J    Questionnaire development and testing
K    Specification for different weights
1. Background

1.1 Introduction to the British Crime Survey

The British Crime Survey (BCS) is now a well-established study, one of the largest social research surveys conducted in England and Wales. The 2001 BCS was the largest to date, with a target sample of 40,000 households in England and Wales, consisting of a representative cross-section of 37,000 households and a special booster sample of 3,000 non-white adults. The survey is carried out for the Home Office, and is managed by a team of researchers in the Research, Statistics and Development Directorate. They develop each sweep of the BCS in collaboration with an external research organisation. In 2001, BMRB Social Research was commissioned to conduct the BCS. Ipsos-RSL was sub-contracted to assist with the fieldwork in the first six months.

The BCS is primarily a victimisation survey, in which respondents are asked about the experiences of property crimes of the household (e.g. burglary) and personal crimes (e.g. theft from a person) which they themselves have experienced.

The reference period to which the BCS relates has traditionally been the last full calendar year. However, following the move to continuous interviewing in the 2001 sweep the reference period was changed to the last 12 months before the date of interview. The wording of the series of questions that are asked to elicit victimisation experiences, have been held constant throughout every sweep of the BCS.

Members of the public are asked directly about their experience of crime, whether or not they reported these incidents to the police. As such the BCS provides a record of peoples’ experiences of crime which is unaffected by variations in reporting behaviour of victims or variations over time and between places in the police practices about recording crime. The BCS and police recorded figures should be seen as a complementary series, which together provide a better picture of crime than could be obtained from either series alone.

The scope of the BCS goes well beyond the counting of criminal incidents, although it is for this estimate that it has become established as a definitive source of information. In order to classify incidents, the BCS collects extensive information about the victims of crime, the circumstances in which incidents occur and the behaviour of offenders in committing crimes. In this way, the survey provides information to inform crime reduction measures and to gauge their effectiveness. The BCS has been successful at developing special measures to estimate the extent of domestic violence, stalking and sexual victimisation. These crimes, while probably the least-reported to the police have among the most serious impacts upon their victims.

As well as providing estimates of victimisation, the BCS has been used to collect high-quality information on a range of other crime-related topics, which are designed to inform the Home Office’s other performance targets. Some of these topics have been well-established aspects of the BCS, providing time-series data on matters such as contacts between the public and the police, attitudes towards aspects of the criminal justice system and exposure to illegal drugs.

The data arising from the BCS are mainly reported by the Home Office’s Crime and Criminal Justice Unit (CCJU) in the form of:
• It is planned that a statistical bulletin based on BCS interviews in the financial year will in future appear in the Summer following the financial year. The first of these reports, which also provides detailed information on police recorded crime figures, has appeared in July 2002 (Simmons and colleagues, Home Office statistical Bulletin, 7/02, ISSN 1358-510X, which can be found at: http://www.homeoffice.gov.uk/rdspdfs2/hosb702.pdf
• Longer subject-specific reports in the Home Office Research Series (HORS),
• Brief Research Papers dealing with specific topics.

A statistical bulletin was published in the Autumn of the 2001 survey year which reported headline victimisation data on Type A data only without calibration weighting (Kershaw et al, Home Office Statistical Bulletin 18/01 by Chris Kershaw, Natalia Chivite-Matthews, Carys Thomas and Rebecca Aust, ISSN 1358-510X). This report can be found at: http://www.homeoffice.gov.uk/rdspdfs/hosb1801.pdf

For more details, see http://www.homeoffice.gov.uk/rdsp/bcs1.html

1.2 Structure of the technical report

This report documents the 2001 British Crime Survey (England and Wales). The report covers all sample that was issued in 2001, including interviews that actually took place in 2002. The sample design is set out in Chapter 2, showing how the Home Office’s requirements were translated into a detailed specification. Data collection is the major task for the organisation commissioned to conduct the BCS and is the central part of this report, in terms of the questionnaire and response rate. This is covered in Chapter 3 (Questionnaire) and Chapter 4 (Fieldwork). Chapter 5 and 6 give details of the tasks that are involved in preparing the data for analysis, in particular the coding and offence classification, but also explains the data files. Chapter 7 outlines the weighting required for analysis of the data. Chapter 8 provides the results of some checks on the profile of the BCS achieved sample against estimates for the population that the BCS aims to represent.

Although it documents the way in which the BCS was conducted, this report does not explain how to analyse the data set. It is worth emphasising that the BCS is a complex study with data organised at different levels (households, individuals, and incidents) and it has numerous sub-samples that were asked specific questions. Accordingly considerable effort and expertise is required to analyse the data and to interpret it in a valid manner. Some of the analysis routines that play a key role in the published estimates are implemented after the data have been handed over to the Home Office, and are not documented in this report. Readers should be aware that the Home Office research team have produced training documents on BCS analysis and also run training days for those who wish to use the data. Data files from all the past sweeps of the BCS have been deposited in SPSS format with the Data Archive at the University of Essex. The 2001 BCS will be deposited in due course.

Considerable emphasis is given in the course of conducting the interview to assure sample members that the information they provide will be held in confidence. For this reason, the data set does not identify the location of the sampled areas (postcode sectors) and this information is not released to the Home Office by the survey organisations.
Information available at postcode sector level can be linked to BCS data from the 1994 sweep onwards, but there are costs involved in doing this that would need to be met by the researcher requesting such linkage. In considering such requests, priority is given to maintaining the anonymity of sample members. This means that most requests for BCS data for linkage to other information about small areas must either be refused or are likely to require data to be aggregated to such an extent that the aim of local area analysis is lost. It must also be borne in mind that the BCS sample, drawn to obtain information on national and regional trends in crime, could not in any case yield reliable information for small localities.

In this report, percentages are presented with rounding to one decimal place. The symbol '*' is used to denote cells in tables where the value is less than half of one per cent.
2. Sample design

2.1 Sample size and structure

Following a methodological review, significant changes were made to the design of the 2001 British Crime Survey compared with previous sweeps. The two main changes introduced in 2001 were an increase in the sample size and a move to continuous fieldwork with a different reference period from that used on previous sweeps. As part of these design changes a 'spliced design' was carried out during the first 6 months of 2001 in order to assess the impact of moving to a different reference period on victimisation rates (see section 2.7).

The 2001 survey was representative of two linked populations:

- households in England and Wales living in private residential accommodation
- adults aged 16 and over living in such households.

As such the survey did not cover the population resident in institutions such as halls of residence, those in residential care, those in prison, or members of the armed forces. Neither did it cover the experiences of those under 16.

With a move to continuous sampling, the survey also needed to be representative over time. The aim was to achieve 37,000 interviews annually, with the survey being representative on a quarterly basis. Additionally, a booster sample of 3,000 interviews was to be achieved with a sample of individuals from non-white groups. This compared to a core sample size of 20,000 core interviews and 4,000 boost interviews in the 2000 survey.

In addition to representing the above populations, the design also ensured that:

- at least 600-700 interviews were conducted in each Police Force Area (PFA);
- that 50% of primary sampling units were flagged for being rotated forward into the 2002 sample in order to improve the precision of year on year comparisons;

2.2 Sample frame

The small user Postcode Address File (PAF) was used as the sample frame. PAF is generally accepted as being the best general population sampling frame in Britain. It has better coverage of both residential addresses and of the private household population of individuals than the Electoral Register (the only serious alternative to PAF), and what non-coverage it has is less concentrated in particular population sub-groups than is Electoral Register non-coverage. Furthermore PAF is structured hierarchically, is available in computerised form and can be linked to Census data thereby permitting considerable control to be exercised over the sampling process.

---

The number of addresses to be drawn from PAF to achieve the required number of interviews depends on an assumption about the number of ineligible addresses and the achieved response rate. In 2001, 55,312 addresses were issued in order to achieve 37,000 interviews.

2.3 Stratification

As mentioned above, one of the survey requirements was a design that achieved at least 600-700 interviews per Police Force Area (PFA). In the event, a lower limit of 650 interviews per PFA was set to allow for variation in response rates by PFA. To achieve a minimum of 650 interviews per PFA required over sampling in the smallest PFA’s and meant that the data have to be weighted to remove the effect of differences in the probability of selection of addresses.

As well as stratifying disproportionately by PFA, the sample was stratified by other socio-demographic variables in order to improve the precision of estimates. The stratifiers used in 2001 were population density and the proportion of household heads in non-manual occupations.

2.4 Clustering

Whole postcode sectors were used as primary sampling units (PSUs) and 32 addresses were issued per PSU. Smaller numbers were not issued per PSU because it was felt that the sample efficiency gains attached to reducing the cluster size would be more than offset by the concomitant cost increases.

The only exception to this was in PSUs where the proportion of non-white households exceeded 20% (based on the 1991 Census), where only 16 addresses were issued. This was done in order to try and limit the variability in interviewer assignment sizes which could be expected to arise from the focused enumeration procedures used to generate the non-white boost sample (see section 2.8). In order to ensure that overall the address sample was self-weighting, PSUs defined as being of high non-white population were duplicated in the sample frame.

Small sectors (containing fewer than 500 delivery points) were amalgamated with neighbours before sample selection to ensure the sample had a reasonable geographic spread in these areas.

2.5 Rotation of sectors

A requirement of the survey was that the sample design should ensure that each month 50% of sectors should be rotated forward from 12 months previously (although fresh addresses should be selected) in order to increase the precision of year on year estimates of change. Although sectors were not rotated from BCS 2000 to BCS 2001, it is planned that 50% of sectors will be rotated forward from 2001 to 2002.
The first stage in the process was to amalgamate any postcode sector containing fewer than 500 delivery points. All PSUs were then sorted into Police Force Area. Additionally, all PSUs were identified as being either of ‘high’ or ‘low’ non-white concentration (20% or more households were defined as high) based on the 1991 Census.

All PFA’s were designated as ‘large’ or ‘small’ PFA’s depending upon whether a minimum sample of 650 cases would be achieved based on drawing a sample with probability proportional to size. In total, there were 25 ‘small’ PFA’s that required over sampling and these were each treated as separate strata. The remaining 17 ‘large’ PFA’s were treated as a single stratum.

Within each PFA, PSUs were ordered by population density and then divided into three bands each approximately containing an equal number of delivery points (high, medium and low density). High non-white PSUs were duplicated for reasons outlined in section 2.4. Within each density stratum, PSUs were ordered by proportion of households with a non-manual household head. PSUs were then sampled within each PFA with probability proportional to number of delivery points by the method of random start and fixed interval.

The sample of PSUs for the whole 12-month period was selected at the beginning of the year. They were then systematically allocated to months to ensure that a nationally representative stratified sample of sectors was issued in each quarter. It is important to note that although each months issued sample is broadly spread geographically, the sample is only designed to be representative on a quarterly basis and not on a monthly basis.

Within each PSU, 32 delivery points were selected by the method of random start and fixed interval. Addresses were ordered by postcode before selection to maximise the geographical spread across the sector.

In the relatively infrequent cases where a PAF address generated more than one household, the interviewers in the field used a random selection method to select one.

Individuals aged 16+ (and of eligible non-white groups in the boost sample) were listed in alphabetical order of first name and one was selected for interview by a random (Kish grid based) method. No substitutes were permitted.

The move to continuous data collection was associated with a change in the survey reference period. All previous sweeps of the BCS have asked respondents about that events that have taken place in the last calendar year up until the date of interview (a period ranging anywhere from 12 to 18 months). By contrast the new reference period asked respondents about events that had taken place in the last full 12 months from the date of interview.

2 City of London and Metropolitan were treated as a single PFA.
In order to assess the likely impact of these changes the first six months of the survey was designed to use both the old and new reference periods in parallel (a ‘spliced design’). This was done by randomly allocating all issued addresses during the first six months of 2001 to either the Type A sample (the old reference period) or to the Type B sample (the new reference period).

Thus, in the Type A sample, respondents were asked about crimes or incidents that may have happened “in the 13 or 14 months since the 1st of January 2000”. This reference period was fixed, irrespective of whether a respondent was interviewed in January 2001 or June 2001. By contrast, in the Type B sample, respondents were asked about crimes or incidents that had happened in the last 12 months. This meant that respondents interviewed in January 2001 were asked about things that had happened in “the 12 months since the 1st of January 2000”, while respondents interviewed in June 2001 were asked about things that had happened in “the last 12 months since the 1st of June 2000”.

Rather than issuing Type A and Type B sample equally over the first 6 months, an attempt was made to issue the sample in such a way that the Type A sample would approximately reflect the monthly fieldwork pattern achieved in previous sweeps of the BCS. This meant a fieldwork profile which peaked in February and ensured that the majority of interviews were conducted before the end of April, with only mop up interviews during May and June$. By contrast, the Type B sample was issued equally over the first six months of the year.

Table 2.1 shows the monthly distribution of Type A and Type B interviews comparing the actual number of interviews attained to the proposed figures. The monthly interviewing profiles for the 1998 and 2000 surveys are shown for comparative purposes. This shows that although the actual number of Type A interviews fell slightly short of the target, the achieved month by month profile replicated the proposed profile almost exactly. The only difference was that the mop up period took slightly longer than anticipated meaning that more interviews were carried out in June.

In terms of allocating Type A and Type B sample across months, it was decided to allocate Type A and Type B interviews proportionately across all points in a month. Table 2.2 shows the proportion of Type A and Type B addresses issued in the first 6 months for a PSU where 32 addresses were issued.

---

$^3$ Although the initial intention was to replicate the 2000 profile it was later agreed that there would be benefits to flattening out the monthly profile so that there was not such a peak in February.

### 2.8 Non-white boost sample

For some analyses, the Home Office provides separate estimates for the non-white population, and for specific groups within this population. Since the number of non-white respondents identified within the core sample is not sufficient to allow for
sufficiently robust analyses, a boost sample was incorporated in the design of the survey.

In previous sweeps of the survey the boost sample was restricted to black and Asian populations. For the 2001, it was decided to adopt the categories used in the 2001 Census and so broaden the population covered. Thus, the groups defined as ‘non-white’ were:

- Indian
- Pakistani
- Bangladeshi
- Other Asian background
- Caribbean
- African
- Other black background
- Chinese
- White and black Caribbean mixed
- White and black African mixed
- White and Asian mixed
- Any other mixed background where at least part of the mix includes one of the above groups.

The key difficulty in drawing any probability sample of people of non-white origin is identifying them in the first place. In previous sweeps of the survey, two different methods have been used to achieve a boost sample. First, by issuing pre-selected sample in areas that are know to have a high proportion of non-white households and doing direct face-to-face screening. And second, by using a method known as focused enumeration, whereby interviewers screen addresses that are adjacent to the core sample address for eligible respondents.

In the 2001 sample it was decided to use only focused enumeration. This was felt to be a preferable to the alternative method since it produces a sample that is representative of the entire non-white population, rather than just the non-white population living in areas of high concentration. The method is designed to try and ensure that interviewers can screen a large number of addresses as efficiently as possible by using proxy information. It is far more cost effective than direct face-to-face screening, especially in areas of low non-white concentration.

Focused enumeration involves screening addresses by proxy where possible. Interviewers screen groups of pre-sampled adjacent addresses by contacting a responsible adult at one of them and asking (i) about the ethnic origins of those living at the address and (ii) about the ethnic origins of those living at the other (adjacent) addresses. The method has taken a number of forms since it was devised, and the version used on the BCS is one variant of the basic methodology.

In practice, the method used on the 2001 BCS was as follows:

---

4 In 2001, the core sample contained 1,971 respondents who defined themselves as non-white.
• interviewers identified two adjacent addresses on each side of a core sample address using a strict set of rules.

• wherever possible, interviewers used the contact at the core sample address to establish whether anyone lived at the two addresses either side who they thought was non-white.

• in cases where this was not possible, either because no contact was made at the core sample address or because the person at the core address refused to give the information or did not know anything about their neighbours, the interviewer approached one of the four identified addresses to try and gain the information.

• the interviewer continued like this until they had information about all four identified addresses. The aim was to obtain information about all four addresses in a single visit, so that no additional visits were needed.

• if an eligible respondent was identified at an address, the interviewer sought to carry out an interview. Where more than one eligible respondent existed, the interviewer carried out a selection procedure exactly the same as on the core sample.

Since ethnic origin is largely a matter of self-definition interviewers were briefed to only use the wording provided, which was “Is there anyone living at [specific address]...who is black, Asian, Chinese, or from any other non-white group”. Interviewers were also briefed to accept the responses given and not to try and apply any of their own definitions. If respondents had difficulty in giving a direct ‘Yes’ or ‘No’ answer to the question, interviewers could use a card with the census categories on it to help respondents.

Calculating the number of addresses that needed to be screened in order to achieve a sample of 3,000 respondents over the whole year was complex, especially considering that information on non-white population comes from the 1991 Census which is now 10 years out of date. The initial estimates suggested that screening two addresses either side of the core sampled address at 50% of all issued addresses would yield the necessary 3,000 interviews. Thus, for the first 6 months of the survey screening took place at half the addresses in each assignment.

After the first few months of fieldwork it was decided that the screening procedures were not identifying enough potentially eligible respondents in order to achieve 3,000 interviews by the end of the year. As mentioned above, one of the possible reasons for this shortfall was the fact that data from the 1991 Census is ten years out of date and the nature and location of the non-white population is likely to have changed. In addition, a relatively high proportion of households (around 10%) identified as eligible by proxy respondents turned out to be ineligible when an interviewer called at the actual address (i.e. a proxy respondent would say that someone who was ‘non-white’ lived at an address, but when the interviewer visited the address itself the people considered themselves to be ‘white’). While such cases were easily resolved, it did suggest that eligible respondents may be being missed as a result of incorrect proxy information in the other direction (i.e. a proxy respondent would say that only ‘white’ people lived at an address, but if the interviewer had called at the address the people there would have identified themselves as ‘non-white’).

As a result of a predicted shortfall in interviews, the amount of screening was increased in the second six months of the year. In Quarter 3 (July to September) issued sample,
screening was done at two addresses either side of the core sampled address at 100% of all issued addresses, except in areas of very low concentration of non-white population. In Quarter 4 (October to December), the same proportion of screening was maintained but the number of addresses screened at was increased from two to three. In the event, the number of boost interviews achieved exceeded the target by about 10%.

The number of addresses screened at, the number of respondents identified as eligible and the number of interviews achieved over the whole year are shown in Table 2.3

2.9  Youth Boost sample

As well as increasing the number of interviews conducted with non-white respondents, the Home Office also wanted a boost of young people (aged 16-24) to be carried out in the second six months of the year. The aim was to achieve a sample of 1,500 respondents aged 16 to 24. The 'youth questionnaire' covered fewer topics than the main questionnaire and consequently average interview length was considerably shorter. Discussion of interview length can be found in section 4.5.3.

A separate screening exercise was developed to generate sample for this age group. Interviewers were only sought with eligible respondents at addresses that had been selected as part of the core sample or non-white boost sample.

Since youth screening could involve conducting two interviews in a single household, the selection for the core sample always took place first. This was to ensure that ALL adults (aged 16 and over) in the household were included in the main selection process. If the person selected as the core sample respondent at the address was aged 16 to 24, a youth boost interview was not conducted, regardless of whether an interview was achieved with a core sample respondent or not. This was to ensure that no more than one 16 to 24 year old was ever interviewed in the same household.

Interviewers screened for 'youth sample' by asking a responsible adult at the core address whether there was anybody living at the address aged 16-24 years old. If more than one

In PSUs with a non-white population of less than 0.6%, only 50% of addresses were screened.
16-24 year old was identified at the address, the same random selection procedure was applied as with the core sample to identify one person for interview.

Screening for 16 to 24 year olds was also required as part of the non-white boost. However, it was felt that to ask interviewers to screen at adjacent addresses initially for non-white respondents and then for respondents aged 16 to 24 was too much of a burden. Hence, interviewers were not asked to screen households identified in the non-white sample for 16 to 24 year olds. Instead, eligible respondents were identified from information contained in the household box of returned interviews. Where the core sample respondent had given permission to be re-contacted, they were contacted approximately two months after the core interview by BMRB’s Telephone Unit. Telephone interviewers sought to make contact with the eligible person, carry out a selection procedure if there was more than one 16 to 24 year old in a household, and make an appointment for a face-to-face interviewer to call to conduct the youth interview.
3. Questionnaire Content and Development

3.1 Structure and coverage of the questionnaire

The 2001 BCS questionnaire comprised nine main sections as follows:

- Household Grid and Main questionnaire
- Screener questionnaire which identified respondents experience of victimisation within the reference period
- Victim Forms for any incidents identified at the screeners (up to a maximum of six)
- Module on mobile phone theft
- Module on the performance of the Criminal Justice System
- Follow-up modules (A-D) covering different crime-related topics
- Fires module
- Demographic module
- Self-completion modules on illegal drugs and Inter-Personal Violence (which included sections on domestic violence, sexual assault and stalking)

The basic structure of the questionnaire is shown in Figure 3.1. This also shows what proportion of the sample were allocated to each different module of the questionnaire (see section 3.1.6). The complete questionnaire is documented in Appendix D.

A brief description of each section or module of the questionnaire is outlined below.

Basic socio-demographic details (age, sex, marital status, etc.) were collected in the Household Grid for every adult in the household. Additionally, demographic details of all children under 16 were collected.

The Household Grid was also used to establish the Household Reference Person\(^7\). Household Reference Person (HRP) is the standard classification now used on most government surveys and is based on the following criteria:

- The HRP is the member of the household in whose name the accommodation is owned or rented, or is otherwise responsible for the accommodation. In households with a sole householder that person is the HRP.
- In households with joint householders the person with the highest income is taken as the HRP.
- If both householders have exactly the same income, the older is taken as the HRP.

The Household Grid was followed by a series of primarily attitudinal questions, which were mostly asked of all respondents. Many of these questions related to respondents own local area, such as how long respondents had lived in their local area, what they thought were the main problems in their area, how safe they felt, and how often they went out.

A few of the questions in the Main questionnaire were only asked of a random sub-sample of respondents.

### 3.1.2 Screener questionnaire

Following the Main questionnaire, all respondents were asked whether they had experienced certain types of crimes or incidents within a specified reference period. In 2001, the precise reference period varied depending upon whether the interview was part of the Type A or Type B sample (see section 2.7). To try and encourage respondents to recall events accurately, a life event calendar was given to all Type B respondents to act as a visual prompt when answering the screener questions (see section 3.1.2). Type A respondents were not shown the life event calendar so as to preserve strict comparability with past BCS sweeps.

Depending upon individual circumstances a maximum of 25 screener questions were asked. These can be grouped into four main categories:

- All respondents living in households with a vehicle or bicycle during the reference period were asked about experience of vehicle-related crimes (e.g. theft of vehicle, theft from vehicle, damage to vehicle, bicycle theft)
- All respondents who had moved in the reference period were asked about experience of property-related crimes in their previous residence(s) (e.g. whether anything was stolen, whether the property was broken into, whether any property was damaged)

---

\(^7\) All previous sweeps of the British Crime Survey collected details of the Head of Household.
• All respondents were asked about experience of property-related crimes in their current residence.
• All respondents were asked about experience of personal crimes (e.g. whether any personal property was stolen, whether any personal property was damaged, whether they had been a victim of force or violence or threats).

The wording of the screener questions has been kept consistent across all sweeps of the BCS to ensure comparability. They are designed to ensure that all incidents of crime within the scope of the BCS, including relatively minor ones, are mentioned. The screener questions deliberately avoid using terms such as ‘burglary’, ‘robbery’, or ‘assault’, which have a precise definition that many respondents might not be expected to know. The questions are also designed to ensure that the respondent does not mention the same incident more than once. At the end of the screener questions, the interviewer is shown a list of all incidents recorded and is asked to check with the respondent that all incidents have been recorded and nothing has been counted twice. If this is not the case, the respondent has an opportunity to correct the information before proceeding.

Within the screener questions a crucial distinction exists between household incidents and personal incidents.

All vehicle-related and property-related crimes are considered to be household incidents, and respondents are asked about whether anyone currently resident in the household has experienced an incident within the reference period. A typical example of a household incident is criminal damage to a car. It is assumed that the respondent will be able to recall these incidents and provide information even in cases where he/she was not the owner or user of the car.

Personal incidents refer to all crimes against the individual and only relate to things that have happened to the respondent personally, but not to other people in the household. An example of a personal incident would be a personal assault. An assault against other household members would not be recorded, unless the respondent was also assaulted in the course of the incident. In such cases, the offence would be coded according to the crime experienced by the respondent (which may not be the same as the experience of another household member).

### 3.1.3 Victim Forms

All incidents identified at the screener questions are followed through in more detail in the Victim Form. Incidents are covered in a specific priority order, which replicates the procedure used up to 1992, when the questionnaire was printed on paper.

#### 3.1.3.1 Identification and ordering of incidents for Victim Forms

In 2001, over two-thirds (68.7%) of respondents did not report any victimisation over the reference period, meaning that no Victim Forms had to be completed. Where a respondent had experienced one or more incident in the reference period, the computer programme automatically identified the order in which the Victim Forms were asked. This meant that the interviewer had no discretion about the selection or order of Victim Forms.

---

8 In the case of the incidents of sexual victimisation or domestic violence, the interviewer had an option to suspend the Victim Form, as this might embarrass or endanger the respondent in some situations. The
If six or fewer incidents were identified at the screener questions then a Victim Form was completed for all of the incidents reported. The priority ordering used by the computer was as follows:

- According to the **type** of crime. Victim Forms were asked in reverse order to the screener questions. Broadly speaking this means that all personal incidents were asked before property-related incidents, which were asked before vehicle-related incidents.
- **Chronologically** within each type of crime. If a respondent reported more than one incident of the same type of crime, Victim Forms were asked about the most recent incident first and worked backwards chronologically.
- The first three Victim Forms were **long forms**, which contain all the detailed questions relating to each incident. The second three Victim Forms were **short forms**, a cut down version of the questions that are much quicker to complete.

If the respondent had experienced more than six incidents in the reference period, only six Victim Forms were asked using the above priority ordering. The priority ordering means that the survey does not collect details or only collects limited details (through the short Victim Form) for the crimes or incidents that tend to be more common (e.g. criminal damage to vehicles).

In 2001, a total of 20,739 Victim Forms were completed and 31.3% of respondents reported at least one incident (see Table 3.1). Respondents in the non-white boost sample were more likely than respondents in the core sample to report a crime (36.5% and 30.8% respectively). Among victims, the majority of respondents (63%) only completed 1 Victim Form while only a small proportion completed 4 or more Victim Forms (6.7%). This means that about one in five (19.8%) of all respondents completed 1 Victim Form, while only 2% of all respondents completed 4 or more.

---

**interviewer would then attempt to arrange a revisit at a time that would be more convenient (in particular when other household members would not be present).**

3.1.3.2 Series of incidents

Most incidents reported represent one-off crimes or single incidents. However, in a minority of cases a respondent may have been victimised a number of times in succession. At each screener question where a respondent reported an incident, they were asked how many incidents of the given type had occurred during the reference period. If more than one incident had been reported, the respondent was asked whether they thought that these incidents represented a ‘series’ or not. A series was defined as “the same thing, done under the same circumstances and probably by the same people”. Where this was the case, only one Victim Form was completed in relation to the most recent incident in the series. In 2001, 82% of all Victim Forms related to single incidents and 18% related to a series of incidents.

There are two practical advantages to this approach. Firstly, since many (although not all) incidents classified as a series tend to be petty or minor incidents (e.g. vandalism) it avoids the need to ask the same questions to a respondent several times over. Secondly, it avoids ‘using up’ the limit of six Victim Forms on incidents which tend to be less serious.

In the rare cases where a respondent has experienced a mixture of single incidents and a series of incidents the Quanquest interview program has a complex routine which handles the sequence of individual and series incidents and allows the priority ordering of the Victim Forms to be decided.

In terms of estimating the victimisation rates, series incidents receive a weight corresponding to the number of incidents up to a maximum of five (see section 7).

3.1.3.3 Content of Victim Forms

The Victim Form is the key to the estimate of victimisation and collects three vital bits of information:

The exact month(s) in which the incident or series of incidents occurred. In a few cases, respondents may have reported an incident, which later turned out to have been outside the reference period. In such cases, the Victim Form was simply by-passed by the computer. If respondents were unsure about the exact month in which something happened, they were asked to narrow it down to a specific quarter. For incidents that
were part of a series, respondents were asked how many incidents occurred in each quarter and the month in which the most recent incident had occurred. In the questionnaire program dates were automatically calculated based on the date of interview and appropriate text substitution was used to ensure that the questions always referred to the correct reference period, for both Type A and Type B sample. Details of the appropriate reference periods used for the 2001 sample can be found in Appendix F.

- An open-ended description of the incident where the respondent describes in their own words exactly what happened.
- A series of key questions used to establish important characteristics about the incident. Examples of the sort of information collected includes where and when the incident took place; whether there was a racial element to the incident; whether anything was stolen or damaged and, if so, what; the costs of things stolen or damaged; whether force or violence was used and, if so, the nature of the force used and any injuries sustained; and whether the police were informed or not.

The questions within the Victim form have remained largely unchanged from previous sweeps. In 2001, a number of additional questions were added specifically in relation to car theft. These collected more detail about the make, model, and age of the vehicle stolen and details about the security features of the vehicles.

### 3.1.4 Module on mobile phone theft

To reflect this new area of crime concern, a module on mobile phone theft was included on the survey from July 2001. Although mobile phones stolen from the respondent should be picked up in the Victim Form, thefts from other members of the household (including children) are not covered. Consequently, in this module all respondents were asked who in the household, if anyone, used a mobile phone, whether anyone in the household had had a mobile phone stolen in the last 12 months and, if so, details of the incident.

Data from these questions should be analysed using the household weights to generate victimisation rates per household. These are discussed in greater detail in Chapter 7. If one wanted to generate figures for victimisation rates per head of population, this can be done but involves generating a victimisation rate within a household (i.e. average number of mobile phone thefts per person in the household, including children) and generating sample weights equal to the household weights multiplied by the number of persons in the household. For victimisation rates for age groups the same process of averaging and generating new sample weights would have to be followed, but restricted to the age group of interest.

### 3.1.5 Module on performance of the Criminal Justice System

This short module asked all respondents about their confidence in the Criminal Justice System, and how good a job they thought the different elements of the Criminal Justice System (e.g. the courts, the Crown Prosecution Service, the police, the prison service, the probation service) are doing.
3.1.6 Follow-up modules

Respondents were randomly allocated to one of four follow-up modules (see section 3.5.2 for how this was done). Core sample respondents were allocated equally to each follow-up, meaning that approximately 9,250 respondents were asked each module. Respondents who were part of the non-white boost sample were randomly allocated to only modules A or B, in a ratio of 3:1 (i.e. approximately 2,250 respondents were asked Follow-up A and approximately 750 respondents were asked Follow-up B).

3.1.6.1 Follow-up A: Contact with and attitudes towards the police

In 2001, Follow-up A included both questions that had been asked on previous sweeps of the BCS, as well as a number of new questions. Some of the topics covered in this module included:

- whether respondents knew or had any contact with the police
- whether they had been stopped by the police either in a vehicle or on foot
- if so, the reason for this and the nature of the contact
- attitudes to the police
- what respondents thought police priorities should be

3.1.6.2 Follow-up B: Contact with and attitudes towards the Criminal Justice System

Again, this module included both questions that had been asked on previous sweeps of the BCS as well as new questions. Topics covered in this module included:

- knowledge of sentencing practices
- attitudes to sentencing policy, including what respondents thought sentences should be for particular crimes and what they thought they actually were.
- recent contact with different parts of the Criminal Justice System

3.1.6.3 Follow-up C: Crime prevention and security

Topics covered in this module included:

- community action
- knowledge of Neighbourhood Watch
- knowledge of local crime partnerships
- home, personal and vehicle security
- attitudes to vehicle security
- fire safety measures in the home

3.1.6.4 Follow-up D: Ad hoc crime

This follow-up module consisted largely of new questions. Although a number of questions focused on respondents’ local areas, the module contained quite a wide variety of questions. These included:
- role of victims in the Criminal Justice System
- concern about crime
- attitudes to the local community
- involvement in community activity/ voluntary activities
- experience of anti-social behaviour
- attitudes to driving behaviours.

### 3.1.7 Fires module

Respondents were asked whether they had experienced any domestic fires in the last year. For the small proportion of respondents who had experienced a fire, there were a number of follow-up questions relating to how and where it started, how it was discovered, who put it out and any damage or injuries caused. These questions were included on the BCS partly because the Home Office had policy responsibility in this area during the time of the survey, but also because of their relative rarity a very large sample is required to provide a satisfactory base for analysis of different types of domestic fires.

### 3.1.8 Demographics module

This section collected additional information on the respondent and their household. Questions included:

- general health, including smoking and drinking behaviour
- employment details. Where the respondent was not the Household Reference person occupation details were also collected about the HRP
- educational attainment and qualifications
- ethnicity\(^9\)
- housing tenure
- household and personal income.

### 3.1.9 Self–completion modules

The self-completion modules were only asked of respondents aged under 60 years of age. They were all presented as computer assisted self-completion (CASI) modules to ensure respondent confidentiality in answering these questions. The respondent was asked to follow the instructions on the screen of the laptop and enter their answers appropriately. Practice questions were included before the start of the self-completion module to give the interviewer an opportunity to show the respondent the different functions of the computer. If the respondent was unable or unwilling to complete the modules using the computer the interviewer could administer the self-completion. However, in this situation only the drugs and the domestic violence section of the Inter-Personal Violence module were asked, while the sexual assault and stalking sections of the Inter-Personal Violence module were by-passed.

Interviewer assistance and the presence of others while completing these modules was recorded by the interviewer (Section 4.4, Tables 4.2 and 4.3).

---

\(^9\) In the 2001 survey the ethnicity question was changed from previous sweeps to be consistent with the 2000 Census question on ethnicity.
3.1.9.1 Drugs

The module on knowledge of and use of drugs remained virtually unchanged from previous BCS sweeps.

Questions about whether respondents had ever heard of certain types of drugs were dropped and questions asking if they had ever taken a variety of different drugs had a ‘Never heard of it’ category added (in previous sweeps most respondents had heard of all the drugs listed except the made up drug Semeron). If respondents had ever taken any types of drugs, respondents were then asked whether they had taken them in the last year or the last month. In 2001, additional questions were added to this module asking those who had taken drugs at what age they first took them and how easy they thought it was to get particular drugs. These additional questions were only asked of respondents aged 16 to 24.

3.1.9.2 Inter-personal violence

A new self-completion module on inter-personal violence was developed covering the areas of domestic violence, sexual attack and stalking. Although these areas have been asked in previous sweeps of the BCS, the new module was considerably more detailed than previous sweeps.

Respondents were asked whether they had ever suffered from any sort of domestic violence and whether they had experienced this in the last 12 months. Those who had suffered such violence were then asked detailed questions who the perpetrator(s) was, any injuries suffered, use of medical and health services, whether the police were involved or not, and other sources of help and support sought. If the respondent had experienced more than one incident of domestic violence, they were asked to answer the questions in relation to the worst incident.

Respondents were asked a similar set of questions in relation to sexual assault. This section asked about aspects of minor sexual assault (indecent exposure, touching, and sexual threats) and serious sexual attack (rape, attempted rape, and other serious sexual assault)

Respondents were asked a short section on experience of stalking. This included receiving obscene or threatening phone calls or letters, experience of being followed and persistent damage of property.

On account of their sensitive nature, the sexual assault and stalking questions were only asked if the respondent was prepared to enter the answers to the questions on the laptop themselves (i.e. the interviewer was not allowed to assist).

3.2 Life event calendar

Due to changes in the reference period being introduced to the 2001 survey, the Home Office wished to take the opportunity to try and improve the accuracy with which respondents recalled events.
Whenever respondents are asked to think about events that have happened during a particular time period there is likely to be a certain level of response error. Errors most salient to the BCS include:

- Respondents forgetting about more trivial incidents.
- Respondent not knowing about incidents, especially in relation to household crimes which might not have involved them personally.
- Respondents remembering an incident but placing it wrongly in time either by remembering an incident as happening earlier than it actually did (backwards telescoping) or later than it actually did (forward telescoping).
- Respondents deliberately concealing incidents, such as sexual assault, which they may not wish to reveal.

Methodological work\textsuperscript{10} has shown that the net effect of response biases tends to result in an under-counting of survey-defined offences, but that these losses are not the same for all crime categories. While more trivial crimes are the most likely to be under-reported, more serious incidents are more easily recalled and may even be subject to ‘forward telescoping’ and therefore over-counted.

A qualitative follow-up study of respondents to the 1996 BCS suggested that ability of respondents to accurately recall incidents in the reference period was affected by a number of things\textsuperscript{11}. These included:

- A failure to understand the importance of the reference period. Respondents can believe that incidents that fall outside this period are not being taken seriously or that a false impression of crime rates are being created by not allowing them to report incidents. The overall impact of this may be to encourage respondents to include incidents that did not actually occur in the reference period.
- A perception that the reference period was vaguely defined due to the use of phrases such as ‘in the last 13 to 14 months’ in many of the screener questions. A vague time period allows respondents to use their own interpretation and so may encourage respondents to include incidents, especially serious incidents, which occurred outside the reference period.
- Recall is also influenced by various factors related to the specific circumstances of the crime – the exact timing of the crime relative to the interview; the number of incidents experienced; the severity of the crime; whether the crime was experienced by the respondent or by others in the household. A lot of these factors – especially the occurrence of relatively trivial incidents, and household crimes actually experienced by other members of the household – may tend to encourage respondents to under report incidents.

The move to continuous sampling meant that the reference period had to become the previous 12 months rather than the period since the start of the previous calendar year. This is arguably a less memorable reference period. Lynn and Elliot\textsuperscript{12} in their review of BCS methodology proposed a tightening up of procedures for bounding the reference period to coincide with their recommendation to move to continuous sampling.

\textsuperscript{11} White, C et. al. (1998) Following up the British Crime Survey 1996 : A qualitative study (London : SCPR)
Based on these findings and the need to update procedures with the introduction of continuous sampling, it was decided to reword the introductory preambles to the screener questions to try and address some of these issues. In particular, the preamble to the screener questions was amended to explain to respondents why the survey was only asking about things that had happened in a specific time period and to reassure them that crimes which may have occurred outside this period were still important.

It was also decided to try and address issues of recall by using a life event calendar on the survey. Such a calendar works by trying to place events or incidents in some sort of meaningful context for each respondent by building up a picture of events that have happened to them in the last year (e.g. birthdays, anniversaries, holidays, starting a new job, etc.) which are memorable to the respondent. Additionally, national dates such as Christmas, Easter, or Bank Holidays can be put on the calendar as common reference points.

Life event calendars have been used in a number of contexts. One example is the 1994 Family and Working Lives Survey, which used an ‘events matrix’ to record a skeleton of the respondent’s life, including periods of marriage, cohabitation, divorce and separation; periods of employment or training; and periods in prison or in other institutions. This data was collected on paper, separately from the main CAPI interview, with assistance from the interviewer. Having a paper document was reported to be invaluable, because it could remain in front of the respondent throughout the interview.  

In relation to the BCS, it was decided a life event calendar could serve two useful purposes:

- First, to provide respondents with a visual aid throughout the screener questions; and
- Second, to help respondents who were having difficulty recalling in which particular month an incident may have occurred.

Appendix E has an example of the calendar used on the 2001 survey. To maintain consistency with previous sweeps, the calendar was only used with respondents who were part of the Type B sample (i.e. the new reference period).

### 3.3 Questionnaire development

Since many of the questions on the 2001 BCS had been included in previous sweeps of the survey, it was decided to concentrate piloting efforts only on new questions. Additionally, the life event calendar needed to be piloted. It was particularly important to pilot the new self-completion module on inter-personal violence (which included sections on domestic violence, sexual assault and stalking) with respondents who had actually experienced such incidents. Due to the difficulties of finding such respondents through door to door screening, it was decided to pilot the self-completion module separately by approaching womens’ refuges to try and contact women who had experienced such incidents. (see section 3.3.2).

---

3.3.1 Main stage piloting

Piloting of the main parts of the questionnaire was done using dynamic piloting. This is a form of piloting which is regularly used by BMRB to develop questionnaires across many different surveys. Dynamic piloting uses techniques similar to cognitive interviewing by seeking to understand the thought processes that a respondent uses in trying to answer a survey question. It is designed to see whether the respondent understands the question, or specific words and phrases contained within the question; what sort of information the respondent needs to retrieve in order to answer the question; and what decision processes the respondent uses in coming to an answer.

3.3.1.1 Dynamic piloting methodology

Dynamic piloting involves a small number of highly experienced interviewers working together with researchers in a field setting. The interviewer fulfils his or her conventional role, while the researcher observes the interview at first hand. This enables the observer to identify and note areas of doubt, misunderstanding or incomprehension on the part of the respondent during the interview. By observing the interview as it takes place, the researcher is able to witness not only the verbal communication that takes place, but also any non-verbal reactions of the respondent. At the end of the interview or immediately following questions or sections of particular interest, the researcher probes on specific aspects of the interview. Although each observer had a standard list of probes that are developed prior to the pilot, the method is flexible enough to allow observers to carry out spontaneous probing based on what happens during each individual interview.

A small scale and intensive dynamic pilot of this nature is preferable to a larger scale exercise where the interviewers are unaccompanied. In the latter instance, interviewers tend to report back on how they rather than the respondents found the questionnaire.

With all dynamic pilots the interviewers and researchers are thoroughly briefed before starting the pilot and an informal debrief is held at the end of the pilot.

3.3.1.2 Structure of piloting on the BCS

Dynamic piloting on the BCS was carried out in two rounds during late October and early November 2000. This approach allowed the preliminary findings from the first round of piloting to be considered by researchers and the Home Office and amendments made to specific questions where necessary before round two. In total four interviewers and four researchers worked on each round of the pilot and a total of 40 interviews were conducted over the two rounds of piloting. Respondents were pre-recruited by interviewers and all respondents were paid a small incentive. Quotas were set to ensure that at least half of the respondents had experienced some sort of crime in the previous twelve months. To make it easier to find such respondents, all the areas used for the pilot were high crime areas.

In both rounds of the pilot, the questionnaire had a similar structure. It consisted of the standard Household Box, the screener questions, the open-ended description in the Victim Form (if applicable), and then a composite follow-up module which contained the new questions from all of the follow-up modules. The pilot questionnaires used at both rounds of the pilot can be found in Appendix J.
Interviews lasted approximately 30 minutes, with a further 20-30 minutes of probing by the observer.

3.3.2 Piloting of the self-completion module

As part of piloting the self-completion module on inter-personal violence, (including sections on domestic violence, sexual assault and stalking) interviews were conducted with women who had direct experience of such incidents. This was done through conducting interviews with women in refuges. A total of 4 refuges were approached, with initial contact being made through the Home Office. Like the main stage pilot, two rounds were conducted to allow preliminary findings from round one to be incorporated into the questionnaire at round two. In total, 18 interviews were conducted with women who had experienced inter-personal violence. Since the module being piloted was intended for self-completion, all respondents were asked to complete the module themselves. All interviews were administered by female researchers.

3.3.3 Dress rehearsal

After the piloting of the questionnaire had been completed a dress rehearsal was undertaken in late November 2000. The dress rehearsal was simply a small-scale survey carried out under conditions as similar as possible to the full survey. The aim of the dress rehearsal was to test not only the piloted questionnaire but also the survey systems and processes. In total, 14 interviewers worked on the dress rehearsal and 168 interviews were achieved. All interviewers were briefed prior to the start of the dress rehearsal and a full-day debrief was held which was attended by both researchers working on the project and the Home Office.

3.4 Final questionnaire and revisions

Following more feedback from the dress rehearsal and detailed analysis of the timings, further modifications were made to the questionnaire to bring the length of the questionnaire in line with previous sweeps. This was done primarily by allocating more questions to sub-samples within each follow-up module. This means that within each module some questions are only asked of half the respondents allocated to that module (i.e. approximately 5,000 respondents)

A paper questionnaire was produced from the Quanquest software that detailed the questions and their routing instructions as specified in the Quanquest code. This was translated into a Word document to provide a more user-friendly questionnaire.

Once all changes had been approved the questionnaire was thoroughly checked by BMRB researchers and Home Office research staff.

Despite best efforts a few small errors were subsequently discovered in the filtering of the questionnaire. Since the whole sample and fieldwork management process is based on a monthly cycle and each month operates as a mini-survey in its own right, the BCS questionnaire is issued to interviewers on a monthly basis. This allowed any minor errors in the CAPI script to be corrected in a timely fashion.
3.5  CAPI Development Issues

3.5.1  Converting the 2000 BCS

In 2001, the questionnaire was written in Quancept script. Quancept is a suite of programs used by many research agencies for both CAPI and CATI surveys. Central to Quancept is a high level programming language used to define all aspects of the questionnaire. The script contains the questions to be asked, the responses which will be accepted to each question, filter instructions to determine exactly which questions will be asked of each respondent and other statements for checking consistency between answers.

Since previous sweeps of the survey had been carried out using the Blaise software system it was essential that the programming of the 2001 questionnaire was entirely consistent with previous sweeps. It was especially crucial that the programming of the screener questions and the rules used to determine the order in which Victim Forms are asked was consistent. This required not only replicating the questions and filtering precisely but also the consistency and logic checks used in previous sweeps to ensure that no changes in the data could be attributed to differences in the way the questionnaire was programmed. Additionally, the treatment of Don’t Know and Refused keys had to be kept consistent with previous sweeps.

Considerable resources were devoted during the piloting and dress rehearsal stages to ensure that the questionnaire programme was working properly and exactly replicated the 2000 questionnaire. The Home Office provided the Blaise script from 2000 to allow precise comparisons to be made. Additionally, the 2001 questionnaire was run in parallel with the 2000 questionnaire to ensure that the filtering and logic and consistency checks worked in exactly the same way where relevant.

The Quancept program is run within an environment – known as the CAPI Shell- that controls the management of the sample, the data transmission procedures, and the back up procedures.

3.5.2  Allocation of sample within CAPI

In the 2001 survey the unique serial number entered by interviewers into the computer had to be capable of the following:

• to randomly allocate respondents to one of four follow-up modules (and within each module to further allocate respondents into a sub-sample).
• to distinguish between Type A and Type B interviews in the first four months of issued sample.
• to distinguish between a core sample respondent and a non-white boost sample respondent.

The unique serial number pre-printed on all core Address Contact Sheets and transferred by interviewers into the CAPI consisted of 6 digits. The first 4 digits (1000-9999) represented the area or sample point number and the last 2 digits (01-99) represented the address number. Additionally, the interviewers had to enter a screen number which denoted whether the interview was a core sample interview (screen number 0) or a non-white boost sample interview (screen number 1-6). Various checks were incorporated.
into the questionnaire to minimise the chances of errors being made by interviewers when entering the serial and screen numbers.

In the first 4 months of issued sample, when each sample point contained both Type A and Type B addresses (see section 2.7), address numbers 01-49 were used to denote Type B interviews, while address numbers 50-99 were used to denote Type B interviews. In the latter part of the year, when all issued sample became in effect Type B, all issued address numbers were in the range 01-32.

Allocation of respondents to each follow-up module was also done on the basis of the address number, using an algorithm based on division of the address number by 8 as shown in Table 3.2. For non-white respondents, who were allocated only between Follow-up modules A and B in the ratio of 3:1, the algorithm was amended to ensure a similar random allocation of respondents.

Since each sample point contained either 16 or 32 addresses the above algorithm ensured that within each sample point a similar number of issued addresses were randomly allocated to each follow-up module.

3.5.3 Features of Quancept used in the BCS

3.5.3.1 Don’t Know and Refusal Keys

In the Quancept script, Don’t Know and Refused are special codes. Rather than entering numeric codes for these options, interviewers enter DK and REF respectively. As with previous sweeps of the BCS, almost every question had a Don’t Know and Refused option that the interviewer could use. However, at most questions they were hidden, and so did not appear on the screen as an explicit option. In the paper questionnaire in Appendix D, Don’t Know and Refused are only shown if they actually appeared as an option on the screen.

3.5.3.2 Different question types

As with previous sweeps of the BCS, the vast majority of questions were pre-coded, meaning that a list of answer categories appears on the laptop screen and the interviewers enter the appropriate numeric code. Question were either single response (i.e. only one code can be entered) or multi-response (i.e. more than one code can be entered). In the latter case, answers are entered separated by spaces. In multi-response questions it is possible to allow a combination of either multi-response or single response options at the same question. In the case of numeric questions, where an actual value is required, the interviewer simply types in the appropriate number.

Many pre-coded questions had a ‘Other –specify’ option, and if this option was selected by a respondent, the interviewer would simply type in the answer given. In all these questions, the answers were later examined by coders to see if the other answer could be back coded into one of the original pre-coded options (see section 5.2).

In Quancept the standard keys that interviewers use to move forwards and backwards through the questionnaire are Ctrl + Enter and Ctrl + Backspace respectively. Although interviewers are trained to use computers, it was felt that these keystroke combinations might be awkward for respondents when completing the self-completion part of the questionnaire. Consequently, a modified version of the software was used for the BCS which allowed respondents to use single keystrokes (F2 for forward, F1 for backward) to complete the self-completion.

3.5.3.3 Logic and consistency checks

A number of logic and consistency checks were built into the Quancept script. These were of two types. First, hard checks, where the interviewer was not able to move on to the next question until the discrepancy had been resolved. And, second soft checks where the interviewer was asked to confirm that the information entered at a specific question was correct but was allowed to pass on to the next question.

A full list of all the logic and consistency checks in the 2001 script can be found in Appendix I.
3.5.3.4 *Date calculation and text substitution*

As with previous sweeps of the BCS text substitution and date calculations were used extensively throughout the questionnaire. Type A interview screener questions were kept exactly the same as before. Type B interviews used different text substitution and date calculations due to the change in the reference period definition.

**Text substitution** is where alternative text is used in a question depending upon the series of answers given by a respondent to previous questions. In the paper questionnaire, square brackets are used to denote the existence of text substitution in a question.

Two main types of *date calculations* were used in the questionnaire:

- First, the precise reference period was calculated based on the date of interview and this was then substituted into the text of many questions. In all cases it was decided to calculate the date to the first of the month 12 months previous. Thus, for example, any interviews conducted in July 2001 would use the reference period “*since the first of July 2000*”. This means that in practice the 12 month reference period consisted of the last 12 full calendar months, plus the current month (i.e. slightly more than 12 calendar months). This fact is taken into account when the victimisation rates are being estimated.

- Second, some code frames consisted of particular time periods (e.g. months or quarters) which changed on a month by month basis. With these type of questions the Quancept script was programmed to allow the whole period covered by the survey (e.g. from January 2000 to April 2002 – a total of 28 months). However, interviewers only saw on screen the sub-set of codes that were appropriate to the correct reference period (i.e. 13 calendar months).

Since some questions use these constantly rotating code frame based upon date of interview it is impossible to label these variables in any meaningful way in the SPSS data file. A list of these questions and the appropriate code frames that actually appeared on screen depending upon the month of interview for both Type A and Type B sample can be found in Appendix F.
4. Fieldwork

This chapter documents the data collection process, focusing on quality control procedures and the outcome in terms of response rates.

4.1 Briefing of interviewers

All interviewers working on the 2001 BCS attended whole day briefing meetings with researchers and field staff from their organisation, together with representatives of the Home Office research team.

Each briefing included:
- information about the BCS and its use by the Home Office
- information about sampling procedures and the importance of high response rates
- explanation of certain questions and topics covered in the interview
- instruction about how to handle the self completion sections of the interview.

Initial briefing sessions were conducted in January and February 2001, with others conducted later in the year to brief new interviewers joining the panel. A total of 385 interviewers attended briefings on the 2001 BCS, including supervisors and those who attended to ensure the smooth running of the briefings, for example by helping any interviewer who had problems with their computer.

In July 2001, all interviewers were briefed on the new youth screening procedures, brought up to date with changes to the questionnaire, and given further information on existing procedures by means of a video briefing. Video briefings are recorded on CD and interviewers are able to play them on their laptop computers.

4.2 Supervision and quality control

Several methods were used to ensure the quality and validity of the data collection operation.

A proportion of interviewers, particularly those less experienced, were accompanied in the field by supervisors. This included all interviewers who were new to random probability, who were accompanied on the first day of a BCS assignment by a supervisor.

A proportion of addresses were re-contacted, to verify that the interviewer had contacted someone at the address, whether or not an interview had resulted. In total, 3,521 respondents were re-contacted to verify that the interviewer had contacted someone, and whether or not an interview had resulted.

A total of 10,220 core addresses and 1,731 non-white addresses where there was an unproductive outcome at the initial stage were re-issued, either to the original interviewer, or to another interviewer or supervisor. In some cases, addresses were issued more than once. Of these, 29% were converted into productive outcomes, compared to 34% in 2000.
4.3 Fieldwork dates

The BCS had always been conducted in the early part of the year, in order to keep the reference period for incidents as consistent as possible with BCS sweeps. From January 2001 the British Crime Survey (BCS) became a continuous survey with 40,000 respondents interviewed per year.

Each fieldwork period lasted approximately 3 months to allow sufficient time for non-productive addresses to be re-issued. This means that for sample issued in January, fieldwork was carried out until the end of March, while sample issued in February was in the field until the end of April. Because of this time lag, it means that although sample was issued throughout 2001, interviewing did not finish until the end of March 2002. In fact, 6.6% of core interviews and 9.8% of non-white interviews that were part of the 2001 issued actually took place in 2002.

Both the date of interview and the date of issue are included on the BCS data set. It is important to understand that while the sample and fieldwork is managed on the basis of issued sample, much of the analysis (including the calculation of victimisation rates) is based upon the achieved sample within any given period. Details about how issued sample and achieved sample relate to data output can be found in section 6.2.

4.4 Presence of others during the interview

In briefing interviewers, emphasis was placed on trying to conduct the interview in private. It was felt that this would not only make the interview run more smoothly, it might also prevent some respondents from mentioning certain incidents, which they might be embarrassed or worried of talking about in front of others. This was a particular concern for respondents who had experienced domestic violence or sexual assault. For such incidents, interviewers were given the option of suspending the Victim Form if they felt it was inappropriate to continue with the questions because of the presence of others in the room.

However, it was also recognised that in some situations the presence of others can improve the accuracy of the information collected. This is particularly the case in incidents of vehicle crime or property crime, where the respondent may not have been personally present, reported the incident to the police, etc.

The key point at which the presence of another person could affect the estimate of victimisation is during the initial set of 'screener’ questions. At the end of these questions, the interviewer recorded whether anyone else was present. The coding of this question is shown in Table 4.1.
Table 4.1 WHETHER ANYONE ELSE WAS PRESENT DURING THE SCREENER QUESTIONS

<table>
<thead>
<tr>

</tbody>
</table>

In more than two-thirds of interviews (69%), the respondent was interviewed without anyone else other than the interviewer being present. Respondents interviewed as part of the non-white boost sample were more than twice as likely as respondents from the core sample to be interviewed with children under 16 present (18.5% and 8% respectively) and with other adults present (16% and 7.5% respectively).

The presence of others during the self-completion sections was also recorded (Table 4.2). In 71% of interviews the self-completion was done with no one other than the respondent and interviewer present. As with the screener questions, it was more common for respondents from the core sample to complete the self-completion with no-one else present compared with respondents from the non-white sample (71% and 65% respectively).

</tr>
</tbody>
</table>

Where anyone else was present, the extent to which they were involved in answering questions was noted as was whether the interviewer was involved in the self-completion sections.

Even where someone else was present during the self-completion, it was not common for others to become involved in answering the questions. In 87% of cases where

---

\(^{14}\) Percentages add up to more than 100% since more than one answer could be coded at this question
someone else was present, the respondent completed the self-completion section entirely on their own. In 7% of cases someone else looked at or read the self-completion with the respondent, while in 6% of cases the respondent discussed the self-completion with others.

Interviewer involvement in helping the respondent with the self-completion sections was also not common (Table 4.3). Just over 11% of respondents asked the interviewer to complete the self-completion for them, with respondents from the non-white boost sample being more likely to choose this option than respondents from the core sample (15.5% and 11% respectively). However, the vast majority of respondents (81%) completed the self-completion without any assistance at all.

4.5 Length of interview

4.5.1 Introduction

Timing stamps were placed throughout the questionnaire to allow timing of individual sections. Due to various technical issues associated with the CAPI system, it is not always possible to derive meaningful time stamps from every interview. For example, should an interviewer briefly go back into an interview at a later time to check or amend a response the time stamps can be set to show an apparently very short (2-3 minutes) interview. Similarly, if an interviewer has to temporarily stop or suspend an interview for an hour or so and fails to come out of the questionnaire in the intervening period (simply powering down the computer instead) the time stamps can show an interview of 4-5 hours.

To eliminate the effects of these outliers on the calculation of average timings, it was decided to only include interviews where the total length of interview was in the range 15
minutes to 180 minutes. During the 2001 survey 35,907 interviews out of 40,491 had a time within these ranges and are included in the analysis below\textsuperscript{16}.

**4.5.2 Calculation of interview times**

Since the calculation of interview times is based on time stamps generated within the interview (rather than an interviewer estimate), they represent the elapsed time from the first question to the last question. As such they do not include the time during which the interviewer is introducing the survey, setting up the laptop, or packing up at the end of the interview. It should be noted that this represents a different method of timing interviews from previous sweeps of the BCS which were based on interviewer estimate of the total time spent in a respondent’s home (including introduction, setting up and packing up).

**4.5.3 Overall length of interview**

The average (mean) length of the interview during the first 6 months of 2001 was **47 minutes**. This compares to a set interview length of 50 minutes. The main influence on length was whether or not the respondent was a victim of crime or not. The average interview length for **non-victims** was **39 minutes** compared to **63 minutes** for **victims**. The average length of core sample interviews was **46 minutes**, while the average length of the non-white boost sample interviews was **50 minutes**. The average length of the youth boost sample interviews was **26 minutes**.

The average length of interview by number of Victim Forms is shown in Table 4.4 below.

**Table 4.4 LENGTH OF INTERVIEW BY NUMBER OF VICTIM FORMS**

<table>
<thead>
<tr>

<tr>
<td>4 or more</td>
<td>93</td>
</tr>
<tr>
<td>All victims</td>
<td>63</td>
</tr>
<tr>
<td>All respondents</td>
<td>47</td>
</tr>
</tbody>
</table>

\textsuperscript{16} A high proportion of the interviews without valid time stamps are from January due to the time stamps initially being set incorrectly. The setting of the time stamps were adjusted from February onwards to ensure that stamps were not overwritten should an interviewer go back into an interview at a later time.
4.5.4 Average time for different sections of the interview.  

The average times for each of the main sections of the questionnaire are shown below in Table 4.5.

</tr>
</tbody>
</table>

4.5.5 Length of victim forms  

As mentioned above the average length of the questionnaire is affected primarily by the number of Victim Forms completed by a respondent with the time for non-victims being, on average, 39 minutes compared to 63 minutes, on average, for victims.

Although the average time taken to complete the victim forms was 6.7 minutes, this figure is skewed by the fact that non-victims take no time to complete this section. Therefore, a more meaningful time can be obtained by looking at the average time taken to complete each victim form by those who completed each one (Table 4.6).

Long victim forms averaged about 12.3 minutes per form, while short victim forms averaged 4.2 minutes per form. Table 4.6 also shows that the time taken to complete the first Victim Form was greater than for forms two or three, perhaps suggesting either that as respondents become more familiar with the questions they speed up or that respondents pay less attention to their answers.

\(^{17}\) This is an average time across all respondents, with non-victims having a time of 0.

\(^{18}\) This represents an average time across all the follow-up modules.
Table 4.6  **AVERAGE TIMES FOR EACH VICTIM FORM**

<table>
<thead>
<tr>
<th>Victim Form number</th>
<th>Average time (minutes)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Victim Form 1</td>

<td>3.9</td>
</tr>
<tr>
<td>Victim Form 6</td>
<td>4.5</td>
</tr>
</tbody>
</table>

**4.5.6 Timing of the follow up modules**

Although the average time of the follow-up modules was 7.1 minutes, this varied from module to module. The average length of each of the 4 follow-up modules is shown in Table 4.7. This shows that follow-up B and D were significantly longer than follow-up A and C.

Table 4.7  **AVERAGE LENGTH OF EACH FOLLOW-UP MODULE**

<table>
<thead>
<tr>

</tr>
<tr>
<td>Follow-up D</td>
<td>9.3</td>
</tr>
<tr>
<td>Average length of Follow-up</td>
<td>7.1</td>
</tr>
</tbody>
</table>

**4.5.7 Timing of the self-completion modules**

Although the overall times for the self-completion modules were 1.7 minutes for drugs and 3.6 minutes for IPV/Sexual Attack respectively these represent the average times calculated across all respondents. Therefore, respondents who either refused the self-completion module or who were not eligible for the module (those aged 60 or over) would have a time of 0.

As with the Victim Forms, a more meaningful assessment of the length of the self-completion modules is to look at the average times only for those who completed the modules. Limiting the analysis to these respondents shows that the average time of the drugs module was **3.0 minutes** while the average time of the IPV/sexual attack module was **6.6 minutes**.
4.6 Response rate and reasons for non-response

The full response rate analysis for the issued core sample is shown in Table 4.8.

</table>

For the core addresses, just over eight per cent were not residential or were unoccupied. This is slightly lower than had been anticipated but seems to follow a pattern over the past few sweeps of the BCS which have shown a decline in the proportion of addresses out of scope (in 1992, 12% of issued addresses were out of scope). At occupied residential addresses, refusal was the main reason for unproductive outcomes. This occurred both prior to and after respondent selection. With the core sample, 14.3% of the sampled addresses refused. Inability of the interviewer to make contact at the address (which may have meant in some cases these were unoccupied at the time of the survey)
accounted for a further 7.1%. A further 5.5% of addresses had unproductive outcomes due to health, language or other reasons.

In terms of the spliced design, response rates for the Type A sample was 71% compared to 74% for the Type B sample. This difference was probably primarily due to the fact that the Type A sample was concentrated in the first few months of the year, at a time when the majority of interviewers were new to the British Crime Survey.

4.7 Non-white boost sample response rates

Table 4.9 shows the 2001 response rates for the non-white boost sample for the 176,656 screened addresses. This shows that of all the addresses screened only 3.7% of households had an eligible respondent. Overall, the response rate for the non-white boost sample was 50%. Although refusal rates were slightly higher compared with the core sample (18% and 14% respectively), the main reason for the lower response rate on the boost sample was a significantly higher non-contact rate (20% compared with 7% on the core sample). This can be explained partly by the nature of the population. The non-white population tends to be concentrated in inner city areas and especially in London, where non-contact rates tend to be higher. It can also be explained partly by the nature of the methodology since eligible households tend to be identified later in an assignment and so interviewers have, on average, less time to make repeated calls.

4.8 Youth boost sample response rates

Table 4.10 shows the response rates for the youth boost sample. All core sample addresses issued between July 2001 and February 2002 included screening for 16 to 24 year olds. At almost a quarter (23.8%) of addresses no screening was actually carried out because the core address was deadwood, a non-contact or a refusal by the selected respondent on the core sample\(^{19}\). At addresses where screening was carried out, an eligible respondent was identified at 7.3% of addresses.

The overall response rate achieved on the youth boost sample was 72%. The level of non-contact and refusal was broadly in line with what was achieved on the core sample.

In addition to the 1,525 interviews generated from the core sample a further 89 interviews were achieved from the non-white sample.

\(^{19}\) Interviewers were instructed not to carry out screening at households where the core sample selected respondent refused either in person or by proxy. This was done to maximise the chances of a core sample interview being achieved at a reissue stage.

4.9 Response to the self-completion questionnaires

4.9.1 Background

The self-completion questionnaire was presented to respondents at the end of the interview. It included four separate topics, knowledge of and exposure to illegal drugs, sexual assault, domestic violence and stalking.

4.9.2 Response rate to self-completion sections

Table 4.11 shows that almost 90% of eligible respondents accepted the self-completion, with respondents in the non-white boost sample being less likely than respondents on the core sample to complete the section (90% and 76% respectively). This was primarily due to language problems, with only 1% of respondents from the core sample refusing the self-completion due to language problems compared with 13% of respondents from the non-white boost sample. For respondents who completed the self-completion, about one in ten (10%) asked the interviewer to operate the computer for them.

<td>90.1</td>
</tr>
<tr>
<td>Base (All 16-59 year olds):</td>
<td>24,926</td>
<td></td>
</tr>
</tbody>
</table>

Table 4.12 shows the response rate by sex and age group. There was little overall difference between male and female respondents, although slightly more men asked the interviewer to complete the sections for them. There was a greater disparity by age group in the way the self-completion sections were treated by respondents, although this

</tr>
</tbody>
</table>
manifested itself in more assistance being given by the interviewer, with only a slight difference in willingness to answer the questions.

It can be concluded from this that there are likely to be differences between the respondents who did the self-completion sections themselves and those who asked for the interviewers' help.

4.10 Full and Partial Interviews

An interview was only counted as a full interview for the core sample and the non-white boost if the respondent had completed to the end of the demographic section of the questionnaire. Anything less than this was returned as a partial interview. Full and partial interviews were recorded separately in the field figures with 37,046 full interviews and 115 partial interviews returned.

4.11 Fieldwork Procedures

An interviewer assignment in most cases consisted of 32 issued addresses. In areas where the proportion of the non-white population was more than 20%, interviewers were only issued with 16 addresses as it was anticipated that they would achieve more non-white boost interviews. Interviewers were only allowed to conduct interviews at the addresses they were issued with.

All selected addresses were sent a letter from the Home Office in advance of an interviewer calling at the address. For addresses in Wales, a Welsh translation was provided on the reverse of the letter. Included with the advance letter was a leaflet from the Home Office explaining what the British Crime Survey is, reassuring potential respondents regarding confidentiality and detailing some of the findings from the survey. The advance letter explained the selection procedure resulting in the household’s selection and that an interviewer would be calling within the next few weeks. The advance letter also provided a telephone number for households to call to find more out about the BCS, to make appointment times for the interview or to say that they didn’t want to be interviewed (office refusal). Office refusals counted for 8.5% of all refusals (620 in total). Examples of the advanced letter (both English and Welsh versions) can be found in Appendix A. A copy of the Home Office leaflet can be found in Appendix B.

4.11.1 Address Contact Sheets (ACS)

Interviewers were provided with an Address Contact Sheet (ACS) for each sampled address. There were two different versions of the core sample ACS. One version was coloured yellow and prompted interviewers to carry out screening for non-white people at neighbouring addresses as well as contacting and interviewing someone at the given address. The second version was coloured white and interviewers did not have to conduct any non-white screening at these addresses. There were additional ACSs for the non-white and youth boost samples, these were blue and pink respectively and had no address pre-printed upon them.

The ACSs allowed interviewers to record all visits made to that address and the final outcome achieved. It prompted interviewers to assess whether the address was ‘traceable, residential and occupied’ in order to confirm eligibility for the survey. At addresses which contained more than one dwelling unit, or more than one eligible person the ACS
assisted in randomly selecting a respondent by providing a selection box with a unique set of random numbers.

The ACSs were also used to collect some basic observational information about the area and the core sample address. This information is used to assess whether non-respondents differ much from respondents, and as well as this its key role in recent Home Office reporting is as an interviewer based disorder measure.

Examples of both core sample Address Contact Sheets and the non-white and Youth Boost Sample ACS can be found in Appendix C.
5. Data Processing

5.1 Offence coding

The BCS Offence Coding System was developed for the 1982 BCS to match, as closely as possible, the way incidents were classified by the police. Apart from some minor changes, the code frame and the instructions to coders have remained stable since 1982.

In 2001, new operational procedures were introduced for coders, although the code frame and the way any given code was reached remained consistent with previous waves.

During 2001, the Offence Coding System consisted of the following steps:

1. An offence code was generated automatically, based on the answers given to a number of pre-coded variables in the Victim Form.
2. Coders used a specially developed questionnaire to produce an offence code for each Victim Form. The coders also had to record for each case how certain or uncertain they were about the code.
3. A supervisor checked any codes that the original coder was uncertain about, plus at least 10% of certain codes as a quality check.
4. Researchers at the Home Office checked:
   - Any codes that BMRB are uncertain about
   - Certain types of incident that were automatically referred (e.g. arson)
   - 10% of certain codes as part of a quality check

A final outcome code was assigned to each Victim Form.

A flow chart of the Offence Coding System is shown in figure 5.1.

These processes are explained in more detail below.
Fig. 5.1 BCS OFFENCE CODING FLOWCHART

1. Initial coding
   - Key code
   - Outcome
     - Certain
     - Uncertain
       - Supervisor coding

               - Provide data to HO
                 - Data returned from HO
                   - Home Office final offence code added
                     - Final offence code data produced

2. Selected for supervisor verification (10%)
   - Yes
   - No

3. Selected for HO check (10%)
   - Yes
   - No
5.1.1 The automatically generated offence code

In 1996 a programme was introduced that automatically generated an offence code based on the answers to a number of pre-coded variables in the Victim Form. The programme that was used for the 2001 BCS was very similar to that used in 2000. The programme was translated from Blaise script into Perl script (so that it could be incorporated into the new coding procedures). As part of the consistency checks done before the beginning of the survey the new programme was checked with data from the 2000 survey to ensure that it worked in the same way.

An automatic code can not be generated in all cases, and in 27% of cases no automatic code was produced (due to missing codes or to some inconsistency between the different variables used). Irrespective of the computer’s suggested code, the coder has the responsibility of producing an offence code, and coders are instructed to see the generated code as only a starting point.

In cases where a code was automatically generated, it was the same as the final offence code in 78% of cases.

5.1.2 The coding task

Coders were provided with a paper-based print out of the key variables from each Victim Form, and this information forms the basis of the coding. This document also provided coders with the offence code that had been generated by the automatic generation programme.

Coders used a specially designed computer assisted questionnaire to carry out the coding. The questionnaire asked the coders certain questions about the nature of the offence. The questionnaire takes account of the major rules that apply to offence coding (such as the priority of codes), and by answering the questions on the basis of the information provided in the Victim Form, the coders reach an offence code.

All coders were personally briefed about the offence coding. The coders were also provided with a coding manual. This manual is similar to the one used in previous sweeps of BCS, and contains all the rules that govern offence coding. The manual also provides flow-charts that show how the coding questionnaire works, so that coders can see how they reached a particular offence code on the basis of the answers that they input. A copy of this manual is provided in Appendix G.

When the coder reaches an offence code, they can say whether they are certain or uncertain that this is the right code. Any Victim Forms which the coder is uncertain about are automatically referred to their supervisor for checking. In addition, the supervisor checks 10% of codes which coders were certain about.

5.1.3 Home Office coding

Victim Forms were referred to the Home Office research team if the incident involved:

- deliberate damage by fire
• the police as offenders
• the offender being mentally ill

The Home Office was also sent all offence codes that the supervisors are unsure about.

10% of codes which BMRB were certain about were randomly selected to go to the Home Office for quality control checking.

A list of Victim Forms to be checked by researchers at the Home Office was sent every two weeks. This was an Excel spreadsheet that contained the serial number of each Victim Form, the code that the coder (and supervisor if applicable) had given the incident, how certain the coder (and supervisor) was about the incident, and any notes that the coder added about why they were uncertain. An electronic version of the paper-based document providing the key variables from the Victim Form was also provided.

Researchers at the Home Office coded each of the Victim Forms sent to them (using the paper-based document) and returned the spreadsheet with their code added. These codes were then manually added into the coding file (so that the coders could see the changes that had been made).

Particular attention was paid to cases where the Home Office changed a code that BMRB coders had marked as “certain”. If the BMRB coders disagreed with such a coding decision, this was fed back to both BMRB researchers and Home Office researchers for further consideration and discussion.

For Quarter 4, the Home Office changed 6% of cases that BMRB had been certain about. (This analysis was not carried out for previous quarters).

5.1.4 Final Offence Code

The SPSS data set includes all the offence codes for each Victim Form:

- Offsug: Suggested offence code (generated by computer)
- Voffence: Code assigned by the original coder
- Soffence: Code assigned by the supervisor
- Finloffc: Code assigned by the Home Office research team
- Offence: Final offence code

5.1.5 Checks on final offence code

During the creation of the SPSS data files some further consistency checks were run on the final offence code, against key pre-coded variables in the Victim Form in order to ensure the offence coding was as accurate as possible. These checks identified cases involving:

• Assaults where no force or violence was used
• Burglary where entry to the property was authorised
• Car thefts where no car was listed as being stolen, and the police were not informed
• Sexual assaults where there was no sexual element to the assault
• Snatch thefts where the item stolen was not being held or carried
• Other thefts where the item stolen was being held or carried
A researcher looked at any cases that failed these checks. For most, the final offence code was correct (on the basis of other information given in the Victim Form). However, if necessary, the final offence code was amended.

5.1.6 Missing Injury data

In the first month of fieldwork, there was an error in the questionnaire that meant that questions for victims of violence on the level of injury and the type of force used were not asked. In total, this affected 212 Victim Forms. All of these cases were re-examined by researchers at the Home Office and BMRB, to ensure that the coding was as accurate as possible given these omissions. In total, 9 cases had their assault codes amended.

5.2 Other coding

In addition to the offence coding, coders also looked at all cases where ‘other –specify’ had been given as an answer. The aim of this was to see whether the answer given could be back coded into one of the original pre-coded response options. Coding was done in Qwincode, part of the Quancept suite of programmes.

Coders were provided with the code frames used in the questionnaire as a starting point. Since most of the questions have been used in previous sweeps of the survey, the code frames were already well developed and there was little need to add new codes to the frames. However, if the coding supervisor felt an extra code was needed, this was flagged up to researchers who approved any changes before they were implemented.

In 2001, there were five fully open-ended questions on the questionnaire. Since three of these questions (WhyHapp, WhyBet, WhyNoAtt) had been asked on previous sweeps of the survey, code frames already existed and these were used for coding. Two new fully open-ended questions on the Sexual Assault section of the Inter-Personal Violence module (SxDescr, SxBelive) were answered by only a relatively small number of respondents and it was decided not to attempt to code these questions. Instead, the verbatim answers were attached to the data files. Consequently, there was no requirement to develop any new code frames in the 2001 survey.

When mid-year revisions were made to the questionnaire in July 2001 it was agreed to change two of the fully open ended questions (WhyHapp, WhyBet) into pre-coded questions. In the case of WhyHapp, this resulted in a slightly different code frame in the second six months of 2001 compared with the first six months. Consequently, the name of this variable was changed to WhyHap2 from July 2001 onwards.

5.3 Coding of occupation and social class

Occupation details were collected for all respondents either relating to their current job or to their last job if the respondent was not currently employed but had worked at some time in the past. Occupational details of the Household Reference Person were also collected, if this was not the same person as the respondent.

Occupations were coded using the Standard Occupational Classification 2000 (SOC2000) (The Stationery Office, 2000). All occupational coding was done centrally once the data were returned from the field.
In addition to coding SOC2000, the old SOC1990 codes were also recorded using Volume 2 of the Standard Occupational Classification 2000. This contains a look-up table that allows SOC2000 codes to be matched to their SOC1990 equivalents.

As well as occupation codes, social class for all respondents and Household Reference Persons was also added to the file. The new social class categories – NS-SEC – were derived automatically using an algorithm which was developed from the documentation provided by ONS (ONS, 2001). Both the NS-SEC operational categories and the NS-SEC analytical categories were derived. Additionally, the old Socio-Economic Group (SEG) was derived using Volume 3 of the Standard Occupational Classification 1990 (HMSO, 1990)
6. Data Output

6.1 Introduction

The main output from the British Crime Survey are two SPSS data files that were delivered to the Home Office on a quarterly basis. One file, the Non Victim File, was produced at the level of the individual respondent and contained all the data, except for that collected in the Victim Form. Cases where interviewers had reached the end of the main demographic section were classified as full interviews, while anything less than this were classified as partial interviews. Cases where the interviewer did not reach the end of the screener questions were regarded as unusable interviews and not included on the SPSS data files.

The second file, the Victim File, was produced at the level of the individual incident or crime and contained all the data collected in the Victim Forms. All generated Victim Forms were included on the file, including cases where the Victim Form has either been suspended or the reference period was out of scope. Although such records contain no information and are not used for any analysis, it is useful to keep these on the file to monitor the number of Victim Forms that fall into these categories.

In supplying the data files to the Home Office, cases from both the core sample and the non-white boost sample were included on the files.

Cases from the youth boost sample will be provided to the Home Office as a separate data file.

6.2 Delivery of data output

Data was delivered to the Home Office approximately one month after the end of each quarterly fieldwork period. This meant that each data file contained interviews that were achieved in a specific time period, rather than those that were issued in a specific time period. Consequently, interviews were included on each quarterly file that came from issued sample that had not yet been exhausted. As such each of the quarterly files represented only preliminary data in terms of the issued sample.

The data files delivered to the Home Office for the 2001 survey are shown below. In each quarter, only the new interviews actually achieved in the previous quarter were processed and checked. These were then merged with the previous quarter data such that the number of cases on each data file built up during the year until the full 2001 sample was delivered in May 2002.

6.3 Content of SPSS data file

The SPSS data files delivered to the Home Office on a quarterly basis contained various types of variables. The main types of variables contained on the files are:

- **Questionnaire variables** (NVF and VF).
- **Geo-demographic variables** (NVF only). All interviews had a set of pre-specified geo-demographic variables attached to them (see Appendix H for complete listing).
- **Observational variables** (NVF only). All interviews had the observational data collected by interviewers on the Address Contact Sheets attached to them (see Appendix H for complete listing).
- **Coding variables** (NVF and VF). On the Non Victim File, SOC2000 and SOC1990 codes are included for both the respondent and the household reference person. Additionally, the new NS-SEC classification and the SEG classification for both the respondent and the household reference person are included. On the Victim File, a full set of offence codes was attached (see Appendix H).
- **Derived variables** (NVF and VF). Many derived variables were also added to the file. These consisted primarily of 2 types:
  - **Flag variables** that identify, for example, the type of interview (Type A or Type B), the type of sample (Core or Non-white), the split and sub-split, the date of interview, the month of issue, whether partial or full interview, whether a victim or non-victim, etc. On the Victim File, flags variables include whether the record was a Long or Short Victim Form, whether it was a Series or a Single incident, and whether it was inside or outside the reference period.
  - **Classificatory variables** derived from the data. These included standard classifications such as ONS harmonised variables, banded age groups, ethnic groups, income groups, etc.
- **Weighting variables** (NVF only). In addition to the scaled and unscaled household and individual weights for both the core and Non-white boost sample the files also contain the constituent parts of each weight as outlined in section 7.

6.4 Conventions used on SPSS Data Files

In creating the 2001 data files great attention was paid to ensuring as much consistency as possible was maintained with previous sweeps of the survey.

6.4.1 Case identifier

The case identifier was required to be similar to that used on previous sweeps of the survey but also had to be designed to meet the requirements of a continuous survey and the fact that from 2002, half the sample points would be rotated forward from the previous year.

On the Non-Victim File, where each individual case or record represents an individual respondent, the unique case identifier (ROWLABEL) is an 8-digit number constructed as follows:
### Naming conventions

Where appropriate, variable names were kept the same as previous sweeps. For some questions, small changes to the code frame (such as the adding of an extra code) meant that questions which appear similar to previous sweeps were not in actual fact identical. In such situations, the variable name on the 2001 data file was changed to reflect this. Thus, for example, although the question OffInHom remained identical between the 2000 and 2001 sweep, the code frame increased from two codes to three codes. Consequently, the name of the variable was amended to OffInHo2 for 2001 to reflect this change.

### Labelling variables

The changing nature of the 12-month reference period over the course of the year created a difficulty in labelling certain variables. In the Quancept script, dates were automatically calculated based on the date of interview and appropriate text substitution was used to ensure that the question always referred to the correct period. In the SPSS data files, which contain data from interviews achieved over the whole year, it was difficult to attach meaningful labels to certain variables since the label is different depending upon the month of interview. This issue affects the following variables (all on the Victim File):

- DateSerA-DateSerH
- NQuart1-NQuart5
- QtrRecIn
- QtrIncId

Details of how the code frames for these specific questions relate to the month of interview can be found in Appendix F.

### Don't Know and Refused values

The convention for Don't Know and Refusal codes used in the most recent sweeps was maintained on the 2001 data. This meant that on the SPSS file the code for Don't Know was ‘9’ for code frames up to 7, ‘99’ for code frames up to 97, and so on. The code for
Refused was 8, 98, and so on. Since these are standard codes used throughout the SPSS files, Don’t Know and Refused codes are not labelled.

In addition, to these standard codes the value –1 was used on a few variables to denote missing data. This was at questions where data was missing because of filter errors in the early months of the survey. The value ‘-1’ was used to denote missing data separately from the standard System Missing values in SPSS which denote that the question did not apply.

### 6.4.5 Multi-response variables

In previous sweeps of the BCS, multi-response variables have been created as a set of variables equal to the maximum number of answers that could be given. The first variable holds the first answer given by the respondent, the second variable holds the second answer given by the respondent, and so on.

After discussions with the Home Office it was agreed from 2001 onwards to present multi-response variables differently from previous sweeps. Instead, multi-response variables were set up as a set of variables equal to the total number of answers possible (including Don’t Know and Refused). Each variable is then given a value of ‘0’ or ‘1’ depending on whether the respondent gave that particular answer or not. To denote this change all multiple response variables in 2001 were all named with a letter suffix, rather than the number suffix that was used in previous sweeps.

An example of a multi-response variable where there are seven possible answer categories, and so seven separate variables, is shown below:

AGEOFFA-

5. or people aged over 40? (AGEOFFE)
    Don’t Know (AGEOFFF)
    Refused (AGEOFFG)
7. WEIGHTING THE DATA

7.1 Introduction

There are three main reasons for calculating weights on the BCS:

- to compensate for unequal selection probabilities. In the BCS, different units of analyses (households, individuals, instances of victimisation) have had different probabilities of inclusion in the sample due to factors such as oversampling of small PFA’s, the selection of one dwelling unit at multi-household addresses, the selection of one individual within a dwelling, and the inclusion of a single victim form to represent a series of similar incidents.
- in an attempt to compensate for differential response. Differential response rates can arise both between different geographic units (e.g. differences in response between inner city and non-inner city areas) and between different age and gender sub-groups.
- to ensure that quarters are equally weighted for analyses that combine data from more than one quarter.

In the 2001 British Crime Survey, a variety of different weights were calculated to meet the different analyses requirements. All weights include a component to compensate for unequal selection probabilities, while weighting components to compensate for differential response and to equally weight quarters are included in some weights but not in others.

7.2 Using different weights

The actual weights to be applied in any particular situation will depend on:

- which unit of analyses is used;
- the sample inclusion criteria;
- whether quarter of issue is treated as a stratifier or not;
- whether or not a non-response element is included; and
- whether attempts are made to equally weight data collected in different quarters.

7.2.1 Units of analyses

The main units of analysis used on the BCS are households, individuals, and incidents of victimisation. Different weights are used depending upon the unit of analyses. In particular, some crimes are considered household crimes (e.g. burglary, vandalism to household property, theft of and from a car) and therefore the main unit of analyses is the household, while others are personal crimes (assault, robbery, sexual offences) and the main unit of analyses is the individual.

For most weights that have been constructed there is a household weight and an individual weight.
Whether a case should be included in the analyses or not is related to a number of different considerations. These include:

- the reference period under consideration;
- whether the reference period refers to the achieved sample or the issued sample;
- the type of interview (Type A or Type B); and
- the type of sub-sample (e.g. core sample, non-white sample, young persons sample, etc.).

In terms of the reference period under consideration, weights were constructed for different reference periods. It is particularly worth noting that while many of the weights are based on the 2001 issued sample, some weights were required for the achieved sample for 2001/2002 financial year. Since the 2001 and 2002 issued samples were drawn entirely separately, this meant that separate weights were constructed for 2001 and for the first quarter of 2002 and then these weights were combined.

While the weights constructed for the 2001/2002 financial year relate to interviews achieved in this period, other weights relate to the issued sample. In terms of achieved sample, addresses issued during 2001 equate to an interviewing period from January 2001 until the end of March 2002.

In terms of type of interview, separate weights were constructed for analysing Type A and Type B cases separately, as well as analysing them together.

In terms of the type of sub-sample, weights were constructed separately for only core sample cases and for the non-white and young people’s sample. In the case of the non-white sample, weights are applied to all eligible cases (i.e. non-white respondents) whether they came from the core sample or the non-white boost sample. The same is true for the young people’s sample, where weights were applied to all eligible cases (i.e. 16 to 24 year olds) whether they came from the core sample or the youth boost sample.

### 7.2.3 Treating quarter of issue as a stratifier

For each quarter of 2001, a nationally representative sample of Type B addresses was drawn. However, in the first six months of 2001, half of all addresses selected were Type A and half were Type B, while in the second six months all addresses selected were Type B. This means that, in essence, Type B addresses sampled between January and June 2001 were selected with half the probability of Type B addresses sampled between July and December 2001.

Given this design, two approaches can be taken to the estimation of probabilities (and hence design weights) for the 2001 Type B issued sample. First, if quarter of issue is treated as a stratifier, the weights for cases issued between January and June would be approximately double those issued between July and August. Application of these weights would have the impact of ensuring that quarterly selection probabilities were equalised thereby ensuring that the sample was not biased towards any particular quarter of issue.
However, it is also possible to view the 2001 issued sample as a single sample that happened to have been issued in tranches over a 12 month period. In effect, this is to treat the 2001 sample as if it were large ad hoc sample in which sample points were issued to interviewers over a protracted fieldwork period. If quarter of issue is ignored in this way, all Type B addresses issued in 2001 (within a PFA) would be treated as having the same probability of selection and no difference in average weight would be expected between the two halves of 2001.

The two approaches have complementary advantages and disadvantages. Treating quarter of issue as a stratifier will remove any bias associated with systematic differences in addresses issued in different quarters. However, doing this will also increase the range of weights that need to be applied and will thereby reduce precision.

**7.2.4 Compensating for differential response**

An attempt is made in some weights to compensate for differential non-response between inner city and other areas. This element has been incorporated in some weights to ensure that weighted data are comparable with previous rounds of BCS where similar inner city weights were also used. Details of the inner city weight can be found in section 7.4.2.

It should be noted that from 2001 onward the Home Office is calculating and applying additional calibration weights to counter the effect of differential response rates between age and gender subgroups. Results for BCS sweeps from 1996 onwards have all been re-weighted using this technique\textsuperscript{20}.

**7.2.5 Equally weighting cases by quarter**

Although an equal number of addresses were issued each quarter during 2001, the number of interviews actually achieved each quarter inevitably varied for a number of reasons. These included differences in the amount of sample issued each month during the first six months, differences in response rates and deadwood rates on a quarterly basis, and events that are specific to particular quarters (e.g. Christmas) which may affect fieldwork. Consequently, although the survey design is ultimately designed to achieve a notional number of core interviews each quarter (9,250), there will always be a degree of variation around this.

Thus, for some analyses based upon interviews achieved within a given reference period, weights have been constructed included to adjust for quarterly differences by equalising the quarterly achieved sample sizes.

**7.3 Summary of weights constructed for 2001 BCS**

The different types of weights used on the 2001 BCS are summarised in Table 7.1 below. Details of how each set of weights was constructed can be found in Appendix K.

\textsuperscript{20} Further details on calibration weighting as applied to the BCS can be found in Simmons J. et. al. Crime in England and Wales 2001/2002. Home Office Statistical Bulletin 7/02

7.4 Component weights

Although a variety of weights were calculated for the 2001 BCS, they were all based on a number of key component weights. In constructing all the different weights from their components the following conventions have been used for the component weights:

- \(w_1\) weights are constructed to compensate for unequal address selection probabilities;
- \(w_2\) weights are inner city versus non-inner-city non-response weights;
- \(w_3\) weights are dwelling unit weights;
- \(w_4\) weights are individual selection weights;
- numinc weights are the series of incidents weight

7.4.1 Police Force Area weight (\(w_1\))

As already described in chapter 2, small PFA’s were oversampled to ensure a minimum of 600-700 interviews. It was therefore necessary to down-weight these PFA’s and up-weight the large ones to correct for the differences in selection probabilities of addresses. In doing this, all the small PFA’s were treated as stratum in their own right, while all the large PFA’s formed a single stratum.

7.4.2 Inner city weight (\(w_2\))

In previous sweeps of the BCS, inner city areas were oversampled. However, the ‘inner city’ weight applied in previous sweeps had compensated not only for this difference in selection probabilities but also for the differential response rates between inner city and non-inner city areas. Therefore, to be consistent with previous sweeps of the BCS it is necessary to continue applying a weight to correct for differential response rates. In essence, the inner city weight is simply the reciprocal of the achieved response rate in inner city and non-inner city areas (after weighting by \(w_1\)).

The definition of inner city or non-inner city has been kept consistent throughout all sweeps of the BCS and is based on 1981 census data. The criteria used to define inner city areas are high population density, low socio-economic group, and low owner occupation.

These three criteria were combined into a single indicator at the postal sector level according to the formula below21:

\[
559.1305 - (0.2737*v_1) - (0.4412*v_2) + (0.1290*v_3)
\]

where

\[
v_1 = 1000*\text{proportion of heads of household who were owner-occupiers}
\]
\[
v_2 = 1000*\text{proportion of heads of household in SEG 1-5 or 13}
\]

21 Up until 1992 the definition was applied to parliamentary constituencies
v3 = 10*population density (persons per hectare)

Postal sectors with a value of 455 or above are defined as inner city.

### 7.4.3 Dwelling unit weight (w3)

At addresses which had more than one dwelling unit, the interviewer made a random selection of one dwelling unit. The dwelling unit weight is therefore simply equal to the number of dwelling units identified at the address. In over 99% of cases, the dwelling unit weight is 1.

### 7.4.4 Individual weight (w4)

At dwelling units that had more than one eligible adult, the interviewer made a random selection of one adult. Thus, the probability of any one individual being selected was inversely proportional to the number of adults in the household. The individual weight is therefore simply equal to the number of adults in the household. In the case of the non-white sample, w4 is equal to the number of eligible adults in the household (i.e. non-white adults only).

### 7.4.5 Series weight (numinc)

This weight is applied when estimating victimisation rates. For single incidents, numinc is always 1. For series incidents, where only details are collected about the most recent incident in the series, the weight equals the number of incidents in the series that fall within the reference period, subject to a maximum limit of 5.
8. The Effect of Weighting on key survey variables

The achieved sample was weighted in order to be representative of the population in private households in England and Wales. A series of comparisons is presented in the following tables, showing to what extent the achieved BCS sample reflects the information on the population, both before and after applying the appropriate weights.

8.1 Demographic comparisons

The regional distribution of the population aged 16 or over is shown in Table 8.1, based on Government Office Region. The main discrepancy is under-representation of London, reflecting the lower response rates achieved in this region. This is compensated by rather higher response in regions further from London. The weighting goes some way to compensate for these differences.

Table 8.1 REGIONAL DISTRIBUTION OF THE POPULATION AGED 16+

</tbody>
</table>

The same type of comparisons are made in Table 8.2 on the basis of age groups and sex. The key point is the relative under-representation of both ends of the age range, again mitigated somewhat by the weighting design. Overall, male respondents are under-represented in the achieved sample.

Dear Sir/Madam,

THE 2001 BRITISH CRIME SURVEY

As you will know, your household has been selected at random to take part in the British Crime Survey. Someone in your household has now been selected, also at random, for the interview. As this person is aged 16 or 17, we would like to have your permission for them to take part in the interview.

The British Crime Survey asks people whether they have been personally affected by crime, and asks about people’s views and experiences of the police and the courts. The survey also asks about people’s awareness and usage of drugs, and experience of interpersonal violence.

We can only interview the person who has been selected at random, to ensure the survey reflects the experiences of the whole population. The information they give will be treated in strict confidence by the research organisations. No information that can identify the person interviewed or your household will be passed to the Home Office or to any other organisation.

If you are willing for the 16 –17 year old you have responsibility for to be interviewed, and they agree to take part, the interviewer will arrange to carry out an interview with them at a convenient time.

Their answers will help in the planning of new initiatives to reduce crime, so their participation is extremely important. It is important that as many people as possible take part in this study, to reflect the variety of different circumstances and experiences that exist in England and Wales today. If you wish to know more about the survey, please ring Carole Maxwell at BMRB Social Research on 0208 433 4439 between 9.30am and 5.30pm Monday to Friday.

Yours faithfully,

A. Myhill

Andy Myhill
Research Officer, Home Office
Dear Sir/Madam,

THE 2001 BRITISH CRIME SURVEY

The Home Office is conducting an important study in England and Wales. The British Crime Survey asks people whether they have been personally affected by crime, and the results play a vital role in helping to decide what action can be taken to prevent crime. The survey also asks about people’s views and experiences of the police and the courts.

Your household has been selected at random from the Post Office’s national list of addresses. We are seeking to interview only one person from each household. The selection of this person is at random, to ensure the survey reflects the experiences of the whole population.

We have commissioned two research organisations, BMRB Social Research and Ipsos RSL, to conduct the interviews on our behalf. An interviewer will call on you within the next few weeks. He/she will show you an identification card and will answer any questions you may have about the survey. The interviewer will need to ask a few questions to decide which person is selected for the interview. The information you give will be treated in strict confidence by these organisations. No information that can identify you or your household will be passed to the Home Office or to any other organisation.

If you wish to know more about the survey or wish to get a message to an interviewer who has already contacted you, please ring Sarah Kitchen at BMRB Social Research on 0208 433 4414 between 9.30am and 5.30pm Monday to Friday.

It is important that as many people as possible take part in this study, to reflect the variety of different circumstances and experiences that exist in England and Wales today. Your answers will help in the planning of new initiatives to reduce crime, so your participation is extremely important. We hope you agree to take part and thank you in advance for your help and co-operation.

Yours faithfully,

Andy Myhill
(Research Officer, Home Office)
Dear Sir/Madam,

THE 2001 BRITISH CRIME SURVEY

The Home Office is conducting an important study in England and Wales. The British Crime Survey asks people whether they have been personally affected by crime, and the results play a vital role in helping to decide what action can be taken to prevent crime. The survey also asks about people’s views and experiences of the police and the courts.

In order to understand crime experienced by members of ethnic minorities, in some areas the survey is seeking additional households with one or more adults who are black, Asian, Chinese or from another non-white group. At each such address, we wish to interview only one adult. The selection of this person is at random, to ensure the survey reflects the experiences of the whole population.

We have commissioned two research organisations, BMRB Social Research and Ipsos RSL, to conduct the interviews on our behalf. An interviewer will call on you within the next few weeks. He/she will show you an identification card and will answer any questions you may have about the survey. The interviewer will need to ask a few questions to decide which person is selected for the interview. The information you give will be treated in strict confidence by these organisations. No information that can identify you or your household will be passed to the Home Office or to any other organisation.

If you wish to know more about the survey or wish to get a message to an interviewer who has already contacted you, please ring Sarah Kitchen at BMRB Social Research on 0208 433 4414 between 9.30am and 5.30pm Monday to Friday.

It is important that as many people as possible take part in this study, to reflect the variety of different circumstances and experiences that exist in England and Wales today. Your answers will help in the planning of new initiatives to reduce crime, so your participation is extremely important. We hope you agree to take part and thank you in advance for your help and co-operation.

Yours faithfully,

A. Myhill
(Research Officer, Home Office)
Motor vehicles are a very common target for criminals. A fifth of all BCS offences involved theft or attempted theft of vehicles or items from vehicles. Over time, attempted thefts have become more common relative to actual thefts. This could well be due to an increase in the use of security devices, which make it more difficult for thieves to get into cars.

Three-quarters of car thefts happen at night, many of them around the home. But if you take account of how long cars are parked at different locations, the risk of theft is four times higher in public car parks than in the street outside home or work. The risk of a car being stolen from a public car park is 200 times higher than when cars are kept in garages at home (Figure 2).

![Figure 2: Risks of car-related thefts in different locations](image)

In 1999, 4.3% of households were burgled, including attempted burglaries in which the offender did not actually gain entry. Since 1993 the number of burglaries has fallen. The fall is related to an increase in the use of home security measures, such as window locks, security lights and burglar alarms. The British Crime Survey shows that even simple security devices, such as deadlocks and window locks, greatly reduce the risk of being burgled.

### Further information

If you would like further information about the findings of the British Crime Survey please contact:

---

The 2001 British Crime Survey

This is the ninth British Crime Survey since 1982 and you have been asked to take part. The survey is carried out for the Home Office by two research organisations working together: BMRB Social Research and Ipsos RSL. Both are well-respected survey organisations that carry out many research studies for the government.

What is the British Crime Survey?

The British Crime Survey (BCS) measures the amount of crime in England and Wales by asking people such as yourself about crimes they have experienced. In 2001, we shall be asking about crimes you and your household have experienced during the past year. In this way, the BCS includes crimes that may not have been reported to the police, so it is an alternative to police records. Without the BCS, the government would have no information on these unreported crimes.
The British Crime Survey also:

- Helps to identify those most at risk of different types of crime, and this is used in designing crime prevention programmes.

- Looks at people's attitudes to crime, such as how much they fear crime and what measures they take to avoid it.

- Looks at people's attitudes to the Criminal Justice System, including the police and the courts.

The British Crime Survey is one of the major sources of information about levels of crime, public attitudes to crime and other Home Office issues. The results play a vital role in developing and monitoring Home Office policies. Your answers are very important to us, whether or not members of your household have experienced any crime.

Who is responsible for the survey?

Who takes part in the survey?

About 40,000 people will be interviewed for the 2001 survey. Addresses are randomly selected from the Post Office's list of addresses in England and Wales. One person (aged 16 or over) from each address is chosen at random and interviewed. It is important to have a strictly random selection, so that the results reflect the experiences and attitudes of the whole population. For the same reason it is very important the selected person agrees to take part.

Is this information confidential?

It is entirely confidential:

- The research organisations conducting the interviews will not pass on the names and addresses of people taking part in this study to the Home Office.

- The forms that identify people's addresses and the computer files holding the answers are always stored separately.

Will I be contacted again?

It is very unlikely, but a number of interviews are checked to ensure that the information you gave was recorded accurately. Also, if you agree to take part in further research, you might be contacted again.

Some findings from the British Crime Survey

Unreported Crime

The British Crime Survey has shown that many crimes are not reported to the police. Over half of all crimes counted by the most recent British Crime Survey had not been reported to the police. Reporting rates vary according to the type of crime. Crimes that involve major financial loss to the victim, such as burglary or theft of a vehicle, are the most likely to be reported (Figure 1).

Figure 1: Percentage of offences reported to the police in 1999

Victims do not report crime for various reasons. In the 2000 BCS, the most common reasons given by victims for not reporting crime were that the offence was not serious enough or involved too small a loss, that the police would be unable to do much about the crime or that the incident was considered private and was dealt with by the victim. But many crimes that are seen as serious are not brought to police attention.

   NOW GO TO C4
C4. CONTACT RESPONSIBLE ADULT AT DWELLING UNIT AND INTRODUCE SURVEY

Good afternoon/evening. I am carrying out a survey about crime on behalf of the Home Office, and I am from BMRB Social Research.

You should have received a letter about this survey from the Home Office, explaining that we would be contacting you.

SHOW COPY OF ADVANCE LETTER

For this survey we are only interviewing people aged 16 or over. Can I just check, how many people aged 16 or over live in this household?

WRITE IN: ENTER NUMBER OF PEOPLE AGED 16+ (e.g. TWO = 02)

INCLUDE
- People who normally live at address who are away for under 6 months
- Boarders and lodgers living as part of household

EXCLUDE
- People aged 16+ who live elsewhere to study or work but who come home for holidays
- Spouses who are separated and no longer resident
- People away continuously for 6 months or more

AND CODE: NO. OF PERSONS ELIGIBLE

1 only A GO TO C6
2 or more B GO TO C5

If no. of persons in household not obtained C

CODE OUTCOME AT C7
(Code 8 or 11) GO TO D1

C5a. ASK FOR FIRST NAME OR INITIAL OF EACH PERSON AGED 16+. LIST IN ALPHABETICAL ORDER IN GRID BELOW

<table>
<thead>
<tr>
<th>FIRST NAME OR INITIAL</th>

- Not at all common 4

D3. How common is vandalism, graffiti or deliberate damage to property?

- Very common 1
- Fairly common 2
- Not very common 3
- Not at all common 4

D4. How common are homes in poor condition/run down?

- Very common 1
- Fairly common 2
- Not very common 3
- Not at all common 4

D5. SAMPLED DWELLING IS:

- Whole house – detached 1
- - semi-detached 2
- - mid-terrace 3
- - end-terrace 4
- Maisonette 5
- Flat – purpose-built 6
- Flat – converted 7
- Rooms, bedsitter 8
- Caravan/mobile home 9
- Unable to code 10

IF FLAT ETC (5-8 AT D5) ANSWER D6-D7 OTHERS GO TO D8

CODE TYPE OF FLAT, ETC:

- Self-contained 1
- Not self-contained 2
- Unable to code 3

D7. BUILDING HAS:

- Common entrance: lockable 1
- Common entrance: not lockable 2
- No common entrance 3

ALL

D8. Is the sampled house/flat in good or poor physical condition?

- Very good 1
- Fairly good 2
- Neither good nor bad 3
- Fairly bad 4
- Very bad 5
- Unable to code 6

D9. Is the sampled house/flat in a better or worse condition than the others in this area?

- Better 1
- Worse 2
- About the same 3
- Unable to code 4

D10. Is the dwelling in a Neighbourhood Watch area?

- Yes 1
- No 2
- Unable to code 3

Electronic questionnaire sent
Please turn over for notes page
Notes Page

For any unproductive interviews, please give us as much information as you can about the reason no interview was obtained. This information will help if the address is re-issued. For example:

- If refusal, or other unsuccessful please give full explanation for outcome
- Best time to call to get someone in
- Any other reasons why you haven’t got an interview yet
- If the address was difficult to find, any helpful directions
- Information on respondent e.g. disabilities, whether work shifts

- “SELECT” row – number beneath total number of dwelling units is SELECTED DWELLING UNIT.
- RING ON GRID ABOVE.

**ENTER DWELLING NO. OF SELECTED DWELLING UNIT:**

**RECORD FLAT OR ROOM NUMBER/DETAILS OF LOCATION OF SELECTED UNIT BELOW:**

NOW GO TO C4
C4. CONTACT RESPONSIBLE ADULT AT DWELLING UNIT AND INTRODUCE SURVEY

Good afternoon/evening. I am carrying out a survey about crime on behalf of the Home Office, and I am from BMRB Social Research.

You should have received a letter about this survey from the Home Office, explaining that we would be contacting you.

SHOW COPY OF ADVANCE LETTER

For this survey we are only interviewing people aged 16 or over. Can I just check, how many people aged 16 or over live in this household?

WRITE IN: ENTER NUMBER OF PEOPLE AGED 16+ (e.g. TWO = 02)

INCLUDE

- People who normally live at address who are away for under 6 months
- Boarders and lodgers living as part of household

EXCLUDE

- People aged 16+ who live elsewhere to study or work but who come home for holidays
- Spouses who are separated and no longer resident
- People away continuously for 6 months or more

AND CODE: NO. OF PERSONS ELIGIBLE

1 only A GO TO C6
2 or more B GO TO C5
If no. of persons in household not obtained C CODE OUTCOME AT C7
(Code 8 or 11) GO TO D1

C5a. ASK FOR FIRST NAME OR INITIAL OF EACH PERSON AGED 16+. LIST IN ALPHABETICAL ORDER IN GRID BELOW

<table>
<thead>
<tr>
<th>FIRST NAME OR INITIAL</th>
<th>PERSON NUMBER</th>
</tr>
</thead>

</tr>
</tbody>
</table>

LOOK AT SELECTION BOX ON FRONT PAGE TO SELECT PERSON FOR INTERVIEW.

- “No. of DUs/people” row – Find number corresponding to total number of persons
- “SELECT” row – number beneath total number of dwelling units is SELECTED PERSON.
- RING ON GRID ABOVE.

ENTER “PERSON NUMBER” OF SELECTED PERSON

C5b. Is selected person aged 16 or 17 AND living with parents? (circle code) Yes 1 GO TO C5c
No 2 GO TO C6

C5c. If yes, has parental permission been obtained and letter from Home Office handed over? (circle code)

Yes 1 GO TO C6
No – parents not contacted 2 GO TO C7
No – parents refused 3 GO TO C7

C6. ENTER NAME OF SELECTED RESPONDENT AND, IF POSSIBLE, TELEPHONE NUMBER ON FRONT PAGE. ATTEMPT INTERVIEW OR RECORD APPOINTMENT TIME ON FRONT PAGE

IF PARENTAL PERMISSION OBTAINED PUT THE NAME OF THE ADULT WHO GAVE PARENTAL PERMISSION IN BRACKETS AFTER THE RESPONDENT’S NAME.

C6a Remember to ask about Youth Boost (Y1 on p5) AT CONVENIENT POINT. This needs to be done if you get an interview, make a firm appointment, or get an outcome code of 14, 15, 16, 17 or 18 (if appropriate).
C7 FINAL OUTCOME CODES
(Circle relevant codes and check that D1-D10 on page 6 completed)

SCREENING FOR 16-24 YEAR OLDS

YOU SHOULD ONLY CARRY OUT A BOOST INTERVIEW WHEN YOU HAVE CARRIED OUT AN INTERVIEW WITH THE MAIN SELECTED RESPONDENT.

EXCEPTIONS ARE IF:
- YOU HAVE A FIRM APPOINTMENT TO INTERVIEW THE MAIN RESPONDENT
- SELECTED RESPONDENT IS AWAY FOR DURATION OF FIELD PERIOD (OUTCOME 16)
- SELECTED RESPONDENT IS ILL/INCAPACITATED AT HOME DURING FIELD PERIOD (OUTCOME 15)
- SELECTED RESPONDENT HAS INADEQUATE ENGLISH (OUTCOME 17)
- SOME OTHER REASON FOR AN UNSUCCESSFUL, IF CONSIDERED APPROPRIATE (OUTCOME 18)

Y1 Is the main selected respondent aged 16-24?

Yes 40 NO EXTRA INTERVIEW
CHECK D1-D10 COMPLETE AND NON-WHITE SCREENING CARRIED OUT

No B Continue at Y2

Y2 How many people aged 16-24 live in this household (include all 16-24 year olds, both white and non-white)?

WRITE IN: (e.g. TWO = 02)

AND CODE: NO. OF PERSONS 16-24

None 41 NO EXTRA INTERVIEW CHECK D1-D10 COMPLETE AND NON-WHITE SCREENING CARRIED OUT

One or more 42 CREATE NEW PINK ACS AND ATTEMPT INTERVIEW (check D1-D10 complete, and non-white screening carried out)

Information refused 43 NO EXTRA INTERVIEW CHECK D1-D10 COMPLETE AND NON-WHITE SCREENING CARRIED OUT

IF YOU DO NOT HAVE TO DO YOUTH SCREENING (i.e. FINAL OUTCOMES 1-13) YOU SHOULD REPORT AN OUTCOME CODE 44

Electronic questionnaire sent
ALL RESIDENTIAL ADDRESSES (CONTACTS AND NON-CONTACTS INCLUDING VACANTS). DO NOT COMPLETE FOR NOT TRACEABLE, NOT BUILT, DERELICT, BUSINESS OR INSTITUTIONAL)

D1. Which of the following are visible at the sampled address?

PLEASE CIRCLE ALL CODES THAT APPLY

- Burglar alarm 1
- Security gate over front door 2
- Bars/grills on any windows 3
- Other security device(s) 4
- Estate/block security lodge/guards 5
- Entryphone 6
- None of these 7

INTERVIEWER ASSESSMENTS:

D2. In the immediate area, how common is litter or rubbish lying around?

- Very common 1
- Fairly common 2
- Not very common 3
- Not at all common 4

D3. How common is vandalism, graffiti or deliberate damage to property?

- Very common 1
- Fairly common 2
- Not very common 3
- Not at all common 4

D4. How common are homes in poor condition/run down?

- Very common 1
- Fairly common 2
- Not very common 3
- Not at all common 4

D5. SAMPLED DWELLING IS:

- Whole house – detached 1
  - semi-detached 2
  - mid-terrace 3
  - end-terrace 4
- Maisonette 5
- Flat – purpose-built 6
- Flat – converted 7
- Rooms, bedsitter 8
- Caravan/mobile home 9
- Unable to code 10

GO TO D8

D6. IF FLAT ETC (5-8 AT D5) ANSWER D6-D7 OTHERS GO TO D8

CODE TYPE OF FLAT, ETC:

- Self-contained 1
- Not self-contained 2
- Unable to code 3

D7. BUILDING HAS:

- Common entrance: lockable 1
- Common entrance: not lockable 2
- No common entrance 3

D8. Is the sampled house/flat in good or poor physical condition?

- Very good 1
- Fairly good 2
- Neither good nor bad 3
- Fairly bad 4
- Very bad 5
- Unable to code 6

D9. Is the sampled house/flat in a better or worse condition than the others in this area?

- Better 1
- Worse 2
- About the same 3
- Unable to code 4

D10. Is the dwelling in a Neighbourhood Watch area?

- Yes 1
- No 2
- Unable to code 3

Electronic questionnaire sent
NON-WHITE SCREENING

E1 WAS THE MAIN ADDRESS TRACEABLE?

YES (outcome at C7 not coded as 1)   A   GO TO E1a
NO (outcome at C7 coded as 1)       B   END

E1a IDENTIFY ADDRESSES TO BE SCREENED BEFORE CALLING AT A MAIN SAMPLE ADDRESS

Use the rules provided to identify 3 adjacent addresses to the left and 3 adjacent addresses to the right of the main sample address (as you look at it). Write each address in at E5 overleaf, giving them screen numbers 1-3 (for addresses to the LEFT of the main sample address) and 4-6 (for the addresses to the RIGHT of the main sample address) respectively. Number outward from main sample address in each case.

ONCE YOU HAVE IDENTIFIED ADDRESSES RETURN TO C2 AND CONTINUE.

E2 IF YOU MAKE CONTACT WITH THE MAIN SAMPLE ADDRESS, EVEN IF YOU DO NOT GET AN INTERVIEW THERE, READ OUT THE FOLLOWING EXPLANATION:

“The Home Office is interested in the experience of crime among all groups in the population. As well as white people, we need to interview (more) people who are black, Asian, Chinese or from other non-white groups.”

THEN ASK:

“The 3 addresses immediately to the LEFT of this one are (DESCRIBE ADDRESSES). Is there anyone aged 16 or over living at these addresses who is black, Asian, Chinese or from another non-white group?”

IF DEFINITE OUTCOME (‘YES’ OR ‘NO’) ESTABLISHED FOR ONE OR BOTH ADDRESSES TO THE LEFT, CODE AT E5 OVERLEAF.

THEN ASK:

“The 3 addresses immediately to the RIGHT of this one are (DESCRIBE ADDRESSES). Is there anyone aged 16 or over living at these addresses who is black, Asian, Chinese or from another non-white group?”

IF DEFINITE OUTCOME (‘YES’ OR ‘NO’) ESTABLISHED FOR ONE OR BOTH ADDRESSES TO THE RIGHT, CODE AT E5 OVERLEAF.

E3 IF YOU ARE UNABLE TO ESTABLISH A DEFINITE OUTCOME (YES OR NO) AT THE MAIN SAMPLE ADDRESS BECAUSE:

- you have not made contact at the main sample address
- the information is refused at the main sample address
- the respondent at the main sample address does not know
- the main sample address is traceable BUT is empty, derelict, demolished, etc

THEN YOU SHOULD CONTINUE SCREENING TO SEEK THE INFORMATION YOU NEED EITHER:

- at the identified address itself
- or at adjacent addresses (up to 3 addresses away from the identified address)
E4  QUESTION TO BE ASKED AT IDENTIFIED ADDRESS TO ESTABLISH OR CONFIRM WHETHER ANYONE NON-WHITE PRESENT:

“The Home Office is interested in the experience of crime among all groups in the population. As well as white people we need to interview people from non-white groups.

Is there anyone aged 16 or over at this address who is black, Asian, Chinese or from any other non-white group?”

You may seek information at identified address itself, and at adjacent addresses as well as the main sample address, accepting a definite ‘no’ or a definite ‘yes’. Any case where the answer is don’t know or not sure must be checked at the address itself.

Once you have established an outcome for each screened address, code the outcome at E5 below. Only code ‘information not obtained’ if you have not established definite outcome by end of fieldwork period.

---

E6 You should make out a new non-white address contact sheet (blue) for each address coded ‘yes’ i.e. said to contain one or more non-white adults.

1. COPY THE AREA CODE AND ADDRESS SERIAL NUMBER FROM THE FRONT OF THIS CONTACT SHEET
2. WRITE APPROPRIATE SCREEN NUMBER (FROM GRID ABOVE) INTO RELEVANT BOX ON FRONT PAGE
3. COPY THE SELECTION ROW DIGITS INTO THE SELECTION BOX
4. COPY THE CHECK DIGITS FROM THE FRONT OF THIS CONTACT SHEET
5. WRITE IN FULL ADDRESS ON FRONT OF NEW NON-WHITE ADDRESS CONTACT SHEET (BLUE)
For any unproductive interviews, please give us as much information as you can about the reason no interview was obtained. This information will help if the address is re-issued. For example:

- If refusal, or other unsuccessful please give full explanation for outcome
- If the address was difficult to find, any helpful directions
- Best time to call to get someone in
- Information on respondent e.g. disabilities, whether work shifts.
- Any other reasons why you haven’t got an interview yet

• “No. of DUs/non-white adults” row – Find number corresponding to total number of dwelling units

• “SELECT” row – number beneath total number of dwelling units is SELECTED DWELLING UNIT.

• RING ON GRID ABOVE.

ENTER DWELLING NO. OF SELECTED DWELLING UNIT:

RECORD FLAT OR ROOM NUMBER/DETAILS OF LOCATION OF SELECTED UNIT BELOW:

NOW GO TO C4
C4. CONTACT RESPONSIBLE ADULT AT DWELLING UNIT AND INTRODUCE SURVEY

Good afternoon/evening. I am carrying out a survey about crime on behalf of the Home Office, and I am from BMRB Social Research.

Here is a letter from the Home Office which explains more about this survey

SHOW COPY OF LETTER

For this survey we are only interviewing people aged 16 or over who are black, Asian, Chinese or from another non-white group. Can I just check, how many non-white people aged 16 or over live in this household?

WRITE IN: ENTER NUMBER OF NON-WHITE PEOPLE AGED 16+ (e.g. TWO = 02)

INCLUDE
• People who normally live at address who are away for under 6 months
• Boarders and lodgers living as part of household

EXCLUDE
• People aged 16+ who live elsewhere to study or work but who come home for holidays
• Spouses who are separated and no longer resident
• People away continuously for 6 months or more

AND CODE: NO. OF PERSONS ELIGIBLE

| 1 only | A | GO TO C6 |
| 2 or more | B | GO TO C5 |
If no. of persons in household not obtained

C5a. ASK FOR FIRST NAME OR INITIAL OF EACH NON-WHITE PERSON AGED 16+. LIST IN ALPHABETICAL ORDER IN GRID BELOW

For any unproductive interviews, please give us as much information as you can about the reason no interview was obtained. This information will help if the address is re-issued. For example:

- If refusal, or other unsuccessful please give full explanation for outcome
- Best time to call to get someone in
- Any other reasons why you haven’t got an interview yet
- If the address was difficult to find, any helpful directions
- Information on respondent e.g. disabilities, whether work shifts

Day Day  Mth Mth (01 – 31)  (01 – 12)
Questionnaire changes from July 2001.

This appendix shows the questionnaire that was effective from 1 July 2001. This questionnaire differed from the one used for January to June in that some new questions were introduced. These changes are summarised below.

1) Additional interviews were sought with respondents aged 16-24, who were boosted via the “Youth Boost”. Discussion of the Youth boost sample can be found in section 2.9 of the main report.

Youth boost interviews were a shortened version of the main British Crime Survey questionnaire. The interview covered:

- Some of the introductory questions (causes of crime, worries about crime, etc)
- The screener questions relating to personal crimes only (since household and vehicle crimes would have been covered in the main interview)
- Any Victim Forms relating to any personal crime mentioned in the screener.
- A shortened demographic section
- The drugs self-completion module

The interview did not include any Follow Up Module or the Self-Completion module on interpersonal violence.

2) The July questionnaire included a new module on mobile phone theft. (see section 3.1.4 of the main report and the questions listed in this appendix (Section D1)

3) A new question in the Victim Form asking respondents whether the incident happened in a place that members of the public have general access to or not.

4) Two questions in the Victim Form; WhyHapp (“Can you tell me why you think this incident happened?”) and WhyBet (“What additional information did you want to know from the police?”) became pre-coded questions from July 2001. Between January and June 2001 these were open-ended questions.

The version of the questionnaire shown in this appendix also only shows question wording that relates to Type B interviews. Section O of this appendix shows the screener and victim form sections of the questionnaire used from January to June showing how these sections differed for Type A interviews.

A full version of the questionnaire used from January to June and a full version of the questionnaire used for the ‘Youth boost’ interviews can be found in the electronic version of this report.

Questionnaire changes from July 2001.

This appendix shows the questionnaire that was effective from 1 July 2001. This questionnaire differed from the one used for January to June in that some new questions were introduced. These changes are summarised below.

1) Additional interviews were sought with respondents aged 16-24, who were boosted via the “Youth Boost”. Discussion of the Youth boost sample can be found in section 2.9 of the main report.

Youth boost interviews were a shortened version of the main British Crime Survey questionnaire. The interview covered:

- Some of the introductory questions (causes of crime, worries about crime, etc)
- The screener questions relating to personal crimes only (since household and vehicle crimes would have been covered in the main interview)
- Any Victim Forms relating to any personal crime mentioned in the screener.
- A shortened demographic section
- The drugs self-completion module

The interview did not include any Follow Up Module or the Self-Completion module on interpersonal violence.

2) The July questionnaire included a new module on mobile phone theft. (see section 3.1.4 of the main report and the questions listed in this appendix (Section D1)

3) A new question in the Victim Form asking respondents whether the incident happened in a place that members of the public have general access to or not.

4) Two questions in the Victim Form; WhyHapp (“Can you tell me why you think this incident happened?”) and WhyBet (“What additional information did you want to know from the police?”) became pre-coded questions from July 2001. Between January and June 2001 these were open-ended questions.

The version of the questionnaire shown in this appendix also only shows question wording that relates to Type B interviews. Section O of this appendix shows the screener and victim form sections of the questionnaire used from January to June showing how these sections differed for Type A interviews.

A full version of the questionnaire used from January to June and a full version of the questionnaire used for the ‘Youth boost’ interviews can be found in the electronic version of this report.
INTERVIEWER: TODAY’S DATE ACCORDING TO THE LAPTOP IS [DAY/MONTH/YEAR]. IS THIS CORRECT? It should be in dd/mm/yy format. So today’s date is day [dd], month [mm], Year [yy]. Is this correct? It is vital today’s date is entered correctly and in correct (dd/mm/yy) format as questions in the script depend upon this.

QualDis [ASK ALL]

And how much is YOUR OWN quality of life affected by these sort of problems, on a scale from 1 to 10, where 1 is no effect and 10 is a total effect on your quality of life?

1...10

M6 GOING OUT

WeekDay [ASK ALL]

Thinking about an average weekday, how many hours do you spend away from your home during the day?

1. None
2. Under 1
3. 1 but under 3
4. 3 but under 5
5. 5 but under 7
6. 7 or more

UnoccW [ASK IF WeekDay NE 1]

Can I check, is your home ever left unoccupied during weekdays?
IF NECESSARY, EXPLAIN NO-ONE AT HOME DURING DAYTIME HOURS

1. Yes
2. No

UnoccL [ASK IF UnoccW = Yes]

For how long is your home left unoccupied on an average weekday?

1. Rarely
2. Less than 1 hour
3. 1 hour or more but less than 3
4. 3 hours or more but less than 5
5. 5 hours or more but less than 7
6. 7 hours or more
PubEve [ASK ALL]

SHOW CARD M5
And in the last month, how many times did you visit a pub or winebar in the evening?

1. None
2. Between 1 and 3 times (Less than once a week)
3. Between 4 and 8 times (Once to twice a week)
4. Between 9 and 12 times (About 3 times a week)
5. More than 12 times (Almost every day)

Club [ASK ALL]

SHOW CARD M5
Still thinking about the last month, how many times did you visit a nightclub or disco?

1. None
2. Between 1 and 3 times (Less than once a week)
3. Between 4 and 8 times (Once to twice a week)
4. Between 9 and 12 times (About 3 times a week)
5. More than 12 times (Almost every day)
M7 SCREENER QUESTIONS HOUSEHOLD EXPERIENCE

M7.1 SCREENER QUESTIONS: VEHICLES AND BICYCLES

MotorCyc [ASK ALL]

Can I check, has anyone in this household, owned or had the regular use of a motorcycle, scooter or moped at any time since [the first of January 2000/the first of ^DATE^]?

1. Yes
2. No

Car [ASK ALL]

Has anyone in this household owned or had the regular use of a car, van or other motor vehicle at any time since [the first of January 2000/the first of ^DATE^]?

1. Yes
2. No

NumCar [ASK IF Car = Yes]

And how many cars, vans or other motor vehicles does the household own or have regular use of now?

0..10

CarTot [ASK IF Car = Yes]

And for most of this period how many did the household have?
NOTES: THIS MEANS FOR THE MAJORITY OF THE YEAR

0..10

[ASK ALL TYPE A]

The next questions concern things that may have happened over the 13-14 months since the first of January 2000, in which you may have been the victim of a crime or offence.

I am only concerned with incidents which have happened to YOU PERSONALLY [or to people who are NOW members of your household].

I don't just want to know about serious incidents - I want to know about small things too.
SHOW Respondent Life Events Calendar

Before asking you about crimes or incidents that may have happened to you over the last 12 months I’d like to give you a calendar. I’d like you to keep this in front of you when answering the next part of the interview.

If at any stage you are unsure about whether or not something happened in the last 12 months you may find looking at the calendar will help to prompt your memory.

INTERVIEWER: Mark off the correct 12 month reference period on the calendar, that is since the first of [DATE] until present, and hand to respondent.

I’m now going to ask you about things that may have happened over the last 12 months, that is since the first of [DATE], in which you may have been the victim of a crime or offence. I only want to know about things that have happened in the period marked on the calendar. This doesn’t mean that crimes that may have happened before this time are unimportant, but we want to build a picture of just the last 12 months so we can measure how people’s experience of crime changes from one year to the next.

I am only concerned with incidents that have happened to YOU PERSONALLY [or to people who are now members of your household].

I don’t just want to know about serious incidents – I want to know about small things too.

MotTheft [ask if (MotorCyc = Yes) or (Car = Yes)]

[During the 13-14 months since the first of January 2000/ During the last 12 months, that is since [DATE], have [you/you or anyone else now in your household] had [your/their] car, van, motorcycle or other motor vehicle stolen or driven away without permission?]

1. Yes
2. No

NMotTheft [ask if MotTheft = Yes]

How many times has this happened?
Note: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97 More/too many to remember
MotStole  [ASK IF MotorCyc = Yes OR Car = Yes]
2
And (apart from this) in the time since [the first of January 2000/the first of ^DATE^]
have [you/you or anyone else now in your household] had anything stolen off [your/their]
vehicle or out of it (parts of the vehicle, personal possessions or other things)?

1. Yes
2. No

97  More/too many to remember

YrDeface  [ASK ALL]

And again, (apart from anything you have already mentioned), in that time did anyone deliberately deface or do damage to your house/flat or to anything outside it that belonged to someone in your household?

1. Yes
2. No

NYrDefac  [ASK IF YrDeface = Yes]

How many times has this happened?
NOTE : 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97  More/too many to remember
SCREENER QUESTIONS: PERSONAL EXPERIENCE

[ASK ALL TYPE A]
The next few questions are about things that may have happened to you PERSONALLY [not the other people in your household] in the 13-14 months since the first of January 2000. Please include anything that happened to you during that time - at home, in the street, at work, in a shop, in a park, on a train or anywhere else.

[ASK ALL TYPE B]
The next few questions are about things that may have happened to you PERSONALLY [not the other people in your household] over the last 12 months, that is since the first of ["DATE"], in which you may have been the victim of a crime or offence. Again, I only want to know about things that have happened in the period marked on the calendar, so we can build a picture of crime in the last 12 months.

Please include anything that happened to you during that time – at home, in the street, at work, in a shop, in a park, on a train or anywhere else.

PersThf 18
(Apart from anything you may have already mentioned, since [the first of January 2000/the first of "DATE"], was anything you were carrying stolen out of your hands or from your pockets or from a bag or case?

1. Yes
2. No

NPersTh 19
[ASK IF PersThf = Yes]
How many times has this happened?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97 More/too many to remember

TryPers 19
[ASK ALL]
(Apart from anything you have already mentioned), in that time has anyone TRIED to STEAL something you were carrying out of your hands or from your pockets or from a bag or case?

1. Yes
2. No
NTryPers  [ASK IF TryPers = Yes]

How many times has this happened?
NOTE : 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96  
97 More/too many to remember

OthThef  [ASK ALL]

20
And (apart from anything you have already mentioned), in that time has anything (else) of yours been STOLEN, from a cloakroom, an office, a car or anywhere else you left it?

1. Yes
2. No

NOthThef  [ASK IF OthThef = Yes]

How many times has this happened?
NOTE : 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96  
97 More/too many to remember

DelibDam  [ASK ALL]

21
And (apart from anything you have already mentioned), in that time has anything else of yours been DELIBERATELY DAMAGED or tampered with by vandals or people out to steal?

1. Yes
2. No

NDelibDa  [ASK IF DelibDam = Yes]

How many times has this happened?

WhoPresA-
WhoPresF [ASK ALL]

INTERVIEWER: RECORD WHO WAS PRESENT DURING THE MAIN QUESTIONNAIRE SET OF [3]

1. No-one else in room during Main Questionnaire
2. Child(ren) under 16 present
3. Husband, wife, partner
4. Other adult, including visitor
M10  CHECKING WHETHER ANY SERIES OF INCIDENTS

[ASK ALL]

I am now going to ask you some more about the time since [the first of January 2000/the first of "DATE"].

+Similar_1  [ASK IF NMotThef > 1]

You mentioned [NUMBER OF MotThef INCIDENTS FROM NMotThef] incidents of VEHICLE THEFT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_2  [ASK IF NMotStol > 1]

You mentioned [NUMBER OF MotStol INCIDENTS FROM NMotStol] incidents of THEFT FROM A VEHICLE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_3  [ASK IF NCarDam > 1]

You mentioned [NUMBER OF CarDamag INCIDENTS FROM NCarDam] incidents of VEHICLE DAMAGE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_4  [ASK IF NBikThef > 1]

You mentioned [NUMBER OF BikTheft INCIDENTS FROM NBikThef] incidents of BICYCLE THEFT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
+Similar_5  [ASK IF NPrevThe > 1]

You mentioned [NUMBER OF PreThef INCIDENTS FROM PrevThe] incidents of BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_6  [ASK IF NPrevDam > 1]

You mentioned [NUMBER OF PrevDam INCIDENTS FROM NPrevDam] incidents of BREAK-IN WITH DAMAGE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_7  [ASK IF NPrevTry > 1]

You mentioned [NUMBER OF PrevTry INCIDENTS FROM NPrevTry] incidents of ATTEMPTED BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_8  [ASK IF NPrevSto > 1]

You mentioned [NUMBER OF PrevStol INCIDENTS FROM NPrevSto] incidents of THEFT FROM DWELLING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_9  [ASK IF NPrOSide > 1]

You mentioned [NUMBER OF PrOSide INCIDENTS FROM NProSide] incidents of THEFT OUTSIDE BUILDING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
+Similar_10  [ASK IF NPrDeFac > 1]

You mentioned [NUMBER OF PrDeFace INCIDENTS FROM NPrDeFac] incidents of VANDALISM. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_11  [ASK IF NHomThef > 1]

You mentioned [NUMBER OF HomeThef INCIDENTS FROM NHomThef] incidents of BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_12  [ASK IF NYrHThef > 1]

You mentioned [NUMBER OF YrHoThef INCIDENTS FROM NYrHThef] incidents of BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_13  [ASK IF NYrHoDam > 1]

You mentioned [NUMBER OF YrHoDam INCIDENTS FROM NYrHoDam] incidents of BREAK-IN WITH DAMAGE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_14  [ASK IF NYrHoTry > 1]

You mentioned [NUMBER OF YrHoTry INCIDENTS FROM NYrHoTry] incidents of ATTEMPTED BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
+Similar_15  [ASK IF NYrHoSto > 1]

You mentioned [NUMBER OF YrHoStol INCIDENTS FROM NYrHoSto] incidents of THEFT FROM DWELLING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_16  [ASK IF NYrOSide > 1]

You mentioned [NUMBER OF YrOSide INCIDENTS FROM NYrOSide] incidents of THEFT OUTSIDE DWELLING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_17  [ASK IF NYrDeFac > 1]

You mentioned [NUMBER OF YrDeFace INCIDENTS FROM NYrDeFac] incidents of VANDALISM. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_18  [ASK IF NPersTh > 1]

You mentioned [NUMBER OF PersThef INCIDENTS FROM NPersTh] incidents of THEFT FROM PERSON. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_19  [ASK IF NTryPers > 1]

You mentioned [NUMBER OF TryPers INCIDENTS FROM NTryPers] incidents of ATTEMPTED THEFT FROM PERSON. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
+Similar_20  [ASK IF N0thThef > 1]

You mentioned [NUMBER OF OthThef INCIDENTS FROM N0thThef] incidents of OTHER THEFT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_21  [ASK IF NDelibDa > 1]

You mentioned [NUMBER OF DelibDam INCIDENTS FROM NDelibDa] incidents of DAMAGE TO PROPERTY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_22  [ASK IF NDelibV > 1]

You mentioned [NUMBER OF DelibVio INCIDENTS FROM NDelibV] incidents of ASSAULT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_23  [ASK IF NThreVio > 1]

You mentioned [NUMBER OF ThreViol INCIDENTS FROM NThreVio] incidents of THREATS. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_24  [ASK IF NSexAtt > 1]

You mentioned [NUMBER OF SexAttak INCIDENTS FROM NSexAtt] incidents of SEXUAL ASSAULT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
+Similar_25  [ASK IF NHhldVio > 1]

You mentioned [NUMBER OF HhldVio INCIDENTS FROM NHhldVio] incidents of HOUSEHOLD VIOLENCE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

M11  SORTING OUT THE SERIES PATTERN

[ASK NEXT SET OF QUESTIONS SEPARATELY FOR EACH TYPE OF CRIME WHERE THERE WAS MORE THAN ONE INCIDENT PER CRIME AND INFORMANT SAID YES SOME WERE PART OF A SERIES]

+AllPart  (AllPart_1- AllPart_25)  [ASK FOR EACH TYPE OF CRIME WHERE MORE THAN ONE INCIDENT AND SOME ARE PART OF A SERIES]

Were all the incidents of [TYPE OF CRIME] part of a series or were any of them separate incidents?

1. All were part of a series
2. Some were separate incidents, the rest were a series

+XnumSep  [ASK IF AllPart = Some separate, rest series]

(XnumSep_1- XnumSep_25)

How many of the [number of incidents] incidents were SEPARATE incidents?

1..97

+SepDates  [ASK FOR EACH SEPARATE INCIDENT, IE. XnumSep TIMES]

(SepDates_1- SepDates_25)

[Can we now think about the separate incidents of [type of crime], that is, those incidents which were NOT part of the series.] Can you tell me the date of the [earliest/second/etc] separate incident of [type of crime]?

IF DON'T KNOW THE EXACT DATE, PLEASE ENTER ESTIMATE FIRST is EARLIEST, SECOND is NEXT AFTER THAT, ETC.

[INTERVIEWER: IF RESPONDENT IS NOT SURE, USING THE CALENDAR MAY HELP]

YOU MUST ENTER ALL SIX DIGITS OF THE DATE (E.G. IN 2001 NEW YEAR'S DAY WOULD BE 01/01/01, VALENTINE'S DAY WOULD BE 14/02/01)
So there were [NUMBER] incidents of [TYPE OF CRIME] making up the SERIES?
INTERVIEWER - PLEASE CONFIRM, OR GO BACK AND AMEND CODING.

1. Yes
2. No

Could you tell me the date of the MOST RECENT incident in the series?
IF DON’T KNOW THE EXACT DATE, PLEASE ENTER ESTIMATE.

[INTERVIEWER: IF RESPONDENT IS NOT SURE, USING THE CALENDAR MAY HELP]

YOU MUST ENTER ALL SIX DIGITS OF THE DATE (E.G. IN 2001 NEW YEAR’S DAY WOULD BE 01/01/01, VALENTINE’S DAY WOULD BE 14/02/01)

So there were one or more separate incidents, followed by a series of incidents, and THEN another one or more separate incidents?
INTERVIEWER - PLEASE CONFIRM OR GO BACK AND AMEND CODING

1. Yes
2. No

Of the [NUMBER] separate incidents, how many were there BEFORE the series began?
1..97
[ASK IF SEPARATE INCIDENT, FOLLOWED BY A SERIES OF INCIDENTS
FOLLOWED BY ANOTHER SEPARATE INCIDENT]

And how many separate incidents were there AFTER the series ended?
1..10

[PROGRAMME RECORDS WHICH INCIDENT(S) TAKES PRIORITY (HIDDEN)]

1. Series takes priority
2. Latest separate incident takes priority
3. Separate, then series, then separate

S INDICATES THAT THE QUESTION IS ASKED ON SHORT VICTIM FORMS.
L INDICATES THAT THE QUESTION IS ASKED ON LONG VICTIM FORMS.
SL INDICATES THAT THE QUESTION IS ASKED ON BOTH LONG AND SHORT VICTIM FORMS.

+V1 DATE AND DESCRIPTION OF INCIDENT

[ASK ALL]

INTERVIEWER - BELOW IS A CHECK LIST OF OFFENCES COMMITTED AGAINST THE RESPONDENT AND HOUSEHOLD IN THE PAST YEAR PLEASE CONFIRM THE LIST WITH THE RESPONDENT - CHECK THAT EVERYTHING HAS BEEN MENTIONED AND NOTHING COUNTED TWICE GO BACK AND AMEND CODING IF NECESSARY.
IF YOU CHOOSE TO GO BACK YOU WILL BE TAKEN TO THE BEGINNING OF THE SCREENER QUESTIONNAIRE

1. Continue
2. Go back

[ASK ALL TYPE B]

I now want to ask you about WHEN the incident(s) you have just mentioned happened during the last 12 months. I’d like to mark on the calendar the date of each incident.

INTERVIEWER: FOR EACH CRIME, MARK ON THE CALENDAR THE DATE WHEN IT OCCURRED. THIS ONLY NEEDS TO BE ESTIMATED TO THE NEAREST MONTH.

IF THE RESPONDENT IS HAVING DIFFICULTY REMEMBERING THE EXACT MONTH YOU MAY FIND IT USEFUL TO MARK SOME OTHER LANDMARK DATES ON THE CALENDAR (EG. BIRTHDAYS, ANNIVERSARIES ETC.) WHICH CAN BE USED FOR REFERENCE POINTS. EXAMPLES OF SUCH EVENTS OR PERIODS CAN BE FOUND ON THE FRONT PAGE OF THE CALENDAR.

+CrimeNo [CRIME NUMBER, WITHIN TYPE OF CRIME]

INTERVIEWER ENTER CRIME NUMBER: 1..11

12. M. To report any other type of problem or difficulty
13. O. To ask for any other sort of advice or information
14. P. To give them any other sort of information
**ToldCrim**  
ASK if RecCont = 1 or 2

Have you already told me about this incident?

1. Yes
2. No

**VFCrim**  
ASK IF ToldCrim=1

INTERVIEWER: ON WHICH VICTIM FORM WAS THE INCIDENT RECORDED?

1.6

[IF INCIDENT HAS ALREADY BEEN RECORDED ON THE VICTIM FORM GO TO INTERNET]

**CopWait**  
ASK ALL WHO HAVE CONTACTED THE POLICE RECENTLY – OTHER THAN BEING TOLD TO, DIRECTIONS OR SOCIAL CHAT AND NOT ON A VICTIM FORM

(Thinking about the most recent occasion when you contacted the police) Can you tell me about the way they responded? Did you have to wait at all before the police attended to the matter or did they deal with it immediately?

1. Had to wait
2. Dealt with immediately
3. Police never dealt with this matter
4. Not applicable/Victim did not want to be involved any further

**CopWait2**  
ASK IF CopWait=1

Did the length of time you had to wait seem reasonable to you or not?

1. A reasonable time
2. Not a reasonable time

**Polinter**  
ASK IF ANSWERED CopWait

How much INTEREST did the police show in what you had to say? Was it...READ OUT

1. As much as you thought they should
2. or less than you thought they should?

**CopEff**  
ASK IF ANSWERED CopWait

How much EFFORT would you say the police put into dealing with this matter? Was it...READ OUT

1. As much as you thought they should
2. or less than you thought they should?
Copinfo [ASK IF ANSWERED CopWait]

And how well did they keep you informed about what was happening? Was it...

1. Very well
2. Fairly well
3. Not very well
4. or not at all well?

Moreinfo [ASK IF Copinfo NE 1]

Do you think the police should have kept you/(the victim) better informed?

1. Yes
2. No
3. Not necessary - no investigation going on
4. Not necessary - did not want to be informed
5. Police had no information

CopSat [ASK IF ANSWERED CopWait]

Overall, were you satisfied or dissatisfied with the way the police handled this matter?

INTERVIEWER: IF SATISFIED ASK: Very satisfied or just fairly satisfied?
IF DISSATISFIED ASK: A bit dissatisfied or very dissatisfied?

1. Very satisfied
2. Fairly satisfied
3. A bit dissatisfied
4. Very dissatisfied

A3 CONTACTING THE POLICE BY INTERNET

Internet [ASK IF NOT PCWhoA or PCWhoB = 1]

Do you personally use the Internet to either send e-mails or access Internet websites?

1. Yes
2. No

InternY [ASK IF Internet=Yes]

If you were able to contact the police using the Internet, for example, to report a crime, to provide information, or to request information, would you use this service?

1. Yes
2. No
3. SPONTANEOUS : Would use it for some things, but not others
InternN  [ASK IF Internet=No]

If you DID use the Internet and were able to contact the police using it, for example, to report a crime, to provide information, or to request information, would you use this service?

1. Yes
2. No
3. SPONTANEOUS: Would use it for some things, but not others

A4  RESPONDENT IN VEHICLE STOPPED BY POLICE

PStopCar  [ASK IF NOT PCWhoA or PCWhoB = 1]
Have you EVER been in a car or on a motorcycle which was approached or stopped by police officers?

1. Yes
2. No

CarStpYr  [ASK IF PStopCar = Yes]
Has this happened at all since [the first of January 2000/the first of ^DATE^]? OR

1. Yes
2. No

NCarStp  [ASK IF CarStpYr = Yes]
How many times have you been stopped since [the first of January 2000/the first of ^DATE^]? CODE 97 IF TOO MANY TO COUNT

1..97

CopReas1  [ASK IF CarStpYr = Yes]
(Thinking just about the last occasion when this happened) Did the officer give a reason for stopping you?

1. Yes
2. No

StopRea1  [ASK IF Copreas1 = Yes]
What was the reason? DO NOT READ OUT. CODE ONE ONLY.

1. Speeding
2. Some other driver related behaviour
3. Some vehicle defect
4. Parking offence
5. Other motoring/traffic offence
6. To check car ownership
7. Routine check (checking tax disc, brake lights, tyres etc)
8. Some other (non motoring non vehicle) offence
9. Police had received information (tip-off) about an offence
10. Case of mistaken identity
11. Some matter other than offence
+(XstpRea) [ASK IF Stoprea1=11]

INTERVIEWER: RECORD OTHER ANSWER

GoodRea1 [ASK IF Copreas=1]

Would you say that this was a good enough reason?

1. Yes
2. No

StopFeA-
StopFeJ [ASK IF CarStpYr=Yes]

SHOW CARD A3
Looking at this card, please choose the word or words that describe how you felt when you were last stopped by the police?
CODE ALL THAT APPLY SET [7] OF

1. Angry
2. Embarrassed
3. Upset
4. Guilty
5. Worried
6. Grateful
7. Not worried/did not mind/no feelings
8. Other feeling
9. SPONTANEOUS : Don’t remember

+(XstopFeel) [ASK IF StopFeel=8]

INTERVIEWER: RECORD OTHER WORDS.

SearcVeh [ASK IF CarStpYr = Yes]

Can I just check, did they search the vehicle or anyone in it the last time this happened?

1. Yes
2. No

CopOffR1 [ASK IF SearcVeh = Yes]

Did the officer fill out an official form about the search?

1. Yes
2. No

CopOffF [ASK IF CopOffR1=Yes]

Were you offered a copy of this form at the time?

1. Yes
2. No
SHOW CARD A4

Which of these did the officer do? CODE ALL THAT APPLY  SET [14] OF

1. Gave an on the spot warning about offence committed
2. Said they would issue a summons
3. Said they might issue a summons
4. Made an arrest
5. Carried out a breath test
6. Issued a Fixed Penalty Notice for an offence (£20 or £30 or £40)

IF DISSATISFIED ASK: A bit dissatisfied or very dissatisfied?

1. Very satisfied
2. Fairly satisfied
3. A bit dissatisfied
4. Very dissatisfied

A6 ATTITUDES TO THE POLICE

RatPolic  [ASK IF NOT (PCWhoA or PCWhoB =1)]

I would now like to talk about how the police perform their job. Taking everything into account, would you say the police IN THIS AREA do a good job or a poor job?
INTERVIEWER PROMPT IF GOOD : very good or fairly good?
PROMPT IF POOR : very poor or fairly poor?

1. Very good
2. Fairly good
3. Fairly poor
4. Very poor

CopBehav  [ASK IF NOT (PCWhoA or PCWhoB =1)]

Have you ever been really annoyed about the way a police officer behaved towards you or someone you know, OR about the way the police handled a matter in which you were involved?

1. Yes - towards respondent
2. Yes - towards someone else
3. Yes - towards both respondent and someone else
4. No
**CopBeh5Y**  [ASK IF CopBehav IN (1..3)]

Has this happened at all in the last FIVE years?

1. Yes
2. No

**NCopBeh5**  [ASK IF CopBeh5Y = Yes]

How many times has it happened in the last five years?
IF TOO MANY TIMES TO COUNT THEN RECORD AS 97
1…97

**ReasBeA- ReasBeM**  [ASK IF CopBeh5Y = Yes]

Last time you were really annoyed, what was the reason?

1. Slow to arrive/did not come when sent for
2. Used undue FORCE OR VIOLENCE, or ASSAULTED someone
3. Behaved ILLEGALLY/broke the rules
4. Behaved UNREASONABLY or unfairly
5. Offenders NOT CAUGHT/property NOT RECOVERED
6. Did nothing/DIDN’T DO ENOUGH
7. DID WRONG THING/were incompetent
8. DID NOT keep person INFORMED/DID NOT COME BACK
9. RACIST language or behaviour
10. Manner UNFRIENDLY/rude/arrogant/over-casual etc.
11. Other reason

+(XreasBeh)  [ASK IF ReasBe=11]

INTERVIEWER: RECORD OTHER ANSWER GIVEN

**ActCompl**  [ASK IF CopBehav = 1 to 3]

Have you made, or tried to make, an official complaint in the last five years?

1. Yes - made a complaint
2. Tried but failed to make a complaint
3. No

**NActComp**  [ASK IF ActCompl = Yes]

How many times have you made an official complaint in the last five years?
INTERVIEWER: IF TOO MANY TIMES TO COUNT, CODE 97
1…97
YrComp [ASK IF ActCompl = Yes]

In what year did you last make a complaint?

1. 1995
2. 1996
3. 1997
4. 1998
5. 1999
6. 2000
7. 2001

SatisCom [ASK IF ActCompl= 1 or 2]

Overall, were you satisfied or dissatisfied with the way the police dealt with your complaint?
INTERVIEWER: PROMPT IF SATISFIED: Was that very satisfied or just fairly satisfied?
PROMPT IF DISSATISFIED: Was that a bit dissatisfied or very dissatisfied?

1. Very satisfied
2. Fairly satisfied
3. A bit dissatisfied
4. Very dissatisfied

PCompCh [ASK IF ActCompl=1 or 2]

Were you aware of any changes to the police complaints procedure either before or after you made your complaint?

1. Yes, before I made my complaint
2. Yes, after I made my complaint
3. No, not aware of any changes

WhyNoCom [ASK IF ActCompl=2 or 3]

Why did you not (manage to) make a complaint?
DO NOT PROMPT. CODE ONLY ONE REASON

1. Did not know who to complain to
2. Could not understand complaints procedure
3. Worried about police response
4. Unsure of consequences of making a complaint/did not know what would happen
5. Too long after the incident/left it too late
6. I was not the appropriate person to make the complaint/none of my business
7. Could see no benefit to making a complaint/no point

PersView [ASK FIRST HALF OF FUA + 1,125 OF ETHNIC SAMPLE AND IF NOT (PCWhoA or PCWhoB =1)]

[ASK SECOND HALF OF FUB + 375 OF ETHNIC SAMPLE]

SHOW CARD Y2 (ASSAULT SCENARIO)
I am now going to ask you to read a card containing details of an actual crime that went
to court. I will then ask you what sentence you think the offender was ACTUALLY given,
and then what sentence you think the offender SHOULD have been given. Please let me
know when you have finished reading the card.
INTERVIEWER: ALLOW RESPONDENT TIME TO READ SHOW CARD PROPERLY,
THEN CONTINUE.
A man aged 21 pleaded guilty to assaulting a stranger. An argument started when the offender pushed his way into a taxi queue. When another man tried to calm the offender down, the offender hit the victim in the face, fracturing his nose. The offender did not have any previous convictions for violence.

SentCA-

SentCK [ASK SECOND HALF OF FUB]

SHOW CARD B1
There are a number of possible sentences which could be imposed in this case. Which type, or types, of sentence do you think the offender ACTUALLY received?
CODE ALL THAT APPLY SET [9] OF

1. Conditional discharge
2. Have to pay compensation
3. Fine
4. Probation
5. Community service order
6. Electronic tagging
7. Suspended prison sentence
8. Prison sentence
9. Other

+(TypSntCO) [ASK IF TypSentC=9]

INTERVIEWER: RECORD OTHER ANSWER GIVEN

PrSentC [ASK IF SentCG=1 (Imprisonment)]

How long do you think the prison sentence was?
INTERVIEWER: RECORD LENGTH OF SENTENCE RECEIVED RATHER THAN LENGTH OF SENTENCE SERVED.

1. IN YEARS ONLY
2. IN MONTHS ONLY
3. IN YEARS AND MONTHS

PrSentCY [ASK IF PrSentC = 1 or 3]

CODE NUMBER OF YEARS

0…97

PrSentCM [ASK IF PrSentC = 2 or 3]

CJSWork [ASK ALL FUB + 750 ETHNIC SAMPLE]
Have you ever worked in, or for, any part of the Criminal Justice System, including police, prisons, courts, or the legal profession?
1. Yes
2. No
CJSWhen  [ASK IF CJSWork = Yes]

Was this within the last two years?

1. Yes
2. No

EverVict  [ASK ALL FUB + 750 ETHNIC SAMPLE]

Have you ever been the VICTIM of any crime, however minor, that was reported to the police, (including anything you have previously mentioned)?

1. Yes
2. No

VictWhen  [ASK IF EverVict= Yes]

Was this within the last two years?

1. Yes
2. No

EverArr  [ASK ALL FUB + 750 ETHNIC SAMPLE]

Have you ever been arrested by the police for any reason?
INTERVIEWER : INCLUDE WHERE NO FURTHER ACTION WAS TAKEN.

1. Yes
2. No

ArrWhen  [ASK IF EverArr= Yes]

Was this within the last two years?

1. Yes
2. No

EverCrt  [ASK ALL FUB + 750 ETHNIC SAMPLE]

Have you ever been in court as a VICTIM, WITNESS or SPECTATOR in a criminal case?

1. Yes
2. No

CrtWhen  [ASK IF EverCrt= Yes]

Was this within the last two years?

1. Yes
2. No
EverJur [ASK ALL FUB + 750 ETHNIC SAMPLE]

Have you ever been in court as a JUROR in a criminal case?
1. Yes
2. No

JurWhen [ASK IF EverJur= Yes]

Was this within the last two years?
1. Yes
2. No

EverDef [ASK ALL FUB + 750 ETHNIC SAMPLE]

Have you ever been in court as the person ACCUSED of committing a crime?
1. Yes
2. No

DefWhen [ASK IF EverDef= Yes]

Was this within the last two years?
1. Yes
2. No

EverProb [ASK ALL FUB + 750 ETHNIC SAMPLE]

Have you ever been in contact with the PROBATION SERVICE for whatever reason?
1. Yes
2. No

ProbWhen [ASK IF EverProb= Yes]

Was this within the last two years?
1. Yes
2. No

EverPri2 [ASK ALL FUB + 750 ETHNIC SAMPLE]

Have you ever been inside a PRISON, including juvenile prisons, for whatever reason?
INTERVIEWER: DO NOT INCLUDE VISITS MADE AS A TOURIST
1. Yes
2. No

PrisWhen [ASK IF EverPris= Yes]

Was this within the last two years?
1. Yes
2. No
RepBurg1  [ASK FIRST HALF OF FUB + 375 ETHNIC SAMPLE]

SHOW CARD B2
Please read this card which describes the current policy for sentencing repeat burglars.
INTERVIEWER: ALLOW RESPONDENTS TIME TO READ PROPERLY, THEN CONTINUE

On card only (not on screen)
Offenders, aged 18 or over, convicted of house burglary for the third time now receive a minimum prison sentence of three years.

Were you aware of this policy?

1. Yes
2. No

RepBurg2  [ASK FIRST HALF OF FUB + 375 ETHNIC SAMPLE]

Does this policy give you more confidence in the way that the Criminal Justice System deals with burglars, less confidence in the way that the Criminal Justice System deals with burglars or does it not change your view?
PROBE: Does this increase/decrease your confidence a lot or a little?

1. A lot more confidence in the Criminal Justice System
2. A little more confidence in the Criminal Justice System
3. Does not change view of the Criminal Justice System
4. A little less confidence in the Criminal Justice System
5. A lot less confidence in the Criminal Justice System

JuvCriA-JuvCriN  [ASK SECOND HALF OF FUB + 375 ETHNIC SAMPLE]

SHOW CARD B3
Which of the following measures used to tackle juvenile crime have you heard of?

1. Youth Justice Board
2. Youth Offending teams
3. Secure remands
4. Detention and training orders
5. Final warnings
6. Action Plan Orders
7. Reparation Orders
8. Parenting Orders
9. Child Safety Orders
10. Local Child Curfews
11. Referral Orders
12. None of these

FOLLOW-UP MODULE C (CRIME PREVENTION AND SECURITY)

C1 COMMUNITY ACTION

[ASK ALL FUC]

I now want to ask you some questions about crime prevention and security measures. First, a few questions about who should be involved in reducing crime in your local area.

CommacA-

CommacO [ASK FIRST HALF OF FUC]

SHOW CARD C1
Which of the groups on this card do you think SHOULD have responsibility for reducing crime in your local area? CODE ALL THAT APPLY

1. A. Members of the public
2. B. Media -TV/newspapers
3. C. Parents
4. D. Neighbourhood Watch
5. E. Other local community/voluntary groups
6. F. Private security organisations
7. G. Social services
8. H. Health authorities/GPs
9. I. Local education authorities/schools/teachers
10. J. Local authorities/councils
11. K. The probation service
12. L. The police
13. M. The courts

CommMost [ONLY ASK IF MORE THAN ONE RESPONSE GIVEN AT Commac]

SHOW CARD C1
And which of the groups you have mentioned do you think should have the MAIN responsibility for reducing crime in your local area?

1. A. Members of the public
2. B. Media -TV/newspapers
3. C. Parents
4. D. Neighbourhood Watch
5. E. Other local community/voluntary groups
6. F. Private security organisations
7. G. Social services
8. H. Health authorities/GPs
9. I. Local education authorities/schools/teachers
10. J. Local authorities/councils
11. K. The probation service
12. L. The police
13. M. The courts

[Only list responses given at Commac]
CommNext  [ ONLY ASK IF MORE THAN TWO GIVEN AT Commac]

SHOW CARD C1

And which do you think should have the NEXT?

1. A. Member of the public
2. B. Media -TV/newspapers
3. C. Parents
4. D. Neighbourhood Watch
5. E. Other local community/voluntary groups
6. F. Private security organisations
7. G. Social services
8. H. Health authorities/GPs
9. I. Local education authorities/schools/teachers
10. J. Local authorities/councils
11. K. The probation service
12. L. The police
13. M. The courts

[IF APPLICABLE, only list responses given at Commac, but not given at Commost]

C2  NEIGHBOURHOOD WATCH

AreaNbrw  [ASK FIRST HALF OF FUC]

Has a Neighbourhood Watch Scheme ever been set up in this area, covering this address?

1. Yes
2. No
3. Never heard of Neighbourhood Watch
4. Don’t know

MbrNbrW  [ASK IF AreaNbrW = Yes]

Do you consider your household currently to be a member of the scheme?

1. Yes
2. No
3. Scheme no longer operating.

SchmWork  [ASK IF MbrNbrW=Yes]

Have you had any information from the police or from a co-ordinator about how the scheme is working?

1. Yes
2. No
JoinSchm  [ASK IF AreaNbrW=No OR Don't know]

Would you personally join a scheme if there were one in this area?

1. Yes
2. No

LocCom  [ASK FIRST HALF OF FUC]

How effective do you think Neighbourhood Watch Schemes are in preventing crimes such as burglary? Do you think they are...READ OUT

1. Very effective
2. Moderately effective
3. Not particularly effective
4. or not effective at all?

C3 LOCAL CRIME PARTNERSHIPS

Partners  [ASK FIRST HALF OF FUC]

In 1998 there was a new initiative which set up crime partnerships for each district of the country. These partnerships, involving local councils, the police and other organisations, were set up to reduce crime and disorder in their area. Are you aware that there is a local partnership covering your area?

1. Yes
2. No

Partinf  [ASK IF Partners = Yes]

Are you aware of what the crime partnership covering your area is doing?

1. Yes
2. No

PartEff [ASK FIRST HALF OF FUC]

How successful do you think that these local crime partnership will be in reducing crime in your local area? Do you think they will be...READ OUT

1. Very successful
2. Fairly successful
3. Not very successful
4. or not at all successful?
[ASK FIRST HALF OF FUC]

INTERVIEWER: READ OUT
I’d now like to ask you some questions about security measures fitted to your home. We need to ask these questions so that we can investigate the relationship between home security and levels of crime in your area.

BurgAlar [ASK FIRST HALF OF FUC]

First, a few questions about some things people do to protect their homes against burglary. Do you have a burglar alarm in your home? By a burglar alarm, I mean a real alarm not a dummy alarm box.

1. Yes
2. No

NDummy [ASK IF BurgAlar = No or DK or REF]

Do you have a dummy alarm box visible on the outside wall of your house/flat?

1. Yes
2. No

Visible [ASK IF BurgAlar = Yes]

Is the alarm box for the burglar alarm visible on the outside of your house/flat?

1. Yes
2. No

AlarmTyp [ASK IF BurgAlar = Yes]

Is the alarm the type which is connected by telephone so that if the alarm goes off the police or a central security station are automatically called?

1. Yes
2. No

AlarmOn [ASK IF BurgAlar = Yes]

How often is your home left empty for a couple of hours or more without the alarm switched on?

1. At least once a week
2. At least once a fortnight
3. At least once a month
4. Less than once a month
5. Never
**DeadLock**  
[ASK FIRST HALF OF FUC]

Do you have double locks or deadlocks on the outside doors into your home?
INTERVIEWER: DOUBLE LOCKS NEED THE KEY TURNED TWICE 
DEAD LOCKS ARE “FIVE LEVER MORTICES” OR “RIM AUTOMATIC DEADLOCKS” 
(YALE TYPE LOCKS ON WHICH THE LATCH CAN BE FIXED WITH A KEY)

1. Yes - on all
2. Yes - on some
3. No

**UsedLock**  
[ASK IF DeadLock is 1 or 2]

How often is your home left empty for a couple of hours or more without the deadlocks or double locks on?

1. At least once a week
2. At least once a fortnight
3. At least once a month
4. Less than once a month
5. Never

**Chains**  
[ASK FIRST HALF OF FUC]

Do you have security chains on the inside of the doors into your home?

1. Yes - on all
2. Yes - on some
3. No

**DayChain**  
[ASK IF Chains =1 OR 2]

SHOW CARD C2

Thinking about when you are in the house during the DAY, how regularly would you say the security chain is on?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
6. SPONTANEOUS: Not applicable – never at home during the day
SHOW CARD C2

And thinking about when you are in the house during the EVENING or at NIGHT, how regularly would you say the security chain is on?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
6. SPONTANEOUS: Not applicable – never at home during the evening or at night

SHOW CARD C2

When someone calls at your home, do you check to see if you recognise the person calling before fully opening the door? For example, by looking through a window, a security viewer in the door, through the letterbox, or by using a security chain.

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never

SHOW CARD C2

When an official calls at your door, for example, someone from the gas, electricity or water companies or a police officer, do you check their identity card or documentation before allowing them to enter?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
WindLock  [ASK FIRST HALF OF FUC]

Do your windows have locks that need keys to open them?
READ OUT. CODE FIRST THAT APPLIES.

1. All of them
2. All downstairs windows
3. Only some windows
4. No none of them

TimLiIn  [ASK FIRST HALF OF FUC]

Do you have any INDOOR lights on a timer or sensor switch?

1. Yes
2. No

TimLiOut  [ASK FIRST HALF OF FUC]

And do you have any OUTDOOR lights on a timer or sensor switch?

1. Yes
2. No

BarGrill  [ASK FIRST HALF OF FUC]

Do your windows have bars or grilles?

1. All of them
2. Some of them
3. No

SecYrA-
SecYrM  [ASK SECOND HALF OF FUC]

SHOW CARD C3
Since [the first of January 2000/the first of ^DATE^] have you done any of the following things on this card? CODE ALL THAT APPLY SET [10] OF

1. Installed a burglar alarm
2. Installed a dummy alarm
3. Fitted double locks or deadlocks on outside doors into your home
4. Fitted security chains on the doors into your home
5. Fitted window locks
6. Fitted indoor timer or sensor lights
7. Fitted outdoor timer or sensor lights
8. Fitted bars or grilles to windows
9. Security marked household property
10. Made other security improvements
11. None of these

+(Xothsecy)  [ASK IF SecYear=10]

INTERVIEWER: RECORD OTHER SECURITY IMPROVEMENT
YSecYrA-  [ASK IF ANY (SecYrA – SecYrN = 1)]

What were the main reasons you decided to improve your home security since [the first of January 2000/the first of ^DATE^]? DO NOT READ OUT. CODE ALL THAT APPLY SET [11] OF

1. Own home was burgled
2. Friend's/relative's home was burgled
3. Neighbour's home was burgled
4. General increase in burglaries in local area
5. Home was going to be left empty (e.g. going on holiday)
6. To reduce insurance premiums
7. Advice from police/crime prevention officer
8. Advice in leaflets, papers, or on TV, radio or internet
9. Adverts/contacted by commercial businesses selling security devices
10. Decision taken by landlord/person responsible for accommodation
11. Done as part of general improvements to the house
12. Other reason (specify)
13. None of these

+(XYSecyr)  [ASK IF OTHER REASON IN YSecYr]

INTERVIEWER: RECORD OTHER ANSWER.

YNoSecYA-  [ASK IF SecYr = NONE OF THESE]

You say that you have not made any home security improvements since [the first of January 2000/the first of ^DATE^]. Why is this? DO NOT READ OUT. CODE ALL THAT APPLY SET [7] OF

1. Home already as secure as it can be
2. Don’t think home is at risk
3. Security measures are too expensive
4. Haven’t got around to it yet
5. Can’t be bothered
6. Home is rented (security is responsibility of landlord)
7. Other reason (specify)

+(XYNoSecy)  [ASK IF OTHER REASON IN YNOSECYR]

INTERVIEWER: RECORD OTHER ANSWER.
C5 PERSONAL SECURITY

[ASK SECOND HALF OF FUC]

I now want to ask you some questions about crime prevention and security measures. First, a few questions about personal security.

Alarm

[ASK SECOND HALF OF FUC]

SHOW CARD C4

When you go out after dark, how often do you carry a personal alarm, whistle or other noise-making instrument to attract attention in case you are attacked?

1. Always
2. Usually
3. Sometimes
4. Rarely
5. Never
6. Never go out after dark

WeaponA

[ASK SECOND HALF OF FUC]

SHOW CARD C4

When you go out after dark, how often do you carry a weapon or something you use as a weapon for protection?

1. Always
2. Usually
3. Sometimes
4. Rarely
5. Never
6. Never go out after dark
WhWeapA-WhWeapG [ASK IF WeaponA IN (1..4)]

1. Spray/mace/CS gas
2. Keys
3. Knife/sharp object
4. Gun
5. Other

+(XwhaWeap) [ASK IF WhWeap = Other]

INTERVIEWER: RECORD OTHER ANSWER GIVEN

SelDef [ASK SECOND HALF OF FUC]

Have you ever taken a self-defence course for your personal safety?

1. Yes
2. No

C6 VEHICLE SECURITY

[ASK IF ALREADY ANSWERED VEHICLE SECURITY QUESTIONS IN THE VICTIM FORM]

I’d now like to ask you some questions about vehicle security. You may have already answered some similar questions about a current or previous vehicle, but it would be very helpful if you could answer these questions as well.

Carvan [ASK SECOND HALF OF FUC IF CAR = Yes]

You said earlier your household owned or had regular use of a car, van, or other motor vehicle. Can I just check, how many CARS or LIGHT VANS does your household currently own or have regular use of?

INTERVIEWER: EXCLUDE MOTORCYCLES

0. None
1. One
2. Two
3. Three
4. Four
5. Five
6. Six or more

CarVan1 [ASK IF Carvan=1]

You said that you currently have a car or van. Can I just check is it a car OR a van?

NOTE: FOUR WHEEL DRIVE VEHICLES COUNT AS CARS

1. Car
2. Light van
3. Neither
I now want to ask some questions about this [car/van].

CentLoc0 [ASK IF Carvan1=1 or 2]

Does it have central locking of all doors so that locking one door locks all?

1. Yes
2. No

CarAlar0 [ASK IF Carvan1=1 or 2]

Does it have an alarm?

1. Yes
2. No

Immob0 [ASK IF Carvan1=1 or 2]

Do you have a mechanical immobiliser for this [car/van]? That is a device which can be used to lock the steering wheel, handbrake or gearstick so that they cannot be used.

NOTE: DO NOT INCLUDE STEERING COLUMN LOCKS WHICH ARE INTEGRAL TO THE [CAR/VAN]

1. Yes
2. No
3. Don’t know

Immob01 [ASK IF Carvan1=1 or 2]

Does it have an electronic immobiliser fitted? That is a device which prevents the vehicle being driven away except if the correct key is used.

1. Yes
2. No
3. Don’t know

VTrack [ASK IF Carvan1=1 or 2]

Does it have a tracker device that allows police to trace the vehicle?

1. Yes
2. No
3. Don’t know
VEtch  [ASK IF Carvan1=1 or 2]

Does it have the registration number etched onto the windows of the vehicle?

1. Yes
2. No
3. Don’t know

RcasCD0  [ASK IF Carvan1=1 or 2]

Does it have a radio, cassette player or CD player?

1. Yes
2. No

Remove0  [ASK IF RCasCD0=1]

Is this removable? That is, can you either remove the whole unit or part of the unit.

1. Yes
2. No

SecPIN0  [ASK IF RCasCD0=1]

Does it have a security PIN code such that it will not work without the code?
NOTE DO NOT INCLUDE PROPERTY MARKING CODES

1. Yes
2. No

Use0  [ASK IF Carvan1=1 or 2]

Do you yourself ever drive this [car/van]?

1. Yes
2. No

ParkDoo0  [ASK IF Use0 = Yes]

SHOW CARD C5
When you park this [car/van] in a place with public access, how often do you leave any of the doors or the boot unlocked, even if it is just for a short time?

1. Always
2. Almost always
3. Sometimes
4. Rarely
5. Never
Parkdo00 [ASK IF Use0 = Yes AND Immob0 = Yes]

SHOW CARD C5
When you park this [car/van] for more than 10 minutes in a place with public access, how often do you use the mechanical immobiliser?

1. Always
2. Almost always
3. Sometimes
4. Rarely
5. Never

[ASK IF Carvan IN (2..6)]

The following questions are about your household’s main vehicle - that is, the one that is most often used.
INTERVIEWER: IF NECESSARY, MOST OFTEN REFERS TO THE VEHICLE WITH THE HIGHEST MILEAGE.

CarVan2 [ASK IF Carvan IN (2..6)]

Is this a car or a van?
NOTE: FOUR WHEEL DRIVE VEHICLES COUNT AS CARS

1. Car
2. Light van
3. Neither

CentLoc1 [ASK IF Carvan2= 1 or 2]

Does it have central locking of all doors so that locking one door locks all?

1. Yes
2. No

CarAlar1 [ASK IF Carvan2= 1 or 2]

Does it have an alarm?

1. Yes
2. No

Immob1 [ASK IF Carvan2= 1 or 2]

Do you have a mechanical immobiliser for this [car/van]? That is a device which can be used to lock the steering wheel, handbrake or gearstick so that they cannot be used. NOTE DO NOT INCLUDE STEERING COLUMN LOCKS WHICH ARE INTEGRAL TO THE [CAR/VAN]

1. Yes
2. No
3. Don’t know
**Immob11** [ASK IF Carvan2= 1 or 2]

Does it have an electronic immobiliser fitted? That is a device which prevents the vehicle being driven away except if the correct key is used.

1. Yes
2. No
3. Don’t know

**VTrackA** [ASK IF Carvan2=1 or 2]

Does it have a tracker device that allows police to trace the vehicle?

1. Yes
2. No
3. Don’t know

**VEtch2C** [ASK IF Carvan2=1 or 2]

Does it have the registration number etched onto the windows of the vehicle?

1. Yes
2. No
3. Don’t know

**RcasCD1** [ASK IF Carvan2= 1 or 2]

Does it have a radio, cassette player or CD player?

1. Yes
2. No

**Remove1** [ASK IF RCasCD1=1]

Is this removable? That is, can you either remove the whole unit or part of the unit.

1. Yes
2. No

**SecPIN1** [ASK IF RCasCD1=1]

Does it have a security PIN code such that it will not work without the code? **NOTE DO NOT INCLUDE PROPERTY MARKING CODES**

1. Yes
2. No
**Use1**  
[ASK IF Carvan2= 1 or 2]

Do you yourself ever drive this [car/van]?

1. Yes
2. No

**ParkDoo1**  
[ASK IF Use1=1]

SHOW CARD C5
When you park this [car/van] in a place with public access, how often do you leave any of the doors or the boot unlocked, even if it is just for a short time?

1. Always
2. Almost always
3. Sometimes
4. Rarely
5. Never

**ParkDo02**  
[ASK IF Use1 = 1 AND Immob1 = Yes]

SHOW CARD C5
When you park this [car/van] for more than 10 minutes in a place with public access, how often do you use the mechanical immobiliser?

1. Always
2. Almost always
3. Sometimes
4. Rarely
5. Never

**VehVict**  
[ASK ALL FUC]

ASK (OR RECORD IF ALREADY MENTIONED)
Can I just check, have you YOURSELF been the victim of a vehicle crime in the last FIVE years? By vehicle crime, I mean theft of or from a car or van and attempted theft from a car or van.

INTERVIEWER: EXCLUDE MOTOR CYCLES. ONLY INCLUDE VEHICLES OWNED BY THE RESPONDENT OR VEHICLES WHICH THE RESPONDENT HAS SOLE USE OF (E.G COMPANY CARS). DO NOT COUNT VEHICLES USED EXCLUSIVELY FOR WORK (E.G. POST VANS).

1. Yes
2. No

**NVehVic**  
[ASK IF VehVict=YES]

How many times have you yourself been the victim of vehicle crime in the last five years? CODE 97 IF TOO MANY TIMES TO REMEMBER

1..97
CarVan3  [ASK IF VehVict=Yes]

In this incident/most recent incident, was the vehicle involved a car or van?
NOTE: FOUR WHEEL DRIVE VEHICLES COUNT AS CARS

1. Car
2. Light van
3. Neither

ChangeA-ChangeM  [ASK IF Vehvict=Yes]

SHOW CARD C6
Since the incident/most recent incident, have you made any of the changes listed on this card to your vehicle security arrangements? CODE ALL THAT APPLY SET [9] OF

1. Always lock doors
2. Fitted an alarm
3. Fitted mechanical immobiliser
4. Fitted electronic immobiliser
5. Remove radio/stereo/CD player when car/van not in use
6. Looked for better security on next car purchased
7. Not leaving property on show in the vehicle
8. Not parking in certain areas
9. Sold car
10. Other
11. No improvements made

+(Xchange)  [ASK IF Change=OTHER]

INTERVIEWER: RECORD OTHER ANSWER

NChangeA-NChangeH  [ASK IF Change=No improvements made]

Why have you NOT made any improvements to the security of your car/van?
DO NOT PROMPT CODE ALL THAT APPLY SET [6] OF

1. Vehicle is as secure as it can be
2. Don’t think car/ van is at risk
3. Security measures are too expensive
4. Haven’t got around to it yet
5. Can’t be bothered
6. Other reason

+(XYNoChng)  [ASK IF YNoChng = 6]

INTERVIEWER: RECORD OTHER REASON
VExpend \[\text{ASK IF Any of (ChangeB – ChangeD = 1)}\]

How much did you spend on this change/these changes?
INTERVIEWER: RECORD AMOUNT IN POUNDS

0..5000

[ASK SECOND HALF OF FUC IF Car=1 FROM MAIN SECTION]

SHOW CARD C7
Now I am going to read out a number of statements that people have made about vehicle crime. For each one, I’d like you to tell me how much you agree or disagree with it. So, first of all…
(How much do you agree or disagree that….)

1. Agree strongly
2. Agree slightly
3. Neither agree nor disagree
4. Disagree slightly
5. Disagree strongly

RANDOMISE STATEMENTS

VehAtt1-VehAtt11

A. The likelihood of having your vehicle stolen is decreasing
B. The likelihood of having things stolen from your vehicle is decreasing
C. People with vehicles have a responsibility to prevent vehicle crime happening to them
D. Most vehicle crime is opportunistic
E. More is being done nowadays to reduce vehicle crime
F. There are things you can do to reduce the risk of vehicle crime happening to you
G. There is little chance of vehicle crime being reduced in the future
H. Alarms and engine immobilisers reduce the chances of your vehicle being stolen
I. Steering locks reduce the chances of your vehicle being stolen
J. If a thief wants your vehicle or something in it they WILL get it regardless of anything you do to prevent it
K. Removing things from view is one of the best things you can do to deter someone from breaking into your vehicle

FOLLOW-UP MODULE D (AD HOC)

D1 ROLE OF VICTIMS IN CJS

[ASK ALL FUD]

INTERVIEWER: READ OUT
I would now like to ask you about how victims of crime are treated in court.

VStat1 [ASK ALL FUD]

SHOW CARD D1
When a court case takes place how important do you think it is that victims should be INVITED to attend court, even if they do not have to give evidence?

1. Very important
2. Fairly important
3. Not very important
4. Not at all important

VStat2 [ASK ALL FUD]

SHOW CARD D1
And how important do you think it is that victims should have a reserved seat in the court during the case?

1. Very important
2. Fairly important
3. Not very important
4. Not at all important

VStat3 [ASK ALL FUD]

SHOW CARD D1
And how important do you think it is that victims should be allowed to personally tell the court what effect the crime has had on them?

1. Very important
2. Fairly important
3. Not very important
4. Not at all important
VStat4  [ASK ALL FUD]

SHOW CARD D1
Lawyers who prosecute people accused of committing crimes act on behalf of the Crown in court proceedings. They do not act on behalf of the victim. Bearing this in mind how important do you think it is that victims have someone to represent THEIR interests during the case?

1. Very important
2. Fairly important
3. Not very important
4. Not at all important

VSHlplne  [ASK ALL FUD]

Victim Supportline is a central number which victims can call to get information about their local Victim Support Scheme. Have you heard of Victim Supportline before now?

1. Yes
2. No

VCHeard  [ASK ALL FUD]

Have you heard of the Victim’s Charter?

1. Yes
2. No

D2  CONCERN ABOUT CRIME

DangAtt  [ASK ALL FUD]

Now turning to concerns about crime. Since [the first of January 2000/the first of ^DATE^] was there an occasion when you actually felt there was a danger of you being physically attacked by a stranger?

1. Yes
2. No
WomVict  [ONLY ASK IF THE RESPONDENT IS MALE AND THERE ARE ADULT WOMEN IN HOUSEHOLD]

SHOW CARD D2
How worried are you about an adult woman in the household being physically assaulted or mugged by a stranger?

1. Very worried
2. Fairly worried
3. Not very worried
4. Not at all worried
5. (Not applicable)

ManVict  [ONLY ASK IF THE RESPONDENT IS FEMALE AND THERE ARE ADULT MEN IN HOUSEHOLD]

SHOW CARD D2
How worried are you about an adult man in the household being physically assaulted or mugged by a stranger?

1. Very worried
2. Fairly worried
3. Not very worried
4. Not at all worried
5. (Not applicable)

WCardSt  [ASK ALL FUD]

SHOW CARD D2
How worried are you about someone using your credit card or bank card, or using your card details, such as your PIN number, to buy things or withdraw cash without your permission?

1. Very worried
2. Fairly worried
3. Not very worried
4. Not at all worried
5. (Not applicable – Don’t use credit cards or bank cards)

BurgReg  [ASK ALL FUD]

I would now like to talk about the chance of certain crimes happening. Some crimes are more likely to happen to some people than to others. I am going to read out a list of crimes and for each one I would like you to tell me, from this card, how likely you think this crime is to happen to you in the next year.

SHOW CARD D3
First, how likely do you think your house is to be burgled in the next year?

1. Very likely
2. Fairly likely
3. Fairly unlikely
4. Very unlikely
CarStole [ASK ALL FUD IF Car=Yes]

SHOW CARD D3
And how likely do you think you are to have your car/van stolen in the next year?

1. Very likely
2. Fairly likely
3. Fairly unlikely
4. Very unlikely

ItemStol [ASK ALL FUD IF Car = Yes]

SHOW CARD D3
And how likely do you think you are to have things stolen from your car/van in the next year?

1. Very likely
2. Fairly likely
3. Fairly unlikely
4. Very unlikely

MugRob [ASK ALL FUD]

SHOW CARD D3
And how likely do you think you are to be mugged and robbed in the next year?

1. Very likely
2. Fairly likely
3. Fairly unlikely
4. Very unlikely

Attack [ASK ALL FUD]

SHOW CARD D3
Apart from this, how likely do you think you are to be physically attacked or assaulted by a stranger in the next year?

1. Very likely
2. Fairly likely
3. Fairly unlikely
4. Very unlikely
D3 SOCIAL COHESION

NeighTyp [ASK ALL FUD]
I would now like to ask you some questions about your local area. By local area I mean within a 15 minute walk from your home.

In general, what kind of area would you say you live in? Would you say it is an area in which people do things together and try to help each other, or one in which people mostly go their own way?

1. Help each other
2. Go own way
3. (Mixture)

AreaLive [ASK ALL FUD]
SHOW CARD D4
Taking everything into account, what do you think of this area as a place to live?

1. A very good place to live
2. A fairly good place to live
3. Neither good nor bad
4. A fairly bad place to live
5. A very bad place to live

LocArea1-
LocArea8 [ASK ALL FUD]
SHOW CARD D5
Choosing an answer from this card please indicate how much you agree or disagree with each of the following statements about your local area. So...

(How much would you agree or disagree that....)

1. Strongly agree
2. Tend to agree
3. Neither agree nor disagree
4. Tend to disagree
5. Strongly disagree

ATTITUDE STATEMENTS (RANDOMISED)

A. This area is a close, tight knit community
B. This area is a friendly place to live
C. This area is a place where local people look after each other
D. Most people who live in this area trust one another
E. You often see strangers in this area
F. I would be happy asking certain local people to keep an eye on my house and property
G. The people who live here can be relied upon to call the police if someone is acting suspiciously
H. If any of the children or young people around here are causing trouble, local people will tell them off
SocProb1  [ASK FIRST HALF OF FUD]

SHOW CARD D6
Looking at this card, which of these social issues would you say is the BIGGEST problem in your area at the moment?

1. A. Unemployment
2. B. Crime
3. C. Provision of public transport
4. D. Drug misuse
5. E. Standards of housing
6. F. Provision of health services
7. G. Provision of education services
8. H. Lack of local amenities
9. I. Poverty
10. J. Racial abuse/attacks
11. K. Lack of facilities for young people
12. DO NOT PROMPT : None of these

SocProb2  [ASK IF SocProb1 IN (1,11)]

SHOW CARD D6
And which would you say is the NEXT biggest problem?

1. A. Unemployment
2. B. Crime
3. C. Provision of public transport
4. D. Drug misuse
5. E. Standards of housing
6. F. Provision of health services
7. G. Provision of education services
8. H. Lack of local amenities
9. I. Poverty
10. J. Racial abuse/attacks
11. K. Lack of facilities for young people
12. DO NOT PROMPT : None of these

AreaPrev  [ASK ALL FUD]

SHOW CARD D7
This card lists some ideas for helping to prevent crime. Which ONE do you PERSONALLY think would be most effective in reducing crime in your area?

1. Reduce unemployment
2. Less violence and crime on television
3. Mobile police stations
4. People making their property more secure
5. More CCTV
6. Parents taking responsibility for their children’s actions
7. More schemes like Neighbourhood Watch
8. Send more offenders to prison
9. Firmer discipline in schools
10. More police on the beat
11. DO NOT PROMPT : None of these
SHOW CARD D8
Since [the first of January 2000/the first of ^DATE^] have you taken any of the following actions in an attempt to solve a local problem affecting people in your area?
CODE ALL THAT APPLY SET [7] OF

1. Written to a local newspaper
2. Contacted the appropriate organisation to deal with the problem, e.g. council
3. Contacted a local councillor or MP
4. Attended a public meeting or neighbourhood forum to discuss local issues
5. Attended a tenants’ or local residents’ group
6. Attended a protest meeting or joined an action group
7. Helped organise a petition on a local issue
8. SPONTANEOUS Thought about it but did not do anything
9. None of these

D4 EXPERIENCE OF ANTI-SOCIAL BEHAVIOUR

BothIns [ASK ALL FUD]
(Including anything you have already talked about,) Since [the first of January 2000/the first of ^DATE^], have you been insulted, pestered or intimidated in any way by anybody who is not a member of your household?

1. Yes
2. No

NBoths [ASK IF BothIns = Yes]
How many times since [the first of January 2000/the first of ^DATE^] has this happened?

1. Once
2. Twice
3. Three or more times

NumbOth [ASK IF BothIns=Yes]
(The last time this happened) How many people insulted, pestered or intimidated you?

1. One
2. Two
3. Three or more
BothRel  [ASK IF BothIns=Yes AND Numboth=1 or DK]

(The last time this happened) How well did you know the person who insulted, pestered or intimidated you? Was he/she … READ OUT

1. Someone you knew well
2. Someone you knew just to speak to casually
3. Someone you knew just by sight
4. or was he/she a stranger?

BothRel2  [ASK IF BothIns=Yes and Numboth>1]

(The last time this happened) How well did you know the people who insulted, pestered or intimidated you? Were they…READ OUT

1. People you knew well
2. People you knew just to speak to casually
3. People you knew by sight
4. or were they strangers?

WhyBotA- WhyBotN  [ASK IF BothIns= Yes]

(The last time this happened) Why do you think it happened?

1. To frighten me
2. To embarrass/humiliate/annoy me
3. To get money from me
4. Due to offender’s drunkenness
5. Due to offender’s sexual perversion/sexiist attitudes
6. Due to offender’s racist attitudes
7. Due to offender’s homophobic/anti gay or lesbian attitudes
8. Threats/aggression originating from traffic incident
9. Because respondent is elderly
10. Because respondent is disabled
11. Other reason
12. Do not know why it happened

+(Xothreas)  [ASK IF ANY Whybot =Other reason]

INTERVIEWER RECORD OTHER ANSWER GIVEN

LastAtak  [ASK IF WhybotF NE 1]

(The last time this happened) Did you think it was racially motivated?

1. Yes
2. No
3. Don't Know
RaceAtak [ASK IF LastAtak = Don't know]

Was there anything about the incident that made you think that it might have been racially motivated?

1. Yes
2. No

D5 ATTITUDES TO ROAD SAFETY

AbanCar [ASK ALL FUD]

How much of a problem are abandoned or burnt out cars in your area? By your area, I mean within 15 minutes walk from here. Are they....READ OUT

1. A very big problem
2. A fairly big problem
3. Not a very big problem
4. or not a problem at all?

Speed [ASK ALL FUD]

How much of a problem is speeding traffic in this area? Is it....READ OUT

1. A very big problem
2. A fairly big problem
3. Not a very big problem
4. or not a problem at all?

CarBeh1- CarBeh10 [ASK SECOND HALF OF FUD]

SHOW CARD D9
I am going to read out a list of behaviours related to driving. Choosing a phrase from this card I would like you to tell me how you feel each behaviour should be viewed.

(How do you feel about people … ?)

1. Not wrong
2. Wrong but should not be viewed as a crime
3. Should be viewed as a crime, but not always strictly enforced
4. Should be viewed as a crime and always strictly enforced
BEHAVIOUR STATEMENTS (RANDOMISED)

A. Driving without motor insurance
B. Using a hand held mobile phone whilst driving
C. Drinking and driving after two pints of beer
D. Not wearing a rear seat belt in the back of a car
E. Driving at 40 miles per hour in a 30 miles per hour zone
F. Parking on double yellow lines
G. Carrying on driving when tired
H. Agreeing to ride in a car with a driver who has consumed two pints of beer
I. Parking in a disabled bay without a valid badge
J. Driving without a valid driving licence

FIRES MODULE

[ALL RESPONDENTS ARE ASKED ABOUT FIRES IN THE LAST 12 MONTHS – NO DISTINCTION BETWEEN TYPE A/TYPE B ADDRESSES]

AnyFire [ASK ALL]

I would now like to ask about fires in the home. This means all sorts of fires, including chip pan fires and very minor fires and includes fires in sheds, garages or greenhouses.

In the last 12 months, that is since the first of [*DATE*], have you had a fire of any sort where you live?

INTERVIEWER: IF RESPONDENT HAS LIVED AT MORE THAN ONE ADDRESS IN THE LAST 12 MONTHS THE QUESTION SHOULD RELATE TO ALL THE ADDRESSES WHERE THE RESPONDENT HAS LIVED IN THIS TIME.

1. Yes
2. No

NumFires [ASK IF AnyFire = Yes]

How many fires have you had in the last twelve months?

1. One
2. Two
3. Three
4. Four
5. Five or more

CausFir1 [ASK IF AnyFire=Yes]

SHOW CARD F1
What was the cause of the [LAST] fire you had? Please answer from this card

1. Arson
2. Accidents while cooking (including using toasters and microwaves)
3. Accidents with matches or cigarette lighters
4. Cigarettes, cigars, or pipe
5. Children playing with fire other than matches or cigarette lighters
6. Electrical equipment/wiring (including electric blankets)
7. Heating appliances/equipment and fires (including chimney fires)
8. Blow lamps
9. Candles
10. Vehicle fires (wiring etc)
11. Natural occurrences (lightning etc)
12. Bonfires
13. Fireworks
14. Barbecue
15. Other
+(Xotherfi)  [ASK IF Otherfir = Other]

INTERVIEWER RECORD THE 'OTHER' ANSWER GIVEN

FirStar1  [ASK IF AnyFire= Yes]

[I now want to ask you about where the LAST fire you had started.]
Did the fire first start inside or outside the house/flat?

1. Inside the house/flat
2. Outside the house/flat

InsidFi1  [ASK IF FifStar1 = Inside home]

Where inside the house/flat did the fire begin?

1. Kitchen
2. Lounge, living room, dining room
3. Bedroom
4. Bedsitter (bedsitting room)
5. Hallway or landing
6. Elsewhere in house

+(XinsidF)  [ASK IF InsidFi1=Elsewhere]

INTERVIEWER: RECORD 'OTHER' ANSWER GIVEN

OutsidH1  [ASK IF Firstar1 = Outside home]

Where outside the house/flat did the fire begin?

1. Garage – (freestanding not attached to house)
2. Garage – (built onto house)
3. Shed or greenhouse
4. Garden
5. Dustbin
6. Elsewhere outside house

+XOutSid  [ASK IF OutSideH1=Elsewhere]

INTERVIEWER: RECORD 'OTHER' ANSWER
**FirSpr1a**  
**[ASK IF InsidFi1 IN (1..5)]**

Did the fire spread beyond the [kitchen/lounge or dining room/bedroom/bedsitter/hallway or landing]?

1. Yes
2. No

**FirSpr1b**  
**[ASK IF InsidFi1=Elsewhere]**

Did the fire spread beyond the [answer given at XInsidF1]?

1. Yes
2. No

**FirSpr1c**  
**[ASK IF OutSidH1 IN (1..5)]**

Did the fire spread beyond the [garage/shed or greenhouse/garden/dustbin]?

1. Yes
2. No

**FirSpr1d**  
**[ASK IF OutsidH1=Elsewhere]**

Did the fire spread beyond the [answer given at XOutSid1]?

1. Yes
2. No

**FBrigCal**  
**[ASK IF YES TO AnyFire]**

Was the Fire Brigade called?

1. Yes
2. No

**ActExFiA-ActExFiG**  
**[ASK IF YES TO AnyFire]**

Who actually put the fire out?

CODE ALL THAT APPLY SET [4] OF

1. Fire Brigade
2. Respondent
3. Someone else living in the/your household
4. Someone from outside the home
5. Went out by itself
SHOW CARD F2.

Did you or anyone else in your household suffer any of these injuries as a result of this fire? Please include injuries that were caused in trying to put the fire out or in trying to escape from the fire. CODE ALL THAT APPLY SET [8] OF

1. Bruises
2. Scratches
3. Cuts
4. Broken bones
5. Scalds
6. Burns
7. Smoke inhalation
8. Other injuries
9. No one in household injured

Can I just check, did you or anyone else in your household have attention from a doctor or nurse as a result of the fire?

1. Yes
2. No

And did you or anyone else in your household go to hospital for treatment?

1. Yes
2. No

At the time of the [LAST] fire did you have household insurance that covered the cost of the fire damage?

1. Yes
2. No

Did you or anyone else in your household make a claim for damage caused by the fire?

1. Yes
2. No
FirDamag  [ASK IF AnyFire=Yes]

What was the total cost of the damage done by the fire?
ENTER ANSWER IN £S

DEMOGRAPHICS MODULE

G1 HEALTH AND DRINKING

GenHealt [ASK ALL]

I would now like to ask you for a few further details about yourself [and your household]. How is your health in general? Would you say it is...READ OUT

1. Very good
2. Good
3. Fair
4. Bad
5. or very bad?

Illness [ASK ALL]

Do you have any long-standing illness, disability or infirmity? By long-standing I mean anything that has troubled you over a period of time or that is likely to affect you over a period of time.

1. Yes
2. No

Limits [ASK IF illness = Yes]

Does this illness or disability (Do any of these illnesses or disabilities) limit your activities in any way?

1. Yes
2. No

OftDrink [ASK ALL]

SHOW CARD G1
How often do you usually drink alcohol, whether it’s wine, beer, spirits or any other kind of drink containing alcohol?

1. Once or more a day
2. 5 or 6 days a week
3. 3 or 4 days a week
4. 1 or 2 days a week
5. 2 or 3 times a month
6. About once a month
7. Less than once a month
8. Less than once a year
9. Never
Drinking  [ASK IF OftDrink IS IN (1..8)]

On the days when you do drink alcohol, on average how many units of alcohol do you have in a day? What we mean by a unit of alcohol is a 1/2 pint of beer, a glass of wine, or a single measure of spirit or liqueur.

0..50

AnySmoke  [ASK ALL]

Do you or does anyone else in your household smoke cigarettes, cigars or a pipe?

1. Yes
2. No

G2  RESPONDENT'S EMPLOYMENT

Work  [ASK ALL]

Did you do any paid work in the seven days ending last Sunday, either as an employee or as self-employed?

1. Yes
2. No

GovtSch  [ASK IF WORK NE Yes]

Were you on a government scheme for employment training?

1. Yes
2. No

JobAwy  [ASK IF GovtSch NE Yes]

Did you have a job or business you were away from?

1. Yes
2. No
3. Waiting to take up new job/business already obtained

OwnBus  [ASK IF JobAwy NE Yes]

Did you do any UNPAID work for any business that you own in the 7 days ending last Sunday?

1. Yes
2. No
RelBus  [ASK IF OwnBus NE Yes]

Or did you do any UNPAID work for any business that a relative owns? 
NOTE: INCLUDE SPOUSE/COHABITEE

1. Yes
2. No

LookWk4  [ASK IF Work = No AND GovtSch = No AND JobAwy = No or Waiting AND OwnBus = No AND RelBus = No]

Thinking of the last FOUR WEEKS ending last Sunday, were you looking for any kind of paid work or a place on a government training scheme at any time in those 4 weeks?

1. Yes
2. No
3. Waiting to take up new job/business already obtained

AvSrt2  [ASK IF LookWk4 = Yes]

If a job or a place on a government training scheme had been available last week, would you have been able to start within 2 weeks?

1. Yes
2. No

WhyNLook  [(ASK IF Work = No AND GovtSch = No AND JobAwy = No AND OwnBus = No AND RelBus = No) AND (LookWk4 = No OR AvSrt2 = No)]

What was the MAIN reason [you did not look for work in the last four weeks/you would not have been able to start within two weeks]?

DRUGS SELF-COMPLETION
[ASKED OF ALL RESPONDENTS AGED 16-59]

SC1 SELF-COMPLETION PRACTICE QUESTIONS

[ASK ALL AGE 16-59]

The next questions are for you to answer yourself. Before you do this I will show you how to enter your answers into the computer.

For some questions you can choose one answer and for others you can choose more than one answer. You can choose your answers from those listed on the screen by pressing the numbers next to the answer you want to give.

Here is an example of the first type of question where you have to choose one answer.

INTERVIEWER: TURN SCREEN TO RESPONDENT AND LET THE RESPONDENT ENTER THEIR ANSWERS WHILE YOU OBSERVE AND HELP IF NECESSARY.

1. Continue

+Pract1 [ASK ALL AGE 16-59]

PRESS THE NUMBER NEXT TO THE ANSWER YOU WANT TO GIVE. WHEN YOU HAVE DONE THIS PRESS THE KEY WITH THE RED STICKER TO MOVE TO THE NEXT QUESTION.

Have you used a computer before?

1. Yes
2. No
+Pract2 [ASK ALL AGE 16-59]

THIS TIME YOU CAN CHOOSE MORE THAN ONE ANSWER IF YOU WANT. PRESS THE NUMBERS NEXT TO THE ANSWERS YOU WANT TO GIVE. AFTER EACH ANSWER YOU NEED TO PRESS THE SPACE BAR (THE LARGE BAR AT THE BOTTOM OF THE KEYBOARD).

USE THE PAGE UP AND PAGE DOWN KEYS (MARKED PgUp AND PgDn) TO SEE MORE ANSWERS.

WHEN YOU HAVE GIVEN ALL YOUR ANSWERS, PRESS THE KEY WITH THE RED STICKER TO MOVE TO THE NEXT QUESTION.

Which of these do you have in your home?

1. TV
2. Radio
3. Washing machine
4. Dishwasher
5. Electric kettle
6. Electric iron
7. CD player
8. Computer
9. Microwave
10. Video
11. Games console
12. DVD player
13. Mini disc system
14. Answer phone

+Pract3 [ASK ALL AGE 16-59]

MOST QUESTIONS WILL BE LIKE THESE TWO EXAMPLES. FOR A FEW QUESTIONS, NO ANSWERS WILL BE SHOWN ON THE SCREEN AND YOU WILL NEED TO TYPE IN YOUR OWN ANSWER, USING EITHER THE LETTERS OR THE NUMBERS ON THE KEYBOARD. HERE IS ANOTHER EXAMPLE. ONCE YOU HAVE TYPED IN YOUR ANSWER PRESS THE KEY WITH THE RED STICKER TO MOVE TO THE NEXT QUESTION.

What is your first name?

Text: Maximum 25 characters

+PractEnd [ASK ALL 16-59]

You have now finished the practice questions. Please tell the interviewer you are ready to move on and hand the computer back for a moment.

1. Continue
NonResp  [ASK ALL 16-59]

INTERVIEWER: HAS THE RESPONDENT ACCEPTED THE SELF-COMPLETION?

1. Self-completion accepted
2. Self-completion refused
3. Completed by interviewer

WhyRefDA- WhyRefDN  [ASK IF Nonresp = 2 or 3]

INTERVIEWER - CODE REASON(S) WHY RESPONDENT REFUSED OR WANTED INTERVIEWER TO COMPLETE.

1. Didn't like computer
2. Eyesight problems
3. Other disability
4. Objected to study
5. Worried about confidentiality
6. Could not read/write
7. Ran out of time
8. Language problems
9. Couldn't be bothered
10. Children present/tending to children
11. Other people present in room
12. Other

+(XwhyRefD)  [ASK IF WhyRefD = Other]

INTERVIEWER: RECORD OTHER REASONS FOR REFUSAL

[ASK IF NonResp = 1 or 3]

IF RESPONDENT ACCEPTS THE SELF-COMPLETION GO ON WITH THE DRUGS MODULE BY CONTINUING TO THE NEXT SCREEN AND EITHER HANDING THE COMPUTER BACK TO THE RESPONDENT OR BY COMPLETING THE MODULE WITH THE RESPONDENT.

SC2  WHETHER THE RESPONDENT HAS EVER TAKEN DRUGS  [ASK ALL AGE 16-59]
The following questions ask whether or not you have ever used drugs. Please answer them honestly. The answers you give are completely confidential.

Please choose your answers by pressing the number next to the answer you want to give and then pressing the key with the red sticker to move on to the next question.

If you press the wrong key the interviewer can tell you how to change the answer. Just ask if you want help.
At the end, there are a couple of questions about substances you may have taken, not knowing what they were called. Please do not include drugs that you have taken, or are taking, on a doctor's prescription.

NOW PRESS THE KEY WITH THE RED STICKER TO MOVE TO THE NEXT QUESTION.
DRQ1A  [ASK ALL AGE 16-59]

Have you EVER taken AMPHETAMINES (SPEED, WHIZZ, UPPERS, BILLY) even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

DRQ2A  [ASK ALL AGE 16-59]

Have you EVER taken CANNABIS (MARIJUANA, GRASS, HASH, GANJA, BLOW, DRAW, SKUNK, WEED, SPLIFF) even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

DRQ3A  [ASK ALL AGE 16-59]

Have you EVER taken COCAINE/COKE even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

DRQ4A  [ASK ALL AGE 16-59]

Have you EVER taken CRACK/ROCK/STONES even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

DRQ5A  [ASK ALL AGE 16-59]

Have you EVER taken ECSTASY ('E') even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer
**DRQ6A** [ASK ALL AGE 16-59]

Have you EVER taken HEROIN (SMACK, 'H', BROWN) even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

**DRQ7A** [ASK ALL AGE 16-59]

Have you EVER taken LSD/ACID even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

**DRQ8A** [ASK ALL AGE 16-59]

Have you EVER taken MAGIC MUSHROOMS even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

**DRQ9A** [ASK ALL AGE 16-59]

Have you EVER taken METHADONE or PHYSEPTONE (not prescribed by a doctor) even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

**DRQ10A** [ASK ALL AGE 16-59]

Have you EVER taken SEMERON even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer
**DRQ11A**  [ASK ALL AGE 16-59]

Have you EVER taken TRANQUILLIZERS (TEMAZEPAM, VALIUM) (not prescribed by a doctor) even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

**DRQ12A**  [ASK ALL AGE 16-59]

Have you EVER taken AMYL NITRITE (POPPERS) even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

**DRQ13A**  [ASK ALL AGE 16-59]

Have you EVER taken ANABOLIC STEROIDS (STEROIDS) (not prescribed by a doctor) even if it was a long time ago?

1. Yes
2. No
3. Never heard of it
4. Don't want to answer

**DRQ14A**  [ASK ALL AGE 16-59]

Have you EVER taken GLUES, SOLVENTS, GAS OR AEROSOLS (TO SNIFF OR INHALE) even if it was a long time ago?

1. Yes
2. No
3. Don't want to answer

**DRQ15A**  [ASK ALL AGE 16-59]

Apart from anything you have already mentioned have you EVER taken PILLS OR POWDERS (not prescribed by a doctor) when you didn't know what they were, even if it was a long time ago?

1. Yes
2. No
3. Don't want to answer
DRQ16A [ASK ALL AGE 16-59]

Apart from anything you have already mentioned, have you EVER SMOKED SOMETHING (excluding tobacco) when you didn't know what it was, even if it was a long time ago?

1. Yes
2. No
3. Don't want to answer

DRQ17A [ASK ALL AGE 16-59]

Apart from anything else you have already mentioned, have you EVER taken ANYTHING ELSE THAT YOU THOUGHT WAS A DRUG (not prescribed by a doctor) when you didn't know what it was, even if it was a long time ago?

1. Yes
2. No
3. Don't want to answer

SC3 WHETHER THE RESPONDENT HAS TAKEN DRUGS IN THE LAST 12 MONTHS [ASK IF EVER TAKEN DRUG]

DRQ1B [ASK IF DRQ1A=1]

In the last 12 MONTHS have you taken AMPHETAMINES (SPEED, WHIZZ, UPPERS, BILLY)?

1. Yes
2. No
3. Don't want to answer

DRQ2B [ASK IF DRQ2A=1]

In the last 12 MONTHS have you taken CANNABIS (MARIJUANA, GRASS, HASH, GANJA, BLOW, DRAW, SKUNK, WEED, SPLIFF)?

1. Yes
2. No
3. Don't want to answer

DRQ3B [ASK IF DRQ3A=1]

In the last 12 MONTHS have you taken COCAINE/COKE?

1. Yes
2. No
3. Don't want to answer
DRQ4B  [ASK IF DRQ4A=1]

In the last 12 MONTHS have you taken CRACK/ROCK/STONES?

1. Yes  
2. No  
3. Don't want to answer

DRQ5B  [ASK IF DRQ5A=1]

In the last 12 MONTHS have you taken ECSTASY ('E')?

1. Yes  
2. No  
3. Don't want to answer

DRQ6B  [ASK IF DRQ6A=1]

In the last 12 MONTHS have you taken HEROIN (SMACK,'H', BROWN)?

1. Yes  
2. No  
3. Don't want to answer

DRQ7B  [ASK IF DRQ7A=1]

In the last 12 MONTHS have you taken LSD/ACID?

1. Yes  
2. No  
3. Don't want to answer

DRQ8B  [ASK IF DRQ8A=1]

In the last 12 MONTHS have you taken MAGIC MUSHROOMS?

1. Yes  
2. No  
3. Don't want to answer

DRQ9B  [ASK IF DRQ9A=1]

In the last 12 MONTHS have you taken METHADONE or PHYSEPTONE (not prescribed by a doctor)?

1. Yes  
2. No  
3. Don't want to answer
DRQ10B [ASK IF DRQ10A=1]  
In the last 12 MONTHS have you taken SEMERON?  
1. Yes  
2. No  
3. Don't want to answer

DRQ11B [ASK IF DRQ11A=1]  
In the last 12 MONTHS have you taken TRANQUILLIZERS (TEMAZEPAM, VALIUM) (not prescribed by a doctor)?  
1. Yes  
2. No  
3. Don't want to answer

DRQ12B [ASK IF DRQ12A=1]  
In the last 12 MONTHS have you taken AMYL NITRITE (POPPERS)?  
1. Yes  
2. No  
3. Don't want to answer

DRQ13B [ASK IF DRQ13A=1]  
In the last 12 MONTHS have you taken ANABOLIC STEROIDS (STEROIDS) (not prescribed by a doctor)?  
1. Yes  
2. No  
3. Don't want to answer

DRQ14B [ASK IF DRQ14A=1]  
In the last 12 MONTHS have you taken GLUES, SOLVENTS, GAS OR AEROSOLS (TO SNIFF OR INHALE)?  
1. Yes  
2. No  
3. Don't want to answer
DRQ15B  [ASK IF DRQ15A=1]

Apart from anything you have already mentioned, in the last 12 MONTHS have you taken PILLS OR POWDERS (not prescribed by a doctor) when you didn't know what they were?

1. Yes
2. No
3. Don't want to answer

DRQ16B  [ASK IF DRQ16A=1]

Apart from anything you have already mentioned, in the last 12 MONTHS have you SMOKED SOMETHING (excluding tobacco) when you didn't know what it was?

1. Yes
2. No
3. Don't want to answer

DRQ17C  [ASK IF DRQ17B=1]

Apart from anything you have already mentioned, in the LAST MONTH have you taken ANYTHING ELSE THAT YOU THOUGHT WAS A DRUG (not prescribed by a doctor) when you didn't know what it was?

1. Yes
2. No
3. Don't want to answer

SC5 WHEN A DRUG WAS FIRST TAKEN
[ASK IF DRUG EVER TAKEN DRUG AND AGE=16-24]

[ASK IF ANY OF DRQ1A-DRQ9A=1]

The following questions ask you at what age you first took drugs. Enter the age in numbers. If you do not want to answer the question enter 99 at the question. NOW PRESS THE KEY WITH THE RED STICKER TO MOVE TO THE NEXT QUESTION
DRQ1D  [ASK IF DRQ1A=1 AND AGE=16-24]

Around what age did you first take AMPHETAMINES (SPEED, WHIZZ, UPPERS, BILLY?)

0..24
99 = Don’t want to answer

DRQ2D  [ASK IF DRQ2A=1 AND AGE=16-24]

Around what age did you first take CANNABIS (MARIJUANA, GRASS, HASH, GANJA, BLOW, DRAW, SKUNK, WEED, SPLIFF)?

0..24
99 = Don’t want to answer

DRQ3D  [ASK IF DRQ3A=1 AND AGE=16-24]

Around what age did you first take COCAINE/COKE?

0..24
99 = Don’t want to answer

DRQ4D  [ASK IF DRQ4A=1 AND AGE=16-24]

Around what age did you first take CRACK/ROCK/STONES?

0..24
99 = Don’t want to answer

DRQ5D  [ASK IF DRQ5A=1 AND AGE=16-24]

Around what age did you first take ECSTASY ('E')?

0..24
99 = Don’t want to answer

DRQ6D  [ASK IF DRQ6A=1 AND AGE=16-24]

Around what age did you first take HEROIN (SMACK,'H', BROWN)?

0..24
99 = Don’t want to answer
DRQ7D  [ASK IF DRQ7A=1 AND AGE=16-24]

Around what age did you first take LSD/ACID?

0..24
99 = Don’t want to answer

DRQ8D  [ASK IF DRQ8A=1 AND AGE=16-24]

Around what age did you first take MAGIC MUSHROOMS?

0..24
99 = Don’t want to answer

DRQ9D  [ASK IF DRQ9A=1 AND AGE=16-24]

Around what age did you first take METHADONE or PHYSEPTONE (not prescribed by a doctor)?

0..24
99 = Don’t want to answer

SC6  HOW EASY IS IT TO OBTAIN ILLEGAL DRUGS
     [ASK ALL 16-24]

DRQ1E  [ASK IF AGE=16-24]

How easy would it be for you to get ILLEGAL DRUGS if you wanted to?

1. Very easy
2. Fairly easy
3. Fairly difficult
4. Very difficult
5. Impossible
6. Don’t know
7. Don’t want to answer
SC7  HOW EASY IS IT TO OBTAIN SPECIFIC DRUGS

[ASK ALL 16-24 WHO HAVE HEARD OF DRUG]

DRQ1F  [ASK IF AGE=16-24 AND DRQ1A IS NOT Never heard of it]

How easy would it be for you to get AMPHETAMINES (SPEED, WHIZZ, UPPERS, BILLY) if you wanted to?

1. Very easy
2. Fairly easy
3. Fairly difficult
4. Very difficult
5. Impossible
6. Don't know
7. Don't want to answer

DRQ2F  [ASK IF AGE=16-24 AND DRQ2A IS NOT Never heard of]

How easy would it be for you to get CANNABIS (MARIJUNA, GRASS, HASH, GANJA, BLOW, DRAW, SKUNK, WEED, SPLIFF) if you wanted to?

1. Very easy

DOMESTIC VIOLENCE MODULE

[ASK OF ALL MEN AND WOMEN AGED 16-59]

DV1 GENERAL INTRODUCTION

Display [ASK IF NonResp=1 or 3]

The next questions are about personal relationships. Again, please answer them honestly. The answers you give are completely confidential.

PLEASE PRESS THE KEY WITH THE RED STICKER TO MOVE ON TO THE NEXT QUESTION

DVCohab [ASK IF Marst=Single AND Cohab NE Yes]

First of all, just to check, have you EVER lived together with someone as a couple?

1. Yes
2. No
3. Don’t know
4. Don’t wish to answer

SeeRels [ASK IF NonResp=1 or 3]

Other than the people you live with, how often have you seen friends or relatives in the past year?

1. Most days
2. Not most days, but at least once a week
3. Less than once a week but at least once a month
4. Less than once a month
5. Don’t know
6. Don’t wish to answer

RelStay [ASK IF NonResp=1 or 3]

Do you have friends or relatives that you could stay with for a night or two at short notice if you needed to?

1. Yes
2. No
3. Don’t know
4. Don’t wish to answer
DV2 PREVALENCE OF DOMESTIC VIOLENCE

DVEverA–DVEverN [ASK IF NonResp=1 or 3]

No matter how well a couple gets along, there are times when they can get annoyed with each other. Thinking about ANY relationships you have had since you were 16, has any partner ever done any of the following things to you? By partner, we mean any boyfriend or girlfriend, as well as a husband or wife.

PLEASE ENTER THE NUMBERS OF ALL THE ANSWERS THAT APPLY, PRESSING THE SPACE BAR AFTER EACH ANSWER. THEN PRESS THE KEY WITH THE RED STICKER TO MOVE ON TO THE NEXT QUESTION.

USE PgUp AND PgDn KEYS TO SEE MORE ANSWERS.

1. Prevented you from having your fair share of the household money
2. Stopped you from seeing friends and relatives
3. Frightened you, by threatening to hurt you or someone close to you
4. Pushed you, held or pinned you down or slapped you
5. Kicked you, bit you, or hit you with a fist or something else, or threw something at you that hurt you
6. Choked or tried to strangle you
7. Threatened you with a weapon, such as a stick or a knife
8. Threatened to kill you
9. Used a weapon against you, eg. a knife
10. Used some other kind of force against you
11. None of these
12. Have never had a partner / been in a relationship
13. Don’t know/can’t remember
14. Don’t wish to answer

DVL12MA–DVL12MM [ASK IF ANY OF DVEver IN (1..10)]

And which, if any, of these things has a partner done to you in the last 12 months, that is, since [the first of ^DATE^]? YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

USE PgUp AND PgDn KEYS TO SEE MORE ANSWERS

1. Prevented you from having your fair share of the household money
2. Stopped you from seeing friends and relatives
3. Frightened you, by threatening to hurt you or someone close to you
4. Pushed you, held or pinned you down or slapped you
5. Kicked you, bit you, or hit you with a fist or something else, or threw something at you that hurt you
6. Choked or tried to strangle you
7. Threatened you with a weapon, such as a stick or a knife
8. Threatened to kill you
9. Used a weapon against you, eg. a knife
10. Used some other kind of force against you
11. None of these
12. Don’t know/ Can’t remember
13. Don’t wish to answer

[Show only answer categories in range (1..10) mentioned at DVEver, plus 11,12, 13]
The next questions ask you about the time or times a partner threatened you or used force against you. We want to know about all these incidents, even those that you may not have considered very serious.

If any incident has happened in the last 12 months, that is since [the first of ^DATE^], you may have already told the interviewer about it, but it would be very helpful if you could answer some additional questions.

NOW PRESS THE KEY WITH THE RED STICKER TO MOVE ON TO THE NEXT QUESTION.

next 5 questions repeated as a block up to four times depending on answers at DVEver:
If DVEver=3, repeated with text as given below
If DVEver=4, repeated with text [pushed you, held or pinned you down or slapped you]
If DVEver=5, repeated with text [kicked you, bit you, or hit you, or thrown something at you that hurt you]
If DVEver=any in (6..9), repeated with text [[choked or tried to strangle you/ threatened you with a weapon/ threatened to kill you/ used a weapon against you/ used some other kind of force against you]] depending on which answers given

1. An indecent assault
2. A sexual assault
3. Sexual abuse
4. Something else
5. Don’t know/ can’t remember
6. Don’t wish to answer

And which one of these do you NOW think best describes this incident?

1. It was a crime
2. It was wrong, but not a crime
3. It was just something that happens
4. None of these
5. Don’t know/ can’t remember
6. Don’t wish to answer

And thinking back to the [worst] incident, would you now call what happened to you domestic violence?

1. Yes
2. No
3. Don’t know/ can’t remember
4. Don’t wish to answer

Thank you for completing these questions. The last set of questions are about serious sexual assaults. You can stop at any time if you think these questions may upset you, but we hope you will continue until the end. The information in this section is very important in helping us to understand and deal with these crimes.

You may find the first question a little shocking but it is important for us to understand how often these things occur in relation to how often they are reported to the police.

We now want you to tell us about the time(s) since you were 16 [when someone penetrated your vagina with a penis, even if only slightly]. Did the person or people who did this do any of the following:
YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

USE PgUp AND PgDn KEYS TO SEE MORE ANSWERS

1. Threaten you in some way
2. Threaten to hurt someone or something dear to you
3. Hold you down
4. Hurt you in some way
5. Force you in some way
6. Threaten you with a weapon, such as a stick or knife
7. Use a weapon
8. Drug you in some way
9. Do this to you when you were incapable of consent due to the effect of alcohol
10. Do this to you when you were unconscious or asleep
11. Use some other kind of force or intimidation
12. No - none of these
13. Don’t know/can’t remember
14. Don’t wish to answer

SxOft01-SxOft11  [IF THIS TYPE OF INCIDENT SINCE AGED 16 (SxE16=[1 .. 11])]

How often, since you were 16, has this happened to you?

1. Once
2. Twice
3. Between 3 and 5 times
4. Between 6 and 10 times
5. More than 10 times
6. Don’t know/can’t remember
7. Don’t wish to answer

SxLast01-SxLast11  [IF THIS TYPE OF INCIDENT SINCE AGED 16 (SxE16=[1 .. 11])]

When did this last happen to you?

1. In last six months
2. Between 6 and 12 months ago
3. Between 1 and 2 years ago
4. Between 2 and 3 years ago
5. Between 4 and 5 years ago
6. More than 5 years ago
7. Don’t know / can’t remember
8. Don’t wish to answer
SxOftY11 [IF THIS TYPE OF INCIDENT HAPPENED IN LAST 12 MONTHS (SxLast[01..11]=1 OR 2)]

How often has this happened in the last 12 months, that is, since the first of [*DATE*]?

1. Once only
2. Twice
3. Three or more times
4. Don’t know/can’t remember
5. Don’t wish to answer

IF RESPONDENT HAS REPORTED ANY INCIDENTS OF ASSAULT AT SxE16, THEY WILL BE ASKED FURTHER QUESTIONS ABOUT ONE PARTICULAR INCIDENT.

PRIORITY IS GIVEN TO THE WORST (OR ONLY, IF ONE REPORT) INCIDENT IN LAST 12 MONTHS. IF NONE IN LAST 12 MONTHS ASK ABOUT THE WORST (OR ONLY, IF ONE REPORT) INCIDENT SINCE AGED 16.

CATEGORISING INCIDENTS IN LAST 12 MONTHS

IF NO INCIDENTS IN LAST 12 MONTHS AT Q20A, SKIP TO CHECKS3.

CheckS2 [ASK IF:

- MORE THAN ONE TYPE OF ASSAULT IN LAST 12 MONTHS (Q20A) AND EACH INCIDENT HAPPENED ONLY ONCE IN THE LAST 12 MONTHS (Q21A);
- OR ANY ASSAULTS HAPPENED IN LAST 12 MONTHS BUT FOR EVERY TYPE OF INCIDENT, DK or REF HOW MANY TIMES HAPPENED;
- OR A MIXTURE OF THESE TWO CASES]

You said that a person or persons had done the following to you in the last 12 months… [list from Q20A]

Can I just check, did all these things happen on only one occasion during the last 12 months or did they happen over more than one occasion?

1. One occasion only
2. More than one occasion
3. Don’t know/Can’t remember
4. Don’t want to answer
[ASK IF:
• ONLY ONE TYPE OF ASSAULT IN LAST 12 MONTHS AND THIS HAPPENED ONLY ONCE IN THE LAST 12 MONTHS;
• OR ONE TYPE OF ASSAULT, DK/REF HOW OFTEN IN LAST 12 MONTHS BUT CheckS2 = ONCE ONLY;
• OR MORE THAN ONE TYPE OF ASSAULT IN LAST 12 MONTHS AND CheckS2 = ONCE ONLY]

You said a person or persons had done the following in the last 12 months… [textfill].

The next few questions ask you about this incident.

You may have already told the interviewer about this incident, but it would be very helpful if you could answer some additional questions.

SxCopDoA– SxCopDoH [IF POLICE CAME TO KNOW (SxCopsK=1)]

12

Which, if any, of these happened as a result of the police getting involved?

YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

1. Police found the person who did it
2. Police spoke to the person who did it
3. Police arrested the person who did it
4. Person who did it was sent to court
5. The case is ongoing
6. None of these
7. Don’t know/can’t remember
8. Don’t wish to answer

SxCourt [IF POLICE FOUND PERSON/ SPOKE TO THEM/ ARRESTED THEM (SxCopD=1 OR 2 OR 3 or 4 or 5) ]

Did the case go to court?

1. Yes
2. Not yet
3. No
4. Don’t know/ can’t remember
5. Don’t wish to answer
SxNoCrt  [IF POLICE FOUND/SPOKE TO/ARRESTED CULPRIT BUT NO COURT CASE (SxCourt=3) ]

Why not?

1. I decided not to make a complaint
2. I withdrew the complaint
3. The police/ Crown Prosecution Service decided not to take any further action
4. Some other reason
5. Don’t know/ can’t remember
6. Don’t wish to answer

SxNoCmA–  SxNoCmM  [IF CULPRIT IDENTIFIED BUT VICTIM WITHDREW COMPLAINT (SxNoCrt=1
12   or 2) ]

Why did you decide [not to make a/ to withdraw your] complaint?

USE PgUp AND PgDn KEYS TO SEE MORE ANSWERS
YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

1. Only a trivial incident/ Not worth it
2. Private/ family matter/ Not police business
3. The police are not helpful
4. I feared having to give evidence about my sexual history in court
5. I would feel ashamed if what happened became public in court
6. I did not want to have to re-live the experience in court
7. I was concerned about going to court for other reasons
8. I was threatened by the person who did it or their family or friends
9. I thought that a conviction was unlikely
10. I thought it might break up my family
11. I changed my mind for some other reason
12. Don’t know/ can’t remember
13. Don’t wish to answer
**SxCopNA–SxCopNM**  
**[IF POLICE DID NOT COME TO KNOW (SxCopsK=2)]**

12

Why did you not tell the police about this [worst] incident?

YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

1. Too trivial / not worth reporting
2. Private / family matter / not police business
3. Didn’t think they could do much to help
4. Didn’t think they would believe me
5. Didn’t think the police would be sympathetic
6. Police did not come when called
7. Dislike / fear of police
8. Feared situation would get worse as a result of involving the police
9. Didn’t want any more humiliation
10. Didn’t want to go to court
11. Some other reason
12. Don’t know/ can’t remember
13. Don’t wish to answer

**SxTell**  
**[ASK ALL REPORTING CASE INCIDENT]**

12 N12

Did you ever tell anyone else about this [worst] incident?

1. Yes
2. No
3. Don’t know/can’t remember
4. Don’t wish to say

**SxWhoTA–SxWhoTR**  
**[IF TOLD ANYONE ELSE (SxTell=1)]**

12 N12

Who did you tell?

YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

1. Partner
2. My friends /relatives / neighbours
3. Partner’s friends / relatives / neighbours
4. Someone at work
5. Women’s refuge
6. Women’s group/centre / Women’s Aid
7. Victim Support
8. Religious group/leader
9. Counsellor/therapist
10. Social services
11. Rape crisis line
12. Men’s helpline
13. Gay helpline
14. Childline
15. Someone else
16. No one
17. Don’t know
18. Don’t wish to answer
SxHelpA–
SxHelpR  [IF TOLD MORE THAN ONE PERSON/ GROUP

12 N12  (MORE THAN ONE ANSWER AT SxWhoT) ]

And which of these people were able to help you?
YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

[SCREEN SHOWS THOSE SELECTED AT SxWhoT plus…]
16. No one
17. Don’t know
18. Don’t wish to answer

SxDidH  [IF ONLY TOLD ONE PERSON/ GROUP (ONLY ONE ANSWER AT SxWhoT

12 N12  AND (NOT (SxWhoT=16 OR 17 OR 18)) ]

And did you find they were able to help you?

1. Yes
2. No
3. Don’t know/can’t remember
4. Don’t wish to say

SxRape  [ASK ALL REPORTING RAPE AS WORST INCIDENT

12 N12  (ie. NOT INCLUDING ATTEMPTED – SxE16 = 1-5)]

Thinking about this [worst] incident, how would you NOW describe what happened?

1. Sexual assault
2. Sexual abuse
3. Forced sex
4. Rape
5. Something else
6. Don’t know/ can’t remember
7. Don’t wish to answer

SxRapeNo  [IF CASE INCIDENT OF RAPE BUT VICTIM USES ANOTHER TERM

12 N12  (Q65=1 OR 2 OR 3 OR 5)]

Why would you not describe what happened as rape? (Please type in your answer)

OPEN ENDED ANSWER
**SxCallDV**  [ASK ALL REPORTING CASE INCIDENT WHERE ASSAILANT WAS VICTIM’S PARTNER OR EX-PARTNER]

**12 N12**

Would you now call what happened domestic violence?

1. Yes
2. No
3. Don’t know/ can’t remember
4. Don’t wish to answer

**SxDoDVA–**  
**SXDoDVJ**  [ALL REPORTING CASE INCIDENT FROM LAST 12 MONTHS WHERE ASSAILANT WAS VICTIM’S PARTNER OR EX-PARTNER]

Has the person who did this ever done any of these other things to you?  
YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

USE PgUp AND PgDn KEYS TO SEE MORE ANSWERS

1. Frightened you by threatening to hurt you or someone close to you  
2. Pushed you, held or pinned you down or slapped you  
3. Kicked you, bit you, or hit you with a fist or something else or threw something at you that hurt you  
4. Choked or tried to strangle you  
5. Threatened you with a weapon or used a weapon against you, such as a stick or knife  
6. Threatened to kill you  
7. Used a weapon against you e.g. a knife  
8. Used some other type of force  
9. None of these  
10. Don’t know/can’t remember  
11. Don’t wish to answer

**SxTold**  [ALL REPORTING CASE INCIDENT FROM LAST 12 MONTHS WHERE ASSAILANT WAS VICTIM’S PARTNER OR EX-PARTNER AND OTHER ASSAULT OCCURRED]

Have you already given details about these things ([ANSWERS FROM LAST QN]), earlier in this self-completion section?

1. Yes  
2. No  
3. Don’t know/can’t remember  
4. Don’t wish to say
SxOuTime 12 N12 [ALL REPORTING CASE INCIDENT FROM LAST 12 MONTHS WHERE ASSAILANT WAS VICTIM'S PARTNER OR EX-PARTNER AND OTHER ASSAULT OCCURRED AND NOT ALREADY REPORTED]

About how many times altogether has your partner behaved in any of these ways?

1. Once only
2. Twice
3. Between 3 and 5 times
4. Between 6 and 50 times
5. More than 50 times
6. Too many times to count
7. Don’t know / can’t remember
8. Don’t wish to answer

SxPest 12 N12 [ASK ALL REPORTING CASE INCIDENT]

Has this person ever harassed or pestered you or made a nuisance of themselves in any other way?

1. Yes
2. No
3. Don’t know/ can’t remember
4. Don’t wish to answer

SxStalk 12 N12 [IF YES (SxPest=1)]

Would you say this person has stalked you or persistently harassed you?

1. Yes
2. No
3. Don’t know/ can’t remember
4. Don’t wish to answer

SxFirst 12 N12 [ALL REPORTING CASE INCIDENT WHERE ASSAILANT WAS VICTIM'S PARTNER OR EX-, AND HAPPENED MORE THAN ONCE (SxWoLL=2 OR 3) ]

Can I just check, you said the worst experience you have had involved your partner and that this happened on more than one occasion. How long had you been in a relationship together when they first made you or tried to make you take part in a sexual act without your consent?

1. A few days
2. Between a few days and a month
3. Between 1 and 3 months
4. Between 3 and 6 months
5. Between 6 months and 1 year
6. Between 1 and 5 years
7. Between 5 and 10 years
8. More than 10 years
9. Don’t know / can’t remember
10. Don’t wish to answer
SxSpe  [ALL REPORTING CASE INCIDENT FROM LAST 12 MONTHS
12 N12 WHERE ASSAILANT WAS VICTIM’S PARTNER (NOT EX-PARTNER)]

Are you still with the person who did this, or did you split up?
1. We’re no longer together
2. We split up for a time but now we’re back together now
3. We’re still together
4. Don’t know/ can’t remember
5. Don’t wish to answer

SxSpe2  [IF (MORE THAN ONE ATTACK FROM A CURRENT (AT TIME) PARTNER
12 N12 THAT SPLIT UP FROM PERMANENTLY OR TEMPORARILY) OR (ATTACK FROM A PREVIOUS PARTNER)]

When you split up with this person did the abuse then:
1. Stop completely
2. Get better
3. Stay about the same
4. Get worse
5. It only started once we split up
6. It changed to some other form of behaviour, such as harassment or stalking
7. Don’t know/ can’t remember
8. Don’t wish to answer

SxSpe3  [IF ASSAILANT IS EX-PARTNER EITHER AT TIME OR SUBSEQUENTLY]
12 N12

How often do you see this person nowadays?
1. Regularly
2. Occasionally
3. Rarely
4. Never
5. Don’t know/ can’t remember
6. Don’t wish to answer

SxYSee  [IF VICTIM IS FEMALE LIVING WITH CHILDREN WHO STILL SOMETIMES SEES EX-PARTNER WHO COMMITTED ASSAULT ( (SxSpe3=1 OR 2 OR 3) AND (SEX = 2 FROM MAIN INTERVIEW) AND (KIDS = 1 FROM MAIN INTERVIEW) )]

When you see this person is this because of your children?
1. Yes
2. No
3. Don’t know
4. Don’t wish to answer
SxChileA–
SxChileG

12 N12  [IF SEE EX-PARTNER BECAUSE OF CHILDREN]

On the occasions when you have seen them since you have split up, have any of the following things ever happened?

YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

1. You have been threatened
2. You have been abused in some way
3. They threatened to hurt your children
4. They hurt your children
5. None of these
6. Don’t know/ can’t remember
7. Don’t wish to answer

SxCrtOe  [IF SEE EX-PARTNER BECAUSE OF CHILDREN]
12 N12

Is there a child contact order which requires you to allow them to see your children?

1. Yes
2. No
3. Don’t know/ can’t remember
4. Don’t wish to answer

END OF SECTION DETAILING (WORST) INCIDENT OF ASSAULT
ASK ALL ANSWERING SEXUAL ASSAULT SELF-COMPLETION

SxOthe [ASK ALL (INCLUDING THOSE NOT REPORTING CASE INCIDENT)]

Have you been subjected to any other form of sexual assault that is not covered here?

1. Yes
2. No
3. Don’t know
4. Don’t wish to answer

SxDescr [IF SAY SOME OTHER FORM OF SEXUAL ASSAULT]

How would you describe it?

OPEN ENDED ANSWER

SxBelive [ASK ALL ANSWERING SEXUAL ASSAULT SELF-COMPLETION]

If a man is accused of rape, and he BELIEVES the woman said ‘yes’ to sex - although she did not – do you think he should be let off a charge of rape?

1. Yes
2. No
3. Don’t know
4. Don’t wish to answer

SxGovt [ASK ALL ANSWERING SEXUAL ASSAULT SELF-COMPLETION]

Do you think the government and agencies, such as the police and courts, are doing enough about rape? Would you say they are doing…

1. Enough
2. Too little
3. Too much
4. Don’t know
5. Don’t wish to answer

SxAtt1 [ASK ALL ANSWERING SEXUAL ASSAULT SELF-COMPLETION]

Some people may experience abuse because of their sexuality. How would you describe your sexuality?

1. Sexually attracted only to the opposite sex
2. Sexually attracted to both men and women
3. Sexually attracted only to the same sex
4. Don’t know
5. Don’t wish to answer
SxAtt2A–
SxAtt2E  [IF GAY/ LESBIAN/ BISEXUAL (SxAtt1 = 2 OR 3 OR 4)]

Have you ever suffered physical attacks or harassment that you think are directed at you because of your sexuality?

YOU CAN CHOOSE MORE THAN ONE ANSWER AT THIS QUESTION IF YOU WISH

1. Physical attacks
2. Harassment
3. No, none of these
4. Don’t know/ can’t remember
5. Don’t wish to answer

SxAttP  [IF SUFFERED PHYSICAL ATTACKS DUE TO SEXUALITY ]

How often have you suffered physical attacks?

1. At least once a week
2. Between once a week and once a month
3. Between once a month and once a year
4. Less than once a year
5. Never
6. Don’t know/ can’t remember
7. Don’t wish to answer

SxAttH  [IF SUFFERED HARASSMENT DUE TO SEXUALITY]

How often have you suffered harassment?

1. At least once a week
2. Between once a week and once a month
3. Between once a month and once a year
4. Less than once a year
5. Never
6. Don’t know/ can’t remember
7. Don’t wish to answer

END OF INTERVIEW ADMINISTRATION

[ASK IF NonResp = 1 or 3]

Thank you for completing these questions. Please tell the interviewer that you have finished and he/she will press a key which will hide your answers, so that no-one can see them on the screen.

OthPr1A–OthPr1H  [ASK IF NonResp = 1 or 3]

INTERVIEWER: WAS ANYBODY ELSE PRESENT IN THE ROOM WHILST RESPONDENT WAS COMPLETING SELF-COMPLETION SECTION?

1. Yes - spouse / partner / boyfriend/girlfriend was present
2. Yes - another adult household member was present
3. Yes - a child household member was present
4. Yes - a non-household member was present
5. Yes - someone present but don’t know who they were
6. Nobody else present

OthPr2  [ASK IF OthPres IN (1..5)]

DID ANYONE ELSE LOOK AT OR DISCUSS ANY PART OF THE SELF-COMPLETION SECTIONS DURING COMPLETION?

1. Yes - looked at / read / filled in together
2. Yes - discussed only
3. No

IntHelp  [ASK IF SCResp=1]

INTERVIEWER: DID RESPONDENT DO THE WHOLE OF THE SELF-COMPLETION ON THEIR OWN OR DID THEY REQUIRE ANY HELP?

1. Whole self-completion done by respondent
2. Respondent required help with one or two questions
3. Respondent required help with more than one or two questions but less than half
4. Respondent required help with more than half of questions but not all
5. Respondent required help with all or nearly all of questions

IntSex  [ASK ALL]

INTERVIEWER: PLEASE CODE YOUR OWN SEX

1. Male
2. Female
Supervis [ASK ALL]

A certain number of interviews on any survey are checked by a supervisor to make sure that people were satisfied with the way the interview was carried out. In case my supervisor needs to contact you it would be helpful if we could have your telephone number.

INTERVIEWER: WRITE NUMBER ON ADDRESS CONTACT SHEET

1. Number given
2. Number refused
3. No phone

FollowUp [ASK ALL]

It is possible that we may want to contact you again for additional information. Would you be willing to be contacted again?

1. Yes
2. No

FollowU2 [ASK IF FollowUp NE No]

If additional information was being collected for the Home Office by another research organisation, would you be willing for BMRB/Ipsos-RSL to pass your name and contact details to another research organisation so they could contact you?

1. Yes
2. No

P. SCREEN QUESTIONS AND FIRST SECTION OF VICTIM FORM FROM JANUARY TO JUNE 2001 VERSION OF QUESTIONNAIRE
M7 SCREENER QUESTIONS HOUSEHOLD EXPERIENCE

M7.1 SCREENER QUESTIONS: VEHICLES AND BICYCLES

MotorCyc [ASK ALL]

Can I check, has anyone in this household, owned or had the regular use of a motorcycle, scooter or moped at any time since [the first of January 2000/the first of ^DATE^]?

1. Yes
2. No

Car [ASK ALL]

Has anyone in this household owned or had the regular use of a car, van or other motor vehicle at any time since [the first of January 2000/the first of ^DATE^]?

1. Yes
2. No

NumCar [ASK IF Car = Yes]

And how many cars, vans or other motor vehicles does the household own or have regular use of now?

0..10

CarTot [ASK IF Car = Yes]

And for most of this period how many did the household have?
NOTE: THIS MEANS FOR THE MAJORITY OF THE YEAR

0..10

[ASK ALL TYPE A]

The next questions concern things that may have happened over the 13-14 months since the first of January 2000, in which you may have been the victim of a crime or offence.

I am only concerned with incidents which have happened to YOU PERSONALLY [or to people who are NOW members of your household].

I don't just want to know about serious incidents - I want to know about small things too.
[ASK ALL TYPE B]

SHOW RESPONDENT LIFE EVENTS CALENDAR

Before asking you about crimes or incidents that may have happened to you over the last 12 months I’d like to give you a calendar. I’d like you to keep this in front of you when answering the next part of the interview.

If at any stage you are unsure about whether or not something happened in the last 12 months you may find looking at the calendar will help to prompt your memory.

INTERVIEWER: MARK OFF THE CORRECT 12 MONTH REFERENCE PERIOD ON THE CALENDAR, THAT IS SINCE THE FIRST OF [^DATE^] UNTIL PRESENT, AND HAND TO RESPONDENT

[ASK ALL TYPE B]

I’m now going to ask you about things that may have happened over the last 12 months, that is since the first of [^DATE^], in which you may have been the victim of a crime or offence. I only want to know about things that have happened in the period marked on the calendar. This doesn’t mean that crimes that may have happened before this time are unimportant, but we want to build a picture of just the last 12 months so we can measure how people’s experience of crime changes from one year to the next.

I am only concerned with incidents that have happened to YOU PERSONALLY [or to people who are NOW members of your household].

I don’t just want to know about serious incidents – I want to know about small things too.

**MotTheft** [ASK IF (MotorCyc = Yes) OR (Car = Yes)]

1

[During the 13-14 months since the first of January 2000/During the last 12 months, that is since ^DATE^,] have [you/ you or anyone else now in your household] had [your/their] car, van, motorcycle or other motor vehicle stolen or driven away without permission?

1. Yes
2. No

**NMotThef** [ASK IF MotTheft = Yes]

How many times has this happened?

NOTE : 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1. 96
2. 97 More/too many to remember
MotStole: [ASK IF MotorCyc = Yes OR Car = Yes]

2

And (apart from this) in the time since [the first of January 2000/the first of ^DATE^] have [you/you or anyone else now in your household] had anything stolen off [your/their] vehicle or out of it (parts of the vehicle, personal possessions or other things)?

3. Yes
4. No

NMotStol: [ASK IF MotStole = Yes]

How many times has this happened?

NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97 More/too many to remember..97

CarDamag: [ASK IF MotorCyc = Yes OR Car = Yes]

3

And (apart from this), in that time [have you had your/has anyone had their] vehicle tampered with or damaged by vandals or people out to steal?

1. Yes
2. No

NCarDam: [ASK IF CarDamag = Yes]

How many times has this happened?

NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97 More/too many to remember..97

OwnBike: [ASK ALL]

Can I just check, [have you/has anyone in this household] owned a bicycle at any time since [the first of January 2000/the first of ^DATE^]? 

1. Yes
2. No

NOwnBike: [ASK IF OwnBike = Yes]

How many bicycles does the household own or have regular use of now?

0..10
BikTheft  [ASK IF OwnBike = Yes]
4
(During the 13-14 months since the first of January 2000/During the last 12 months, that is since the first of ^DATE^], have you/has anyone in this household had a bicycle stolen?
NOTE: IF 2+ BICYCLES TAKEN AT ONE TIME IT COUNTS AS ONE INCIDENT
1. Yes
2. No

NBikThef  [ASK IF BikTheft = Yes]
How many times has this happened?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE
NOTE: IF 2+ BICYCLES TAKEN AT ONE TIME IT COUNTS AS ONE INCIDENT
1..96
97 More/too many to remember..97

M7.2 SCREENER QUESTIONS: PREVIOUS RESIDENCE
[THE NEXT SET OF QUESTIONS ONLY APPLY TO THOSE INFORMANTS WHO HAVE MOVED SINCE 1ST JANUARY 2000/IN THE LAST 12 MONTHS, IF INFORMANT NOT IN THIS CATEGORY GO TO YrHoThef]

PrevThef  [ASK IF ResYrAgo = No]
5
I would like you to think back to the place or places you were living between [the first of January 2000/the first of ^DATE^] and the time you moved here. In that time, did anyone GET INTO the place where you were living without permission and STEAL or TRY TO STEAL anything?
1. Yes
2. No

NPrevThe  [ASK IF PrevThef = Yes]
How many times did this happen?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE
1..96
97 More/too many to remember..97
PrevDam  [ASK IF ResYrAgo = No]

(Apart from anything you have already mentioned), in that time did anyone GET INTO your house/flat without permission and CAUSE DAMAGE?

1. Yes
2. No

NPrevDam  [ASK IF PrevDam = Yes]

How many times did this happen?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97. More/too many to remember

PrevTry  [ASK IF ResYrAgo = No]

(Apart from anything you have already mentioned), in that time have you had any evidence that someone had TRIED to get in without permission to STEAL or to CAUSE DAMAGE?

1. Yes
2. No

NPrevTry  [ASK IF PrevTry = Yes]

How many times did this happen?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97. More/too many to remember

PrevStol  [ASK IF ResYrAgo = No]

(Apart from anything you have already mentioned), in that time was anything STOLEN out of your house/flat?

1. Yes
2. No

NPrevStol  [ASK IF PrevStol = Yes]

How many times did this happen?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97. More/too many to remember
PrOSide  [ASK IF ResYrAgo = No]
9
And (apart from anything you have already mentioned), in that time was anything (else) that belonged to someone in your household stolen from OUTSIDE the house/flat - from the doorstep, the garden or the garage for example?
NOTE: DO NOT COUNT MILK BOTTLE THEFT
1. Yes
2. No

NPrOsie  [ASK IF PrOSide = Yes]
How many times did this happen?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE
1..96
97 More/too many to remember

PrDeface  [ASK IF ResYrAgo = No]
10
And again, (apart from anything you have already mentioned), in that time did anyone deliberately deface or do damage to your house/flat or to anything OUTSIDE it that belonged to someone in your household?
1. Yes
2. No

NPrDefac  [ASK IF PrDeface = Yes]
How many times did this happen?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE
1..96
97 More/too many to remember

HomeThef  [ASK IF ResYrAgo = No]
11
I would now like you to think about the time since you moved here. Since you moved here, has anyone GOT INTO this house/flat without permission and STOLEN or TRIED TO STEAL anything?
1. Yes
2. No

NHomThef  [ASK IF HomeThef = Yes]
How many times has this happened?
NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE
1..96
97 More/too many to remember
M7.3 SCREENER QUESTIONS: PRESENT RESIDENCE

[THE NEXT TWO QUESTIONS ONLY APPLY IF INFORMANT HAS NOT MOVED SINCE JANUARY 1ST 2000/IN LAST 12 MONTHS, IF INFORMANT HAS MOVED GO STRAIGHT TO YrHoDam]

YrHoThef  [ASK IF ResYrAgo = Yes OR YrsAddr IN (3..7)]
12
[During the last 13-14 months since the first January 1999/During the last 12 months, that is since the first of ^DATE^] has anyone GOT INTO this house/flat without permission and STOLEN or TRIED TO STEAL anything?

1. Yes
2. No

NYrHThef  [ASK IF YrHoThef = Yes]

How many times has this happened?
NOTE : 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97 More/too many to remember

M8 SCREENER QUESTIONS: PERSONAL EXPERIENCE

[ASK ALL TYPE A]

The next few questions are about things that may have happened to you PERSONALLY [not the other people in your household] in the 13-14 months since the first of January 2000. Please include anything that happened to you during that time - at home, in the street, at work, in a shop, in a park, on a train or anywhere else.

[ASK ALL TYPE B]

The next few questions are about things that may have happened to you PERSONALLY [not the other people in your household] over the last 12 months, that is since the first of "DATE", in which you may have been the victim of a crime or offence. Again, I only want to know about things that have happened in the period marked on the calendar, so we can build a picture of crime in the last 12 months.

Please include anything that happened to you during that time – at home, in the street, at work, in a shop, in a park, on a train or anywhere else.

PersThef [ASK ALL]

18

(Apart from anything you may have already mentioned, since [the first of January 2000/the first of "DATE"], was anything you were carrying stolen out of your hands or from your pockets or from a bag or case?

1. Yes
2. No

NPersTh [ASK IF PersThef = Yes]

How many times has this happened?

NOTE: 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

1..96
97 More/too many to remember
TryPers [ASK ALL] 19

(Apart from anything you have already mentioned), in that time has anyone TRIED to STEAL something you were carrying out of your hands or from your pockets or from a bag or case?

1. Yes
2. No

NTryPers [ASK IF TryPers = Yes]

How many times has this happened?
NOTE : 97 = 97 OR MORE/TOO MANY TO REMEMBER. USING CODE 97 CAN CAUSE PROBLEMS IN SEPARATING SINGLE AND SERIES INCIDENTS, SO PROBE FOR BEST ESTIMATES WHERE POSSIBLE

You mentioned [NUMBER OF PrevDam INCIDENTS FROM NPrevDam] incidents of BREAK-IN WITH DAMAGE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_7**  [ASK IF NPrevTry > 1]

You mentioned [NUMBER OF PrevTry INCIDENTS FROM NPrevTry] incidents of ATTEMPTED BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_8**  [ASK IF NPrevSto > 1]

You mentioned [NUMBER OF PrevStol INCIDENTS FROM NPrevSto] incidents of THEFT FROM DWELLING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_9**  [ASK IF NPrOSide > 1]

You mentioned [NUMBER OF PrOSide INCIDENTS FROM NProSide] incidents of THEFT OUTSIDE BUILDING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_10**  [ASK IF NPrDeFac > 1]

You mentioned [NUMBER OF PrDeFace INCIDENTS FROM NPrDeFac] incidents of VANDALISM. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
**Similar_11 [ASK IF NHomThef > 1]**

You mentioned [NUMBER OF HomeThef INCIDENTS FROM NHomThef] incidents of BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_12 [ASK IF NYrHThef > 1]**

You mentioned [NUMBER OF YrHoThef INCIDENTS FROM NYrHThef] incidents of BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_13 [ASK IF NYrHoDam > 1]**

You mentioned [NUMBER OF YrHoDam INCIDENTS FROM NYrHoDam] incidents of BREAK-IN WITH DAMAGE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_14 [ASK IF NYrHoTry > 1]**

You mentioned [NUMBER OF YrHoTry INCIDENTS FROM NYrHoTry] incidents of ATTEMPTED BURGLARY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

**Similar_15 [ASK IF NYrHoSto > 1]**

You mentioned [NUMBER OF YrHoStol INCIDENTS FROM NYrHoSto] incidents of THEFT FROM DWELLING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
+Similar_16  [ASK IF NYrOSide > 1]

You mentioned [NUMBER OF YrOSide INCIDENTS FROM NYrOSide] incidents of THEFT OUTSIDE DWELLING. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes  
2. No

+Similar_17  [ASK IF NYrDeFac > 1]

You mentioned [NUMBER OF YrDeFace INCIDENTS FROM NYrDeFac] incidents of VANDALISM. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes  
2. No

+Similar_18  [ASK IF NPersTh > 1]

You mentioned [NUMBER OF PersThef INCIDENTS FROM NPersTh] incidents of THEFT FROM PERSON. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes  
2. No

+Similar_19  [ASK IF NTryPers > 1]

You mentioned [NUMBER OF TryPers INCIDENTS FROM NTryPers] incidents of ATTEMPTED THEFT FROM PERSON. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes  
2. No

+Similar_20  [ASK IF NOthThef > 1]

You mentioned [NUMBER OF OthThef INCIDENTS FROM NOthThef] incidents of OTHER THEFT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes  
2. No
+Similar_21  [ASK IF NDelibDa > 1]

You mentioned [NUMBER OF DelibDam INCIDENTS FROM NDelibDa] incidents of DAMAGE TO PROPERTY. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_22  [ASK IF NDelibV > 1]

You mentioned [NUMBER OF DelibVio INCIDENTS FROM NDelibV] incidents of ASSAULT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_23  [ASK IF NThreVio > 1]

You mentioned [NUMBER OF ThreViol INCIDENTS FROM NThreVio] incidents of THREATS. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No

+Similar_24  [ASK IF NSexAtt > 1]

You mentioned [NUMBER OF SexAttak INCIDENTS FROM NSexAtt] incidents of SEXUAL ASSAULT. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

3. Yes
4. No

+Similar_25  [ASK IF NHhldVio > 1]

You mentioned [NUMBER OF HhldVio INCIDENTS FROM NHhldVio] incidents of HOUSEHOLD VIOLENCE. Were any of these very similar incidents, where the same thing was done under the same circumstances and probably by the same people?

1. Yes
2. No
M11 SORTING OUT THE SERIES PATTERN

[ASK NEXT SET OF QUESTIONS SEPARATELY FOR EACH TYPE OF CRIME WHERE THERE WAS MORE THAN ONE INCIDENT PER CRIME AND INFORMANT SAID YES SOME WERE PART OF A SERIES]

+AllPart
(AllPart_1- AND AllPart_25) [ASK FOR EACH TYPE OF CRIME WHERE MORE THAN ONE INCIDENT AND AllPart_25 SOME ARE PART OF A SERIES]

Were all the incidents of [TYPE OF CRIME] part of a series or were any of them separate incidents?
1. All were part of a series
2. Some were separate incidents, the rest were a series

+XnumSep [ASK IF AllPart = Some separate, rest series]
(XnumSep_1- XnumSep_25)

How many of the [number of incidents] incidents were SEPARATE incidents?
1..97

+SepDates [ASK FOR EACH SEPARATE INCIDENT, IE. XnumSep TIMES]
(SepDates_1- SepDates_25)

[Can we now think about the separate incidents of [type of crime], that is, those incidents which were NOT part of the series.] Can you tell me the date of the [earliest/second/etc] separate incident of [type of crime]?
IF DON'T KNOW THE EXACT DATE, PLEASE ENTER ESTIMATE FIRST is EARLIEST, SECOND is NEXT AFTER THAT, ETC.

[INTERVIEWER: IF RESPONDENT IS NOT SURE, USING THE CALENDAR MAY HELP]
YOU MUST ENTER ALL SIX DIGITS OF THE DATE (E.G. IN 2001 NEW YEAR'S DAY WOULD BE 01/01/01, VALENTINE'S DAY WOULD BE 14/02/01)

+CnumSer [ASK IF AllPart=Mix]
(CnumSer_1- CnumSer_25)

So there were [NUMBER] incidents of [TYPE OF CRIME] making up the SERIES?
INTERVIEWER - PLEASE CONFIRM, OR GO BACK AND AMEND CODING.

3. Yes
4. No
+Latest  [ASK IF AllPart=Mix]

(Latest_1-

Latest_25)

Could you tell me the date of the MOST RECENT incident in the series? IF DON’T KNOW THE EXACT DATE, PLEASE ENTER ESTIMATE.

[INTERVIEWER: IF RESPONDENT IS NOT SURE, USING THE CALENDAR MAY HELP]

YOU MUST ENTER ALL SIX DIGITS OF THE DATE (E.G. IN 2001 NEW YEAR’S DAY WOULD BE 01/01/01, VALENTINE’S DAY WOULD BE 14/02/01)

+Middle

(Middle_1- Middle_25)

[ASK IF SEPARATE INCIDENT, FOLLOWED BY A SERIES OF INCIDENTS FOLLOWED BY ANOTHER SEPARATE INCIDENT]

So there were one or more separate incidents, followed by a series of incidents, and THEN another one or more separate incidents? INTERVIEWER - PLEASE CONFIRM OR GO BACK AND AMEND CODING

3. Yes
4. No

+Inc1x  [ASK IF SEPARATE INCIDENT, FOLLOWED BY A SERIES OF INCIDENTS, FOLLOWED BY ANOTHER SEPARATE INCIDENT]

(Inc1x_1-Inc1x_25)

Of the [NUMBER] separate incidents, how many were there BEFORE the series began?

1..97

+Inc2x  [ASK IF SEPARATE INCIDENT, FOLLOWED BY A SERIES OF INCIDENTS, FOLLOWED BY ANOTHER SEPARATE INCIDENT]

(Inc2x_2-inc2x_25)

And how many separate incidents were there AFTER the series ended?

1..10

+IPrior  [PROGRAMME RECORDS WHICH INCIDENT(S) TAKES PRIORITY (HIDDEN)]

(Iprior_1-

Iprior_25)

1. Series takes priority
2. Latest separate incident takes priority
3. Separate, then series, then separate
VICTIM FORM SECTION

S INDICATES THAT THE QUESTION IS ASKED ON SHORT VICTIM FORMS.
L INDICATES THAT THE QUESTION IS ASKED ON LONG VICTIM FORMS.
SL INDICATES THAT THE QUESTION IS ASKED ON BOTH LONG AND SHORT VICTIM FORMS.

+V1 DATE AND DESCRIPTION OF INCIDENT

[ASK ALL]

INTERVIEWER - BELOW IS A CHECK LIST OF OFFENCES COMMITTED AGAINST THE RESPONDENT AND HOUSEHOLD IN THE PAST YEAR
PLEASE CONFIRM THE LIST WITH THE RESPONDENT - CHECK THAT EVERYTHING HAS BEEN MENTIONED AND NOTHING COUNTED TWICE
GO BACK AND AMEND CODING IF NECESSARY.
IF YOU CHOOSE TO GO BACK YOU WILL BE TAKEN TO THE BEGINNING OF THE SCREENER QUESTIONNAIRE

1. Continue
2. Go back

[ASK ALL TYPE B]

I now want to ask you about WHEN the incident(s) you have just mentioned happened during the last 12 months. I’d like to mark on the calendar the date of each incident.

INTERVIEWER: FOR EACH CRIME, MARK ON THE CALENDAR THE DATE WHEN IT OCCURRED. THIS ONLY NEEDS TO BE ESTIMATED TO THE NEAREST MONTH.

IF THE RESPONDENT IS HAVING DIFFICULTY REMEMBERING THE EXACT MONTH YOU MAY FIND IT USEFUL TO MARK SOME OTHER LANDMARK DATES ON THE CALENDAR (EG. BIRTHDAYS, ANNIVERSARIES ETC.) WHICH CAN BE USED FOR REFERENCE POINTS. EXAMPLES OF SUCH EVENTS OR PERIODS CAN BE FOUND ON THE FRONT PAGE OF THE CALENDAR.

+CrimeNo [CRIME NUMBER, WITHIN TYPE OF CRIME]

INTERVIEWER ENTER CRIME NUMBER: 1..11

CrimType [CODE FOR TYPE OF CRIME]

INTERVIEWER CODE FOR CRIME TYPE: 1..25

Vintro [ASK ALL]

Now I want to ask you some more about the [incident] you reported of [crime type].
[INTERVIEWER: IF SOMEONE ELSE IS PRESENT, IT MAY BE BETTER TO RETURN ON ANOTHER OCCASION TO COMPLETE THIS VICTIM FORM]

[0 Suspend this Victim form for now]

Is there anyone aged 16 or over living at this address who is black, Asian, Chinese or from other non-white groups?

If you are unsure, please use the categories below as a guide.

**White**

A. British  
B. Irish  
C. Any other White background

**Black or Black British**

L. Caribbean  
M. African  
N. Any other Black background

**Mixed**

D. White and Black Caribbean  
E. White and Black African  
F. White and Asian  
G. Any other mixed background

**Chinese or other ethnic group**

O. Chinese  
P. Any other

**Asian or Asian White**

H. Indian  
I. Pakistani  
J. Bangladeshi  
K. Any other Asian background

**SHOWCARD X2**  
JN1154 807
A man aged 23 pleaded guilty to the burglary of a cottage belonging to an elderly man whilst he was out during the day. The offender, who had two previous convictions for burglary, took a video worth £150 and a television, which he left damaged near the scene of the crime.
A man aged 21 pleaded guilty to assaulting a stranger. An argument started when the offender pushed his way into a taxi queue. When another man tried to calm the offender down, the offender hit the victim in the face, fracturing his nose. The offender did not have any previous convictions for violence.
1. Higher degree/postgraduate qualifications

2. First degree (including B.Ed)
   Postgraduate Diplomas/Certificates (include. PGCE)
   Professional qualifications at degree level (e.g. chartered accountant/surveyor)          NVQ/SVQ Level 4 or 5

3. Diplomas in higher education/other H.E qualification
   HNC/HND/BTEC Higher
   Teaching qualifications for schools/further education (below degree level) Nursing/other medical qualifications (below degree level)

   RSA Higher Diploma

4. A/AS levels/SCE Higher/Scottish Certificate 6th Year Studies
   NVQ/SVQ/GSVQ level 3/GNVQ Advanced
   ONC/OND/BTEC National
   City and Guilds Advanced Craft/Final level/Part III
   RSA Advanced Diploma

5. Trade Apprenticeships

6. O Level/GCSE grades A-C/SCE Standard/Ordinary grades
   1-3/CSE grade 1
   NVQ/SVQ/GSVQ level 2/GNVQ Intermediate
   BTEC/SCOTVEC first/General diploma
   City and Guilds Craft/Ordinary level/Part II/RSA Diploma

7. O Level/GCSE grade D-G/SCE Standard/Ordinary below grade 3
   CSE grades 2-5
   NVQ/SVQ/GSVQ level 1/GNVQ foundation
   BTEC/SCOTVEC first/General certificate
   City and Guilds part 1/RSA Stage I-III
   SCOTVEC modules/Junior certificate

8. Other qualifications (including overseas)

SHOWCARD Y5
1. INTERVIEWER: Clearly mark off the 12 month reference period on the calendar and give to the respondent.

2. Mark off the dates, to the nearest month, when any crimes the respondent has experienced took place. If the respondent has experienced a series of crimes, mark off the dates of each incident in the series.

3. If the respondent is having difficulty in remembering exactly when particular incidents or events took place it may help to consider other events that have happened in the last year. Mark these off on the calendar if necessary. Examples of events include:

- The date of respondent's birthday and other family birthdays.
- Other important events over last year, such as the birth of a child, weddings, anniversaries.
- Any dates when respondent started a new job or college, left work or moved house.
- Any periods when the respondent was in employment, full time education or unemployed.
- Any other relevant periods such as holidays, exams, pregnancy, time in hospital.

Coding Frames

Key to code frames for questions with changing labels

For a number of variables the actual code frame was different depending upon whether it was Type A or Type B sample and, for Type B sample, depending upon the month of interview. Text substitution was used in the CAPI to ensure that the interviewer and respondent only saw the appropriate code frame. However, in the SPSS data files – where cases from all months are combined – it was impossible to label these particular variables in any meaningful way since the label is different depending upon the type of sample and the month of interview.

The questions that this relates to are all at the start of the Victim Form and are concerned with trying to establish the exact month in which an incident occurred. They are:

- DateSerA-DateSerH,
- QtRecIn
- QtrIncid
- Nquart1-Nquart5

A comprehensive list of code frames for these questions for both types of sample and each month of 2001 are shown below.

It is important to realise that in terms of calculating victimisation rates for a particular time period (either the calendar year 2001 or the financial year 2001-2), it is crucial to know for each specific case, whether the incident occurred inside or outside the reference period. In the code frames below, code 1 is always the period immediately prior to the reference period and so all incidents in this period are considered out of scope for calculating victimisation rates. Similarly, codes 2-5 are always within the reference period and so incidents are considered in scope when calculating victimisation rates. Code 6 could be either in scope or out of scope depending upon the type of sample or the month of interview. For all Type A sample and Type B sample interviews conducted in the first month of each quarter (i.e. January, April, July, and October) were outside the reference period and so were taken to be out of scope for calculating victimisation rates. However, for Type B interviews conducted in the other eight months of 2001, code 6 was taken to be inside the reference period and so incidents were in scope.

\[^1\] In reality, for these months it was not possible to know precisely whether an incident was in scope or out of scope since code 6 crossed the reference period boundary with part of the period being in scope and part being out of scope. In practice, since the period under consideration represented the period closest to the date of interview respondents knew the exact month in which an incident had taken place and so no valid incidents fell into this category. Nevertheless, a change was introduced to the questionnaire in 2002 to cater for this unlikely situation.
TYPE A INTERVIEWS

1. In 1999 Out of scope
2. Between January and March 2001
3. Between April and June 2001
4. Between June and September 2001
5. Between October and December 2001
6. Between first of January 2001 and the present Out of scope

TYPE B INTERVIEWS

IntMon=January 2001
1. Before the first of January 2000 Out of scope
2. Between January and March 2000
3. Between April and June 2000
4. Between July and September 2000
5. Between October and December 2000
6. Between the first of January 2001 and the present Out of scope

IntMon=February 2001
1. Before the first of February 2000 Out of scope
2. In February or March 2000
3. Between April and June 2000
4. Between July and September 2000
5. Between October and December 2000
6. Between the first of January 2001 and the present

IntMon=March 2001
1. Before the first of March 2000 Out of scope
2. In March 2000

4. Between July and September 2001
5. Between October and December 2001
6. Between the first of January 2002 and the present

**IntMon=March 2002**
1. Before the first of March 2001  
   Out of scope
2. In March 2001
3. Between April and June 2001
4. Between July and September 2001
5. Between October and December 2001
6. Between first of January 2002 and the present
Other code frames

There were 3 questions in the 2001 BCS that were open-ended and required a full code frame to be developed. The coding frames were developed by analysing a list of the answers given by respondents to these questions.

The questions that required coding were WhyHapp, WhyBet and WhyNoAtt. Both WhyHapp and WhyBet were changed to pre-coded questions in July based on code frames developed in the first six months when it was an open-ended question. The full code frames for these questions are presented below.

In addition to the fully open-ended questions, there were a number of open-ended questions where answers were recorded to an ‘other specify’ option. Where possible, these responses were back-coded to an appropriate code in the relevant question.

**WhyHapp**² [ASK IF Racemot=No or Refused or Raceposs=No or Don’t Know or Refused]

Can you tell me why you think this incident happened?
INTERVIEWER TO RECORD

Text: Maximum 50 characters

1. Negligence/carelessness on the part of the respondent or someone else e.g. door left unlocked etc.
2. Due to a relationship/history between the victim and the offender e.g. during argument, jealous, conflicts over children/property
3. Offender wanted money or property (i.e. motive for the incident)
4. Victim/property was targeted/specific type of property targeted by offender
5. Offender was determined/not deterred by security measures etc.
6. Opportunist/spur of the moment/offender took advantage of situation
7. Mindless/‘for fun’/for something to do/‘messing around’/boredom/
8. Alcohol/drugs
9. It was part of a series of incidents in area (i.e. number of houses broken into/cars stolen/offenders in area at time
10. The location of the car/house/property/person made it an easy target
11. As a result of various transport difficulties (busy roads, trains, tubes, buses, road rage, overcrowding
12. The respondent/victim being victimised for being different in some way/picked on
13. The offender was provoked by the police in some way i.e through false arrest, being mistreated
14. The offender was suffering from mental illness
15. The offender was reacting to being confronted by someone/was provoked
16. It was carelessness/a mistake/a misunderstanding/mistaken identity
17. The offender had a bad temper/intolerant attitude/tendency for violence/history of crime
18. Other coding
19. Refused
99. Don’t know

² This question became a pre-coded question in July 2001, this is the original code frame used when it was an open-ended question between January and June 2001.
**WhyBet**  [ASK IF BetInfor= Yes]

What additional information did you want to know from the police?

**INTERVIEWER RECORD.**

1. Whether any investigation/action was taken to prevent a repeat (e.g. sending a patrol to prevent a repeat)
2. Information on investigation/progress/outcome of the incident (e.g. if offenders identified/caught/charged/convicted, if/when in court)
3. Why police didn’t take the opportunity to collect evidence/identify witness/visit scene of the incident/involve respondent (e.g. identity parade/look at photos of suspects)
4. Assurance that incident was being taken seriously/not ignored
5. Why respondent did not receive information promised/expected
6. Help/guidance from the police (e.g. on security/compensation/victims rights)
7. Information/history on the area e.g. if similar incidents have happened before/what is being done to prevent crimes happening
8. Other coding
98. Refused
99. Don’t know

**WhyNoAtt**  [ASK IF AttTria = No]

Why was this?

1. The case did not go to trial
2. The case is still ongoing
3. Awaiting the date of the trial
4. Was not informed/information was withheld about the trial by the police
5. Advised by friends/relatives not to go to the trial
6. Was not allowed to attend the trial
7. The offender was a juvenile
8. Did not want to/not necessary to go to the trial
9. Was not/no longer directly involved in the case
10. Didn’t know that I could go to the trial
11. The accused pleaded guilty to the offence
12. Was working/busy on the day of the trial
13. Had a fear of reprisals/retribution from going to trial
14. Did not want any contact with the offender
15. The offender was already in prison
16. The case was mainly for other offences
17. Would not be able to control my emotions in court
18. Was not bothered/no concern
19. Other coding
98. Refused
99. Don’t know

1. INTRODUCTION

The Home Office conducts the British Crime Survey (BCS) to monitor the crime rate in England and Wales and provide other important information (e.g. on security measures). The survey has been conducted every few years since 1982 and is now very well known. The information it provides is used extensively within the Home Office and by academic researchers. The media also recognise that it is an important source of information on the extent and nature of crime.

The survey's primary aim is to measure the extent of various crimes experienced by the public. This measure of crime is independent of that available from statistics collected by the police, since the survey collects details of offences whether or not they have been reported to or recorded by the police.

It is known that police statistics are subject to changes in the willingness of the public to report crimes and changes in police practice in recording them. For these reasons, the survey can give a better indication of how the rate of crime is changing. Also, a comparison of the survey's results with the police statistics shows what types of crime tend not to be reported to the police.

**Importance of offence coding**

One of the main purposes of the British Crime Survey is to find out whether respondents have experienced any crime in the last 12 months. Anyone who has experienced a crime is asked a series of detailed questions about this crime. These questions are asked by an interviewer and form the part of the interview known as the “Victim Form”.

Each respondent can be asked about up to 6 different crimes. However, it is very rare for anyone to have experienced this many crimes within a year. In 2000, 37% of respondents had at least one Victim Form and fewer than 3% had four or more.

On the basis of the information in the Victim Form each crime is assigned an Offence Code, which is designed to closely match the crime code that the police would have assigned (had it been recorded as a crime). Each crime has only one offence code, and these codes are used as a key part of the analysis of the Crime Survey.

For example, the results of the 2000 British Crime Survey showed that between 1997 and 1999 burglary fell by 21%, vehicle-related theft fell by 15% and bicycle theft by 27%; while robbery rose by 14%.

These figures are based on how the crimes described in the victim forms are coded.
Offence codes and how they work

A list of all the offence codes is attached on pages 9 and 10 of these instructions. Some crimes are excluded from the BCS, and so do not appear – the most obvious examples are murder and fraud.

As explained above, each crime will end up with just one of these codes. If one crime consists of a number of offences (for example, a burglar breaks into someone’s house, beats up the occupants, steals the car and breaks some valuable belongings), the coding needs to sort out which of these offences takes priority (i.e. should the crime be coded as burglary, assault, theft of a car or criminal damage?)

The offence codes do have a priority order. Generally:

- Arson
- Rape or Serious Wounding
- Robbery
- Burglary
- Theft
- Criminal Damage
- Assault
- Threats

For crimes against the person (assault, sexual offences, robbery, snatch theft and other theft from the person) the respondent must be the victim. If someone else is the victim (even if that person is part of the respondent’s household) then the crime is out of scope of the survey. For crimes against the household (burglary, other types of theft – not from the person, criminal damage), the respondent’s household must have been the victim.

This is important so that crimes do not get counted twice. If a respondent tells us about the break in at his mother’s house, it is possible that his mother will also have been selected for the survey and will tell us about the same crime. Thus, we would double count that crime.

Crimes that take place abroad will receive an offence code just like any other incident.

Some crimes must always be referred to the Home Office:

- Arson
- When the offender is clearly mentally ill and not responsible for his actions
- Any crime involving the police as offenders
Carrying out the offence coding

The Offence Coding is a two stage process:

- An automated stage, based on answers given in the Victim Form
- The manual coding stage, where the coder checks the automated code

The automated stage

A special programme has been written which looks at all of the pre-coded answers given in the Victim Form and on the basis of these assigns a “best guess” offence code. This automated code is printed on the Victim Form.

This best guess code forms the starting point for the manual coding, but you should not assume that this automated code is correct. The automated code can only use the answers to certain closed questions, and does not have the same access to full information that you have. Your judgement is what we rely on, so if you feel that the automated code is incorrect, then please proceed with the manual coding as you think best. The automated code can, at best, point you in the right direction and give you an idea of the issues you need to consider.

The manual coding

The manual coding is of vital importance, because the automated system can not make use of any of the open ended questions in the Victim Form, and these often provide crucial information about the crime. There are also situations where judgements have to be made, and this can only be done by a trained coder.

You will be provided with a print out of the Victim Form containing the answers (both pre-coded and open) given by a respondent. The Victim form is highly filtered, and you will only be given the text and answers to the questions that the respondent actually answered. (Thus, if the respondent has said that no force or violence was used, then there will be no follow up questions about the nature of this force or violence).

At the top of this print out there is the serial number and crime number for this victim form. (As we said before, each respondent can be asked about up to six crimes. Thus, it is possible that you will be given up to 6 different forms for each serial number).

Using this print out you will work through a series of questions that appear on the computer screen. The answers you give to each question will eventually take you to the Offence Code for that crime.
The questions you are asked sometimes have quite a lot of explanatory text, which is there to explain exactly what we mean, and to provide guidance. It is important that you do familiarise yourselves with this text (and this manual), as there are situations where the answer to a question is not as straightforward as it appears, or where you will need to use the guidance and your judgement to distinguish between the possible answers. Although the answer to the question will often be obvious, there are all sorts of intricacies that need to be taken into account.

This manual is designed to give you more information that can back up the information that you are given on the computer screen. Although the computerised coding modules are designed to stand alone, sometimes it may help to refer to this manual – just to check why you are getting to an offence code that you think is odd, or to work out what is happening if you think the coding modules are not working as you would expect. The manual also backs up the text on the screen, so may be a useful reference source when dealing with certain offences where the screen contains a lot of information.

Once an offence code has been assigned, you will be asked how certain you are that this is the right code. You can either code certain, uncertain or that it is the wrong code. (If you code the latter, you will be sent back to the start of the coding modules). If you code uncertain, you will be asked to say why you are uncertain or to give any other comments that you think would be useful.

Most of the questions have a “not sure” category. If you code this, the offence will be assigned a “REFER TO SUPERVISOR” code.

As well as internal quality checks, many of the offence codes will be checked by the Home Office. Some offences, of certain types of incidents, will always be referred to the Home Office.

**Coding in practice**

For each respondent you will have one or more Victim Form print outs. All the Victim Forms for a particular respondent will be together. This is important, as in some cases you may find that one of the Victim forms is, in fact, a duplicate (see page 11 for more information).

**Getting to the questionnaire**

The initial screen asks for the serial number of the Victim Form that you are about to code. You need to type in the serial number (followed by a !) and this will take you to the second screen. At this point you put in the Victim Form number (which is on your print out – it is the number in brackets after the serial number).

This will then take you into the coding questionnaire.
The first thing that you will need to do is check that the serial number you have entered is correct. The screen will show you the first line of the description of the incident. This is the first question in the Victim Form (following the automated code). You just need to make sure that the line on screen matches what you have on your paper copy. If it does not match, then you must have entered the wrong serial number and you will be asked to try again.

You will be asked to choose the module that you want to start with. You can do this on the basis of the description of the incident, or on the basis of the automated code. Don’t worry if you choose the wrong module, as you should end up in the correct one if you answer the questions correctly.

The modules are as follows:

- Robbery (which is theft with violence – e.g. a mugging; this section also covers theft from a person i.e. then the article stolen was being held or carried e.g. pickpocketing)
- Burglary and theft (burglary is when someone enters the respondent’s home (or outhouse) without permission; theft covers all thefts where the item was not being held or carried)
- Assault
- Sexual assaults
- Criminal Damage
- Threats (threats of violence, other threats and intimidation)

Having chosen your module you will then be asked four initial questions. The first three just check whether the offence is one of those that always has to be referred to the Home Office (arson, an offence by someone who is mentally ill, or where the police are the offenders). The last question asks if the victim form is a duplicate.
2. MOVING ROUND THE CODING MODULES

Generally, you will answer a question by entering a code and pressing the enter key. However, you may enter the wrong code by mistake, or realise that you have put in some wrong information. Therefore, you need to know how to move about the questionnaire.

**Goback**
At any stage, if you type in “goback” you will be taken back to the point where you choose the module that you want to try. Thus, if you feel that you have gone wrong but are not sure where, type this and try again.

<
if you type this in at a question, it will take you back to the previous question and let you alter the answer you gave

??
Type this in and you will see a list of the questions you have answered and the answers that you gave. This is useful, as it shows you what the questions are called.

<varname
If you type in < followed by the name of a question, you will be taken right back to that specific question and will be able to change the answer you gave.

>varname
This takes you forward to a specific variable.

<<
This takes you back to the very first question (when you typed in the serial number)

>>
This takes you forward to the end of the data that you have entered.

4. Invalid victim forms, out of scope codes and duplicates

Invalid victim forms

Wherever possible you should avoid using code 96 (invalid victim form, no information, no crime). As the name suggests, this code is mainly intended for Victim forms where we have no, or extremely limited, information or where there has been no crime.

Even with quite limited information on a Victim Form we may be able to reach a valid offence code. In some cases, we may have no description or a very poor description, but it is still possible to use the answers to the closed questions to reach a valid offence code. Similarly, if we only have the written description and all codes are missing, we still may have enough information to get an offence code.

If you are uncertain as to whether or not there has been a crime, it is important to try to reach an offence code. A number of the offence codes are “dump codes” which are not used in the official victimisation rates (all of the out of scope codes, and codes such as 87 – possible criminal/possible accidental damage/nuisance with no damage). It is better to arrive at one of these codes than to give the Victim form a code 96. However, there will be cases where you do need to use 96 – but they should be rare. You can get to a code 96 at the main menu for the coding modules.

Out of scope codes

Where there is more than one offence within an incident, but the element that would normally take precedence is out of scope (for example, the respondent’s friend has had property damaged and the respondent has been threatened), you should try to get to an in scope code rather than an out of scope code. In some cases, this may require you to ignore the part of the incident that does not involve the respondent. However, do be careful with this, as some offence codes cover the other members of the household and some do not. Non household members, however, are always out of scope.

Sometimes, even if the respondent is the victim, the crime will be out of scope. This mainly occurs if the respondent had property stolen from someone else’s home or car. In these situations, the actual burglary or theft from a car would be the in scope code. Thus, to avoid double counting, the respondent’s loss is coded as out of scope.

Duplicates

Duplicate incidents (code 02) are those where the same incident is recorded on more than one Victim Form. In these cases, one incident is given the appropriate valid offence code while the duplicates are given code 02. Duplicates are often obvious, but sometimes it can require some detective work to decide whether or not they are duplicates.

Things to look for:

a) the interviewer states that the victim form is a duplicate, or refers to details in a previous victim form
b) the date information and most of the characteristics are identical. The VFs do not need to be exactly the same because the victim may be discussing two elements of the same incident in the different VFs (e.g. if the incident is the theft of a vehicle, the respondent may discuss the theft in one VF and the damage to the car in another).
c) If the Victim Forms include the same unusual characteristic (e.g. said the other injury was “hepatitis B”)
d) In some cases it may be worth checking the job of the respondent. In one case, we had several similar victim forms dealing with threats against the respondent. His job was “custody officer” at a police station, which made it quite likely that the threats were all separate incidents rather than the same one.
SHEET 1: ASSAULTS

Most assaults uncovered by the survey will be straightforward incidents arising in the course of family rows, arguments between acquaintances, brawls in pubs, fights at football matches and so on. In these there is no motive to steal, and no sexual motive. This main group of assaults has been divided into three sub-groups: serious wounding, other wounding and common assault. Incidents that take place in the course of work are in scope.

It is not possible to draw precise boundary lines between these three sub-groups. Coders must use their judgement. Guidelines are:

- **a ‘serious wounding’** (code 11) must involve a wound (where the skin is broken or a bone is broken) which clearly needs immediate medical attention: and the severity of the wounding must be intentional
  - the offender must have intended to do, and succeeded in doing, really serious bodily harm. Things to check:
    - did the respondent suffer broken bones /teeth; loss of consciousness; permanent injury
    - did respondent suffer cuts that required medical attention; a serious cut (e.g. use of weapon, knifing)
    - did the respondent require immediate medical attention

- the majority of incidents involving assault will be either ‘other wounding’ or ‘common assault’

**Other wounding** (code 12) applies if:
- the offender inflicts severe injuries unintentionally, or there are minor injuries inflicted such as:
  - cuts (regardless of medical attention) and the force used was not severe
  - severe bruising or chipped teeth
  - bruises and scratches which required medical attention and the force used seemed serious

**Common assault** (code 13) applies where the victim was punched, kicked, pushed or jostled but there was no injury or only negligible injury. Minor bruising or a black eye count as negligible injury. Victims of common assault are unlikely to require any medical attention. Incidents where the victim received no injury or minor injury are common assault even if knives are involved.

Sometimes, the injuries described in the text description and those coded at WhatFor1 will differ. In these cases, equal weight should be placed on the two sources of information and it should be assumed that both sets of injuries happened. Injuries inflicted accidentally during an incident are counted.

All assaults which have a sexual motive are to be classified using Sheet 3, Sexual Offences. In other words, if an incident is assigned one of the three assault codes, this means that the questionnaire contains no suggestion of any sexual motive. For the survey’s purposes, only the respondent can be the victim of any assault. Assaults happening to other household members are to be treated as outside the survey’s coverage.

</tr>
</tbody>
</table>
PRIORITIES

- It is possible that some victims will have been assaulted in the course of a burglary. In most cases this will be counted as a **burglary**, but if the offence involved serious wounding (as defined above), it may in some cases be counted as `serious wounding` (see detailed notes).

- Similarly, if the offender did some malicious damage to property in the course of, or at the same time as, assaulting the victim, this will in most cases be classified as criminal damage (codes 81 to 89) **unless** the assault amounts to a serious wounding (but see Note for Guidance 1D).

- Threats where force was used, even if there was no injury, should be coded as assaults (codes 11-13) or sexual offences (codes 31-35), depending on the type of force used.

CODE 12 CODE 13
ASSaultS: notes for guidance

1A Some assaults without injury will consist of merely grabbing the respondent. In these cases UseForce (‘Did the person/any of the people actually use force or violence on anyone in any way, even if this resulted in no injury?’) may be answered ‘no’; the correct code is likely to be 13, common assault.

1B Only the respondent can be the victim of an assault, for the purpose of the survey. Any incidents involving assault only, where the respondent is not a victim, should be treated as outside the survey's coverage (code 19) unless there is another part of the incident that involves the respondent (e.g. threats). If the respondent is one of several victims, code on the basis of information about the respondent alone.

Any cases of burglary or other sorts of theft where serious injury was inflicted on someone other than the respondent will be referred to the Home Office.

1C Further criteria for the three categories of assault are:

Common assault Code 13
   a) No injury was inflicted
   OR b) Injury inflicted was trivial or negligible: [Medical attention not really necessary].

Other wounding Code 12
   a) Injury inflicted
      i.e. - substantial bruising, cuts etc. but not amounting to a serious wound -
      [Medical attention probably not necessary for a)]
   OR b) Serious wound inflicted but not intentional: i.e. the offender hurt victim more than he intended.

Note: If an incident involves serious wounding, it should only be coded 'other wounding' if the questionnaire makes it explicit that such a serious attack was not intended.

Serious wounding Code 11
   a) offender intended to inflict really serious wound
   OR b) a really serious wound was inflicted and therefore risk of permanent injury or damage
      [Medical attention needed immediately for a) & b)].

Note: Do not assume that the respondent seeing a doctor means the injury is serious. A stay in hospital is more likely to indicate serious injury.

1D Code 11, serious wounding, always takes precedence over codes 81-89, criminal damage. However, the criminal damage codes take precedence over code 12, other wounding, and code 13, common assault without injury. (Exceptions to this rule can be made where the damage is very trivial, and the assault involves injury; for example, if a victim is given a beating in which his eyes are both blacked and his clothes torn, it makes more sense to call this an assault than an act of criminal damage.) Arson (code 80) takes precedence over all assault codes.
SHEET 2: ATTEMPTED ASSAULT

Respondents are not asked, either in the main questionnaire ‘screener’ questions or in the victim form, whether anyone has tried to hit them, beat them up etc. Some respondents will have reported such incidents, all the same; they will probably be of the nature: "Someone took a swing at me in a pub". Attempted assaults are not the same thing as threatened assaults.

However, if a respondent is threatened with a weapon, this is an attempted assault (code 21).

For the survey's purpose, only the respondent can be the victim of an attempted assault. Attempted assaults happening to other household members will be referred to the Home Office if this is the only offence.

Possible codes

Code 21 Attempted assault.

PRIORITIES

• If attempted assault is "competing" with any other offence classification, except threats, the other offence takes precedence. Attempted assault takes precedence over threats.

ATTEMPTED ASSAULT: NOTES FOR GUIDANCE

2A An incident may involve an attempt to assault the respondent and a successful attack on someone else; in this case the incident should be counted as a code 21.
SHEET 3: SEXUAL OFFENCES

Most sexual offences uncovered by the survey will have an element of physical assault to them; and besides, some sexual offences will occur in combination with offences such as robbery. The survey uses six codes for sexual offences.

Codes 32-34 all involve attacks not amounting to rape. Code 32, serious wounding with sexual motive, refers to incidents which would be classified as serious wounding (code 11) if it were not for the sexual motive. (The criteria for serious wounding are as set out on sheet 1).

Indecent assaults, code 35, refer to incidents involving no injury; a typical case might be perpetrated by a "groper" on a train or bus. An assault may be indecent if its motive was clearly sexual, even though the specific act was not of an explicitly sexual character.

Indecent exposure ("flashers") does not count as indecent assault. Code as ‘other sexual offence’ (code 39).

Possible codes

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>31</td>
<td>Rape</td>
</tr>
<tr>
<td>32</td>
<td>Serious wounding with sexual motive</td>

</tr>
<tr>
<td>34</td>
<td>Attempted rape</td>
</tr>
<tr>
<td>35</td>
<td>Indecent assault</td>
</tr>
<tr>
<td>39</td>
<td>Other sexual offence, falling outside the survey's coverage.</td>
</tr>
</tbody>
</table>

PRIORITIES

- An incident of rape is counted as a code 31 (rape), regardless of any other offence with which it is combined. For example, if a rape takes place in the course of a burglary, it is to be classified as a rape, not a burglary.

- Code 32 (serious wounding with sexual motive), takes precedence over any offence with which it can occur in combination (except, of course, rape and except arson).

- Code 33 (other wounding with sexual motive), and code 34 (attempted rape), do not take precedence over codes for robbery, burglary, criminal damage and most thefts.

- Code 35 (indecent assault), does not take precedence over codes for robbery, burglary, criminal damage and theft.

Respondent: Both male and female respondents can be the victim of sexual offences.
SEXUAL OFFENCES: NOTES FOR GUIDANCE

3A There will be some sexual offences where no force or violence was used. In these, WhatFor will not be completed. For the purposes of coding, if the assault involved some contact between the offender and victim (i.e. not just exposure) this should be coded as a indecent assault (code 35).

If DescriInc indicates that the incident was one of attempted rape (code 34) but WhatFor has not been answered, coders should assume that this is an attempted rape, and answer the coding module questions as if WhatFor had been answered attempted rape.

Where injuries are sustained, it is too serious to be coded as indecent assault. Any sexual assault with injuries will be coded as other wounding with sexual motive (code 33) or serious wounding with sexual motive (code 32) as appropriate.

3B If the respondent is simultaneously the victim of robbery or attempted robbery or theft from the person and of rape or serious wounding with sexual motive, the incident should be coded as rape or serious wounding with sexual motive. However, if robbery, attempted robbery or theft from the person occur in combination with other wounding with sexual motive, attempted rape or indecent assault, the sexual offence codes do not take precedence.

3C If the respondent is the victim of rape or serious wounding with sexual motive in the course of a burglary, the incident is given one of the two sexual offence codes rather than a burglary code.

If someone other than the respondent is the victim of rape or serious wounding with sexual motive in the course of a burglary, the case will be referred to the Home Office.

If any lesser sexual offence occurs in the course of a burglary, the incident is coded as burglary.

3D If a sexual element is claimed to exist, it must relate to the incident, not the general relationship between the victim and the perpetrator.
SHEET 4: ROBBERY, SNATCH THEFTS AND OTHER THEFTS FROM THE PERSON (INCLUDING ATTEMPTS)

Robbery involves the use of force or threat of force to a person immediately before or at the time of a theft. (A threat can be simply implied e.g. "Give us your wallet". The presence of a weapon is an implied threat, even if it is not actually used). If someone is threatened or attacked by an intruder in their home, the element of robbery will usually be absent but see the detailed list. Snatch thefts have no element of threat, and only minimal force; they involve speed rather than force or threat - for example, pulling a handbag off a woman's shoulder or snatching a purse from a shopping bag. However, a snatch that turns into a ‘tug of war’ between victim and offender involves more than minimal force, and should be counted as robbery. Other thefts from the person involve neither force, threats nor snatching, but the offender intends that the victim should remain unaware of the theft whilst it is being committed - pickpocketing being the prime example.

Respondents are likely to use the term ‘mugging’ to refer to robbery and snatches, but not to other thefts from the person. Some thefts and attempted thefts of personal property may need to be classified under code 67 or 73 instead of here.

The following broad hierarchy applies to thefts of personal property:

- **robbery (41, 42)** force was used to further theft; more force than was necessary to snatch property away (including ‘tug of war’ between victim and offender) or threats used, whether or not victim actually holding items (if domestic location, may be code 55 or assault/wounding)
- **snatch (43, 45)** force used was just to snatch property away or no extra force used, but victim clearly aware of the incident as it happened and respondent actually holding items taken or carrying them on their person.
- **stealth (44, 45)** no force used and respondent clearly unaware of incident and actually holding items or carrying them on (or very close to) their person (e.g. purse in pocket or in bag being held).
- **other (67, 73)** no force used and respondent not actually holding items or carrying them on their person. (something put down on a shop counter for a while or left on a shopping trolley while respondent wanders about, and items well away from respondent at the time e.g. things left in cloakrooms).

Sometimes, the respondent may be unclear whether they had their pockets picked or lost their wallet or may report behaviour which may or may not have been attempted theft. In such cases code 48 applies. **Respondent:** Only the respondent can be the victim of this group of offences.

Possible codes

- Code 41 Robbery
- Code 42 Attempted robbery
- Code 43 Snatch theft from the person
- Code 44 Other theft from the person
- Code 45 Attempted theft from the person
- Code 48 Possibly theft but could have been loss/possibly attempted theft but could have been innocent
- Code 49 Other robbery, theft from the person, falling outside the survey's coverage.

**PRIORITIES**

- Where robberies occur in combination with other offences, code 41 takes precedence over all others except rape, code 31. Snatch theft and other thefts from the person, by their nature, will not occur in combination with any other offences except, conceivably, criminal damage, over which they take precedence.

ROBBERIES AND THEFTS FROM THE PERSON: NOTES FOR GUIDANCE

4A For an incident to be coded with this group of codes (41-49), the respondent must be a victim. (Other people might also be victims simultaneously). If the respondent was simply accompanying someone else who was robbed (or someone else who suffered a theft from the person), no offence has occurred for the purposes of the survey, and the incident may be referred to the Home Office. But, if the respondent was accompanying someone else who was robbed, and the respondent was attacked or threatened in the course of the robbery, the incident should be coded as an assault (codes 11-19) or a threat (code 91-95). This also covers situations where the respondent was caught up in the robbery of a business.

4B If someone gains unauthorised access into a house and threatens the occupants in the furtherance of theft - in order e.g. to make them open up a safe - this is code 41, robbery. But if someone breaks into a house to steal and is disturbed by the occupants who (try to) stop him, this is burglary rather than robbery or attempted robbery (even if a household member is wounded) - see burglary (sheet 5).

4C Robbery involves the use of force or threat of force before or at the time of a theft. A threat can, for these purposes, be simply implied. Snatch thefts (code 43) involve no threat and only minimal force - e.g. pulling a handbag from someone's grasp, or off their shoulder. As soon as the victim offers any resistance, more than 'minimal' force has been used, and the offence becomes one of robbery (code 41) or attempted robbery, code 42. ‘Other thefts from the person’ (code 44) involve stealth; pickpocketing for example, and covertly taking a purse from a shopping basket. Victims will not become aware of ‘other theft from the person’ until after the event - in contrast to robberies and snatches. (It may be helpful to check Aware: "Were you aware of what was happening?"). So if a victim is pushed/jostled (e.g. on the tube) and later discovers the theft, this is a stealth theft (code 44). If the victim is aware of the theft at the time of being pushed/jostled it is a snatch (code 43).

4D If property is actually taken by the offender (even if it is dropped and the victim recovers it) this is an actual, not attempted, offence.

4E Property taken from a trolley or pushchair will count as a code 44 (other theft from a person), even though it was not actually physically being carried by the respondent – as long as the trolley or pushchair was in close proximity to the respondent (i.e. being wheeled). Items taken that are not being carried or held (e.g. a bag by someone’s feet, a coat on a hanger, items left behind in a pub) will be coded as 67 (other theft).

4F If a respondent is assaulted or threatened in the course of a robbery or attempted robbery of a business this should only be coded as robbery/attempted robbery (41 or 42) if the respondent was also the victim of a theft (e.g. as well as robbing the business the robber also took items from the respondent or if the business is the respondent’s business and they are a sole trader). Otherwise, the threat or assault codes will apply.

If the respondent challenges shoplifters or thieves and is then threatened/assaulted, the threat or assault codes apply. If the respondent is threatened or assaulted at work by a customer refusing to pay a bill, this is coded as threat/assault.

4G To use code 48 (possibly theft, could have been loss) the victim must not know if the property has been lost or stolen. If the respondent thinks that the property has been stolen, do not use this code.
BURGLARY, ATTEMPTED BURGLARY AND THEFT IN A DWELLING

Burglary from a dwelling consists of entering the respondent's dwelling as a trespasser with the intention of committing theft, rape, grievous bodily harm or unlawful damage (whether the intention is carried through or not). If the offender does not have the right to enter a home, but does so, this will be burglary.

Burglary does not necessarily involve forced entry; a burglar can walk in through an open door, or gain access by, for example, impersonating a gas man, electrician etc. It does not matter to whom the burgled property belongs – just the fact that it is taken from the respondent’s household premises.

The "dwelling" is a house or flat or any outhouse or garage linked to the dwelling via a connecting door. The "dwelling" should be the respondent's permanent residence. Temporary residences (holiday cottages, hotel rooms) do not count – if the respondent has property stolen from a temporary dwelling, this will be referred to the Home Office. Burglary from a friend's house would be outside the scope of the survey (and should be coded as 59 – burglary outside the scope of the survey, even if the respondent has items stolen during that burglary).

For burglary to have occurred, the offender must have entered the home. The home "begins" at any door or window whether open or shut. For example, theft from an open porch (a porch without a door) would not count as burglary, but theft from a porch with a door would, even if the door was open at the time. ‘Common areas’ (e.g. hallways) of flats are NOT included, and you should not code entry to common areas as entry to the home. Garages are included if they are linked to the dwelling via a connecting door. If the garage is not linked to the house with a door, it is not ‘burglary from a dwelling’ (see codes 57, 58). Assume outhouses are not linked to dwellings unless this is clearly the case.

For there to be an attempted burglary, there must be clear evidence that the offender made an actual, physical attempt to gain entry to the home (e.g. damage to locks or broken doors; glass panel in the door smashed; broken windows where the respondent said someone had tried to get in to the home). An attempted burglary takes priority over other theft codes. However, damage to back/side gates or footprints in the garden (in absence of evidence of attempt to get in, e.g. damage to windows, etc) are not sufficient evidence for an attempted burglary. If no evidence of attempted theft, but damage was done, refer to sheet 8, or, if threat, to sheet 9. Code 54 – possible attempted burglary should be used as a last resort, and all other in scope offences take priority over this code.

Theft in a dwelling (code 55) consists of theft committed inside (indoors not outside) a home by somebody who was entitled to be there at the time of the offence. Thefts in dwellings are committed, for example, by guests at parties and by workmen with legitimate access. Thefts from meters in dwellings are to be classified separately, unless these occurred in the course of burglary.

There are special rules regarding vehicles and bicycles stolen during the course of a burglary, so that if these were the only things stolen, it counts as theft of/from vehicle or bicycle theft rather than burglary (see Note 5D for details).

Possible codes

| Code 50 | Attempted burglary to non-connected Domestic garage/outhouse |
| Code 51 | Burglary in a dwelling (nothing taken) |
| Code 52 | Burglary in a dwelling (something taken) |
| Code 53 | Attempted burglary in a dwelling |
| Code 54 | Possible attempted burglary |
| Code 55 | Theft in a dwelling |
| Code 56 | Theft from a meter |
| Code 57 | Burglary from a non-connected domestic garage/outhouse (nothing taken) |
| Code 58 | Burglary from a non-connected domestic garage/outhouse (something taken) |
| Code 59 | Burglary/attempted burglary/theft in a dwelling falling outside survey's coverage |
PRIORITIES

- Burglary, attempted burglary and theft in a dwelling may all occur in combination with a number of other offences, and almost always take precedence over other offences. The exceptions are serious wounding, (code 11), rape (code 31) and serious wounding with sexual motive (code 32). E.g. if a burglar seriously injures a respondent who disturbs him, this may be classified as a code 11, serious wounding (but see detailed list).

- Arson (code 80) takes precedence over burglary but all cases of arson should be referred to Home Office (code 01).
BURGLARY, ATTEMPTED BURGLARY AND THEFT IN A DWELLING: NOTES FOR GUIDANCE

5A A burglary occurs only when the offender or any part of their body has entered the home without permission. For the purposes of the survey, the ‘home’ here includes outhouses and garages linked to the dwelling via a connecting door, but excludes the grounds - i.e. garden - of a home, and garages and outhouses with no connecting doors to the home. Burglaries from such non-connected garages and outhouses are dealt with by codes 50, 57 and 58. ‘Entering the home’ means any part of the offender’s body (e.g. reaching a hand through a window to steal something or taking mail by reaching through a letter-box on the entry door). Communal areas in flats do not count as the home.

If the respondent says “don’t know” to the question “Do they have permission to be in the house” this should be treated as trespassing and coded as a burglary.

The home should be the respondent’s main dwelling, not somewhere where they are temporarily staying (such as a hotel room or holiday cottage). Thefts from hotel rooms should be counted as “other thefts” (code 67). Any burglaries of temporary dwellings (such as second homes, holiday cottages or caravans used for holiday lets) will be referred to the Home Office (whether reported by the person staying in the property temporarily or by the owner of the property).

Caravans: an actual or attempted break-in to a caravan parked on the respondent’s property counts as burglary/attempted burglary to a non-connected outhouse (codes 50, 57 or 58). An actual/attempted break-in to a caravan parked elsewhere (not being lived in) counts as ‘other theft’ (code 67) or ‘other attempted theft’ (code 73). An actual/attempted break-in to a caravan parked elsewhere that is being lived in should be referred (code 01).

(Note that if the whole caravan or parts of it are stolen while parked on the respondent’s property, this is ‘theft from outside dwelling’ (code 65). If parked elsewhere, it is ‘other theft’ code 67).

Break-ins to allotment sheds or other “storage” places not within the grounds of the home (e.g. a lock up or garage) should not count as “outhouse burglaries”, but should be coded as other theft (code 67) or other attempted theft (code 73).

In some cases of attempted burglary, WherVict may be wrongly completed, ‘outside own home’ being given as the response to "Where did it happen?" rather than ‘inside own home (including attempted break-ins)’. In these cases, assume for the purpose of classification that the response ‘inside own home’ has been given.

Deliberate damage to a back/side gate (even if in order to effect entry) but without proof of actual or attempted entry to the home or any outhouse should be coded as criminal damage. Damage to locks/padlocks of sheds or other outbuildings should be coded as attempted outhouse burglary (code 50). Damage to doors will usually be attempted burglary (unless it was obviously not part of an attempt to get in).
5B Thefts in dwellings are committed, for example, by guests at parties and by workmen with legitimate access. Even if one person had legitimate access and lets in others, all count as having legitimate access. Thefts from a meter are classified separately unless they occurred in the course of a burglary. A person who gets access to a house by impersonating an official has no right to be inside the house. A gatecrasher at a party or someone who uses false pretences is trespassing and so leads to a burglary code.

5C If someone breaks into a house and threatens the occupants in the furtherance of theft - e.g. to make them open up the safe - this is code 41, robbery, or code 42, attempted robbery. But if someone breaks into a house in order to steal without intending to confront the occupants, and is disturbed by the occupants, who try to stop him, this is burglary (codes 51 or 52), except in the following situation:

If a burglar seriously wounds any member of the household, the case should be referred. (If anyone is seriously wounded with a weapon belonging to the burglar, the offence in law is ‘aggravated burglary’, and the code will be 51 or 52. But if the respondent is seriously wounded by anything other than a weapon belonging to the offender, the incident should be coded as a serious wounding, code 11. If anyone other than the respondent is seriously wounded by anything other than a weapon belonging to the burglar, the incident should in theory be excluded from the survey, being a code 11 with a victim other than the respondent).

If anyone was the victim of ‘other wounding’ or ‘assault without injury’, in the course of a burglary, the incident is still coded as burglary - code 51 or 52.

5D If theft of/from a motor vehicle occurs in a connected garage or unconnected garage/outhouse, and these are the only things stolen, this should be coded as theft of/from a vehicle (codes 60-63), rather than burglary/theft from dwelling. However, if anything else was stolen, or an attempt was made to steal something else, it counts as burglary/theft from dwelling.

If only bicycles were stolen from a non-connected garage/outhouse and no attempt was made to steal anything else, this should be coded as bicycle theft (code 64), not outhouse burglary. However, if anything else was stolen, or an attempt was made to steal something else, it is outhouse burglary (code 58).

If only bicycles were stolen from a connected garage and they were taken easily (e.g. door left open), this also counts as bicycle theft (code 64). If the offender had to break in, however, or anything else was stolen as well, code as burglary (code 52).

5E It may not be clear whether the offender tried to get inside. If footprints were noticed in a flowerbed, or snow, this is not by itself evidence of an attempted burglary; the offender might just be a nosy parker, or a peeping Tom. Similarly an intruder sighted in a garden may not be a burglary. If in doubt, regard ‘don’t know’ as ‘no’ for both OffInHom and TryInside. Such cases should be coded as code 54 ‘possible attempted burglary’. However, if any other offences have been committed (e.g. criminal damage), then that offence should take priority.

A burglary of commercial premises is out of scope, unless the burglar gains access to the proprietor’s living quarters (in which case a burglary code would apply) or personal or private items belonging to the respondent were taken, in which case an other theft code would apply.
SHEET 6: THEFT OF/FROM CAR/VAN, THEFT OF/FROM MOTORBIKE ETC, THEFT OF PEDAL CYCLE, THEFT FROM OUTSIDE DWELLING AND OTHER THEFT

Theft is something of a residual category, classified by eliminating contenders such as burglary and robbery. Within the theft classifications, ‘theft in a dwelling’ code 55, (defined on sheet 5), takes precedence over ‘theft of pedal cycle’ (code 64) and ‘other theft’ (code 67). Thus a bicycle stolen from inside a house by somebody who was not trespassing at the time is counted as ‘theft in a dwelling’. But ‘theft of pedal cycle’ takes precedence over ‘theft outside a dwelling’ (code 65) as do all theft classifications except ‘other theft’.

A bicycle belonging to the household stolen from outside another person’s home or from someone else’s garden is an in-scope bicycle theft. Similarly, if someone else’s bicycle is stolen from the outside the respondent’s home or from their garden, it is an out of scope theft.

Theft from motor vehicles refers both to theft of parts and accessories of motor vehicles and to theft of contents. The classification system makes no distinction between attempted thefts of and from motor vehicles, because it is often difficult to distinguish these. Where a vehicle and its contents are stolen and the vehicle is subsequently recovered without the contents, this still counts as theft of a vehicle.

Do not include small children's (under 5s) bicycles or tricycles in theft of pedal cycles: such thefts should be treated in the same way as general household property (e.g. code 65).

In some cases, the questionnaire will indicate that respondents were in doubt as to whether they had lost something or had it stolen. In any case where doubt is clearly expressed, the incident should be coded as code 68, ‘possible theft, possible lost property’. Negligence by the victim makes no difference to theft.

Sometimes it is difficult to distinguish criminal damage from theft. (e.g. aerials broken off cars, lighting removed from house walls). The guiding principle is that for something to have been stolen it has to be re-usable elsewhere. So only vehicle parts/accessories that could be reused, were carefully removed (especially regarding aerials and wipers), and were not discarded nearby should be seen as thefts. Otherwise a vandalism code applies (code 81 or 82). However, code theft of wing mirrors or car badges as theft from vehicle (codes 61 or 63). Damage to wipers, paintwork, etc is vandalism (81, 82), unless done with intention to steal.

**PRIORITIES**

- When theft occurs with a straightforward assault, the classification is generally neither one of assault nor theft, but robbery. Similarly the classification of burglary embraces the element of theft. When theft occurs in combination with rape or serious wounding with sexual motives (codes 31 and 32) the theft codes do not take precedence. If theft occurs with an assault that is not in furtherance of the theft, the theft takes priority.

- Theft will frequently occur in combination with criminal damage - for example, where the paintwork of a car is damaged and something taken off or from a car. In these cases the theft codes almost invariably take precedence over the criminal damage codes (codes 81 to 89). This is so even if the damage is very extensive and the theft very small; the exception is where the criminal damage amounts to arson, where a house is set on fire. Such cases should be coded 80 and referred.

THEFTS OF/FROM MOTOR VEHICLES, OF PEDAL CYCLES, FROM OUTSIDE DWELLINGS, OTHER THEFT: NOTES FOR GUIDANCE.

6A If the offender was inside the home, this is usually burglary. However, there are special rules covering theft of/from vehicles and of bicycles:

If theft of/from a motor vehicle occurs in a connected garage or unconnected garage/outhouse, and these are the only things stolen, this should be coded as theft of/from a vehicle (codes 60-63), rather than burglary/theft from dwelling. However, if anything else was stolen, or an attempt was made to steal something else, it counts as burglary/theft from dwelling.

If only bicycles were stolen from a non-connected garage/outhouse and no attempt was made to steal anything else, this should be coded as bicycle theft (code 64), not outhouse burglary. However, if anything else was stolen, or an attempt made to steal something else, it is outhouse burglary (code 58).

If only bicycles were stolen from a connected garage and they were taken easily (e.g. door left open), this also counts as bicycle theft (code 64). If the offender had to break in, however, or anything else was stolen as well, code as burglary (code 52).

6B Communal areas in flats (e.g. hallways) do not count as part of the home. Thus, any theft from a communal area should be treated as a theft from outside the dwelling (code 65). If there are clear signs that the offender attempted to break in to the respondent’s flat, then this would be coded as an attempted burglary. (However, theft from outside the dwelling should take precedence over a possible attempted burglary).

6C If something is missing but may have been lost rather than stolen, the correct code is 68, ‘possible theft, possible lost property’ - for example, belongings left on a train and not recovered. If the respondent thinks the item was stolen, code as other theft (code 67).

6D Thefts of company cars (belong=employer) are in scope. Vans are in scope if used for private use or if the respondent is a self employed one man/woman band. However, thefts of hired cars are out of scope. If any of the respondent’s property was inside the stolen hired car, this counts as ‘other theft’, code 67 (not as a theft from a vehicle). If only the hired car was stolen, the incident is out of scope (code 69). Include caravanettes as if they were cars or light vans. Refer cases of theft of lorries, tractors, heavy vans (these will tend to be out of scope). Assume that vans are light vans unless this is clearly not the case.

If a vehicle is stolen and returned (e.g. by joyriders) this is still theft of a vehicle (code 60 or 62)

6E Thefts of the respondent’s personal property from lorries/work vans/hired cars should be coded as ‘other theft’ (code 67), not as thefts from vehicles.

Where the respondent’s belongings have been stolen from other peoples’ private cars (or homes or garages), the incident is out of scope (code 69 or 59). The owner of the car/home could have been selected for the same survey. However, where other peoples’ property has been stolen from the respondent’s car (or home or garage), even if none of the respondent’s property was stolen, the incident is in scope and should be coded as a valid theft from a vehicle (code 61 or 63), or a valid burglary.

Theft of personal property from another person’s house is out of scope, as this person may be in the sample. However, thefts from places such as workplace or lockers are in scope as other personal theft (code 67).

6F If an incident involves theft of milk bottles and nothing else from outside the home, a victim form should not have been completed and code 66, ‘theft of milk bottles from outside dwelling’ applies.
6G Only the respondent can be the victim of ‘other theft’, code 67. If another household member is the victim of theft, and the theft does not fit any one of codes 61-69, the incident may be referred. Thefts of items (e.g. mobile phones, laptops) belonging to an employer are out of scope. Work tools are in scope for other personal theft (code 67) if they belong to a respondent who is obviously self-employed and a one man/woman band. If the respondent is self-employed, but has partners or separate business premises, this is out of scope.

Theft of a credit card is in scope, but subsequent use of a credit card (or fraudulent use of a credit card number if the card is not actually stolen) is out of scope.

**Respondent:** Only the respondent can be the victim of ‘other theft’, code 67. Any member of the household can be the main victim of the remaining categories. All cases where the victim is neither the respondent nor a household member - e.g. the respondent’s employing company, should be coded 69 (theft outside the survey’s coverage).
The most frequent categories of attempted theft are likely to be codes 71 and 72, attempted theft of or from cars/vans or motorbikes/scooters/mopeds. In their nature it will often be impossible to say whether these incidents were attempts to steal the vehicle or just parts/contents.

There are no codes for attempted theft in a dwelling, attempted theft of a meter, of a pedal cycle or from outside a dwelling; any such attempted thefts which emerge should be coded as other attempted theft (code 73) provided that the respondent is the victim. Attempted theft, where someone else is the victim and there is no other crime will be coded as an out of scope theft (code 69).

Attempted theft from the person (code 45) is dealt with on Sheet 4.

**PRIORITIES**

- Evidence for attempted theft of/from motor vehicles will often be damage (to locks, etc.): the attempted theft codes take priority over the criminal damage codes, except Arson (code 80).
ATTEMPTED THEFT OF/FROM MOTOR VEHICLES, 'OTHER' ATTEMPTED THEFT:
NOTES FOR GUIDANCE

7A It may be unclear what the attempt was aimed at; DeserInc may contain additional information.

There can be considerable ambiguity as to whether the incident is one of attempted theft or criminal damage. In such cases, the incident should be coded as attempted theft if any of the following conditions apply:

- the offender actually got into the car
- the damage was concentrated around the lock (e.g. scratches round the door lock, lock punched out)
- the quarterlight was smashed (or similar damage of the type which suggests that the offender was trying to get into the vehicle)
- the radio was pulled out or glove compartment ransacked
- other evidence exists of an attempt to steal

Smashed windscreens count as criminal damage (unless something else happened which indicates theft e.g. also tried to pull out radio).

Respondent

7B Only the respondent can be the victim of ‘other attempted theft’. If, for example, a victim form reports an attempt to steal a bicycle from a household member other than the respondent, this will be coded as an out of scope incident.
Sheets 8: Criminal Damage

Arson (code 80) consists of causing deliberate damage by fire. All cases involving arson should be referred to the Home Office. This means that you are never able to get to a code 80, instead you will always get a code 01 (refer to Home Office).

Criminal damage does not just refer to vandalism, but to any intentional and malicious damage done to the property belonging to the respondent, or to their home or vehicles. Offenders and victims are quite likely to know one another, as in arguments between ex-friends, landlord/tenant etc. Criminal damage to the home includes doors, windows, gates, fences, plants, shrubs and belongings in the garden - but excludes motor-vehicles in driveways. Communal areas in flats, such as hallways, staircases etc do not count as part of the home and so any damage would be coded as other criminal damage (code 85 or 86), unless damage has also been done to the door, walls or window of the respondent’s flat. Include damage to rented property as in-scope. Where damage is solely to a door (e.g. glass panel in door smashed, damage to lock, tried to smash door down), or there are smashed windows where the respondent said the offender was trying to get in, this is likely to be an attempted burglary (sheet 5).

Criminal damage does not include cases where the damage could be repaired by the labour of the victim without outside cost (e.g. throwing eggs at a house or vehicle, flour emptied on a car, rubbish dumped on a doorstep, drawing on walls with chalk, dogs fouling) or cases where there is nuisance only (e.g. letting down car tyres). These should be coded as 87. Criminal damage also does not include damage which is probably accidental (see Note 8B). Refer any doubtful cases to Home Office. Code 88 covers cases where there was a definite but unsuccessful attempt to commit criminal damage.

A smashed windscreen counts as criminal damage (code 82) unless there is also evidence of an attempt to steal.

Possible codes
- Code 80 Arson
- Code 81 Criminal damage to a motor vehicle (£20 or under)
- Code 82 Criminal damage to a motor vehicle (over £20)
- Code 83 Criminal damage to the home (£20 or under)
- Code 84 Criminal damage to the home (over £20)
- Code 85 Other criminal damage (£20 or under)
- Code 86 Other criminal damage (over £20)
- Code 87 Possibly criminal/possibly accidental damage/nuisance with no damage
- Code 88 Attempted criminal damage (no damage actually achieved)
- Code 89 Other criminal damage falling outside the survey's coverage.

Priorities
- When criminal damage occurs in combination with burglary or robbery, the burglary and robbery codes take precedence over the criminal damage codes. When criminal damage occurs in combination with theft, the incident is always to be classified as theft, except where the damage amounts to arson.

- When criminal damage occurs in combination with serious wounding (code 11), rape (code 31) or serious wounding with sexual motive (code 32), these codes take precedence. Where criminal damage occurs in combination with other wounding (code 12) and other wounding with sexual motive (code 33), the incident can be coded as assault if the damage is relatively trivial or the assault is clearly the more serious aspect of the incident. For example, if someone was punched in the eye so that their glasses broke and they got a broken nose, this should be recorded as a code 12, other wounding.

- It is often hard to distinguish between criminal damage and attempted burglary or attempted theft. The ‘attempt’ classification should only be used where the victim form states clearly that an attempt was made. (In these cases, the attempt classification takes precedence over criminal damage).

- Threats where something was damaged should be coded as criminal damage.
CRIMINAL DAMAGE: NOTES FOR GUIDANCE

8A) If an incident involves both criminal damage and serious wounding, the assault code (code 11) always takes precedence - provided that the respondent is victim of the serious wounding. If someone else is victim of the wounding, refer.

Criminal damage codes, however, take precedence over codes 12, 13 and 21 - other wounding, common assault and attempted assault. (Exceptions to this can be made where the damage is very trivial and the assault involves injury to the respondent; for example if a respondent is given a beating in which his eyes are blacked and his clothes slightly torn, it makes more sense to code this as an assault than an act of criminal damage.)

8B) For an incident of criminal damage to have occurred, damage must have been done maliciously. Damage should be coded as accidental (code 87) in the following circumstances:

- the respondent says it was accidental (but if they say it was deliberate, then treat it as such)
- the damage is just dents in the side of a car which could have caused by another car (although a dent or scratch on the roof of a car is almost certainly malicious and a scratch 'made with a coin’ down the side of a car is obviously malicious). A broken windscreen or window with no evidence of intention to steal the car or from the car should count as vehicle damage (81 or 82).
- the respondent just found the brake lights, headlight or wing mirror smashed (unless there is evidence that it was deliberate (wing mirror by pavement or both wing mirrors are smashed)
- the damage is to the home and probably unintentional (e.g. cigarette burns after a party, crushed hedge from someone drunk falling in it)

8C) If the respondent was just left with a clean-up job but no further costs, or if the effect of the act was trivial (e.g. letting down car tyres, throwing eggs at a house or vehicle, flour emptied on a car, rubbish dumped on a doorstep, drawing on walls with chalk, dogs fouling) code 87 applies. However, graffiti done with paint, felt tip or aerosol does count as criminal damage, as does deliberate damage to plants/trees/hedges. Incidents should not be given a code 87 if it is perceived that the damage may easily be put right at a low cost (rather than no cost) e.g. cables ripped off a wall.

Some incidents of vandalism where the respondent specifies no cost may not be code 87 if the cost is accrued to the landlord or the owner of the property. In this case use the description to assess the level of damage and estimate whether it would cost more or less than £20 to repair.

If the offenders were attempting to effect criminal damage but were stopped before they succeeded in doing so, code 88 applies.

8E) The "home" in this context includes doors, windows, gates, fences, plants, shrubs and belongings in the garden, but not motor vehicles in driveways or communal areas in flats.

Respondent

8F) Any member of the household can be the main victim of damage to motor vehicles or to the home. But only the respondent can be the victim of other acts of criminal damage. Thus damage, for example, to the respondent's bicycle would be coded 85 or 86 if the damage were done away from the home - but coded 83 or 84 if damaged when in the respondent's garden. But if the respondent's son's bike were damaged when away from the home, this would be out of scope and may be referred.
"Threats" are verbal. Any non-verbal threatening behaviour (following a person closely, menacing gestures) counts as intimidation.

In most cases, the respondent will be both the person to whom threats are made and the person against whom threats are made. There will be a few cases where this is not so. Either a threat may be made to the respondent against someone else (e.g. I will kill your child) or a threat may be made to someone else against the respondent (respondent's wife is told respondent will be beaten up). The coding system is adapted to this. Where the offence consists only of obscene or nuisance telephone calls (no verbal threats stated in the calls), code 95 applies.

Threats where force was actually used, even if there was no injury, should be coded as assaults/sexual offences (code 11-13 or 31-35). Threats where the offender attempted to use force should be coded as attempted assault (code 21). Any threats that involved the use of a weapon should be coded as an attempted assault (code 21). Remember, however, that threats or force where something was stolen or an attempt was made to steal, should usually be coded as robbery/attempted robbery rather than threats or assault.

Possible codes

91 Threat to kill/assault made against but not necessarily to respondent
92 Sexual threat made against but not necessarily to respondent
93 Other threat or intimidation made against but not necessarily to respondent
94 Threats against others, made to the respondent
95 Obscene or nuisance phone calls
97 Threats/intimidation falling outside survey's coverage

**PRIORITIES**

- All other codes take precedence over the threat codes.
THREATS: NOTES FOR GUIDANCE

9A) Some threats may simply be against property; in this case **ThreaVio** may be answered ‘no’, and 
**WhoHarm** and **WhThrea** not completed. In this case, use **DescriInc** as the basis for selecting 
codes 93, 94 or 99.

9B) The survey can cover threats made to the respondent, but not necessarily against him (e.g. I will 
kill your wife). This is a code 94 (threats against others, made to respondent). If the threat is 
made merely to someone else (though, for example, the respondent overheard it), this would be 
outside the scope of the survey and would be coded 97.

9C) Code 93 (other threats or intimidation made against but not necessarily to the respondent) covers 
a range of threats. It will cover general abuse directed at the respondent, or a threat to damage a 
car or other property owned by the respondent. (However, if someone threatens damage that 
could do harm e.g. to burn down their house, this should be coded as a threat to kill/assault – code 
91).

Threats made to or against businesses (e.g. threatening to spit on the fruit outside the respondent’s 
shop) are out of scope and should be coded 97 (threats falling outside the survey’s coverage).

---

1 ACORN (A Classification of Residential Neighbourhoods) classifies households according to the demographic, employment and housing characteristics of the surrounding neighbourhood. Acorn was developed by CACI Ltd, through the use of cluster analysis of variables from the 1991 census. There are a total of 54 ACORN types from which 17 groups are constructed and from these 6 categories. (Further information about ACORN is available from CACI Ltd, CACI House, Kensington Village, Avonmore Road, London, W14 8TS)
13. Older people, less prosperous
14. Council Estates, better off
15. Council Estates, high unemployment
16. Council Estates, greatest hardship
17. Multi Ethnic low income

³ The ONS classification of areas was revised for authorities in 1999. The revised version of the classification was compiled using the same methodology and approach as for the original version, and the same 37 socio-economic and demographic variables from the 1991 National Census. The revised classification was necessary to reflect the new local and health authority boundaries in Great Britain at April 1999. The revision produced a different hierarchical structure hence there is little direct comparability with the results of the original classification. See “The ONS classification of local and health authorities of Great Britain: revised for authorities in 1999 for more details.

APPENDIX I

LIST OF CHECKS IMPLEMENTED IN THE QUANQUEST INTERVIEW PROGRAM

- Confirm correct area code, serial number, check digit and interviewer number have been entered by the interviewer.
- Confirm that valid day, month and year of interview has been entered.
- All dates must be entered in the format dd/mm/yy.
- Age taken drugs in self-completion drugs module must be consistent with household grid.
- For a MAIN SAMPLE address the number of adults living in the household should be the same as the number of ELIGIBLE adults recorded on the previous screen (NSelec).
- For a NON-WHITE SAMPLE address the number of adults living in the household cannot be LESS THAN the number of ELIGIBLE adults recorded on the previous screen (NSelec).
- For a NON-WHITE SAMPLE interview, respondent must be from a non-white group.
- For YOUTH interviews the total number of adults (nadults) must always be GREATER THAN the number of ELIGIBLE 16-24 YEAR OLDS recorded at NYouth. If the household only contains 16-24 year olds the interviewer should have selected one on the MAIN sample and should not be doing a YOUTH interview.
- Number of the person selected at pselec must not be greater than the number of adults recorded at nadults.
- Age of respondent for YOUTH interview must be 16-24.
- Marital status - only allow one spouse of respondent.
- Marital status - only allow spouse of respondent to be married.
- Marital status - only allow spouse of respondent to be of opposite sex to respondent.
- Marital status - only allow one cohabitee of the respondent.
- Must be one Household Reference Person per household.
- The number of people coded as cohabiting at question COHAB must be an even number.
- The number of people coded as married at question MARST must be an even number.
- Time lived at address cannot be greater than time lived in area.
- Time moved to address must be before date of interview.
- If there is a series, the number of separate incidents must be at least two less than the total number of incidents in the crime.
- The number of separate incidents cannot be greater than total number of incidents in the crime.
- Date of incident must be in the reference period. It must also be after date of any previous incident.
- A series must comprise of at least two incidents.
- Date of incident must not be after the interview date.
- The sum of the total number of incidents must be consistent with earlier answers.
- Number of series incidents occurring in each year quarter must not add up to more or less than the total number of incidents in the series.
- Month that incident took place must not be in the future.
• Number of codes used at AgeOff (How old the offenders were) must not be more than the number of offenders coded at NumOff
• Number of codes used at RaceOff (Race of offender) must not be more than the number of offenders coded at NumOff
• Number of codes used at OffRelat (Relationship of offender to respondent) must not be more than the number of offenders coded at NumOff
• Answers at V71 and V72 (initial question about what was stolen) must be consistent with Whatstol (more detailed question about what was stolen)
Appendix J

Question development and testing

J.1 Introduction and Aims

As part of the questionnaire development for the 2001 British Crime Survey (BCS) the Home Office asked BMRB Social Research to carry out a programme of research to:

- test the impact of wording changes to existing questions
- develop questions on new topics
- conduct a ‘Dress Rehearsal’ to test new operating systems prior to the survey going live.

This appendix summarises the findings of the programme of question testing.

The following question areas were included in the testing programme:

- Use of Life Events Calendar
- Opinions of Police
- Priorities for the Police
- Effectiveness of the Criminal Justice System
- Administration of the courts
- Perception and opinions of sentencing decisions
- Personal/ home security features
- Questions about community
- Questions about vehicle driving behaviour

Following these two phases of cognitive testing a full dress-rehearsal pilot of the survey took place in November/ December 2000. This dress rehearsal is discussed in section J.4.

J.2 Question testing for BCS 2001

Question testing was carried out in October and November 2000, and consisted of two phases. This strategy enabled a relatively large number of questions to be tested, as well as enabling some testing of questions modified as a result of findings from the first phase.

Cognitive interviews were carried out by specially trained BMRB interviewers who were each accompanied by a BMRB researcher. Five interviewers worked on the two phases of testing. For the first phase interviewers attended a half-day personal briefing, which covered the following:

- Background information about the BCS and the purpose of the cognitive interviewing
- Recruitment of respondents
- Information about the content of the questionnaire
- Information required at the debriefing
As the same interviewers who had worked on phase one worked on phase two, and there were only a few days between the phase one de brief and the start of phase two, it was not felt necessary to re-brief them in person. Rather, materials were sent by post, which included detailed instructions on the requirements for the second phase of testing. A face-to-face debriefing session took place at the end of the second phase, which was attended by researchers from the Home Office.

In both phases, retrospective probing was used to explore the ways in which respondents understood the questions and came up with their answers. Respondents were asked a series of survey questions on a particular topic, followed by in-depth probing on specific points of interest - for example, how an answer was arrived at and respondents' understanding of key words and phrases used in particular questions. The survey questions, recruitment questionnaire and follow up probes used in both phases of cognitive testing are included at the end of this Appendix.

Interviewers were given broad quotas to fulfil based on age, sex and ethnic origin. In phase one a total of 16 respondents were interviewed.

The second phase of cognitive testing took place two weeks later, and contained questions modified as a result of the feedback from phase one as well as previously untested questions. In total 16 respondents were interviewed in this phase.

Interviews took place in respondents' own homes, and lasted around an hour. Respondents were paid £20 as a token of appreciation for agreeing to take part. Analysis was based on a combination of researcher summaries and comments made at the debriefing session, which took place after each phase of testing.

J.3 Results of cognitive testing

The following sections describe the findings of the cognitive testing of questions for the 2001 British Crime Survey (BCS), and any recommended wording or question-format changes.

A. LIFE EVENT CALENDAR

Comments

In round 1 of the pilot, interviewers were required to complete the landmark events on the calendar based for all victims. This procedure proved to be relatively time consuming and, in many cases, was felt to be unnecessary when respondents were sure about the date of the incident or incidents. Consequently in round 2 it was decided to allow a degree of interviewer discretion in the completing of the landmark events. Only where the respondent showed hesitation or was obviously unsure about the precise month was the interviewer asked to complete the landmark events. In all other cases, the calendar was retained simply as a visual aid for respondents to use. It was also felt that actually marking on each incident on the calendar was a useful way for interviewers to confirm the date. In round 2 of the pilot it was felt that the calendar might be especially useful for the small minority of respondents who report a series of events and who have
then to sort out the series pattern. This suggested that an additional interviewer instruction would be useful at both SepDates and Latest to remind interviewers to use the calendar if needed and this suggestion was implemented.

Round 1 of the pilot also suggested that there were design faults with the calendar. Most importantly, it was felt that the 12 month reference period needed to be clear and not to go over the page as occurred with the design. Additionally, it was felt that the calendar was overly complex and the inclusion of actual week dates (when only month is required) was confusing. Consequently, in round 2 the calendar was simplified. Round 2 suggested that the new design worked better but a few more minor design issues needed to be incorporated into the final calendar.

**Recommendations**

- Introduce the calendar as a visual aid to all (type B) respondents immediately before the first introductory screener. For type B interviews the wording of the introductory screeners to household crimes (IntroV2) and to personal crimes (PersExp2) was amended to stress various points.

**IntroCal [ASK ALL TYPE B]**

SHOW RESPONDENT LIFE EVENTS CALENDAR

Before asking you about crimes or incidents that may have happened to you over the last 12 months I’d like to give you a calendar. I’d like you to keep this in front of you when answering the next part of the interview. If at any stage you’re unsure about whether or not something happened in the last 12 months you may find that looking at the calendar will help prompt your memory.

INTERVIEWER: MARK OFF THE CORRECT 12 MONTH REFERENCE PERIOD ON THE CALENDAR, THAT IS SINCE THE FIRST OF [^DATE^], AND HAND TO RESPONDENT

1. Continue

**IntroV2 [ASK ALL TYPE B]**

I’m now going to ask you about things that may have happened over the last 12 months, that is since the first of [^DATE^], in which you may have been the victim of a crime or offence. I only want to know about things that have happened in the period marked on the calendar. This doesn’t mean that crimes that may have happened before this time are unimportant but we want to build a picture of just the last 12 months so we can measure how people’s experience of crime changes from one year to the next.
I’m only concerned with incidents that have happened to YOU PERSONALLY [or to people who are NOW members of your household]. I don’t just want to know about serious incidents – I want to know about small things too.

1. Continue

PersExp2 [ASK ALL TYPE B]

The next few questions are about things that may have happened to you PERSONALLY [not the other people in your household] over the last 12 months, since the first of ["DATE"], in which you may have been the victim of a crime or offence. Again, I only want to know about things that have happened in the period marked on the calendar so we can build a picture of crime in just the last 12 months.

Please include anything that happened to you during that time – at home, in the street, at work, in a shop, in a park, on a train or anywhere else.

1. Continue

- At both SepDates and Latest an additional simple interviewer reminder will be introduced on screen.

SepDates [ASK IF (Nmix <= NumSep)]

Can we now think about the separate incidents of [type of crime], that is, those incidents which were NOT part of the series. Can you tell me the date (DAY/MONTH/YEAR) of the [earliest/second/etc] separate incident of [type of crime]?
IF DON’T KNOW, PLEASE ESTIMATE
FIRST = EARLIEST, SECOND = NEXT AFTER THAT ETC.
[INTERVIEWER: IF RESPONDENT IS NOT SURE USING THE CALENDAR MAY HELP]

Latest [ASK IF AllPart=Mix]

Could you tell me the date of the most recent incident in the series?
IF DON’T KNOW, PLEASE ESTIMATE.
[INTERVIEWER: IF RESPONDENT IS NOT SURE USING THE CALENDAR MAY HELP]

- Introduce an additional screener at the start of the Victim Form which again reminds respondents about the calendar and instructs interviewers to mark the date of the crime on the calendar and what to do if the respondent is having difficulty.
MarkCal  [ASK ALL TYPE B]

I now want to ask you about when the incident(s) you have just mentioned happened during the last 12 months. I’d like to mark on the calendar the date of each incident.

INTERVIEWER: FOR EACH CRIME MARK ON THE CALENDAR THE DATE WHEN IT OCCURRED. THIS ONLY NEEDS TO BE ESTIMATED TO THE CLOSEST MONTH

IF THE RESPONDENT IS HAVING DIFFICULTY REMEMBERING THE EXACT MONTH YOU MAY FIND IT USEFUL TO MARK SOME OTHER LANDMARK DATES ON THE CALENDAR (E.G. BIRTHDAY, ANNIVERSARIES, ETC.) WHICH CAN BE USED AS REFERENCE POINTS. EXAMPLES OF SUCH EVENTS OR PERIODS CAN BE FOUND ON THE FRONT PAGE OF THE CALENDAR.

1. Continue
B. NEW QUESTIONS

1. PersView, GenView

Comments

These questions worked fine in both round 1 and round 2.

Recommended questions

SHOW CARD
Overall, which of the statements on this card best describes how you PERSONALLY view the police?

1. I view them with great respect
2. I view them with respect
3. I view them with neither respect nor disrespect
4. I view them with disrespect
5. I view them with great disrespect

SHOW CARD
And which of the statements on this card best describes how you think the police are viewed by society today?

1. Viewed with great respect
2. Viewed with respect
3. Viewed with neither respect nor disrespect
4. Viewed with disrespect
5. Viewed with great disrespect

2. FamJoin

Comments

In round 1 this question was prompted with a list of words (Enthusiastic, Supportive, Concerned for their safety, Disapproving). It was felt that this list was relatively narrow and so in round 2 the question was asked as an open question. This generated a variety of other words (worthwhile career, pleased for them, happy, worried about racist abuse they might receive, etc). However, all of the additional words generated seem to basically fall into whether a respondent has a broadly favourable impression or a broadly unfavourable impression of someone joining the police. If the essence of the question is to see whether people have a positive or negative view of the police then we recommend that the question be simplified to this basic idea. Asking for specific emotions would not seem to add anything.
Recommended question

SHOW CARD
Which of the phrases on this card would best describe how you would feel if a member of your family or a close friend were interested in joining the police?

1. Strongly approve
2. Tend to approve
3. Neither approve or disapprove
4. Tend to disapprove
5. Strongly disapprove

3. PolTask1-PolTask3

Comments

This question worked reasonably well in both rounds and needs little amendment. We believe that the format in which the question was asked in the pilot is preferable to a single question that asks respondents to rank their top three in order of priority. The latter format tends to encourage respondents to give answers in the order they appear on the card rather than in rank order.

We would recommend using the wording at Code 4 used in round 1 of the pilot (i.e. Patrolling on foot). We would also recommend deleting code 6 since this seems to overlap with code 3 and cause respondents some confusion.

Suggested questions

PolTask1  [ASK ALL]

SHOW CARD
On this card are some things that the police are asked to do. Which of these do you think is the MOST important thing the police have to do?

1. Giving crime prevention advice
2. Responding to emergency calls
3. Detecting and arresting offenders
4. Patrolling on foot
5. Patrolling in cars
6. Providing help and support to victims of crime
7. Using CCTV to monitor public areas
8. Policing traffic
9. Work with schools and young people

PolTask2  [ASK ALL]

SHOW CARD
And which of these do you think is the next most important thing the police have to do?
1. Giving crime prevention advice
2. Responding to emergency calls
3. Detecting and arresting offenders
4. Patrolling on foot
5. Patrolling in cars
6. Providing help and support to victims of crime
7. Using CCTV to monitor public areas
8. Policing traffic
9. Work with schools and young people

**PolTask3 [ASK ALL]**

SHOW CARD
And which do you think is the next most important thing?

1. Giving crime prevention advice
2. Responding to emergency calls
3. Detecting and arresting offenders
4. Patrolling on foot
5. Patrolling in cars
6. Providing help and support to victims of crime
7. Using CCTV to monitor public areas
8. Policing traffic
9. Work with schools and young people

**4. PolPri**

In round 1 of the pilot respondents were asked to rank crimes on a scale of 1 (low priority) to 7 (high priority). Respondents had trouble understanding this unlabelled scale and tended to rank all crimes towards the high priority end of the scale. Randomisation meant that the ranking of the first crime strongly influenced what the respondent said for subsequent crimes. The result was that the scale produced little discrimination, with all offences being given a high ranking.

In round 2 we asked respondents to rank the top three crimes in order of priority. Two lists were presented – one containing ‘more serious’ crimes and one containing ‘less serious’ crimes.

Although the second round of piloting was more successful than the first round, we felt that respondents were tending to give their answers in the order on they appeared on the card, rather than in rank order.

To overcome this we recommend firstly asking respondents about the top three crimes (without ranking) that police should give priority to and secondly asking them to rank the three answers just given.
Suggested questions

**PolPri1** [ASK ALL]

SHOW CARD
The police have to deal with a number of different types of crime and the time they have is limited. From the crimes listed on this card which THREE crimes do you think the police in your local area should give priority to tackling? CODE UP TO 3

SET [8] OF
1. Burglary
2. Sex crimes/sexual assaults
3. Drug dealing
4. Muggings/street robberies
5. Assault
6. Racial attacks/abuse
7. Domestic violence
8. Taking drugs
9. None of these
10. All should be priority

**PolPri2** [ASK IF PolPri1 IN (1..8) and more than one answer given at PolPri1]

And which of the crimes you have just mentioned do you think the police in your local area should give HIGHEST priority to?

Only show answer codes given at PolPri1

**PolPri3** [ASK IF PolPri1 IN (1..8) and more than two answers given at PolPri1]

And which do you think they should give next highest priority to?

Only show answer codes given at PolPri1, but not at Polpri2

[Notes: By process of elimination the third priority can be derived, and does not need to be asked. In round 1 the question referred to police in your local area, but this was lost in round 2. Need to clarify whether it is ‘the police in your local area’ or just ‘the police’]

Although we feel this is the preferred solution, we are concerned that asking the question twice will be time consuming in what is already a long module. We feel a split sample would not be appropriate since those asked the ‘less serious’ crime list are likely to be puzzled by it or are more likely to give ‘None of these’ as an answer. Although this question is about the police we feel it is not directly linked to any of the other questions in FUA. One possibility may be to move both questions to FUD, which is currently a lot shorter than FUA. The question would potentially fit well with others such as SocProb and AreaPrev and would allow analysis of how people’s priorities are influenced by the situation in their local area.
5. **PolDesc**

In round 1 of the pilot we used cards with pairs of opposite words on a scale from 1 to 7 and asked respondents to give a number for how each word applied to police officers. Respondents found the scale confusing. Additionally, using 10 word pairs made the question extremely long. In round 2, respondents were given 6 words (3 positive, 3 negative) and asked to rank them on a labelled scale of 1-5.

Although this question worked better in round 2 compared with round 1 we still do not believe that the question is giving any useful information. In round 2, there was a definite tendency for respondents to say ‘Most of the time’ for the positive words and ‘Some of the time’ for the negative words. In terms of the individual words, ‘Intelligent’ seemed inappropriate and ‘Behind the times’ was misunderstood by some respondents (who thought that it meant the police were always late).

Our recommendation is that this type of information can be more usefully gathered through qualitative research. We believe it has little value on the BCS and would recommend dropping this question.

6. **CJSEff1, CJSEff2**

Comments

These questions worked fine in round 1 and were not piloted in round 2

**Suggested questions**

**SHOW CARD**

Thinking about the Criminal Justice System as a whole, that is, the police, courts, prison and probation services, please choose a phrase from this card to show how effective you think it is in reducing crime?

1. Very effective
2. Fairly effective
3. Not very effective
4. Not at all effective

**CJSEff2** [ASK ALL]

**SHOW CARD**

And how effective do you think it is in dealing with young people accused of crime?
1. Very effective
2. Fairly effective
3. Not very effective
4. Not at all effective

7. CrtAdm1-CrtAdm2 (JobAdlt in round 2)

In round 1 of the pilot, separate questions were asked about the administration of the magistrates’ court, the Crown Courts and the adult courts. It was clear that respondents had little or no understanding of what was meant by ‘the administration of the courts’ and had only a vague notion of the difference between the magistrates’ courts and the Crown Courts. In round 2, the question was simplified to ask about the adult courts in general, without specific mention of their administration. The question was also placed in the context of other questions that have been asked on previous surveys.

Although we feel that this question worked better as part of the series of questions, we remain doubtful about whether respondents fully understand the meaning of this question and are, therefore, giving considered responses. The term ‘adult courts’ clearly does not have the same currency as the term ‘juvenile courts’. If required, we feel the best option is to adopt the question used in round 2 of the pilot and put it immediately after the question relating to the juvenile courts.

Suggested question

SHOW CARD
How good a job do you think the adult courts are doing? By the adult courts I mean both the magistrates’ courts and the Crown Courts?

1. Excellent
2. Good
3. Fair
4. Poor
5. Very poor

8. NBurgPM, NBurgPF

Comments

These questions worked fine in round 1 of the pilot and were not piloted in round 2

Recommended questions

NBurgPM  [ASK ALL]

Thinking about house burglary. Out of every 100 MEN aged 21 or over who are convicted of house burglary, how many do you think are sent to prison?
0..100

**NburgPF** [ASK ALL]

And, out of every 100 WOMEN aged 21 or over who are convicted of house burglary, how many do you think are sent to prison?

0..100

9. **NGuilty1-NGuilty4**

In round 1 of the pilot we felt that respondents were missing the basic premise that both people were innocent. In round 2 the questions were slightly re-worded to increase the stress on innocence.

Although the questions seemed to flow better in round 2 we remain doubtful about whether respondents actually appreciated and understood the scenario they were presented with. In particular, we feel the notion of innocence is still being missed. We believe that the question that most respondents actually respond to is “Suppose two people – one man, one woman – each appear in court charged with the same crime. Who do you think is most likely to be found guilty? Do you think...?”

At the moment the proposal is to adopt a split sample with NGuilty1-4 and Guilty1-4. In light of the pilot, we recommend that Guilty1-4 should be asked of the whole sample since this seems to be easier for respondents to understand.

10. **Guilty1-Guilty4**

As with round 1, this question seemed to work better in round 2 since it is a simpler concept for respondents to understand. In round 2, some respondents were presented with this set of questions before NGuilty1-4 to ensure there was no order effect. However, this seemed to make little difference to respondent understanding.

It was noticeable that the black/white comparison was more problematic for some respondents to answer than the other pairs. We would suggest moving this to be the fourth of the paired comparisons.

**Recommended questions**

**Guilty1 [ASK ALL]**

Suppose two people – one man, one woman – were each found guilty of the same crime at court. Who do you think would receive the **tougther sentence**? Do you think...READ OUT

1. the man would receive the tougher sentence
2. they would receive the same sentence
3. or the woman would receive the tougher sentence?
4. DO NOT READ OUT: It depends (on the court/on the judge/on the jury/etc.)

Guilty2 [ASK ALL]

Now suppose another two people – one aged under 18, one aged over 18 – were each found guilty of the same crime at court. Who do you think who receive the tougher sentence? Do you think…READ OUT

1. the younger person would receive the tougher sentence
2. they would receive the same sentence
3. or the older person would receive the tougher sentence?
4. DO NOT READ OUT: It depends (on the court/on the judge/on the jury/etc.)

Guilty3 [ASK ALL]

Now suppose another two people from different backgrounds – one rich, one poor – were each found guilty of the same crime at court. Who do you think who receive the tougher sentence? Do you think…READ OUT

1. the richer person would receive the tougher sentence
2. they would receive the same sentence
3. or the poorer person would receive the tougher sentence?
4. DO NOT READ OUT: It depends (on the court/on the judge/on the jury/etc.)

Guilty4 [ASK ALL]

Now suppose another two people – one white, one black – were each found guilty of the same crime at court. Who do you think would receive the tougher sentence? Do you think…READ OUT

1. the white person would receive the tougher sentence
2. they would receive the same sentence
3. or the black person would receive the tougher sentence?
5. DO NOT READ OUT: It depends (on the court/on the judge/on the jury/etc.)
11. **TypSentC, TypSentD**

*Comments*

In round 1 of the pilot, the questions were ordered to ask about ‘should have received’ and then ‘actually received’. In round 2, the ordering of the questions was reversed. Additionally, in round 2 a longer preamble was added so that respondents were aware up front of what they were going to be asked. We feel that both these changes were positive and allowed respondents to give a more considered response to the questions. We feel it is too complicated to expect respondents to actually rank sentences and recommend that the question is simply CODE ALL THAT APPLY. Our belief is that the majority of respondents will only give one answer at this question.

Although we feel the structure of the question is working, we feel there is a case for re-examining the scenario used. The scenario is perhaps too long for respondents to take in. Probing found, for example, that no respondents remembered the last two points – about a high risk of re-offending or about showing remorse. Answers were, therefore, given on the basis of the first bit of information, and nearly all respondents gave ‘prison sentence’ as the sentence that should have been received. We believe the scenario may be too extreme to ensure a range of responses.

We also feel it is essential (for both scenarios) that interviewers know what the actual sentence imposed was since respondents will ask and will expect the interviewer to know.

**Recommended questions**

**TypSentI [ASK ALL]**

SHOWCARD
I am now going to ask you to read a card containing details of an actual crime that went to court. I will then ask you what sentence you think the offender was ACTUALLY given, and then what sentence you think the offender SHOULD have been given. Please let me know when you have finished reading the card.

INTERVIEWER : ALLOW RESPONDENT TIME TO READ SHOW CARD PROPERLY THEN CONTINUE

1. Continue

On card only (not on screen)
A man aged 23 was convicted of wounding a man in a wine bar in an unprovoked attack. He pushed a pint glass into the victim’s face causing cuts that needed 44 stitches and resulted in permanent scarring. He had seven previous convictions, including threatening behaviour and assault. The man is considered to be at high risk of re-offending. He has subsequently shown remorse for his actions.

**TypeSentC0-**
There are a number of possible sentences which could be imposed in this case. Which type, or types, of sentence do you think the offender ACTUALLY RECEIVED?

1. Conditional discharge
2. Have to pay compensation
3. Fine
4. Probation
5. Community service order
6. Electronic tagging
7. Imprisonment
8. Other

And how long do you think the prison sentence was?

1. In years only
2. In months only
3. In years and months

INTERVIEWER: RECORD LENGTH OF SENTENCE RECEIVED RATHER THAN LENGTH OF SENTENCE SERVED

CODE NUMBER OF YEARS
0…30

CODE NUMBER OF MONTHS
0…30
**TypSentD7** [ASK ALL]

SHOW CARD
And which type, or types, of punishment do you think the offender SHOULD HAVE RECEIVED? CODE ALL THAT APPLY  SET [8] OF

1. Conditional discharge
2. Have to pay compensation
3. Fine
4. Probation
5. Community service order
6. Electronic tagging
7. Imprisonment
8. Other

**TypSntDO** [ASK IF (Other IN TypSentD)]

INTERVIEWER: RECORD OTHER ANSWER GIVEN

**PrSentD** [ASK IF (ANY TypSntDO TO TypSntD7=Imprisonment)]

And how long do you think the prison sentence should have been?
INTERVIEWER: RECORD LENGTH OF SENTENCE RECEIVED RATHER THAN LENGTH OF SENTENCE SERVED

1. In years only
2. In months only
3. In years and months

**PrSentDY** [ASK IF PrSentD= Year only OR Years and months]

CODE NUMBER OF YEARS
0…30

**PrSentDM** [ASK IF PrSentD = Months only OR Years and months]

CODE NUMBER OF MONTHS
0…30
12. CJSVICT1-CJSVICT5

Comments

In both round 1 and round 2 these questions were asked in the same format. In round 2 the pre-amble was slightly shortened.

We remain unconvinced that respondents understand the basic premise behind these questions. Most respondents understand little about the procedures in court and, for example, have difficulty understanding who the prosecuting lawyer actually represents. Indeed, we believe that respondents are clearly misinterpreting some of the questions (especially the question about victim’s having a qualified lawyer) and are, therefore, giving potentially misleading responses. Although it would be possible to consider redrafting the questions we believe the problem is one of basic respondent understanding/misunderstanding and redrafting the questions will be of limited use. We would recommend that these questions are dropped.

13. Daychain, Nitchain, Viewer, UseView, Idcard

Comments

These questions all worked well in round 1 and were not piloted in round 2.

Recommended questions

Daychain [ASK IF CHAINS =1 or CHAINS=2]

SHOW CARD
Thinking about when you are in the house during the DAY, how regularly would you say the security chain is on?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
6. SPONTANEOUS Not applicable – Never at home during the day

Nitchain [ASK IF CHAINS =1 or CHAINS = 2]

SHOW CARD
And thinking about when you are in the house during the EVENING or at NIGHT, how regularly would you say the security chain is on?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
6. SPONTANEOUS Not applicable – Never at home in the evening/at night

Viewer [ASK ALL]

Do you have a security viewer in the doors into your home so you can see who is at the door before opening it?

1. Yes - on all
2. Yes - on some
3. No – not necessary as have glass in doors
4. No

Useview [ASK ALL]

SHOW CARD
When someone calls at your home, do you check to see if you recognise the person calling before fully opening the door? For example, by looking through a window, a security viewer in the door, through the letterbox, or by using a security chain.

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never

Idcard [ASK ALL]

SHOW CARD
When an official calls at your door, for example someone from the gas, electricity or water companies or a police officer do you check their identity card or documentation before allowing them to enter?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
14. Secyear, Whysecy, Ynosecy

Comments

These questions worked fine in round 1 and were not piloted in round 2.

Recommended questions

SecYear0- [ASK ALL FUC]
SecYear9

SHOW CARD C3
Since [the first of January 2000/the first of ^DATE^] have you done any of the following things on this card? CODE ALL THAT APPLY SET [10] OF

1. Installed a burglar alarm
2. Installed a dummy alarm
3. Fitted double locks or deadlocks on outside doors into home
4. Fitted security chains on the doors into your home
5. Fitted window locks
6. Fitted indoor timer or sensor lights
7. Fitted outdoor timer or sensor lights
8. Fitted bars or grilles to windows
9. Security marked household property
10. Made other security improvements (specify)
11. None of these

XOthsecy [ASK IF “other security improvement” IN SecYear]

INTERVIEWER: Record other security improvement

Ysecyr0- [ASK IF ANY 1-10 IN SecYear]

Ysecyr9

And what were the main reasons you decided to improve your home security during [the last 13 to 14 months /the last 12 months]? DO NOT READ OUT. CODE ALL THAT APPLY SET [10] OF

1. Own home was burgled
2. Friend’s/relative’s home was burgled
3. Neighbour’s home was burgled
4. General increase in burglaries in local area
5. Home was going to be left empty (e.g., going on holiday)
6. To reduce insurance premiums
7. Advice from police/crime prevention officer
8. Advice in leaflets, papers, or on TV, radio or internet
9. Adverts/contacted by commercial businesses selling security devices
10. Other reason (specify)
11. None of these

**XYSecyr**  [ASK IF OTHER REASON IN WHYSECYR]

INTERVIEWER: Record other answer.

**Ynosecy0-**  [ASK IF SECYEAR=11, NONE OF THESE]

**Ynosecy6**

You say that you have not made any home security improvements since [the first of January 2000/the first of ^DATE^]. Why is this? DO NOT READ OUT. CODE ALL THAT APPLY SET [7] OF

1. Home already as secure as it can be
2. Don’t think home is at risk
3. Security measures are too expensive
4. Haven’t got around to it yet
5. Can’t be bothered
6. Home is rented (security is responsibility of landlord)
7. Other reason (specify)

**XYNoSecy**  [ASK IF OTHER REASON IN YNOSECYR]

INTERVIEWER: Record other answer.

15. **LocArea, SocProb1, SocProb2, AreaPrev**

**Comments**

These questions all worked fine in round 1 and were not piloted in round 2

**Recommended questions**

**LocArea0-**  [ASK ALL]

**LocARea7**

SHOW CARD P13

I would now like to ask you some questions about your local area. By area, I mean within a 15 minute walk from your home. Choosing an answer from this card please indicate how much you agree or disagree with each of the following statements about your area.

1. Strongly agree
2. Tend to agree
3. Neither agree or disagree
4. Tend to disagree
5. Strongly disagree

**ATTITUDE STATEMENTS [RANDOMISED]**

A. This area has a close, tight knit community
B. This area is a friendly place to live
C. This area is a place where local people look after each other
D. Most people who live in this area trust one another
E. You often see strangers in this area
F. I would be happy asking certain local people to keep an eye on my house and property
G. The people who live here can be relied upon to call the police if someone is acting suspiciously
H. If any of the children/young people around here are causing trouble, local people will tell them off

**SocProb1 [ASK ALL]**

SHOW CARD
Looking at this card, which of these social issues would you say is the **biggest** problem in your area at the moment?
1. Unemployment
2. Crime
3. Provision of public transport
4. Drug misuse
5. Standards of housing
6. Provision of health services
7. Provision of education services
8. Lack of local amenities
9. Poverty
10. Racial abuse/attacks
11. Lack of facilities for young people
12. None of these
13. Don’t know

**SocProb2 [ASK IF SocProb1 IN(1..11)]**

SHOW CARD
And which would you say is the next biggest problem?
1. Unemployment
2. Crime
3. Provision of public transport
4. Drug misuse
5. Standards of housing
6. Provision of health services
7. Provision of education services
8. Lack of local amenities
9. Poverty
10. Racial abuse/attacks
11. Lack of facilities for young people
12. None of these
13. Don’t know

AreaPrev [ASK ALL]

SHOW CARD
This card lists some ideas for helping to prevent crime. Which one do you personally think would be most effective in reducing crime in your area?

1. Reduce unemployment
2. Less violence and crime on television
3. Mobile police stations
4. People making their property more secure
5. More CCTV
6. Parents taking responsibility for their children’s actions
7. More schemes like Neighbourhood Watch
8. Send more offenders to prison
9. Firmer discipline in schools
10. More police on the beat

16. LocAct

Comments

This question worked reasonably well, although it is not clear to respondents what was meant by a local problem. Many local authority tenants reported that they had contacted the local council in order to sort out maintenance problems. We are unclear whether the question is intended to refer specifically to crime and disorder problems or to all social problems (e.g. problems with the local schools, traffic problems, etc.). The intention of the question needs to be clarified and dealt with either through question re-wording, interviewer note, or through interviewer instructions.

Recommended question

LocAct0- [ASK ALL]

LocAct5

SHOW CARD
[During the last 13-14 months since the first of January 2001/In the last 12 months, that is since the first of ^DATE^], have you taken any of the following actions in an attempt to solve a local problem?
CODE ALL THAT APPLY SET [6] OF

1. Written to a local newspaper
2. Contacted the appropriate organisation to deal with the problem, e.g. council
3. Contacted a local councillor or MP
4. Attended a public meeting or neighbourhood forum to discuss local issues
5. Attended a tenants or local residents group
6. Attended a protest meeting or joined an action group
7. SPONTANEOUS Thought about it but did not do anything
8. None of these

17. CarBeha

Comments

In round 1 of the pilot this question used a 1(acceptable) to 7(unacceptable) scale. Like the other scales this was not easily understood by respondents. In round 2, a 5 point labelled scale was used. This worked a lot better although we do not believe that the scale results in a great deal of differentiation. Specifically, there was still a tendency towards the top end of the scale for all behaviours and we believe the range of responses is likely to be across codes 3-5. Nevertheless, we believe the question used in round 2 is workable given the above reservations.

Recommended question

CarBeha0- \[ASK ALL\] CarBeha9

SHOW CARD
I am going to read out a list of behaviours related to driving. Choosing a phrase from this card I would like you to tell me how wrong you think each behaviour is.

1. Not at all wrong
2. A bit wrong
3. Wrong
4. Seriously wrong
5. Very seriously wrong

BEHAVIOUR STATEMENTS [RANDOMISED]

A. Driving without motor insurance
B. Using a hand held mobile phone whilst driving
C. Drinking and driving after two pints of beer
D. Not wearing a rear seat belt in the back of a car
E. Driving at 40 miles per hour in a 30 miles per hour zone
F. Parking on double yellow lines
G. Carrying on driving when tired
H. Riding in a car with a driver who has consumed two pints of beer
I. Parking in a disabled bay without a valid badge
J. Driving without a valid driving licence
18. SpeedBeh

Comments

This question worked fine although we believe there is an inconsistency between the question wording and the answer codes. If the question is phrased as ‘ALWAYS’, then the answer codes should be Yes/No (since Depends must be No)

Recommended question

SpeedBeh [ASK IF 3-5FOR “driving at 40 mph in a 30 mph zone” ABOVE]
Do you think that the police should always prosecute those who drive at 40 miles per hour in a 30 miles per hour zone?
INTERVIEWER: IF RESPONDENT SAYS IT DEPENDS CODE AS NO
1. Yes
2. No

J.4 Dress Rehearsal

As 2001 was the first time that the survey has been carried out jointly by BMRB and Ipsos-RSL, and the first time it has been conducted using our interviewing software (in Quantum) it was felt that it was important conduct a dress rehearsal, a small scale run through of the survey.

During this stage all aspects of the survey were tested - the advanced letters, questionnaire, show cards, address contact sheets, sample procedures, coding, editing, the fieldwork monitoring, and interviewers and coders were encouraged to feedback their views on the procedures.

Interviewers were briefed on 23 November and dress rehearsal fieldwork took place between 27 November and 2 December. A debriefing of interviewers took place on 5 December.

For the Dress Rehearsal there was a target of achieving 160 interviews across 14 areas, meaning that each area needed to achieve at least 12 interviews. As part of the field assignment the screening procedures for non-white screening was also tested.

BMRB achieved 78 interviews for the dress rehearsal, Ipsos-RSL achieved 76.
Good morning/afternoon/evening. My name is [_________] and I am from the British Market Research Bureau. We are currently conducting a study regarding people’s life experiences.

Please be assured that in accordance with the Market Research Society Code of Conduct, all your answers would be treated in the strictest of confidence.

FOLLOW UP MODULE FOR PILOT

GenIntro  [ASK ALL]

I’d now like to ask you a number of questions relating to crime, policing, the
criminal justice system, and crime prevention. I’d like to start by asking you a
few questions about the police.

PersView  [ASK ALL]

SHOW CARD P1
Overall, which of the following statements best describes how you personally
view the police?

1. I view them with great respect
2. I view them with respect
3. I view them with neither respect nor disrespect
4. I view them with disrespect
5. I view them with great disrespect

GenView  [ASK ALL]

SHOW CARD P2
And which of the following statements best describes how you think the police
are viewed by society today?

1. Viewed with great respect
2. Viewed with respect
3. Viewed with neither respect nor disrespect
4. Viewed with disrespect
5. Viewed with great disrespect

FamJoin0-  [ASK ALL]
FamJoin3

SHOW CARD P3
Looking at this card, please tell me which of these words and phrases would best
match how you would feel if a member of your family or a close friend was
interested in joining the police? CODE ALL THAT APPLY
SET OF [4]

1. Enthusiastic
2. Supportive
3. Concerned about their safety
4. Disapproving
5. None of these
SHOW CARD P4
On this card are some things that the police are asked to do. Which of these do you think is the most important thing the police has to do?

1. Giving crime prevention advice
2. Responding to emergency calls
3. Detecting and arresting offenders
4. Patrolling on foot
5. Patrolling in cars
6. Investigating crimes
7. Providing help and support to victims of crime
8. Using CCTV to monitor public areas
9. Policing traffic
10. Work with schools and young people

SHOW CARD P4
And which of these do you think is the next most important thing the police has to do?

1. Giving crime prevention advice
2. Responding to emergency calls
3. Detecting and arresting offenders
4. Patrolling on foot
5. Patrolling in cars
6. Investigating crimes
7. Providing help and support to victims of crime
8. Using CCTV to monitor public areas
9. Policing traffic
10. Work with schools and young people
SHOW CARD P4
And which do you think is the next most important thing?

1. Giving crime prevention advice
2. Responding to emergency calls
3. Detecting and arresting offenders
4. Patrolling on foot
5. Patrolling in cars
6. Investigating crimes
7. Providing help and support to victims of crime
8. Using CCTV to monitor public areas
9. Policing traffic
10. Work with schools and young people

SHOW CARD P5
I am going to read out a number of different types of offence. I would like you to give me a number between 1 and 7 to show what priority you think the police in your area should give to tackling each offence. A score of 1 means you think the police should give a low priority to dealing with the crime and a score of 7 means you think the police should give a high priority to dealing with the crime.

1. Low priority
2.
3.
4.
5.
6.
7. High priority

OFFENCE LIST
1. Burglary
2. Vehicles being stolen/joyriding
3. Racial attacks/abuse
4. Drink driving
5. Speeding
6. Assault
7. Drug dealing
8. Muggings/ street robbery
9. Vandalism
10. Taking drugs
PolDesc  [ASK ALL]

The following cards each contain a scale of 1 to 7, with a word that might be used to describe police officers at each end. For each show card, I would like you to give me a number from 1 to 7, which most closely matches YOUR view of police officers.

IF NECESSARY: We want to know your views of police officers, given your previous experience. We do NOT want to know what you think police officers SHOULD be like.

4. or the older person would receive the tougher sentence?
5. DO NOT READ OUT : It depends (on the court/on the judge/on the jury/etc.)
6. Don’t know

TypSentC0-  [ASK ALL]

TypSentC7

SHOWCARD P9a
A man aged 23 was convicted of wounding a man in a wine bar. In an unprovoked attack, he pushed a pint glass into the victim’s face causing cuts to his face that needed 44 stitches and resulted in permanent scarring. He had seven less serious previous convictions, including using threatening words and behaviour and two assaults. The man is considered to be at high risk of re-offending. He has subsequently shown remorse for his actions.

ALLOW RESPONDENT TIME TO READ SHOW CARD PROPERLY, THEN ASK:

SHOW CARD P9b
There are a number of possible sentences which could be imposed in this case. Which type, or types, of sentence do you think the offender should receive? DO NOT PROMPT. RECORD EACH MENTIONED IN ORDER (UP TO 8 MENTIONS). CODE ALL THAT APPLY
1. Conditional discharge
2. Have to pay compensation
3. Fine
4. Probation
5. Community service order
6. Electronic tagging
7. Imprisonment
8. Other

**TypSntCO** [ASK If (Other IN TypSentC)]

INTERVIEWER: RECORD OTHER ANSWER GIVEN

**PrSentC** [ASK IF (ANY TypSntC0 TO TypSntC7=Imprisonment)]

How long do you think the prison sentence should be?

1. In years only
2. In months only
3. In years and months

**PrSentCY** [ASK IF PrSentC = Year only OR Years and months]

CODE NUMBER OF YEARS
0...30

**PrSentCM** [ASK IF PrSentC = Months only OR Years and months]

CODE NUMBER OF MONTHS

CODE NUMBER OF MONTHS
0...30

**CJSVctI**  [ASK ALL]

INTERVIEWER: READ OUT
Lawyers who prosecute people accused of committing crimes act on behalf of the State in court proceedings. They do not act on behalf of the victim, though they do have to carefully consider the interests of victims. Before court proceedings begin, victims can expect to be told what will happen, and they can be accompanied by friends or relatives if they choose to attend.

**CJSVctI**  [ASK ALL]

SHOW CARD P10
In view of this, how important do you think it is that victims should be invited to attend court even if they do not have to give evidence?

1. Very important
2. Fairly important
3. Not very important
4. Not at all important
CJSVict2 [ASK ALL]

SHOW CARD P10
And how important do you think it is that victims should have a reserved seat in the court during the case?
  1. Very important
  2. Fairly important
  3. Not very important
  4. Not at all important

CJSVict3 [ASK ALL]

SHOW CARD P10
And how important is it that victims should be allowed to sit next to the prosecuting lawyer during the case?
  1. Very important
  2. Fairly important
  3. Not very important
  4. Not at all important

CJSVict4 [ASK ALL]

SHOW CARD P10
How important is it that victims should be allowed to personally tell the court what effect the crime has had on them?
  1. Very important
  2. Fairly important
  3. Not very important
  4. Not at all important

CJSVict5 [ASK ALL]

SHOW CARD P10
And how important is it that victims should have a qualified lawyer to represent their interests during the case?
  1. Very important
  2. Fairly important
  3. Not very important
  4. Not at all important
BurgAlar [ASK ALL]

I now want to ask about some things people do to protect their homes against burglary.
Do you have a burglar alarm in your home? By a burglar alarm I mean a real alarm not a dummy alarm box.

1. Yes
2. No

Deadlock [ASK ALL]

Do you have double locks or deadlocks on the outside doors into your home?

1. Yes - on all
2. Yes - on some
3. No

Chains [ASK ALL]

Do you have security chains on the inside of the doors into your home?

1. Yes - on all
2. Yes - on some
3. No

Daychain [ASK IF CHAINS =1 or CHAINS=2]

SHOW CARD P11
Thinking about when you are in the house during the day, how regularly would you say the security chain is on?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
6. SPONTANEOUS Not applicable –Never at home during the day
Nitchain  [ASK IF CHAINS =1 or CHAINS = 2]

SHOW CARD P11
And thinking about when you are in the house during the evening or at night, how regularly would you say the security chain is on?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
6. SPONTANEOUS Not applicable – never at home in the evening/at night

Viewer  [ASK ALL]

Do you have a security viewer in the doors into your home so you can see who is at the door before opening it?

1. Yes - on all
2. Yes - on some
3. No – not necessary as have glass in doors
4. No

Useview  [ASK ALL]

SHOW CARD P11
When someone calls at your home, do you check to see if you recognise the person calling before fully opening the door? (For example, by looking through a window, a security viewer in the door, through the letterbox, or by using a security chain).

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never
SHOW CARD P11
When an official calls at your door, for example someone from the gas, electricity or water companies or a police officer do you check their identity cards/documentation before allowing them to enter?

1. Always
2. Usually
3. Some of the time
4. Rarely
5. Never

SHOW CARD P12
Now thinking about the last 12 months, that is since the first of October 1999, in that time have you done any of the following? CODE ALL THAT APPLY

APPLY SET [10] OF

1. Installed a burglar alarm
2. Installed a dummy alarm
3. Fitted double locks or deadlocks on outside doors into home
4. Fitted security chains/bolts on the doors into your home
5. Fitted window locks
6. Fitted indoor timer or sensor lights
7. Fitted outdoor timer or sensor lights
8. Fitted bars or grilles to windows
9. Security marked household property
10. Made other security improvements (Specify ________________)
11. None of these

What were the main reasons you decided to improve your home security in the last 12 months? CODE ALL THAT APPLY

DO NOT READ OUT SET [10] OF

1. Own home was burgled
2. Friends/relatives home was burgled
3. Neighbours home was burgled
4. General increase in burglaries in local area
5. Home was going to be left empty (e.g., going on holiday)
6. To reduce insurance premiums
7. Advice from police/crime prevention officer
8. Advice in leaflets, papers, or on TV, radio or internet
9. Adverts/contacted by commercial businesses selling security devices
10. Other reasons (Specify ______________________)
11. None of these

Ynosecy

[ASK IF SECYEAR=11]

Ynosecy5

You say that you have not made any home security improvements over the last 12 months. Why is this? CODE ALL THAT APPLY  DO NOT READ OUT SET [6] OF

1. Home already as secure as it can be
2. Don’t think home is at risk
3. Security measures are too expensive
4. Haven’t got around to it yet
5. Can’t be bothered
6. Other reason (Specify ______________________)

LocArea

[ASK ALL]

LocAre7

SHOW CARD P13

I would now like to ask you some questions about your local area. By area, I mean within a 15 minute walk from your home. Choosing an answer from this card please indicate how much you agree or disagree with each of the following statements about your area.

1. Strongly agree
2. Tend to agree
3. Neither agree or disagree
4. Tend to disagree
5. Strongly disagree

ATTITUDE STATEMENTS

1. This area has a close, tight knit community
2. This area is a friendly place to live
3. This area is a place where local people look after each other
4. Most people who live in this area trust one another
5. You often see strangers in this area
6. I would be happy asking certain local people to keep an eye on my house and property
7. The people who live here can be relied upon to call the police if someone is acting suspiciously
8. If any of the children/young people around here are causing trouble, local people will tell them off

SocProb1  [ASK ALL]

SHOW CARD P14
Looking at this card, which of these social issues would you say is the biggest problem in your area at the moment?

1. Unemployment
2. Crime
3. Provision of public transport
4. Drug misuse
5. Standards of housing
6. Provision of health services
7. Provision of education services
8. Lack of local amenities
9. Poverty
10. Racial abuse/attacks
11. Lack of facilities for young people
12. None of these
13. Don’t know

SocProb2  [ASK ALL]

SHOW CARD P14
And which would you say is the next biggest problem?

1. Unemployment
2. Crime
3. Provision of public transport
4. Drug misuse
5. Standards of housing
6. Provision of health services
7. Provision of education services
8. Lack of local amenities
9. Poverty
10. Racial abuse/attacks
11. Lack of facilities for young people
12. None of these
13. Don’t know
SHOW CARD P15
This card lists some ideas for helping to prevent crime. Which one do you personally think would be most effective in reducing crime in your area?

1. Reduce unemployment
2. Less violence and crime on television
3. Mobile police stations
4. People making their property more secure
5. More CCTV
6. Parents taking responsibility for their children’s actions
7. More schemes like Neighbourhood Watch
8. Send more offenders to prison
9. Firmer discipline in schools
10. More police on the beat

SHOW CARD P15
In the last 12 months, that is since the first of October 1999 have you taken any of the following actions in an attempt to solve a local problem?
CODE ALL THAT APPLY SET [6] OF

1. Written to a local newspaper
2. Contacted the appropriate organisation to deal with the problem, e.g. council
3. Contacted a local councillor or MP
4. Attended a public meeting or neighbourhood forum to discuss local issues
5. Attended a tenants or local residents group
6. Attended a protest meeting or joined an action group
7. SPONTANEOUS Thought about it but did not do it
8. None of these

SHOW CARD P17
I am going to read out a list of behaviours and I would like you to tell me how acceptable or unacceptable you think each behaviour is. A score of 1 means you think the behaviour is unacceptable and a score of 7 means it is acceptable, or you can use one of the numbers in between.
1 Unacceptable
2
3
4
5
6
7 Acceptable

BEHAVIOUR STATEMENTS

1. Driving without motor insurance
2. Using a hand held mobile phone whilst driving
3. Drinking and driving after two pints of beer
4. Not wearing a rear seat belt in the back of a car
5. Driving at 40 mph in a 30 mph zone
6. Parking on double yellow lines
7. Carrying on driving when tired
8. Riding in a car with a driver who has consumed two pints of beer
9. Parking in a disabled bay without a valid badge
10. Driving without a valid driving licence

SpeedBeh [ASK IF 1-3 FOR “driving at 40 mph in a 30 mph zone” ABOVE]

Do you think that the police should always prosecute those who drive at 40 mph in a 30 mph zone?

1. Yes
2. No
3. Depends
The following table provides some guidance for probing the follow up module of the pilot.

OBSERVING/PROBING INSTRUCTIONS FOR CALENDAR/INTRODUCTION SCREENS

1. Observation and timing during the interview

@IntroCal

- Does respondent seem to understand the explanation of what the calendar is for?
- Observe how interviewer hands over calendar (e.g. do they show both sides, explain the period it covers, explain what they are marking off and why, add any supplementary information not contained in the screener)
- How much interest does respondent show in calendar when given it? Do they ask any questions about the calendar at this stage?
- Observe during the whole screener section – do they look at the calendar in detail, glance at it, or pay no attention to it? Does the calendar seem to distract respondents in any way during the screener questions?

@IntroV2

- Observe how this screen reads – does it come across as long? Do respondents ask for any points of clarification? Do respondents seem to understand or do they loose track of what is being said? Do they ask for any clarification at any later point during the screener?

Timing

- Try to time from the end of CarTot until the beginning of MotTheft.

@MarkCal

- Observe how the calendar is marked up. How much interest does respondent take? Do they seem to be making an effort to remember dates/events accurately? What dates/events seem to be easiest for them to remember? Are there dates/events which are difficult to remember?
- Is there any spontaneous mention of the 'in the news events' at the top of the calendar?
- Note when interviewer asks about other events not mentioned on show card anything else that is spontaneously mentioned by respondent
- Once the exercise is completed do respondents seem to understand why they have been asked to do this? Do they ask any questions about it? If so, what responses does interviewer give.
- Observe how interviewer prompts respondent. How do they use the show card. Do they go through every date/event? How do they prompt for 'other' events not on the show card?
- Are there any 'style' issues which seem to make the calendar difficult to complete (eg. the way the calendar is laid out)?
After MarkCal

- When respondents are asked about the exact dates (month) for each incident do they refer to the calendar at all, just glance at it, study it in detail? Note the dates given by respondents (to be put on calendar at probing stage).

Timing

Try to measure the time taken from the end of DispVict through until the calendar is completed and moved on to the next question.

2. Probing after interview

Purpose of calendar

- Check what the respondent understood the purpose of the calendar to be – both non-victims who were simply given the calendar for reference and victims who were asked to complete the calendar.
- Ask whether they actually referred to it at any point during the interview other than at IntroCal and MarkCal

Non-victims

- For non-victims, probe about how definite they are that they have experienced no incidents in the last 12 months. Probe with specific ‘minor’ incidents (e.g. damage to car – key scratched along the side; any graffiti on outside walls, fences, etc; any damage to garden (plants or bushes ripped up); any smashed window (non-accidental), etc. Does this prompt any recollection?
- Probe for a longer time period (e.g. last 2 years). If respondent has experienced a crime/incident in the last 2 years but not in the last year get them to estimate the date. How easy is this for them to do?

Content of calendar - Victims

- Go through the various events and see how easy it was for the respondent to fill each date/period. Probe again whether there are any other events/dates in the last 12 months that the respondent identifies as ‘memorable dates’ and might want to add to the calendar.
- Were there any particular dates/events which were either difficult for respondents to remember or seemed likely to cause upset?
- How sure was the respondent about each date/event? Ask them to rate each date for its accuracy (ie. certain, fairly definite, reasonably sure, reasonable guess, etc.)
Revisiting the questionnaire - Victims

- Mark the dates for each incident given by the respondent on the calendar in a spare line (i.e. so calendar now contains both memorable events/dates and dates of crimes/incidents). Examine the calendar with the respondent and ask them to confirm the dates of the crime(s). Note whether respondents always stick with the dates originally given or whether (and what) changes occur.
SPECIFICATION FOR DIFFERENT WEIGHTS

Below we outline the way in which each set of weights summarised in Table 7.1 of were constructed.

**K.1 2001 issued Type A sample**

These weights apply to core sample cases only and were calculated from a set of component weights as described below.

**w_{1A} weights to equalise unequal selection probabilities**

This was defined as:

\[ w_{1A} = \frac{N_i}{n_i} , \]

where \( N_i \) is the total number of delivery points in PFA \( i \) and \( n_i \) is the total number of addresses issued as part of the 2001 sample in the PFA. Since all the large PFA’s were treated as a single stratum this means that all cases within these PFA’s have the same value for \( w_{1A} \)

**w_{2A}, inner city weight.**

Addresses were divided into two strata (\( j=1,2 \)) on the basis of whether or not they were in sectors categorised as inner city. Sectors were designated as inner city or non-inner city as described in section 7.4.2.

\( w_{2A} \) was calculated for Type A addresses as follows:

\[ w_{2A} = \frac{(n^{A1}_j - d^{A1}_j)}{m^{A1}_j} \]

where:

- \( n^{A1}_j \) is the total number of Type A addresses issued in sectors stratum \( j \) after weighting by \( w_{1Ai} \);
- \( d^{A1}_j \) is the total number of Type A addresses that were issued in 2001 and were found to be deadwood addresses in stratum \( j \) after weighting by \( w_{1Ai} \);
- \( m^{A1}_j \) is the total number of Type A addresses that were issued in 2001 and at which interviews were eventually achieved (at any time, and not just in 2001) in stratum \( j \) after weighting by \( w_{1Ai} \).

After \( w_{2A} \) had been calculated an adjustment factor was applied so that the Type A total after weighting by \( w_{1A} \times w_{2A} \) would equal the Type A total after weighting by \( w_{1A} \) alone. This was done by calculating an adjustment factor \( w_{2F} \) for Type A as follows:

\[ w_{2F} = \frac{1}{\text{mean value of } w_{2A}} , \]

where the mean of \( w_{2A} \) is calculated after weighting by \( w_{1A} \).
w_{3A}, the dwelling unit weight

This was defined as the number of dwelling units at the address from which interviewers made their selection.

w_{4A}, the individual selection weight

This was defined as the number of eligible individuals in the household from which interviewers made their selection.

Combining component weights and scaling the final core sample weight

Weights were combined as follows to produce overall unscaled weights:

Unscaled household weight = w_{1A} * w_{2A} * w_{2F} * w_{3A}
Unscaled individual weight = w_{1A} * w_{2A} * w_{2F} * w_{3A} * w_{4A}

Each weight was examined and capped where necessary to reduce the effect of outliers. Weights were subsequently scaled to equalise issued and achieved sample sizes.

These weights were set to zero for the non-white sample.

The final 2001 Type A issued sample scaled weights are:

- W_{tmhhas} (Type A household weight)
- W_{tminas} (Type A individual weight)

K.2 2001 issued sample core type B: no stratification by quarter

These weights were calculated for all four 2001 quarters combined. They were constructed from a set of component weights as outlined below.

w_{IB1} weight to equalise unequal selection probabilities

This was defined as:

w_{IB1i} = N_i / n_i ,

where N_i is the total number of delivery points in the PFA stratum i and n_i is the total number of addresses issued as part of the 2001 sample in the PFA.

w_{2B1}, inner city weight.

Addresses were divided into two strata (j=1,2) on the basis of whether or not they were in sectors categorised as inner city.

w_{2B1j} was calculated as:
\[ w_{2Bi} = \frac{(n_{Bi}^j - d_{Bi}^j)}{m_{Bi}^j} \] where:

- \( n_{Bi}^j \) is the total number of Type B addresses issued in sectors stratum \( j \) after weighting by \( w_{1Bi} \);
- \( d_{Bi}^j \) is the total number of Type B addresses that were issued in 2001 and were found to be deadwood addresses in stratum \( j \) after weighting by \( w_{1Bi} \); and
- \( m_{Bi}^j \) is the total number of Type B addresses that were issued in 2001 and at which interviews were eventually achieved (at any time, and not just in 2001) in stratum \( j \) after weighting by \( w_{1Bi} \).

After \( w_{2Bi} \) had been calculated, an adjustment factor was applied so that the Type B total after weighting by \( w_{1Bi} \times w_{2Bi} \), would equal the Type B total after weighting by \( w_{1Bi} \) alone. This is done by calculating an adjustment factor \( w_{2f} \) for Type B as follows:

\[ w_{2f} = \frac{1}{(\text{mean value of } w_{2Bi})}, \]

where the mean of \( w_{2Bi} \) is calculated after weighting by \( w_{1Bi} \).

\( w_{Bi3} \), the dwelling unit weight

This was defined as the number of dwelling units at the address.

\( w_{Bi4} \), the individual selection weight

This was defined as the number of eligible individuals in the household.

Combining component weights and scaling the final core sample weight

Weights were combined as follows to produce overall unscaled weights:

Unscaled household weight = \( w_{1Bi} \times w_{2Bi} \times w_{2f} \times w_{Bi3} \)
Unscaled individual weight = \( w_{1Bi} \times w_{2Bi} \times w_{2f} \times w_{Bi3} \times w_{Bi4} \)

Extreme values of these weights were capped and scaled weights were calculated to equalise weighted and unweighted sample sizes.

These weights were set to zero for the non-white sample.

The final 2001 Type B issued sample with no stratification by quarter scaled weights are:

\( Wtmhhb1s \) (Type B household weight, no stratification)
\( Wtmnb1s \) (Type B individual weight, no stratification).
K.3 2001 Type B issued sample, with stratification by quarter

These weights were similar to the previous weights, except that rather than treating 2001 as a single sample, the weights were calculated separately for each quarter of issue.

They were calculated from a set of component weights as described below.

**w\textsubscript{1B2}** weights to equalise unequal selection probabilities (the PFA weight)

This was defined as:

\[ w_{1B2} = \frac{N_i}{n_{BQg}^i} , \]

where \( N_i \) is the total number of delivery points in PFA stratum \( i \) and \( n_{BQg}^i \) is the total number of Type B addresses issued in the 2001 quarter \( g \) sample in the PFA (where \( g \) could take values 1, 2, 3, or 4).

**w\textsubscript{2B2}**, inner city weight.

Addresses were divided into two strata \( (j=1,2) \) on the basis of whether or not they were in sectors categorised as inner city (see section 2 above for how sectors were categorised).

\( w_{2B2} \) was calculated as:

\[ w_{2B2} = \frac{(n_{BQg}^j - d_{BQg}^j)}{m_{BQg}^j} , \]

where

- \( n_{BQg}^j \) is the total number of Type B addresses issued in stratum \( j \) in quarter \( g \) after weighting by \( w_{1B2} \),
- \( d_{BQg}^j \) is the total number of Type B addresses that were issued in stratum \( j \) in quarter \( g \) and were found to be deadwood after weighting by \( w_{1B2} \), and
- \( m_{BQg}^j \) was the total number of Type B addresses issued in stratum \( j \) in quarter \( g \) at which interviews were eventually achieved (at any time, and not just in quarter \( g \)) in after weighting by \( w_{1B2} \).

**w\textsubscript{3B2}**, the dwelling unit weight

This was defined as the number of dwelling units at the address.

**w\textsubscript{4B2}**, the individual selection weight

This was defined as the number of eligible individuals in the household.

Combining component weights and scaling the final core sample weight

Weights were combined as follows to produce overall unscaled weights:

Unscaled household weight = \( w_{1B2} \ast w_{2B2} \ast w_{3B2} \)
Unscaled individual weight = \( w_{1B2} \times w_{2B2} \times w_{3B2} \times w_{4B2} \)

Extreme values of these weights were capped and scaled weights were calculated to equalise weighted and unweighted sample sizes.

These weights were set to zero for the boost sample.

The final Type B scaled weights (with stratification by quarter) are:

- \( W_{mhhb2s} \) (Type B household weight, with quarter stratification)
- \( W_{minb2s} \) (Type B individual weight, with quarter stratification)

**K.4 2001 Type A and Type B issued sample, with quarter stratification**

These weights were calculated separately for each quarter.

\( w_{1AB} \), weights to equalise unequal selection probabilities.

This was defined as:

\[ w_{1ABi} = \frac{N_i}{n_{ABQg}^i} \]

where \( N_i \) was the total number of delivery points in the PFA stratum \( i \) and \( n_{ABQg}^i \) was the total number of addresses issued in the 2001 quarter \( g \) sample in the PFA (where \( g \) can take values 1, 2, 3, or 4.)

Note that for this exercise all type A addresses were included in quarter 1.

\( w_{2AB} \), inner city weight.

The sample can be divided into two strata (\( j=1,2 \)) on the basis of the inner-city variable.

\( w_{2ABj} \) was calculated as:

\[ w_{2ABj} = \frac{(n_{ABj} - d_{ABj})}{m_{ABj}} \]

where:
- \( n_{ABj} \) is the total number of Type A and Type B addresses issued in stratum \( j \) in quarter \( g \) after weighting by \( w_{1ABi} \);
- \( d_{ABj} \) is the total number of Type A and Type B addresses issued in stratum \( j \) in quarter \( g \) that were found to be deadwood addresses after weighting by \( w_{1ABi} \) and
- \( m_{ABj} \) is the total number of Type A and Type B addresses issued in stratum \( j \) in quarter \( g \) and at which interviews were eventually achieved (at any time, and not just in quarter \( g \)) after weighting by \( w_{1ABi} \).
\( W_{3AB} \), the dwelling unit weight

This was defined as the number of dwelling units at the address.

\( W_{4AB} \), the individual selection weight

This was defined as the number of eligible individuals in the household.

Combining component weights and scaling the final core sample weight

Weights were combined as follows to produce overall unscaled weights:

unscaled household weight = \( w_{1ABi} \times w_{2ABj} \times w_{3AB} \)
unscaled individual weight = \( w_{1ABi} \times w_{2ABj} \times w_{3AB} \times w_{4AB} \)

Extreme values of these weights were capped and scaled weights were calculated to equalise weighted and unweighted sample sizes.

These weights were set to zero for the boost sample.

The final Type A and B scaled weights (with stratification by quarter) are:

\( W_{tmhhABs} \) (Type A and B household weight, with stratification by quarter)
\( W_{tminABs} \) (Type A and B individual weight, with stratification by quarter).

K.5 2001 issued non-white sample

These were calculated for all non-white respondents from addresses issued in 2001 irrespective of whether they were part of the core sample or were sampled via the non-white boost sample. These weights were set to zero for all white respondents.

\( w_{INW} \), weights to equalise unequal selection probabilities

Addresses in each PFA were divided into 2 strata depending on the concentration of the non-white population as follows:

Stratum 1: PSUs containing at least 0.6% non-white households.
Stratum 2: PSUs containing less than 0.6% non-white households

Next it was necessary to calculate weights that took into account the fact that different numbers of addresses were screened around core sample addresses in different periods of fieldwork. This was done as described below.

First the proportion of sampled 2001 addresses (including both Type A and Type B) that were issued in different time periods were defined as follows:
Issued in Jan-June = \( f_{\text{JJ}} \);
Issued in July-September = \( f_{\text{JS}} \);
Issued in October - December = \( f_{\text{OD}} \);

Next, the following quantities were defined:

\[
\begin{align*}
n_{\text{PFA}} & = \text{Total 2001 issued sample size for PFA;} \\
N_{\text{PFA}} & = \text{Total number of PAF addresses in PFA (using sample frame from which 2001 sample was selected)}
\end{align*}
\]

The probability of selection \( P(NW) \) was then calculated separately in stratum 1 and stratum 2 in each PFA.

In stratum 1, in each PFA:

\[
P(NW) = \left( \frac{n_{\text{PFA}}}{N_{\text{PFA}}} \right) \times \left( 3 f_{\text{JJ}} + 5 f_{\text{JS}} + 7 f_{\text{OD}} \right)
\]

In stratum 2 in each PFA:

\[
P(NW) = \left( \frac{n_{\text{PFA}}}{N_{\text{PFA}}} \right) \times \left( 3 f_{\text{JJ}} + 3 f_{\text{JS}} + 4 f_{\text{OD}} \right)
\]

The address probability weight \( w_{1NW} \) was then calculated as:

\[
w_{1NW} = \frac{1}{P(NW)}
\]

\( w_{3NW} \), Dwelling unit weight

This was defined differently for the core and boost sample members:
- for the core sample this was defined as the number of dwelling units at the address;
- for the boost sample it was defined as the number of dwelling units containing one or more eligible non-white person at the address.

\( w_{4NW} \), Individual selection weight

This was defined differently for the core and boost sample members:
- for the core sample this was defined as the number of individuals aged 16 or over in the household;
- for the boost sample it was defined as the number of eligible non-white individuals aged 16 or over in the household.

Combining component weights

Unscaled design weights were calculated as:

\[
\begin{align*}
W_{\text{thhNWu}} & = w_{1NW} \times w_{3NW} \\
W_{\text{tinNWu}} & = w_{1NW} \times w_{3NW} \times w_{4NW}
\end{align*}
\]
Extreme values of these weights were capped. Weights were scaled to equalise weighted and unweighted achieved non-white sample size for 2001. Resultant scaled design weights were:

- \(W_{thhNWs}\) (2001 issued non-white household weight)
- \(W_{tinNWs}\) (2001 issued non-white individual weight)

**K.6 2001/2002 financial year achieved sample core type B**

These weights apply to sample members interviewed between April 2001 and March 2002. Initial weights were calculated separately for addresses issued in 2001 and for addresses issued in 2002.

*Calculation of initial weights*

For addresses sampled in 2001 (even if interviewed in 2002) \(W_{thhhb2u}\) and \(W_{tinb2u}\) (calculated as described in section L.3 above) were used as initial weights.

For addresses issued in 2002 initial weights were calculated as described below.

**\(W_{1-2002} \) PFA weight**

In order to calculate address weights it was first necessary to calculate the address probability for each primary sampling unit (PSU) in the sample. 2002 addresses were sampled in two different ways: either through the rotated sample procedures or through the fresh sample procedures. Thus for each address it was necessary to take account not only of the probability associated with the method by which it was actually sampled but also the probability associated with the method by which it was not but might have been selected. Thus for every 2002 address we had to take account of the rotated sample address selection probability (\(P_{addrot}\)) and the fresh sample address selection probability (\(P_{addfresh}\)).

*Calculation of \(P_{addrot}\)*

The combined Type A and B address selection probability was calculated separately for each quarter in each PFA as:

\[ p_{i}^{AB} = \frac{n_{i}^{AB}Q_{g}}{N_{i}} \]

where \(N_{i}\) was the total number of delivery points in PFA stratum \(i\) and \(n_{i}^{AB}Q_{g}\) was the total number of addresses issued in the 2001 quarter \(g\) sample in the PFA (where \(g\) could take values 1, 2, 3, or 4). (Note that for this exercise all type A addresses were included in quarter 1.)

Next the PAF change adjustment factor, \(f_{paftadj}^{1}\), was calculated, where \(f_{paftadj}^{1} = (2001 \text{ PAF count for PSU}^{1}) / (2002 \text{ PAF count for PSU}^{1})\).

---

1 where 2001/2002 PAF refers to the version of PAF used to draw the sample for the two years of BCS.
Paddrot was then calculated as: \[ P_{\text{addrot}} = (f_{p_{\text{adj}}} \times p_{ABi} \times \text{no. PSUs rotated to 2002}) / \text{(no. PSUs used in 2001)}. \]

**Calculation of Paddfresh**

This was calculated as:

\[ P_{\text{addfresh}} = \frac{n_{Q5i}}{N_i} \]

where \( N_i \) was the total number of delivery points in PFA\(^2\) stratum \( i \) and \( n_{Q5i} \) was the total number of addresses sampled for the first quarter 2002 fresh sample in each PFA.

Because the sampling method ensured that no address could be include in both rotated and fresh samples the 2001 address probability reduced to:

\[ p_{1-2002} = P_{\text{addrot}} + P_{\text{addfresh}} \]

2002 address weight \( w_{1-2002} \) was calculated as:

\[ w_{1-2002} = 1 / p_{1-2002} = 1 / (P_{\text{addrot}} + P_{\text{addfresh}}). \]

**\( W_{2-2002} \), Inner city weight**

Because full 2002 response information was not available at the time these weights were calculated this was estimated from the four 2001 Type B sample quarterly inner city weights \( (w_{2B}) \) as shown below.

For inner city areas and for non-inner city areas separately:

\[ w_{2-2002j} = 4 / ((1 / w_{2BQ1j}) + (1 / w_{2BQ2j}) + (1 / w_{2BQ3j}) + (1 / w_{2BQ4j})) \]

where \( w_{2BQ1j} \ldots w_{2BQ4j} \) were values of \( w_{2Bj} \) calculated separately for quarters 1 to 4 in 2001.

**\( w_{3-2002} \), the dwelling unit weight**

This was defined as the number of dwelling units at the address.

**\( w_{4-2002} \), the individual selection weight**

This was defined as the number of eligible individuals in the household.

**Combining component weights and scaling the final core sample weight**

Unscaled weights were calculated as:

\[ w_{\text{tm2hhu}} = w_{1-2002} \times w_{2-2002} \times w_{3-2002} \]

\[ w_{\text{tm2inu}} = w_{1-2002} \times w_{2-2002} \times w_{3-2002} \times w_{4-2002} \]

\(^2\) Using the 2002 sample version of PAF
Extreme values of these weights were capped and weights were scaled to equalise unweighted and weighted sample sizes.

These were used as quarter 1 preliminary weights:

wtm2hhhu (household weight);
wtm2inu (individual weight).

**Combining quarters**

Application of the scaled quarterly weights described in the foregoing produced weighted quarterly sample sizes equal to the respective unweighted quarterly sample sizes. As sample sizes varied significantly across quarters (because of the sample design), this meant that these weights are not suitable for analyses that combine quarters.

For analyses that combine data from more than one quarter, it was necessary to calculate further weights that equalised the sizes of the component quarters' achieved samples. Calculation of these is described below.

**Combined quarters unscaled probability weights**

Next wthh Bun and w tin Bun were defined as shown below.

For 2001 Type B sample:

\[
\begin{align*}
\text{wthh Bun} &= \text{wtm2hhhu} \\
\text{w tin Bun} &= \text{wtm2inu}
\end{align*}
\]

For the 2002Q1 sample:

\[
\begin{align*}
\text{wthh Bun} &= \text{wtm2hhhu} \\
\text{w tin Bun} &= \text{wtm2inu}
\end{align*}
\]

**Scaling to quarter of interview**

The above unscaled weights were scaled in order to equalise numbers of achieved interviews per quarter. The weighted achieved sample size was set at 9,250 per quarter (the quarterly target number of interviews for the core sample).

For type B analyses:

\[
\begin{align*}
\text{WthhBsc} &= \text{wthh Bun} \times (9,250/(\text{quarterly achieved total after weighting by wthh Bun})) \\
\text{WtinBsc} &= \text{w tin Bun} \times (9,250/(\text{quarterly achieved total after weighting by w tin Bun}))
\end{align*}
\]
(Note: in the above, interviews were allocated to the *quarter in which the interview was conducted*, not the quarter in which the corresponding address was issued.)

Application of weights

For analyses based on quarter of interview using Type B interviews only `wthhbsc` should be used for household variables and `wtindbse` should be used for individual variables.

(It should be noted that these weights are not appropriate for analyses based on quarter of issue rather than on quarter in which interviews were achieved.)

K.7 2001/2002 financial year achieved non-white sample

These were calculated for all non-white respondents irrespective of whether they were part of the core sample or were sampled via the non-white boost sample. These weights were set to zero for all white sample members.

Note that these weights were calculated only for respondents for whom interviews were achieved between 1 April 2001 and 31 March 2002. They weights were set to zero for interviews achieved outside this time period.

Sample issued in 2001

Addresses in each PFA were divided into 2 strata depending on the concentration of the non-white population:

- **Stratum 1**: PSUs containing at least 0.6% non-white households
- **Stratum 2**: PSUs containing less than 0.6% non-white households

Next it was necessary to calculate weights that took into account the fact that different numbers of addresses were screened around core sample addresses in different periods of fieldwork.

This was done as described below.

First the proportion of sampled 2001 addresses (including both Type A and Type B) that were issued in different time periods were defined as follows:

- Issued in Jan-June = \( f_{Jj} \)
- Issued in July-September = \( f_{Js} \)
- Issued in October - December = \( f_{OD} \)

Next, the following quantities were defined:

- \( n_{PFA} \) = total 2001 issued sample size for PFA;
NPFA = total number of PAF addresses in PFA (using sample frame from which 2001 sample was selected)

The probability of selection P(NW) was then calculated separately in stratum 1 and stratum 2 in each PFA.

In stratum 1, in each PFA:

\[ P(NW) = \left( \frac{n_{PFA}}{NPFA} \right) \times (3f_{JJ} + 5f_{JS} + 7f_{OD}) \]

In stratum 2 in each PFA:

\[ P(NW) = \left( \frac{n_{PFA}}{NPFA} \right) \times (3f_{JJ} + 3f_{JS} + 4f_{OD}) \]

The address probability weight \( w_{1NW} \) was then calculated as:

\[ w_{1NW} = \frac{1}{P(NW)} \]

Sample issued in 2002

These weights applied to all non-white respondents identified from sample issued in the first quarter 2002 (January - March). These are to be calculated for non-white respondents identified through both core and boost samples.

PSUs were divided into two strata:

- Stratum 1: PSUs containing at least 0.6% non-white households
- Stratum 2: PSUs containing less than 0.6% non-white household

The probability of selection P(NW) was then calculated separately in stratum 1 and stratum 2 in each PFA.

In stratum 1:

\[ P(NW) = 4 \times (\text{Paddrot} + (5 \times \text{Paddfresh})) \]

In stratum 2:

\[ P(NW) = 4 \times (\text{Paddrot} + (3 \times \text{Paddfresh})) \]

(Where Paddrot and Paddfresh were calculated as described in section L.5 above.

The address probability weight \( w_{1NW} \) was calculated as:

\[ w_{1NW} = \frac{1}{P(NW)}. \]
\( W_{3NW} \), Dwelling unit weight

For core sample addresses, this was defined as the number of dwelling units at the address; for non-white boost sample addresses it was defined as the number of dwelling units containing one or more eligible non-white individual.

\( W_{4NW} \), Individual selection weight

For core sample addresses, this was defined as the number of individuals aged 16+ in the household; for non-white boost sample addresses it was defined as the number of eligible non-white individuals aged 16+ in the household.

Combining component weights

Unscaled design weights were calculated as:

\[
W_{thhNWu} = w_{1NW} \times w_{3NW} \\
W_{tinNWu} = w_{1NW} \times w_{3NW} \times w_{4NW}
\]

Extreme values of these weights were capped

Weights were scaled to equalise weighted and unweighted achieved non-white sample size for the period April 2001 to March 2002 inclusive. Resultant scaled design weights were:

\[
W_{thhNWsc} \quad (2001/2 achieved non-white household weight) \\
W_{tinNWsc} \quad (2001/2 achieved non-white individual weight)
\]

It should be noted that these design weights were further adjusted by the Home Office in an attempt to reduce the impact of non-response. These additional weights adjusted the ethnic group, age and regional distributions of the achieved BCS sample using Labour Force Survey figures.

K.8 2001/2002 financial year achieved sample interviews with people aged 16-24

These weights were calculated for all Type B young people aged 16-24 in the core sample and in the youth boost sample. They were not calculated for young people in the non-white boost sample and were not calculated for Type A young person interviews.

The unscaled household weight (with stratification by quarter) was used as a starting point. From it, the unscaled young person weight \( (YP_{wtbu}) \) was calculated in two different ways depending on the month in which the address was issued.

If the address was issued between April and June 2001 or in March 2002 (i.e. months in which there was no youth boost taking place), \( YP_{wtbu} \) was calculated as:
\[ YP_{wtbu} = wtmbbu \times n, \]

where \( n \) = number of adults in household

If issued between July 2001 and Feb 2002 \( YP_{wtbu} \) calculated as:

\[ YP_{wtbu} = wtmbbu \times r, \]

where \( r \) = number of individuals aged between 16 and 24 in household.

Weights were capped to remove extreme values and were then scaled to equalise weighted and unweighted sample sizes.

Analyses of young persons interviewed between April 2001 and March 2002 should use \( YP_{wtbu} \) as a weight.

**K.9 2001/2002 financial year achieved sample interviews with non-white people aged 16-24**

These weights are for analyses based upon non-white young people interviewed between April 2001 and March 2002 inclusive. These young people may have been sampled as part of the core sample or as part of the non-white boost. They may also have been selected as part of the normal random adult selection procedures or as part of the youth boost selection procedures. **These weights were calculated for Type B interviews only.**

Note that these weights are suitable for analyses of non-white young people. They do not allow non-white young people to be combined in analyses with other young people.

The non-white household financial year unscaled weight (\( W_{thhNWsc} \)) was used as the starting point.

Thereafter the weights were calculated in essentially the same way as the 2001/2002 young people weights. Procedures are described below.

The unscaled non-white young person weight (\( EYP_{wtbu} \)) was calculated in two different ways depending on month address was issued.

If issued between April and June 2001 or in March 2002, \( EYP_{wtbu} \) was calculated as:

\[ EYP_{wtbu} = W_{des(EM)_{khi}} \times n, \]

where \( n \) was the number of non-white adults in households for the non-white boost sample and was the total number of adults in the household for core sample addresses.

If issued between July 2001 and Feb 2002 \( EYP_{wtbu} \) was calculated as:
\[ EYP_{wtbu} = W_{da}(EM)_{d,111} \times r, \]

where \( r \) was the number of non-white individuals aged between 16 and 24 in the household for non-white boost sample addresses and was the total number of individuals aged between 16 and 24 in the household for core sample addresses.

Extreme values of weights were capped and the weights were then scaled to equalise weighted and unweighted sample sizes.

Analyses of non-white young persons interviewed between April 2001 and March 2002 should use \( EYP_{wtbu} \) as a weight.
Key information on the British Crime Survey drug module

Some key information on the methodology ......................................................... 1
Questions in the drug module (1996-2004/05) .................................................. 2
Cleaning the drug module data ......................................................................... 5
Calibration weighting ......................................................................................... 5
Some key information on the methodology

All of the information on the BCS methodology can be found in the technical reports. In addition to detailing all of the questions asked in the survey and the routing, the reports also describe how the data is collected, how the weights are constructed, the sample sizes, response rates etc. You should always consult the technical reports when conducting any analysis as the responses/routing may change.

Sampling frame

From 1992 Postcode Address File (previously Electoral Register).

Data collection

From 1994 CAPI/CASI (previously PAPI).

In 2001 the BCS moved from biennial to continuous annual sampling. This had very little impact on the drug module.

</tbody>
</table>

Key things to note about the youth boost:

- In 2001/02 it was conducted in the second half of 2001 (although there was some run over into early 2002). A similar method was used in 2002/03. From 2003/04 the youth boost was conducted continuously (over 12 months as opposed to 6)
• The process of collecting the data is called the youth boost, however the data is held as a youth file. This means all young people (16-24) from both the core and boost samples in one data set.

• Respondents in the youth boost are not asked about household victimisation (would mean double counting – as main respondent is asked about this).

• They also have a shortened demographic section (as the information will be on the main interview).

Questions in the drug module

Since the introduction of the drug module in 1992 there have been relatively few changes made to the questions asked.

From 1994 data on drug use was collected by CAPI/CASI.

1996 module:
In 1996, respondents answered Yes/No to the following questions:

• Have you ever HEARD of X?

With the range of responses Yes/No/Don’t want to answer, respondents were asked:

• Have you EVER taken X?
• Have you taken X in the LAST YEAR?
• Have you taken X in the LAST MONTH?

Respondents are routed out accordingly, for example you will only be asked if you have taken X in the LAST YEAR, if you respond positively to having EVER taken (obviously you would also have said that you had HEARD of X).

Respondents were also asked: ‘Have you injected or had someone else injected you with any drug not prescribed by a doctor?’.

1998 module:
The ‘inject’ question that was introduced in 1996 was dropped.
2000 module:
Replica of 1998 module.

2001/02 module:
There were several changes made to the questions in this sweep.

- The ‘ever HEARD’ question was dropped and put in as a response in the ‘EVER taken’ question. So now when asking ‘Have you EVER taken X?’ the responses available were Yes/No/Never heard of it/Don’t want to answer (obviously no need to ask this for the taken anything unknown questions).
- The ‘taking anything else that you thought was a drug’ changed to ‘taking anything else that you knew or thought to be a drug’.

There was also two new sets of questions introduced asked only of 16-24 year olds (core & boost), concerning ‘age when first used X?’ and ‘how easy to get hold of any illegal drugs/X?’.

Responses for the ease of access questions were in the form of a Likert Scale – ranging from ‘very easy’ to ‘impossible’ (as well as usual refusal categories).

2002/03 module:
The questions on ease of access to illegal drugs were dropped after June 2002. In their place, a new set of questions asking about frequency of drug use were added for 16-24 year olds who had taken drugs in the last 12 months. Respondents were asked: ‘How often during the last 12 months have you taken X?’, with the responses ranging from ‘Every day’ to ‘Once or twice a year’. The questions on frequency of use were asked in July – December 2002 only.

2003/04 module:
Replica of 2002/03 module with questions on ease of access to illegal drugs excluded and questions on frequency of use included. Also, the questions on age of first use were asked to all those aged 16 to 59, not just 16 to 24 year olds.

2004/05 module:
Questions on age of last use of each drug were added for all those aged 16 to 59 who had ever taken particular drugs.
Names of drugs:

The list of drugs asked about in the BCS has remained relatively consistent. However, over time the street names for drugs tend to change. To reflect this, the BCS has often had to add additional examples to each drug. This is necessary so as to maximise the capture of use.

The table below shows the drugs asked about in each sweep and the list of examples that is used to describe the drug.

There are also questions on:
- Taking pills/powder unknown.
- Smoking something unknown.
- Taking something else they thought (knew) was a drug.

Cleaning the drug module data

All cases in the data set are given a survey weight. However, the recently introduced ‘calibration weight’ adjusts the data for non-response – according to known differentials in age, sex and region (GOR) population totals. Those respondents who fail to give a response to one of these variables will have a missing calibration weight – and therefore are recoded out.

Those people who refuse to take part in self-completion drug module are coded as missing in the dataset.

The BCS drugs dataset also codes as missing those people who reported having taken Semeron. Analysis showed that those people, who said they had used this fake drug, tended to have also said they had taken all other drugs (yes to ever/year/month). It was felt that these people were unreliable, they may have wanted to simply finish the questionnaire as quickly as possible (as the drug questions come at the end of the questionnaire – which in some cases can take up to several hours to complete). Or respondents may have been exaggerating their drug use. If either of these is true – then it has serious implications on the prevalence rates for other drugs – principally rare drugs. This is because those drugs with infrequent use such as heroin, methadone etc have such a low prevalence, that a difference of one or two respondents can greatly effect the overall rate. Alternatively, it may be that the respondents genuinely thought they had taken a drug that may have sounded like Semeron. As there is no way to determine the extent to which any of these are true, it was felt best to code them as missing.

Respondents are screened out as soon as they give a negative response to a question i.e. if they say they haven’t ever taken X then they can’t have taken X in the last year so they are not asked this question (the same goes for last month). Therefore if you were to run a frequency on last year prevalence of X – if you haven’t brought those people who say they have never taken X into the ‘no’ response to have taken it in the last year, then you will only get a frequency of last year users as a proportion of ever users.

The process of cleaning the original dataset therefore involves changing the name of the variables, bringing those people who had not taken X ever or in the last year into the ‘no’ base for taking in the last year and the last month, and recoding non-valid responses into system missing.

Variables for use any drug and use of Class A drugs are also created.

Calibration weighting

The Office for National Statistics (ONS) recommended, as part of a review of the BCS methodology, that the calibration weighting method be adopted in the BCS.
The weighting is designed to make adjustment for known differentials in response rates between different age by gender and regional subgroups. For example, a 19 year old male living in an inner city may be less likely to take part in the survey (more likely to refuse, harder for the interviewer to contact if he works or lives in a block of flats), than an older female with children (who may be more likely to be at home). However, because young males are more likely to have used drugs, resultant data on drug prevalence may be an underestimation. Calibration weighting therefore works by minimising the differences between the weights implied by sampling and the final weights subject to the weighted data meeting the population controls.

Calibration weighting was introduced in 2001 and has been applied back to the 1996 BCS. It is not possible at this stage to apply this weighting to sweeps prior to 1996. This is because the regional component of the calibration weight is based on GOR and pre-1996 the geographical identifier was standard region and they are not comparable.

The population totals that the calibration weighting works on are provided by ONS and are based on estimates from the Labour Force Survey (LFS).

The impact of calibration weighting on the drug estimates has remained relatively constant over consecutive sweeps: on average ‘ever use’ estimates increase by a 0.5 percentage point, ‘year use’ by 0.2 and ‘month use’ by 0.1.
