to note the day of posting on the ARF).

The advance letter is identical to the explanatory letter. You will have supplies in your pack so that, if the selected person does not receive remembering the letter or if he/she has lost it, you can leave a copy behind. It important to do this in case the respondent wishes to contact one of the researchers, after you have left.

You must attempt to make contact at every address in your assignment except those notified to you as office refusals (not necessarily in the order given to you, but grouped and visited in 'economic' batches). You must call on at least 4 occasions, at different times of the day and spread across the fieldwork period before you classify the address as unproductive. If necessary, at least one of these calls should be in the evening and one at the weekend.

As always, it is very important to achieve a high response rate in this survey. Please keep trying to contact all the named addresses until the end of the fieldwork period, and call back as often as you can while you are still in the area. If you sense a respondent may be about to refuse, it often helps if you withdraw, offering to call again at a more convenient time, before a formal refusal is actually given. Only by interviewing as many as possible of those selected for the sample can we at SCPR be confident that the answers you get are representative of the views of everyone. We have provided you with a Question and Answer booklet which gives you some ideas on how to combat potential refusals.

To help achieve a good response rate, we are asking you to:

• call the Field Office before you return any incomplete or unanswerable addresses. We might be able to find out some information which will help you locate 'hard to find' addresses;
• return all completed paper ARFs and computer address work for other deadwood addresses (vacant premises, etc.) to the Field Office as soon as possible. We need to know where deadwood is as soon as possible in the fieldwork period;
• if you select a person who proves hard to contact, breaks an appointment, etc., keep on trying to 'convoy' him/her until the end of the fieldwork period, even if you have already made 4 calls. Then whenever you are in the neighbourhood try again, unless you have learned that the selected respondent will not be available until after the end of the fieldwork (due to holiday, illness, etc.) [Complete the ARF, and the computer address work for any non-contact, and return them to the Field Office with your final work.]

You must never substitute one address for another, nor substitute one selected individual for another. The sample has been randomly selected, and any substitutions would lead to bias in the results.

To remember to show your Identity Card when you introduce yourself. If you think it will help you to get an interview, you can give the person you initially contact a copy of the explanatory letter, or the newspaper leaflet describing the study, or the SCPR leaflet, or all three, as part of your introduction. In any case, you must leave a copy of the SCPR leaflet with each respondent after the interview, in case he/she has any queries after you have left and wishes to contact the office.

You may find it useful to say that SCPR is a non-profit making research institute, registered as an educational charity and independent from government.

The main interview will last, on average, about one hour, though it will be quite a bit shorter for those not in paid work. Older respondents may take a little longer. So please allow enough time between appointments.

7. Materials for the survey

1. Address Record Forms (ARFs) - 30 per assignment - see section 8
2. Copies of the advance letters & envelopes & extra copies of letter to show as necessary
3. Leaflets about SCPR - leave one with each respondent
4. 'Newspaper' leaflets about the survey - use as necessary
5. Book information forms
6. BSA 1997 Questionnaire Plan
7. Set of show cards
8. Self-completion questionnaires
9. Politics open-ended answer sheet booklets
10. Self-briefing Project Instructions
11. Self-briefing questionnaire
12. Home practice notes
13. Question & Answer Information
14. Pre-paid A5 envelopes. These are for respondents to use in returning the self-completion questionnaires in those cases where they cannot be picked up.
15. I blank END disk
16. Disk to install CAPI program (unless you have a fast modem, in which case you will pick up the program via the modem)
17. BSA leaflet (for your reference)

... and of course, a las-top computer with a rechargeable battery pack and shoulder bag.

We think you will find it helpful to check both show-cards (that they are a complete set and in the right order) AND the self-completion questionnaire in your pack. The printers have been known to make mistakes and it is better to discover them at home, before you begin your assignment, than later, in the field.

To check your showcards, you need to note that they should run from 1 to 35.
8. Address Record Forms (ARFs)

These are the forms on which your assignment of addressess is issued. You will have one for each address in your sample.

Besides going the selected address, the ARF has a number of other purposes:
- it provides space for you to record details of all the calls you make, and the outcomes
- it allows you to select one adult at random for interview (and one dwelling unit in the rare case where there is more than one dwelling unit at the address)
- in a case where you do not achieve an interview you record some details about why. For refusals or broken appointments, you also record some details about the person who refused or broke the appointment
- it is used to tell us how the Field Office might expect the self-completion questionnaire to be returned

It works just like a normal questionnaire and you should follow the filter instructions in the normal way.

You will see that the address, its serial number and other vital information are given on two separate labels on the first page of the ARF.

- the address label at the top left of the page looks like this:

| SERIAL NO. | SN: 90649M ** |
| SAMPLING POINT | 15 PRINCES CRESCENT SKIPTON N YORKSHIRE BD21 1HH |
| FIELD AREA | POINT: 022 AREA: 3 |

- the selection label on the top right of page 1 looks like this:

| SN: 90649M  |
| (HAROLD DENT) |
| PERSON/DU: 123456 |
| SELECT: 121355 |

This allows you to make random selections of dwelling units or individuals whenever you come across more than one of either at your selected address.

Also on page 1, you will see that there is space for you to keep a note of the times, dates and results of all your calls. Please remember to fill in at each separate visit: it will help you to plan any further visits you may have to make and helps other interviewers in case of reissues. (We are asking you to fill in the exact time of each call, as part of a study SCPR is carrying out into interviewer calling patterns).

Also on page 1, there is a box for you to write in the respondent's full name (see question 16).

Finally, on page 1 of the ARF, there is a box for you to write in the respondent's telephone number, if given. If it is not, write in 'No phone'. If he/she has no telephone, write in 'No phone'.

From here on, you fill in the ARF just like a questionnaire.

Qs. 1-9 deal with the address. If you find that the address contains two or more dwelling units (e.g. flat, bed-sitting rooms), Qs. 5 to 8 take you through the steps necessary to select one at random, by listing them all in a systematic way and using the selection label on page 1 to choose one at which to seek an interview. This will, in fact, happen only very rarely. But remember it is the exact address as given that counts. If the address on the label is 'Flat 4, 12 London Road', it is that part of accommodation that is the sampled address, not the whole of no. 12.

(If you happen to come across an address with 13 or more dwelling units, there is a look-up table at the end of these instructions that will tell you which one to select.)

It is essential that - if you need to select a dwelling unit - you follow the rules in making this selection. Only in this way can we be sure that we end up with a truly random sample of dwelling units and adults living there.

At Q. 8, write in the number of the selected dwelling unit, (the "DU" code), that is the number printed on the grid at Q. 5 - not the flat or room number of the unit itself.

If the address on the label is spelt wrong, or is incomplete, make any necessary changes on the label and on the Admin. Section on the laptop.

Qs. 10-16 help you to select the individual within the address for interview. A useful tactic is to explain at the outset that you have to ask a few questions beforehand to make sure you interview the 'right person' - to ensure that you get a true cross-section of views and give everyone an equal chance to be included. If you can make the person giving the information feel that he or she is helping - and know why it is necessary - you will find it easier to gain co-operation.

At Q. 11 you must find out how many adults (aged 18 or over) there are living at the address (or dwelling units). On each occasion where there is more than one adult
At Q 13a, list all resident adults in alphabetical order of their first name or initial. For example, if there are 4 adults in this household:

<table>
<thead>
<tr>
<th>FIRST NAME OR INITIAL</th>
<th>PERSON NUMBER</th>
</tr>
</thead>
<tbody>
<tr>
<td>B.</td>
<td>01</td>
</tr>
<tr>
<td>J.</td>
<td>02</td>
</tr>
<tr>
<td>M.</td>
<td>03</td>
</tr>
<tr>
<td>P.</td>
<td>04</td>
</tr>
<tr>
<td></td>
<td>05</td>
</tr>
<tr>
<td></td>
<td>06</td>
</tr>
</tbody>
</table>

if there are 4 adults in this household. By referring to the selection label, you will see that person number 1 is to be interviewed, as this is the number printed under '4' on the label. At Q 15, write in the person number that is printed in the grid at Q 13a. So in the example, person number 1 (initial B) has been selected, and you will write '01' in the boxes at Q 15. Once a random selection has been made, no substitute can be taken, even if there is another adult living there who is available and willing to be interviewed.

Please note two other points:

- If there are two people with the same first name, list them in alphabetical order of their full name. If the full names are the same, list them in order of their age, with the eldest first.
- Make sure that you write in the initials: this is part of the way that backchecks can be carried out to your work, to reassure us that the correct person has been selected.

If there are 13 or more adults living at the selected address, use the look-up list at the end of these instructions to tell you which one to select for interview.

We need the following information for each person successfully interviewed:

- The name of the selected person, if you can obtain it. (You may find out the name only at the end of the interview.) Write this in the box on the front page of the ARF. If someone refuses to give their name, write in 'Refused'. This information must then be transferred into the Admin. Block when you have completed the interview.
- Whether an interview was carried out - Q 17a, codes 51 and 52. Very occasionally, you may not be able to finish an interview, or you may have to leave gaps because a particular respondent is finding it hard to cope. But a 'partial' will count as a 'productive' interview when half or more of the questionnaire is completed - that is, that you get at least to the end of the socio-economic activity and employment section. An 'unproductive' partial is one where less than this but at least some attitude questions are completed, and should be coded '50' at Q 18a.
- Details about the self-completion questionnaire (Q 17b) - see Section 12.

A few last points about selecting respondents.

(i) Any responsible adult member (aged 18+) of the household may provide the information that you need in order to establish who it is you see to interview.

(ii) Interview only persons living at listed addresses. Never follow anyone to a different address, although you could of course interview a person somewhere else (e.g. at work). No substitutes are permitted, so if the selected person is in hospital or away for the duration of the survey, or too old or too ill to be interviewed, then no interview can take place.

(iii) This survey is intended to cover only the population living in private households - not those living in institutions. But people can be living as private households within institutional premises. Even if the address you have been given appears to be that of an institution, check that no one is living in a private household on those premises before abandoning the possibility of an interview there.

At Q 18b, you are asked to record full reasons why there was no interview (or no full interview) for non-products other than refusals and broken appointments.

On BSA this year, as we did last year on BSA and we are doing on several SCPR surveys, we are carrying out telephone recontacting. For many of the sampled addresses we have managed to find out the names of electors living there, and often their telephone numbers as well. This is the name in brackets on the selection label on the ARF. Any refusals in your assignment (including 'office refusals' and proxy refusals will be referred to a special team of interviewers in the Brentwood Telephone Unit, and they will attempt to 'convert' the selected person - at least to the extent of getting his or her agreement to a further visit from you.

The important point to remember is that these 'recontacted' addresses do not count as refusals, and so you keep the ARF until notified by your Area Manager.

- Either that the door is open to you for a possible 'conversion'
- Or that there is no prospect of a 'conversion' at that address.

In designing the ARF, we have allowed for both these possibilities - on the relevant questions, there are two answer columns 'first round' and 'after telephone conversion'.

At Q 18a, if you did not manage initially to obtain an interview, you ring an intermediate code, and at Q 19a, after checking with your Area Manager, code whether or not the address/selected person is to be referred for attempted telephone conversion.

If it is to be referred for conversion, write in the result at Q 19b. If the attempted telephone conversion is unsuccessful, code 2 at Q 19c, and the final outcome at Q 20 (i.e. the outcome you have already coded earlier in the ARF, and any different outcome that the telephone interviewer might obtained).

If the way is open for a possible conversion, from the first round outcome you have coded at Q 20 will tell you how far back through the ARF you should go when you make your attempted recontact.

No contact make with any adult at address
9. Field procedures

(i) Receiving your allocation and CAPI program

Your allocation containing your addresses and serial numbers will be transmitted to you by modem. The CAPI program will be loaded at the briefing.

(ii) The Admin Block

The Admin block should be completed at home once you have reached a final outcome code on the ARF. The Admin block mirrors the ARF and for the most part you will simply be transferring information from the ARF. Please transfer your answers exactly as they are on the ARF, following the instructions on the screen. If you recontracted the household after a telephone conversion, for some questions on the ARF you will have two codes - one for 'first round' and one for 'after telephone conversation'. In these cases, only enter the 'after telephone conversion' code - do not enter in the 'first round' code. For example, if at Q3 'no contact was made with any adult' at the 'first round', but after the telephone conversion you established 'the number of occupied units', on the Admin block you should enter the latter code only. All the information from the ARF that we may require at a later date is now entered onto the Admin Block, including the name, address and telephone number of the respondent.

IMPORTANT NOTE ABOUT CONFIDENTIALITY. Please note that as soon as any identifying pieces of information - such as names, addresses and 'phone numbers - have been entered, they will become protected. From that time on, neither you nor anyone else who might have access to the laptop or to the questionnaire will be able to read them. They are held in a special 'sub-file' which goes to a different part of the Brentwood office where it is stored quite separately from the questionnaires. In addition, the data are 'scrambled', both while they are held on the laptop and during transmission to the office.

You must complete an Admin block for every serial number, including unproductives, deadwood and office refusals. Failure to complete all Admin blocks will prevent you from doing your end of assignment clearout.

(iii) Returning work

For those of you that have worked on FRS, please note that the procedure on BSA for sending back completed interviews is now the same. You will be transmitting your interviews back to Brentwood. Use the Transmit/return work option in the MAIN MENU to download your work. Please do this on a daily basis.

In addition, it is essential that each day's work is backed up onto the END disk so that there is always a spare copy (in case of disasters!) of the work you have carried out (Admin, as well as interviews). Always keep your END disk at home - separate from your computer and other disks. Use the Backup option in the MAIN MENU to do your backups.

You will then have the following items to send back by post. They should be sent at the same time as you download the interview data -

- the ARF
- the police open-ended booklet (see section 12)
- the self-completion questionnaire (maybe)
- the book information form (maybe)

The ARF must always be sent back separately to all other paperwork. The open-ended booklet, the self-completion questionnaire and the book information forms can all be sent back together in another envelope. However, if you are due to collect the self-completion questionnaire at a later date, send back the ARF, open ended booklet and (if relevant) the book information form at the same time as downloading the interviews.

At the end of your assignment, do your end of work clearout as usual onto the END disk and send the disk back to Brentwood - it should contain backups of all your interviews as well.

10. The self-completion questionnaire

Respondents may fill in the self-completion questionnaire either:

- immediately after the interview, before you leave. Ideally, we would prefer it to be filled in then. You could use the time to key in the admin details and 'tidying up' any other answers or notes.
- in the respondent's own time after the interview. In this case you will need either to call back to pick up the questionnaire, or to arrange for the respondent to post it back to Brentwood (in which case you must leave one of the A5 prepaid addressed envelopes).

Under no circumstances should you give the self-completion questionnaire to the respondent to fill in before the interview.

Before handing over the self-completion questionnaire, there are some important things to remember:

1. You should write the Sampling Point number, the respondent's Serial Number and your Interviewer Number in the boxes provided, before you hand over the questionnaire. We strongly advise you to enter the Sampling
Point number and your Interviewer Number on all questionnaires before your first day in the field.

Without these identifying numbers, the self-completion questionnaire cannot be used - and we will not be able to pay you for a completed questionnaire!

Please also remember to fill in Q17b on the ARF, to tell us what your plans for returning the questionnaire are:

**Code**

1. if you yourself are sending the self-completion questionnaire back to the office at the same time as sending the interview data down the modem;
2. if you yourself are sending back the self-completion questionnaire separately (at a later date);
3. if you leave the questionnaire with the respondent for him or her to return direct to the office.

Please remember to place the self-completion in a separate envelope from the ARF, even if you are returning them at the same time.

2. If you leave the self-completion questionnaire at an address after the interview, leave it only with the selected respondent - the person you interviewed. The self-completion questionnaire may be filled in only by the selected respondent. Please tell the respondent that we cannot use questionnaires filled in by anyone else. No substitute is acceptable.

3. If the respondent cannot fill in the questionnaire by the end of the visit at which you carry out the interview, please arrange to call back for it - provided you are still interviewing in that area. You could use one of your appointment cards to remind the respondent of when you are coming for the questionnaire. This will help remind the respondent how important the self-completion questionnaire is. If this is not possible, you should leave a prepaid A5 (not A4) envelope and ask the respondent to post the self-completion questionnaire back to the office. If you do this please remember to ring code '3' at Q17b on the ARF. (We will then know whether or not to send out reminders to respondents whose questionnaires have not arrived.)

4. Never leave the respondent in any doubt as to how he or she should return the questionnaire. If you have arranged to call back for it, make sure that your respondent realises this and that you keep your appointment. If you cannot arrange to call back, make sure that the respondent knows it is to be posted back, and stress the need for (reasonable) speed.

5. If you do wait for the questionnaire or call to collect it later, please try to spend a minute checking through to see that it has all been filled in. Any gaps can then be tactfully pointed out to the respondent and he or she should be asked to fill them in, even if it means writing in 'don't know' where appropriate.

6. On rare occasions, it might be clear that a willing respondent needs your help to complete the questionnaire, because of, e.g., poor eye-sight or illiteracy. In such cases, treat the questionnaire as if it were an extension of the interview, and tick the boxes accordingly, with the respondent at your side. You may make a claim for time spent with the respondent, but please give full details of the circumstances.

### 11. The interview questionnaire: general guidelines

First, a feature of such a wide-ranging questionnaire is that people are likely to be more interested in some questions than in others. The particular interviewing challenge posed is one of establishing the right speed at which to ask the questions. Rushing the respondent clearly has to be avoided, but an over-detailed approach would be equally wrong. It may be that some respondents want to give a great deal of thought to some of the issues, but we are seeking to capture present attitudes, not to conduct a philosophical discussion or a political debate! If some respondents have no particular viewpoint on a topic, or if they cannot answer the question as posed, a 'don't know' or 'other answer' code is acceptable, then you just move on to the next question. ('Don't Know' can be entered at any question by using the left square bracket (]).

Second, throughout the questionnaire we will be using a number of general phrases that may cause the respondent to ask for further explanation. Examples might be:

- "Closer links with the European Union"
- "Britain's general industrial performance"

In these and many similar cases we do not wish to give the respondent any further explanation. The phrases used are intended as general ones. Simply read the question or statement out, and tell respondents that they should answer in terms of whatever they understand by the phrase.

Third, at questions where an 'other answer' code has been provided, the other answer should be recorded verbatim. (Up to 60 characters can be keyed or written in. If the respondent gives a longer answer, press <Ctrl + F4> and use the 'notepad' to continue.) Unless specifically stated, 'other answer' should be coded only when one of the pre-coded answers will not fit after probing.

At questions where there is no specific provision for 'other answer', none is anticipated, although should they occur, they should be entered on the 'notepad' provided for comments. For questions in which no 'other answer' space is provided, first repeat the question with the appropriate emphasis before accepting an 'other answer'. You can also use phrases like "Generally...", "In general...", etc. as probes, otherwise repeating the question wording exactly.

Fourth, the interview questionnaire is divided into blocks of question topics (see below for details). Sometimes these are introduced by (e.g.) "And now some questions on..." but often they are not. Respondents do not need to be made aware...
of the various blocks or sections of the questionnaire during the course of the
interview, the questionnaire is designed to be administered as a single unit with a
reasonably smooth transition between groups of questions and different topics.

If a respondent does break off the interview part way through (this happens very rarely),
you may code it as a productive partial (outcome code 52) if you have got as far as the end
of the Economic activity and the labour market section. Otherwise, code as an
unproductive partial (code 80).

12. The interview questionnaire: in detail

The question name which will appear on the lower half of your CAPI screen is listed
in italics on the left of the page.

HOUSEHOLD GRID

HouseId

This question asks for the total number of people in the household
(including children). You should have, of course, just recorded the number of
adults at Q11b on the ARF. If you should discover at this stage that you
have been given the wrong information at HouseId:

- Do NOT change the ARF or redo the selection procedure
- DO record the correct information at HouseId
- DO use <Ctrl & F4> to make a note of what happened.

When you come to fill in Perm1T in the Admin block, record the
information as recorded at Q11b on the ARF. If this is at variance with the
household grid, you will have to suppress a soft check <Shift & F3>.

RelResp

'Son/daughter' includes adopted children, step-children and foster children.

NEWSPAPER READERSHIP/PARTY ID

WhPaper

A single newspaper is the preferred answer here. If the respondent
maintains, in spite of probing, that he or she reads more than one daily
morning paper equally frequently, code 95 for 'Other' and list the relevant
papers under OttSpec. If respondents say that the newspaper they read
most frequently is a free daily paper, code in 95, ask for the name of the
paper and list it under OttSpec.

HOUSING

HomeType

code type of accommodation from observation and check with respondent

Tenure

Note that this question on tenure applies to the whole accommodation that
the respondent's household occupies, not just to the part of the
accommodation that the respondent may occupy. For instance, if the
respondent was renting a room from a relative who owns the property
outright, you would code 1, not 9.

Own (leasehold/freehold) outright: those whose accommodation is
wholly owned, i.e., they are not buying on a mortgage or with a loan. To
own a leasehold property, the occupier must have a lease of 21 years or
more.

Buying (leasehold/freehold) on mortgage: those buying with a mortgage
or loan, from a bank, building society or other organisation. This category
also includes those buying as part of a co-ownership scheme, or those
buying leasehold property when the lease is 21 years or more.

Rented property: includes those where the lease is fewer than 21 years.
Note that the rent need not be paid by a household member: it could be paid
by another member of the family (e.g., son on behalf of mother) or by
income support.

POLITICS

VoteSys

Proportional representation is a voting system in which the number of votes
parties get determines the number of seats they have in Parliament.

Lindsay -

These four questions are open-ended questions. It is imperative to the
variable names?

success of this Politics module that we get as much information as
possible at these questions. We will be conducting early work checks
on these questions to ensure that we are getting the information we need. Instead of typing the answers into the CAPI program during the interview, we are asking you to write the answers in the open-ended booklet provided - you have one page for each question. When you are completing the Admin Block at home, you are asked to enter the verbatim answers into the CAPI program at Lindsay - variable names?. It is imperative that both at the interview and then in transferring to the Admin Block that full verbatim is recorded. The Admin fee has been increased to reflect the work involved in this. Please note that you must send back the written answers in the open-ended booklet as well as copy them into the Admin Block.

WELFARE BENEFITS AND HEALTH CARE

Dole
In most cases people will be able to choose between the two statements. In some cases, however, people may feel the two statements are related. In these cases, code 7 and key in 'other answer given' under Own Spec.

ECONOMIC ACTIVITY

EconFW
The respondent may well choose several types of economic activity undertaken 'last week' - that is the seven days ending last Sunday. If so, all of them should be coded. In this case, the highest on the list (the first that applies) is the one that determines which set of questions you ask next (there are sets of questions for, e.g., employees, self-employed people, unemployed people and so on). If a respondent is not sure or doesn't know, please probe to find out which of the items on the card comes closest to what they were doing in the last week. Please note that 'Don't know' is not a valid code for this question and if entered you will be asked to change it. Respondents can refuse to answer the question.

If you interview on a Sunday, the seven days are the ones ending the previous Sunday.

The following notes explain the categories at EconFW a little more fully:

Code

01 In full-time education (not paid for by employer, including on vacation)
All students, even those doing vacation jobs during the last week, are to be coded in this category. If the student is on vacation and will continue to be a student only if he or she passes an exam, assume that the exam will be passed and still treat the respondent as in full-time education. People on government training programmes (ET, etc.) are EXCLUDED from this category. They should be counted as 02.

02 On government training/employment programme
People on government-sponsored training or employment programmes should be coded here. They should not be coded as 'In paid work' or 'In full-time education' (even if they are doing the educational part of the programme).

03 In paid work for at least 10 hours in the week (or away temporarily from that work)
This category includes all types of paid work, whether for an employer, or on the respondent's own account as self-employed. It includes casual, part-time and temporary work provided that it amounts to at least 10 hours in the week.

Voluntary work, or work carried out where only expenses are reimbursed or work paid for in kind (e.g., receiving board and lodgings only) where there is no financial transaction, are EXCLUDED from this category.

People temporarily away would include those who were absent from work last week because of sickness or injury, holiday, compassionate leave, or maternity leave, provided that they have a job to go back to with the same employer or as self-employed in the same field. It would also include people who were temporarily laid off, or on strike, or locked out, again provided that they have a job with the same employer to go back to, or to the same self-employed status, e.g., an actor 'resting' between jobs.

People whose contract of employment incorporates regular but intermittent work (e.g., some staff in educational institutions, or professional sportmen, whose wages are paid only during term-time or in the season, and who therefore may not have worked last week) are included in this category.

04 Waiting to take up paid work already accepted
This category covers people not in work last week but who have a definite agreement to start work on a set date. It does not include people who have been given a vague promise of a job if and when a vacancy occurs.

05 Unemployed and registered at a benefit office
This category covers those who are both unemployed and registered as unemployed for benefit purposes. It does not cover those unemployed and registered only through the government employment service (e.g., Jobcentre, local government careers offices).

06 Unemployed, not registered but actively looking for a job
This category includes all unemployed, not registered for benefit, but who are actively looking for a job of at least 10 hours a week. This would include people seeking work through central or local government employment services (Jobcentres, local authority careers offices, etc.), people registered with private employment agencies, people answering advertisements for work, advertising for work or even people just actively looking around for opportunities.

07 Unemployed, wanting a job but not actively looking for a job
Include here any unemployed (again not registered for benefit), but who are not actively looking for a job at the moment. People who, for instance, have given up looking for work would be included here, or those who are ill and temporarily unable to look for work. Respondents should normally be left to decide for themselves whether an illness in this case is temporary or not. If in doubt, include it if it has lasted less than six months.
The remaining four categories cover those members of the population who are generally considered to be economically inactive.

08 Permanently sick or disabled covers people out of work and not seeking work because of permanent (or indefinite) sickness or disability. People who have never worked because of disability are included. Do not include retired people in poor health who would not be seeking work even if they were healthy. In cases of doubt over whether an illness or disability is permanent, treat it as permanent if it has lasted continuously for six months or more.

09 Who has retired from work covers people who have retired from their occupation at approximately the normal retirement age or who have taken 'early retirement', and are not seeking further employment of any sort. Retired people who are permanently sick or have become disabled still count as retired.

Women who leave work on marriage to look after the home or to raise a family and who have not worked for many years, should be classified as 'looking after the home' rather than retired. But it is difficult to define retirement exactly. Apart from the proviso made about women, the respondent's description from the card should generally be accepted.

10 Looking after the home covers anyone more or less wholly involved in domestic duties when classifying economic position. There can be more than one person in a household in this category, here we are concerned only with the respondent's position.

11 Doing something else is not on the show card. It covers anyone who does not fit into any of the ten categories on the card. But remember that people who are in any kind of paid work (including casual self-employed jobs) of more than 10 hours in the week should not be included here.

Employa Self-employed refers to work done on the person's own account, not being taxed through PAYE. Some self-employed persons will have their own businesses, some will simply be involved with casual or intermittent work.

A person in a one-man business is not necessarily self-employed; if the business is a company, he or she may well be an employee of the company, drawing a salary and being taxed through PAYE.

Title We wish to collect occupational details of almost all respondents, excluding only those who have never had a job.

Ask everyone else about their current, future or last job - the computer will change the tense as necessary. Please probe fully for all relevant details; if any are missing, we may be unable to code occupation accurately.

EmpMake If the respondent works from premises (e.g. a travelling salesperson) rather than REmpWP or WP in a workplace, adapt the question wording accordingly.

OctSec2 Note that if you are asking someone about their last job (not present or future), and the status of the organisation has since changed (e.g. privatised), we are interested in the status of the organisation at the time that they were working there.

UnionSA 'Staff association' referred to at this question is an organisation of employees recognised, like a union, by management for the negotiation of (e.g.) pay and other conditions of employment. In certain professions (e.g. banking) staff associations exist alongside or instead of trade unions. If respondent is a member of both - code 'trade union'.

EmptyFWI Answers to several questions in this section, including EmptyFWI, can be recorded either in months or years. Key in whatever answer is given and you will next be asked to record whether the answer was given in months or years. You should round up the answers to the nearest whole month. Two weeks or over is the next highest month; under two weeks is the next lowest. Probe for best estimate in all cases.

WJobTim Here we want the respondent's own definition of whether they work full-time.

PayGap At this question and elsewhere, the place of work is the establishment where or from which the respondent works. This will ordinarily have a single address. The employer of the respondent may of course have several establishments but it is only the respondents workplace that is being asked about. Several questions refer to the workplace so it must be clearly established at this question.

SPartners These questions are asked about the respondent's main self-employed occupation. Bus/10 "Business" may not always be the best or most appropriate SPartners description, Bus/11, and you may therefore need to explain that this question SNumEmp refers to the paid job, whatever it is.

SEmpNum Note that family members can be employees, BUT ONLY IF THEY RECEIVE A REGULAR WAGE OR SALARY. Please check if unsure.

EUROPE ECpolicy This question is both a card and a read out

EUFeder This question is both a card and a read out

EUQuiz1-6 For your information, the answers to the 'EU quiz' are -

</tr>
</tbody>
</table>
COUNTRYSIDE/TRANSPORT

NCarincv At this question and at NeedCar1, and NCarpTr you need only read out 'or a van' if the respondent has explicitly stated that he/she only uses a van.

GetAbom1-3 The answer options on the showcard are in a different order to the answer option on the screen.

CarHoF1-2 Note that for half of the interviewed, we are reversing the order of the two pairs of questions. So, for odd serial numbers, you ask 'a quarter' first and 'a half' second; for even serial numbers, the order is 'a half' and 'a quarter'.

CHARITIES/NATIONAL LOTTERY

LotPrst etc This marks the start of a series of questions asking respondents what they think money raised by the National Lottery gets spent on. A few of the areas asked about - as you may realise - are not ones which any money gets spent on!

Lindsay, Note that if someone says they play the Lottery twice a week (soon to be introduced), you should code 1 that they play 'Every week'.

variable?

RELIGION AND ETHNIC ORIGIN

RelRFW Please note that the first set of codes (2-12) all relate to different Christian denominations. Codes 13-18 relate to other (non-Christian) religions. If none of these pre-coded categories exactly corresponds with the respondent's religion, the answer should be written in as 'Other Protestant', 'Other Christian' or 'Other non-Christian' as appropriate.

RaceOri2 'English', 'British', 'Welsh', 'Scottish', or 'Irish' should be coded as (Any European origin). Note that on Version A and B, this question appears in the Social Divisions module.

CLASSIFICATION

TEA2 Full-time continuous education refers to the period of full-time education which spans school and any other full-time education undertaken after school. Ignore any gaps in full-time education that lasted one academic year or less.

EdQFW1 EdQFW2 The main types of exams and qualifications are included here. Code ALL that apply. You should key in under 'other activity that the respondent mentions that are not on the list, but we are interested only in educational or vocational exams and qualifications, not leisure activities, St John's Ambulance, etc.

EconFW We need to collect details of occupation for the respondent's spouse or partner. The same principles apply as for respondent's occupational activities (see p. above).

BenFONFW spouse or partner If you are in any doubt about which benefit(s) the respondent or his/her partner is receiving, code 'Other state benefit' and write in.

Hidcome At Hidcome you should obtain the total income of the household from all sources, before tax. Income includes not only earnings but state benefits, occupational and other pensions, unearned income such as interest from savings, rent, etc. For respondents in paid work in the last 7 days you should also obtain their own earnings at REarn.

In each case - for both income and earnings - we want figures before deductions of income tax, national insurance, contributory pension payments and so on. The questions refer to current level of income or earnings or, if that is convenient, to the nearest tax or other period for which the respondent is able to answer.

13. Reallocations and reissues

There are two special re-allocation and re-issue outcome codes:

Code 81: Re-allocated to another interviewer
Code 82: Re-issue, not covered at final cut-off-date

These will enable interviewers with addresses that fall into these categories to clear out their work at the end of an assignment.

If you have any queries or problems about how to complete the questionnaire, please do not hesitate to telephone a member of the British Social Attitudes team at the Head Office in London on 0171 259 8666. The researchers on this survey are Caroline Bryson and Lindsay Brook. Queries about field arrangements should be raised with your supervisor or Area Manager in the first instance. If you need to phone the Field Office in Brentwood, their number is 01277 201 600. - LINDSAY DO WE GIVE THEM THE DARLINGTON NUMBER INSTEAD?

When you have finished, please:

- Check the self-completion questionnaire (if you are collecting it)
- Double-check that you have entered the respondent's Serial Number, the Sampling Point number and your Interviewer Number on the self-completion questionnaire.

We hope that all goes well and that you enjoy the assignment.
## 14. Look-up Chart

1986 report
Do people have consistent attitudes?
Work and the work ethic
Political partisanship
A green and pleasant land
British & American attitudes: similarities and contrasts
Interim report: education
Interim report: public spending and the welfare state
Interim report: housing
Interim report: social and moral issues

Anthony Heath
Michael Martin
John Curtice
Ken Young
James Davies
Harvey Goldstein
Nick Bosanquet
Nick Bosanquet
Colin Airey and Lindsay Brook

1987 report
Citizenship and welfare
Business and industry
Political culture
Nuclear reactions
Food values: health & diet
Family matters
Interim report: the countryside
Interim report: party politics

Peter Taylor-Gooby
Martin Collins
Anthony Heath & Richard Topf
Ken Young
Aubrey Sheiham & Michael Marmot
Sheena Ashford
Ken Young
John Curtice

The 5th report (1989)
The price of honesty
Education matters
Trends in permissiveness
Working-class conservatives and middle-class socialists
The public’s response to AIDS
An ailing state of national health
Trust in the establishment
One nation?

Michael Johnston
Paul Flather
Stephen Harding
Anthony Heath & Geoff Evans
Lindsay Brook
Nick Bosanquet
Roger Jowell & Richard Topf
John Curtice
Interim report: rural prospects
Interim report: a woman's work

The 6th report (international)
Measuring national differences
International patterns of work
The role of the state
Inequality and welfare
Kinship and friendship
Understanding of science in Britain and the USA

The influence of the recession
Religion in Britain, Ireland and the USA
The North-South Divide
Men and women at work and at home
Changes in values
What price profits?
Community relations in Northern Ireland
Class, race & opportunity

Ken Young
Sharon Witherspoon

James Davies & Roger Jowell
David Blanchflower & Andrew Oswald
Peter Taylor-Gooby
Tom Smith
Janet Finch
Geoff Evans and John Durant
Richard Topf, Peter Mohler & Anthony Heath
Stephen Harding

Peter Taylor-Gooby
Neil Millward
Jacqueline Scott
Ken Young
Kaye Wellings & Jane Wadsworth
David Blanchflower & Andrew Oswald
Aubrey Sheiham, Michael Marmot,
Bridget Taylor & Andrew Brown
John Rentoul
John Curtice & Tony Gallagher

Anthony Heath & Dorren McMahon
Peter Taylor-Gooby
A H Halsey
Tony Gallagher
John Curtice
Ken Young
Sharon Withespoon & Gillian Prior
Yoav Ben-Shlomo, Aubrey Sheiham &
Michael Marmot
Lindsay Brook & Ed Cape
Bridget Taylor

Sharon Witherspoon & Jean Martin
Frances Cairncross
Andrew Greeley
John Curtice
Kathleen Kieman
Anthony Heath & Dorren McMahon
Michael Johnston
Tony Gallagher
Ken Young
Interim report: charitable giving
Interim report: the national health

The 10th report (International Social Attitudes)
Disengaging from democracy
The family way
Religion, morality and politics
What citizens want from the state
Satisfying work - if you can get it
Class conflict and inequality

Do we really want more public spending?
Where next for transport policy?
Welfare outside the state
Work in a changing climate
Improving health
Middle-class politics
Authoritarianism updated
Education: reaction to reform
The greening of Britain: romance and rationality
Time-series and lap-tops: the change to
computer-assisted interviewing

The 12th report
Comfortable, marginal and excluded: who should pay higher taxes for a better welfare state?
Fear of crime
Teenagers and their politics
Working mothers: choice or circumstance?
Faith in local democracy
The state of the Union: attitudes towards Europe
The sceptical electorate
Differences of degree: attitudes towards universities
Libertarianism in retreat

Steve Barnett & Susan Saxon-Harold
Nick Bosanquet

Michael Johnston
Jackie Scott, Michael Braun & Duane
Alwin
Anthony Heath, Bridget Taylor & Gabor
Toka
Peter Taylor-Gooby
John Curtice
Geoff Evans

David Lipsey
Gordon Stokes & Bridget Taylor
Peter-Taylor Gooby
Barry Hedges
Nick Bosanquet
Anthony Heath & Mike Savage
Daphne Abrendt & Ken Young
A H Halsey & Denise Lievesley
Sharon Witherspoon

Peter Lynn & Susan Purdon

Peter-Taylor Gooby
Lizanne Dowds & Daphne Abrendt
Alison Park
Katarina Thomson
Ken Young & Nirmala Rao
Geoff Evans
John Curtice and Roger Jowell

Chris Rootes & Anthony Heath
Lindsay Brook & Ed Cape
The 13th report
One nation again?
Portraying sex: the limits of tolerance
Relative values: kinship and friendship
Reactions to a flexible labour market
Illegal drugs: liberal and restrictive attitudes
Northern Ireland during the cease-fire
National Identity
Matters of life and death: attitudes to euthanasia
Public spending and taxation

John Curtice
Steven Barnett & Katarina Thomson
Francis McGlone, Alison Park & Ceridwen Roberts
Peter Spencer
Arthur Gould, Andrew Shaw & Daphne Ahrendt
Geoffrey Evans
Lizanne Dowds & Ken Young

David Donnison & Caroline Bryson
Lindsay Brook, John Hall & Jan Preston

The 14th Report
Thatcher's Children?
What about the workers?
The NHS: new prescriptions needed?
Benefit claimants: villains or victims?
Trust in the political system
Green in word...
The housing divide
Politics and the news media: mobilisation or videomalaise?
How we view violence
Crime and punishment

Anthony Heath & Alison Park
Alex Bryson & Stephen McKay
Ken Judge, Jo-Ann Mulligan & Bill New
Caroline Bryson
John Curtice & Roger Jowell
Bridget Taylor
Alan Murie

Kenneth Newton
Steven Barnett & Katarina Thomson
Roger Tarling and Lizanne Dowds

The 15th Report (British - and European - Social Attitudes)
National identity and national pride
Partner, parent, worker: family and gender roles

What people expect from the state: plus ça change?
Commitment to the welfare state
The rewards of work
The greening of Europe

The end of materialism?
East meets West
How Britain views the EU

David McCrone & Paula Surridge
Jaqueline Scott, Michael Braun & Duane Alwin

Max Kaase & Kenneth Newton
Peter Taylor-Gooby
Helen Russell
Russell Dalton & Robert Rohrschneider
Caroline Bryson & John Curtice
Alan Renwick & Gabor Toka
Geoffrey Evans
APPENDIX K

INTERNATIONAL SOCIAL SURVEY PROGRAMME (ISSP)

Contact names and addresses
ISSP members and Archive

Australia
Dr Jonathan Kelley, Dr Mariah Evans
International Survey Centre, RSSS
The Australian National University
Canberra ACT 0200, Australia
Tel: (00 61 6) 249 3035 (International Survey Centre)
    (00 61 6) 297 2937 (J. Kelley, M. Evans)
